PSYC 336 Adolescence (W)
Why do we define adolescence as a distinct stage of development? What are its perils and accomplishments? What internal and external forces make adolescence such a volatile and formative stage of life? The course considers a range of empirical and theoretical material, as well as fiction and film, in order to identify and understand the behavior and experience of adolescents. Topics include: identity, sexuality, romantic love, intellectual growth, family relationships, psychological problems, education, and variation between cultures.
Class Format: seminar **Requirements/Evaluation:** there will be a midterm paper and a group project that will involve several pieces of writing
Prerequisites: PSYC 232 or permission of instructor **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** Psychology majors and those who plan to become teachers
Distributional Requirements: Division 2 Writing Intensive
Other Attributes: PSYC Area 3 – Developmental Psychology
TEAC Teaching Sequence Courses
Not Offered Academic Year 2014–2015
SEM Instructor: Susan Engel

PSYC 337 Temperament and Biobehavioral Development (W)
This class will explore individual differences in reactivity and self–regulation in infancy and childhood. Developmental, ethological, and neuroscience models will serve as the foundation for the exploration of the construct of temperament. Topics will include biobehavioral models of reactivity to stress and novelty, including research examining individual differences in neuroendocrine, electrophysiological, and emotional responding. Individual differences in self–regulation will be explored, and will focus heavily on the literature examining the development of attention and other executive control processes in infancy and early childhood. Longitudinal research that examines continuity and change in temperament from infancy through adulthood will be examined. The contributions of genetics and the contextual influences on temperament trajectories will be explored, including research demonstrating the influence of caregivers and gene–by–environment interactions.
Class Format: seminar **Requirements/Evaluation:** weekly thought papers and one final 7– to 10–page paper
Prerequisites: PSYC 201 and 232 or PSYC 212 or permission of instructor **Enrollment Limit:** 19 **Expected Class Size:** 16 **Enrollment Preferences:** Psychology majors
Extra Info: may not be taken on a pass/fail basis; not available for the Gaudino option
Distributional Requirements: Division 2 Writing Intensive
Other Attributes: PHLH Maternal and Child Health
PSYC Area 3 – Developmental Psychology
Not Offered Academic Year 2014–2015
SEM Instructor: Amie Hane

PSYC 338 Childhood in Context
The psychological lives of children are shaped not only by internal changes, but also by the ways in which adults in their community view and treat them, as well as by other situational forces (for instance poverty and social unrest). In this course students will consider how various external forces affect children's daily experience. Students will compare several psychological models of young children—some emanating from folk culture, and some from scientific paradigms. We will look at how parenting and educational practices reflect the implicit models of childhood held by members of a community, and then examine whether those practices have a substantive or lasting effect on children. We will also weigh the impact of certain non–parental features of the environment: poverty, wealth, social unrest, violence, societal well–being, and technological advances. Specific questions we will consider in the course include (but are not limited to): What are the short and long term effects of growing up in a society with a formal model of teaching and learning? In what ways is the psychological experience of poor children different than that of the middle class? Are children who grow up in rural areas different from those who grow up in cities? What is the long term impact of growing up in a culture that does or does not value play? We will draw on observational and experimental data, narrative non–fiction, and film, as well as the work of anthropologists and historians.
Class Format: seminar **Requirements/Evaluation:** three 5– to 7–page papers
Prerequisites: PSYC 232 or 272 **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** Psychology majors
Extra Info: may not be taken on a pass/fail basis
Distributional Requirements: Division 2 **Other Attributes:** PHLH Maternal and Child Health
PSYC Area 3 – Developmental Psychology
Not Offered Academic Year 2014–2015
SEM Instructor: Susan Engel

PSYC 339(S) Imagination
Imagination refers to the capacity to mentally transcend time, place, and/or circumstance to think about what might have been, plan and anticipate the future, create fictional worlds, and consider remote and close alternatives to actual experiences. This multi–faceted capacity emerges in early childhood and is fundamental to human thought throughout life. The study of imagination crosscuts traditional areas in psychology and extends into other fields as well (e.g., philosophy, literature). In this course we will examine how psychologists think about and study human imagination, covering topics such as pretend play in children, counterfactual reasoning, imagery, mental time travel, creativity, consciousness, fiction, dreaming, mental illness, and the impact of technology on concepts of self and identity. All students will design and conduct an empirical research project.
Class Format: empirical lab course **Requirements/Evaluation:** active class participation, regular thought papers and class presentations, written report and presentation of an original empirical research project
Prerequisites: PSYC 201 and PSYC 232 **Enrollment Limit:** 16 **Expected Class Size:** 12 **Enrollment Preferences:** preference will be given to Psychology majors
Distributional Requirements: Division 2 **Other Attributes:** PSYC Area 3 – Developmental Psychology

PSYC 340T Interdisciplinary Approaches to Social Psychology (W)
This tutorial will examine new and emerging interdisciplinary approaches to the study of important social psychological issues. Its focus will be on the connections between social psychology and disciplines such as neuroscience, biology, cognitive psychology, political science, organizational behavior, educational psychology, and cross–cultural and multi–cultural psychology. Examples of topics to be examined include: Neuroscience and prejudice; culture and the self; education and diversity; biology and altruism; politics and attitude change. We will explore the benefits and challenges of taking interdisciplinary approaches to studying these issues.
Class Format: tutorial **Requirements/Evaluation:** tutorial papers and responses to partner's tutorial papers, in alternating weeks; participation in tutorial discussions
Prerequisites: PSYC 242 **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** preference given to Psychology majors
Distributional Requirements: Division 2 Writing Intensive
Other Attributes: PSYC Area 4 – Social Psychology
Not Offered Academic Year 2014–2015
TUT Instructor: Steven Fein

PSYC 341 Stereotypes, Prejudice, and Discrimination (D) (W) Crosslistings: PSYC 341/WGSS 339
This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people's perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.
Class Format: empirical lab course **Requirements/Evaluation:** weekly brief papers, oral reports, two longer papers
Prerequisites: PSYC 201 and 242 **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** senior, then junior Psychology majors
Distributional Requirements: Division 2 Exploring Diversity Writing Intensive

PSYC 344(S) Advanced Research in Social Psychology
This course will focus on the process of doing original, empirical social psychological research. We will concentrate on a few social psychological topics, such as stereotyping and prejudice, media influences, political biases, and sports psychology. Students will research and critically analyze and integrate the relevant literatures, and they will design and conduct original research to test hypotheses that emerge from these literatures. We will examine a variety of types of research designs, how to conduct online and in–person research, and how to analyze and understand results, including using SPSS to analyze data.
Class Format: empirical lab course **Requirements/Evaluation:** two exams, two papers, and several small assignments
Prerequisites: PSYC 201 and PSYC 242 **Enrollment Limit:** 16 **Enrollment Preferences:** Psychology majors
Materials/Lab Fee: a lab fee of up to $30 is associated with this course

PSYC 345(S) Political Psychology Crosslistings: PSCI 310/PSYC 345
Political psychology studies human nature so as to understand politics. For example, many political philosophers begin their political programs by asserting some foundational claims about "human nature" which in turn led them to their justification for their vision of politics. For example, the enlightenment thinkers held that science and technology would strengthen rationality and thereby making democracy more viable. On the other hand, those who defend authoritarian regimes often do so by proclaiming that the general public is incapable of rationality and of self–rule and should therefor accept rule by their betters. Many of these arguments turn on how rational people are and on their capacity for and willingness to pursue justice for all people. We explore what psychology tells us about people as political citizens and as leaders. The course pays special attention to the powerful, but surprising, roles that emotions play in all aspects of politics. Central to politics is the general issue of judgment, and its more important variants, moral and political judgment. If we are to trust ourselves to rule ourselves, how well will we secure justice and liberty for one and all among us? Political psychology is one of the very oldest disciplines (it can be dated at least back to the early classic Greeks, among them Socrates, Plato, and Aristotle). The issue of citizen competence for self and collective rule, then as now, was at the center of their attention. So, it shall be in this course.
Class Format: lecture/discussion **Requirements/Evaluation:** a midterm, a term paper, and a final exam
Prerequisites: a PSCI elective at the 200 or 300 level OR PSYC 101, 212, 221, 232, 242, 251, or 300–level course **Enrollment Limit:** 25 **Expected Class Size:** 13
Distributional Requirements: Division 2 **Other Attributes:** PSCI American Politics Courses
Spring 2015
LEC Section: 01 TR 08:30 09:45 Instructor: George Marcus

PSYC 346(F) Environmental Psychology Crosslistings: PSYC 346/ENVI 346
This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans' disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.
Class Format: empirical lab course **Requirements/Evaluation:** a series of papers, two essay exams, written and oral reports of research
Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended. **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** Psychology majors and Environmental Studies concentrators
Distributional Requirements: Division 2 **Other Attributes:** ENVI Humanities, Arts + Social Science Electives
ENVP SC–B Group Electives

PSYC 347(F) Psychology and Law
This course deals with applications of basic psychology to justice and the legal system. Relevant psychological theory and research address the processes and controversies that surround scientific jury selection, jury decision–making, eyewitness testimony, child witnesses in abuse cases, forensic hypnosis, lie–detector tests, police interrogations, false confessions, the insanity defense, the role of psychologists as trial consultants and expert witnesses, and the role of confirmation biases in all phases. Readings and discussions are animated by observations from real cases, demonstrations, and lab simulations.
Class Format: seminar **Requirements/Evaluation:** two hour exams and class participation
Prerequisites: PSYC 242 **Enrollment Limit:** 30 **Expected Class Size:** 30
Extra Info: may not be taken on a pass/fail basis; not available for the Gaudino option

PSYC Area 4 – Social Psychology
Fall 2014
LEC Section: 01 M 07:00 09:40 Instructor: Saul Kassin

PSYC 349 Progress and Problems in Intergroup Interaction (D)
This course will examine literature on intergroup interaction, ranging from classic work on "the contact hypothesis" to recent work that traces the physiological correlates of intergroup interaction. We will discuss the current challenges of intergroup interaction, and the ways in which good intentions can sometimes backfire in these situations. We will focus on interactions across specific group–based differences, such as race/ethnicity, sexuality, social class, and gender, and in specific settings, such as schools and workplaces. All students will design and conduct an empirical research project. The course fulfills the Exploring Diversity Initiative by focusing on how group membership, individual differences, and social power affect the experiences of both majority and minority group members in these interactions.
Class Format: seminar/empirical lab course **Requirements/Evaluation:** twice weekly response papers, periodic oral presentations, 1–2 short research papers & 1 long empirical research paper
Prerequisites: PSYC 201 and 242 or consent of instructor **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** Psychology majors
Extra Info: may not be taken on a pass/fail basis; not available for the Gaudino option

PSYC 350 Child Psychopathology
This course explores the rapidly evolving field of psychological disorders in childhood and adolescence. We will examine the intertwined effects of individual characteristics (e.g., genetics, neurobiological factors), relationship processes (e.g., parenting, family functioning, peers), community settings (e.g., schools, neighborhoods), and the broader cultural context (e.g., poverty, stigma, media). Using a developmental framework, we will examine the emergence and maintenance of specific psychological disorders, as well as variations in how children cope with cataclysmic stressors (chronic illness, physical and sexual abuse). The goals of this course include (1) appreciation of the dynamic interplay between biology and experience in the unfolding of psychopathology, (2) exploration of diagnostic criteria and phenomenology of specific disorders, and (3) exposure to a wide range of research–based strategies for prevention and intervention.
Class Format: seminar **Requirements/Evaluation:** classroom participation, response papers, midterm, final paper
Prerequisites: PSYC 232 or 252 **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** Psychology majors
Distributional Requirements: Division 2 **Other Attributes:** PHLH Maternal and Child Health
PSYC Area 5 – Clinical Psychology

PSYC 352(F) Clinical and Community Psychology

A study of the theory, methods, and professional issues in clinical and community psychology. In addition to academic work (primary source readings and class discussions), the course aims to enable students to apply their experience in academic psychology to field settings and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field–work placement arranged by the instructor in a local mental health or social service agency.
Class Format: seminar **Requirements/Evaluation:** field work (six hours per week), two 5–page position papers, and a 12– to 15–page final paper
Prerequisites: PSYC 252 **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** senior, then junior, Psychology majors; you MUST have permission of instructor to register for this course
Distributional Requirements: Division 2 **Other Attributes:** EXPE Experiential Education Courses

PSYC Area 5 – Clinical Psychology
Fall 2014
SEM Section: 01 MR 02:35 03:50 Instructor: Laurie Heatherington

PSYC 353(S) Gender & Psychopathology Crosslistings: PSYC 353/WGSS 353
This course will address a range of topics related to the intersection of gender and psychopathology. We will begin the class by discussing the meaning of "gender" and the various mechanisms by which biological sex, gender identity, gender roles and sexual orientation may relate to our understanding of the development, presentation and treatment of psychological disorders. We will also discuss historical and current controversies regarding the classification of psychological disorders concerning sexual orientation and gender identity. The rest of the course will address gender differences in specific psychological disorders and the biological, psychological and social mechanisms contributing to these differences. All students will design and conduct an empirical research project based on the readings and concepts discussed in class.
Class Format: empirical lab course **Requirements/Evaluation:** weekly response papers, midterm exam, a written report and oral presentation of the empirical research project
Prerequisites: PSYC 201 and PSYC 252 **Enrollment Limit:** 16 **Expected Class Size:** 12 **Enrollment Preferences:** preference will be given to Psychology and WGSS majors
Extra Info: may not be taken on a pass/fail basis
Distributional Requirements: Division 2 **Other Attributes:** PSYC Area 5 – Clinical Psychology

LAB Section: 02 W 01:00 04:00 Instructor: Laura Sockol

PSYC 355(S) Psychotherapy: Theory and Research
Psychotherapy is a young, barely 100–year old psychological endeavor which attempts to promote change and healing through social interaction. How can it be that talking with a psychotherapist can help people change — emotionally, cognitively, and/or behaviorally — and how exactly does it help people achieve relief from psychological disorders and problems? In this course, we will study some of the key approaches to psychotherapy by examining the theories and scientific research that surround them, and considering theory and research in juxtaposition. This will be accomplished by a close reading and critical analysis of primary source theoretical papers, the "raw data" (videotapes and transcripts) of therapy sessions, case studies, and contemporary empirical research on the outcomes and change processes of psychotherapy. Students will learn how to evaluate the efficacy claims of both standard and new therapies and how to evaluate claims about the mechanisms by which those therapies work. Current controversies in psychotherapy and psychotherapy research will be addressed and debated as well. All students will design and conduct an empirical research project based on the course material.
Class Format: empirical lab course **Requirements/Evaluation:** two short position papers, occasional one–page response and a written/oral report of research
Prerequisites: PSYC 201 and PSYC 252 **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** Psychology majors
Distributional Requirements: Division 2 **Other Attributes:** PSYC Area 5 – Clinical Psychology
PSYC Empirical Lab Course
Spring 2015
SEM Section: 01 TR 08:30 09:45 Instructor: Laurie Heatherington
LAB Section: 02 T 01:00 04:00 Instructor: Laurie Heatherington

PSYC 357 Depression
This course will provide students with a comprehensive understanding of depression. Topics will include assessment, models of etiology and course, effective approaches to prevention and intervention, and depression in specific populations. Readings will expose students to seminal works in the field as well as current methods and research findings. All students will design and conduct an empirical research project based on the readings and concepts discussed. Throughout the course, students will evaluate current research based on theory, methodological rigor, and potential impact on prevention and intervention efforts.
Class Format: empirical lab course **Requirements/Evaluation:** class participation, in–class short written responses, weekly response papers, midterm exam, an original empirical research project, a written report of the research project, and an oral presentation of the research project
Prerequisites: PSYC 201 and PSYC 252 **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** Psychology majors
Distributional Requirements: Division 2 **Other Attributes:** PSYC Area 5 – Clinical Psychology
PSYC Empirical Lab Course
Not Offered Academic Year 2014–2015
SEM Instructor: Catherine Stroud

PSYC 359(F) Anxiety Disorders: Responses to Danger, Both Real and Imagined
This is an advanced course on anxiety disorders that takes an in depth look at the theory and research on the normative psychological processes that influence responses to danger, both real and imagined. Specifically, it examines the empirical research on psychological responses to traumatic experiences, such as combat, rape, and concentration camp survival. Responses to perceived or imagined threats are also discussed as the underpinnings of such anxiety disorders as Panic Disorder, Generalized Anxiety Disorder, Social Phobia, Specific Phobia and OCD. Discussions focus on commonalities and differences in empirically supported treatments for anxiety disorders as well as controversies in the field.
Class Format: seminar **Requirements/Evaluation:** active class participation, frequent response papers, midterm examination and final term paper
Prerequisites: PSYC 252 **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** Psychology majors
Distributional Requirements: Division 2 **Other Attributes:** PSYC Area 5 – Clinical Psychology
Fall 2014
SEM Section: 01 MR 01:10 02:25 Instructor: Nicole Harrington

PSYC 361 Psychology of Nonviolence
Nonviolence refers to choice behavior in interpersonal interactions in which physical and psychological injury to others is rejected as an option. In this course we will study moral and psychological theories of nonviolence, and evaluate the empirical support for their central empirical claims of psychological benefits to the practitioner, attitude change in the adversary, and positive exemplary effects on social interaction. Topics include anger and self–control, aggression, evil, conflict resolution, empathy, and forgiveness.
Class Format: discussion/seminar **Requirements/Evaluation:** class attendance and participation, discussion leadership, short essays, and a final paper
Prerequisites: any 200–level course in PSYC or permission of instructor **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** Psychology majors
Distributional Requirements: Division 2 **Other Attributes:** JLST Theories of Justice/Law
PSYC Area 6 – Other/Interdisciplinary Psychology
Not Offered Academic Year 2014–2015
SEM Instructor: Kris Kirby

PSYC 372(F) Advanced Seminar in Teaching and Learning
This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?
Class Format: seminar **Requirements/Evaluation:** this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal
Prerequisites: PSYC 232 or PSYC 272 or permission of instructor **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** Psychology majors and those who plan to become teachers

PUBLIC HEALTH

Chair, Associate Professor TARA WATSON

Advisory Committee: Professors: DARROW, D. GOLLIN*, C. JOHNSON, SHANKS, SHORE–SHEPPARD, ZIMMERBERG. Associate Professors: BANTA, GEHRING,HANE, KLINGENBERG*, MUNEMO, WATSON. Assistant Professors: BLACKWOOD, HEGGESETH, KOHLER*.Lecturers: GUTSCHOW, HONDERICH, J. PEDRONI.

Public health seeks to understand, and also to protect and improve, health at the level of a community or population. Communities make decisions and allocate resources that, intentionally or not, fundamentally shape human life. For example, great reductions in sickness and early death have come from social interventions with relatively low financial cost, such as physically separating drinking water from sewage, or distributing aspirin, condoms, mosquito nets, vaccines or soap, or sharing new ideas about life's possibilities. The way a society is organized affects the way that social and scientific knowledge is distributed within it; access to that knowledge shapes health at the individual level. At its heart, the study of public health focuses on questions about relationships between science and society, and between reality and possibility: what effective public health policy is and how we can measure its effectiveness; what the relationship is, and ought to be, between research and policy; how we reconcile important moral and economic claims, or balance other values that compete with maximizing health; what counts as disease, over time and among cultures; how we think about cause and responsibility; what constitutes a healthy environment; how our fundamental beliefs determine our approaches to health decisions; and how such decisions ought to be made.

Requirements:
PHLH 201(S) Dimensions of Public Health
All students wishing to pursue the Area of Concentration should take this course early in their careers. Students may petition the advisory committee to substitute a course taken in a study–abroad program focused on global health, providing that the course is equivalent in scope. However, students who plan to take advantage of this option should have taken at least two other courses from among the electives by the end of their sophomore year, and should recognize that those who lack a foundation in the core issues of the field may find it more challenging to prepare their proposal for admission to the concentration.

Statistics
Statistical analysis is at the heart of the quantitative tools necessary to study the health of populations. One course in statistics from the list below is required of all concentrators.

Electives
Concentrators must take at least three electives, with at least two different prefixes, from the list below. Elective courses are grouped by category, but these clusters are not meant to constrain students to a single "track" within the program. Instead, each student is free to determine, with the guidance of an advisory committee member(s), a set of electives that provides an intellectually coherent exploration of his/her particular areas of interest within the field of public health. In choosing electives, students should consider the balance of breadth versus depth that will allow them to gain theoretical and methodological sophistication in one or more areas. Students may not substitute an independent study for any of these electives. Winter Study courses may not be counted towards the electives.

Experiential Component
Because many public health challenges cannot be fully appreciated until one has hands–on experience with real communities and actual populations, each concentrator must have at least one relevant field–based educational experience with a research component. This requirement may be met through participation in an approved study abroad program (see below), one of the Winter study courses marked with an asterisk, a WS99 project, or a not–for–credit summer or academic–year internship. In every case, the advisory committee must approve the project in advance. This experiential component will serve as a focal point for the student's work in the capstone course.

Capstone Course
The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi–disciplinary team to address a real–world, and in many cases very daunting, public health problem. Students will spend the first part of the semester writing about and sharing with their classmates their fieldwork experiences; these reflections will be framed by readings on health inequities, cultural perspectives and global practices. Through these case studies, students will gain an appreciation for the complex web of structural, societal, and policy issues that define and constrain approaches to contemporary public health crises. Readings for this portion of the course will be chosen by the faculty member to address a shared topic, to be agreed upon by the end of the previous semester between the instructor and students. In the second portion of the course, teams of students will identify a public or global health problem (akin to a Gates Global Challenge), and, drawing jointly on the methods of their respective disciplines, will develop a comprehensive proposal to address this problem. Team projects will be presented to and evaluated by a board of internal and/or external examiners, comprised of faculty members from Williams, alumni and other PH practitioners from the surrounding region. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Written Proposal for the PH Portfolio
To be considered for admission to the Area of Concentration in Public Health, students must submit a written statement describing the portfolio of courses, study abroad, and experiential learning component(s) they intend to pursue. In this proposal, candidates for the concentration should describe their intellectual goals, and if relevant, how these relate to their professional goals. A fundamental purpose of the proposal requirement is to encourage the student to consider concretely how s/he will engage

with socio–cultural, behavioral, policy, and/or biomedical aspects of population health. To this end, students should address whether a methodological or disciplinary emphasis ties their chosen courses together, and how the intended experiential component will relate to this set of questions. This proposal is due by the time a student declares the concentration, typically in the spring of the sophomore year, and should be prepared in consultation with a member of the advisory committee. Concentrators are required to revisit and update their proposal prior to registration in the spring of the junior year, and to provide documentation of their internship experience both prospectively and retrospectively. The final portfolio will typically include major papers written for electives within the concentration, and may serve as a resource for students to draw on during their capstone course.

Study Abroad and Internships

Although not a requirement for the PH concentration, study abroad and/or overseas internships provide a crucial opportunity to engage with global health issues through field–based coursework and independent research projects. The Public Health program in coordination with the Study Abroad Advisor and the Office of Career Counseling will advise students on opportunities in these areas. In particular, students may want to consider one of the several Global Health options offered through SIT. One or more courses completed on an approved study abroad program can be counted toward the three elective courses, with permission of the program coordinator. You can find general study away guidelines for Public Health here.

PHLH 201(S) Dimensions of Public Health
Public health is concerned with protecting and improving health at the level of a community or population. Although individual behavior is an essential element of public health, collective, rather than individual, outcomes are the focus of public health study. In this course we will survey the field of public health, introducing students to core concepts and methods that highlight the interrelationship of individual choice and social institutions with environmental and biological factors in producing health outcomes at the population level. We will develop these concepts and methods within the context of signal cases and public health crises, covering infectious disease epidemics and prevention, sexual health, and mental health.
Class Format: lecture **Requirements/Evaluation:** based on four papers and contributions to class discussion
Prerequisites: none **Enrollment Limit:** 40 **Expected Class Size:** 40 **Enrollment Preferences:** sophomores, potential PHLH concentrators
Extra Info: may not be taken on a pass/fail basis; not available for the Gaudino option
Distributional Requirements:
Non–divisional
Other Attributes: PHLH Core Courses
Spring 2015
LEC Section: 01 TR 09:55 11:10 Instructor: Amy Gehring and Cheryl Shanks

PHLH 402(S) Senior Seminar in Public Health
This course is designed to provide senior concentrators the opportunity to reflect upon and synthesize both their curricular and experiential work in the concentration. In the first part of the course, students will lead discussion on readings addressing a range of issues and disciplines in the field of public health, including health inequities, cultural perspectives and global practices. In the second half of the semester, students will be divided into three or four multi–disciplinary research teams to investigate a contemporary real–life issue in public health, locally, nationally or internationally. The teams will work independently, in contact with the instructor and other resource faculty members, to define areas of investigation and approaches to the issue, gather data and other necessary information and prepare a team report. This report, to be presented at the end of the term, will be part of each student's public health portfolio. In addition each student will write a separate 15–20 page term paper, drawing on the team project and/or the students' prior coursework and experiential education in PH; this term paper will be designed to be a writing sample appropriate for graduate school or job applications. Some amount of off–campus travel may be required either in spring break or the latter half of the semester. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.
Class Format: seminar **Requirements/Evaluation:** active seminar participation, contribution to the team research project and 12–15 page final paper
Prerequisites: Completion of at least 4 courses counting towards the PHLH concentration **Enrollment Limit:** 14 **Expected Class Size:** 14 **Enrollment Preferences:** Senior PHLH concentrators
Extra Info: may not be taken on a pass/fail basis; not available for the Gaudino option
Distributional Requirements:
Non–divisional

RELIGION (Div. II)

Chair, Associate Professor JASON JOSEPHSON

Professors: BUELL*, DARROW, DREYFUS. Associate Professor: JOSEPHSON. Assistant Professors: HIDALGO**, ISRAEL, SHUCK. Lecturer: GUTS-CHOW. . Croghan Bicentennial Professor: MOXNES. Mellon Fellow: YACOOB. Visiting Lecturer: ADHAMI.

MAJOR

The major in Religion is designed to perform two related functions: to expose the student to the methods and issues involved in the study of religion as a phenomenon of psychological, sociological, and cultural/historical dimensions; and to confront students with the beliefs, practices, and values of specific religions through a study of particular religious traditions. It is a program that affords each student an opportunity to fashion his/her own sequence of study within a prescribed basic pattern constructed to ensure both coherence and variety. Beginning with the class of 2016, the major in Religion will consist of at least nine semester courses as follows:

Required sequence courses

Religion 200 Theories and Methods in the Study of Religion
One 300–level seminar or tutorial
Religion 401 Senior seminar

Elective courses

Six electives at the 100, 200 or 300 level (with a maximum of one 100–level class to count towards major)

In addition, each major will select a specialization route in the major in conversation with and with the approval of the department. The specialization will consist of at least four courses. There are two ways to meet this requirement. A major could fulfill the requirement by concentration in one of the College's co–ordinate programs or by designating four specialization courses that can be supported by the resources of the Religion department faculty and the College. In other words, these four courses might be from among the six electives and one 300–level seminar or tutorial or might include additional coursework from other programs and departments (whether cross–listed or not).

The major will culminate in a year–long senior project. The first semester will remain a seminar (REL 401) on a topic in the study of religion set by the faculty member in consultation with incoming seniors. The spring semester will consist of participation in a research colloquium (not a course taken for credit). In this colloquium, each senior major will present their individual research projects, begun in the senior seminar, drawing on their specializations and advised by members of the faculty.

For those who wish to go beyond the formally–listed courses into a more intensive study of a particular religious tradition, methodological trend, or religious phenomenon (e.g., ritual, symbol–formation, mysticism, theology, etc.), there is the opportunity to undertake independent study or, with the approval of the department, to pursue a thesis project.

The value of the major in Religion derives from its fostering of a critical appreciation of the complex role religion plays in every society, even those that consider themselves non–religious. The major makes one sensitive to the role religion plays in shaping the terms of cultural discourse, of social attitudes and behavior, and of moral reflection. But it also discloses the ways in which religion and its social effects represent the experience of individual persons and communities. In doing these things, the major further provides one with interdisciplinary analytical tools and cross–cultural experience and opens up new avenues for dealing with both the history of a society and culture and the relationships between different societies and cultures. What one learns as a Religion major is therefore remarkably applicable to a wide range of other fields of study or professions.

The department will work with students in the classes of 2014–2015 to adapt these new guidelines for the major. Beginning in spring 2012, students declaring Religion as a major will identify an area of specialization and link it to their senior seminar final paper and be expected to present it in a spring colloquium during their senior year.

THE DEGREE WITH HONORS IN RELIGION

The degree with honors in Religion requires the above–mentioned nine courses and the preparation of a thesis of 75+ pages with a grade of B+ or better. A thesis may combine revised work done in other courses with new material prepared while enrolled either in Religion 493–W31 or Religion W31–494. Up to two–thirds of the work in the thesis may be such revised work, but at least one–third must represent new work. The thesis must constitute a coherent whole either by its organizing theme or by a focus on a particular religious tradition. Candidates will also be expected to present the results of their thesis orally in a public presentation. Students who wish to be candidates for honors in Religion will submit proposals and at least one paper that may be included in the thesis to the department in the spring of their junior year. Students must normally have at least a 3.5 GPA in Religion to be considered for the honors program.

The chair will serve as advisor to non–majors.

STUDY ABROAD

The Williams College Religion Department encourages potential majors to study abroad in order to enhance their education and gain international perspectives on religious studies. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. Many of our majors study in the Williams College Oxford Program, but our majors also regularly pursue a semester or year–long study in other programs. You can find general study away guidelines for Religion here.

REL 103 The Way of Power: A History of Occult Knowledge and Practices
Since antiquity, certain individuals and groups have claimed privileged access to hidden sources of knowledge, which they maintained could only be revealed to the initiated or enlightened. What is more, it was also often asserted that this knowledge conveyed various powers' from summoning good and evil spirits, transforming base metals into gold, predicting the future, achieving bodily immortality, directly witnessing the face of God or even becoming a God. How does examining these claims alter our understanding of established religions? This course will trace the historical development of these practices and beliefs–known to scholars as "esotericism"—from antiquity to the present. It will cover such topics as magic, alchemy, kabbalah, Gnosticism, hermeticism, Theosophy, tantrism, occultism, vodou, and spiritualism. Emphasizing close the reading of the primary sources, we will explore the boundaries between religion, magic and science. We will discuss esotericism as the site for the European appropriation of the "Orient," the construction of discipline of religious studies, and even the origins of modern science.
Class Format: lecture/discussion **Requirements/Evaluation:** two short writing assignments, a midterm, and a final exam
Prerequisites: none **Enrollment Limit:** none **Expected Class Size:** 40
Extra Info: may not be taken on a pass/fail basis
Distributional Requirements: Division 2 *Not Offered Academic Year 2014–2015*
LEC Instructor: Denise Buell

REL 104 Religious Conflict and Cooperation
Violent conflicts throughout the world are animated by religious rhetoric, driven by religious actors, and sanctioned by religious authorities. At the same time, religious and "interfaith" organizations are often prominent participants in peace advocacy and conflict resolution. What are the varieties of religious involvement in war and peace? What can we learn about "religion" from religious conflicts and cooperative initiatives? Does the modern nation–state increase the likelihood of religious conflict? Will 21st century globalization support more or less conflict and/or cooperation? We will investigate these questions through contemporary case studies including: conflicts between Jews and Muslims in Israel/Palestine, Hindus and Buddhists in Sri Lanka, and Catholics and Protestants in Northern Ireland. We will also look at the religious militancy of Al Qaeda, the Lord¿s Resistance Army in Uganda, and other groups. And we will consider religious efforts to end these conflicts peacefully and delegitimize militant groups. In each case, we will see how competition for control over what counts as "Judaism," "Hinduism," "religion," "religious," and so forth is central to these conflicts and to the goals of those who seek to resolve them. Along with primary and secondary sources related to each case study, we will read theoretical works by Mark Juergensmeyer, Samuel Huntington, Scott Appleby, Bruce Lincoln, Peter van der Veer, Olivier Roy, Ananda Abeysekara, Talal Asad, Tomoko Masuzawa, and others.
Class Format: lecture **Requirements/Evaluation:** two short papers, an in–class mid–term exam, and a final paper or project
Prerequisites: none **Enrollment Limit:** none **Expected Class Size:** 30 **Enrollment Preferences:** first–year students and potential Religion majors
Distribution Notes: Gateway course
Extra Info: may not be taken on a pass/fail basis
Distributional Requirements: Division 2 *Not Offered Academic Year 2014–2015*
LEC Instructor: Jeffrey Israel

REL 105 Religion and Culture Wars
This course will examine a series of moments of tension where religion and culture have been in the spotlight—especially in 20th century North America. Among other things, we'll consider: Native American religious autonomy, GLBTIQ issues (marriage equality, etc.), socioeconomic and identity questions with Liberation Theology, receptions of Islam in North America, all within a recent historical and current events framework.
Class Format: lecture **Requirements/Evaluation:** active participation, two 1000–1500 word response papers, and a "take–home" midterm and self–scheduled final exam
Prerequisites: none **Enrollment Limit:** none **Expected Class Size:** 30 **Enrollment Preferences:** Religion majors
Distribution Notes: Gateway course
Distributional Requirements: Division 2 *Not Offered Academic Year 2014–2015*
LEC Instructor: Glenn Shuck

REL 106(S) Is God Dead? Secularism in the Modern World
In 1966, "Time" magazine, alluding to Friedrich Nietzsche's famous proclamation, published an issue titled "Is God Dead?" Since then, however, theories that posited the increasing disappearance and/or irrelevance of religion in the modern world have been challenged by the rise of the "religious right" in the United States, as well as Islamism, Hindu nationalism, and other religious revival movements across the globe. Secularization has become a suspect and questionable theory. This course will examine the nature of secularization, secularism, and secularity in the modern world, and theories of these phenomena. In other words, what does it mean to say we live in a secular society? Is there a connection between national religiosity and a secular "separation of church and state"? Is there a necessary connection between modernity and secularism? Can people be religious and secular at the same time? What is the relation between secularism and feminism? Is secularism and secularization unique to Europe and North America? Or is it merely the outward justification of a particular Euro–American ideological/colonial project? Or are there multiple secularities? What do secularism and secularization look like in South Asia, East Asia, and the Middle East? Is a religious government, like Iran, also secular? As some theorists suggest, are we now living in a post–secular age? These are some of the questions that this course will explore as we take a global perspective that examines these issues both historically and in the contemporary. In addition to specific historical and anthropological case–studies, we will read theorists such as Peter Berger, Jose Casanova, Charles Taylor, Janet Jakobsen, Ann Pellegrini, Talal Asad, William Connolly, and others.
Class Format: seminar **Requirements/Evaluation:** active participation, two short essays (4–5 pages), in–class mid–term exam, and final project
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 10 **Enrollment Preferences:** prospective Religion majors
Distributional Requirements: Division 2
Spring 2015

REL 200(F) What is Religion? Theories and Methods in the Study of Religion
As recently at the 1960s, the most influential theorists of modernity were predicting that religion would eventually vanish, while theologians lamented what they called the "Death of God." But one has only to glance at today's headlines to see that accounts of religion's demise were premature. Indeed a basic knowledge of religion is indispensable to understanding the current global moment as well as a range of fields from political science to English literature and history. To explore the meaning of religion, this course will introduce the debates around which the discipline of religious studies has been constituted. It will familiarize students with the discipline's most significant theorists (both foundational and contemporary) and trace their multidisciplinary—philosophical, sociological, anthropological, and psychological—modes of inquiry. At stake are questions such as: How does one go about studying religion? Is "religion" even a cultural universal? Or is it merely the byproduct of the European Enlightenment? What is religion's relationship to God? to science? to society? to secularism? to colonialism? to ethics? to politics? to violence? to sex? to freedom? Has religion changed fundamentally in modernity? And if so, what is its future?
Class Format: seminar **Requirements/Evaluation:** class participation, three short (2–3 pages) writing assignments, a 5–page midterm paper, and a 10– to 15–page final paper
Prerequisites: none, although a previous course on religion is recommended **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** Religion majors
Extra Info: may not be taken on a pass/fail basis
Distributional Requirements: Division 2

REL 201 The Hebrew Bible Crosslistings: REL 201/COMP 201/JWST 201
The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on class participation, short written assignments, and two to three longer papers
Prerequisites: none **Enrollment Limit:** 40 **Expected Class Size:** 40 **Enrollment Preferences:** Jewish Studies concentrators, Religion and Comparative Literature majors

REL 202(S) Moses: Stranger in a Strange Land Crosslistings: REL 202/JWST 202/COMP 214
As chieftain, priest, prophet, and lawgiver all in one, Moses occupies the central place in the history of Israelite and Jewish leaders. However, he is a somewhat unlikely candidate for such an important role. He is God's chosen leader among the enslaved Israelites, but he is raised as an Egyptian prince. He is a spokesman for his people, but he is slow of speech. He is the lawgiver and first judge of his nation, yet he is quick–tempered and impatient. The story of the most revered figure in the Jewish tradition, who nevertheless remains an outsider to the very end, has fascinated commentators and inspired countless artistic and literary interpretations. This course will engage in a close study of the figure of Moses by examining the biblical narrative of his life and career from Exodus through Deuteronomy with an eye towards understanding the complex and often contradictory portrait of this self–described "stranger in a strange land." We will also examine some of the ancient legendary and folkloric accounts about Moses, as well as philosophical and allegorical treatments in Hellenistic Jewish, early Christian, and Muslim biographies. We will then proceed to investigate key modern reconfigurations and critiques of Moses in several genres, which may include renaissance visual depictions, literary works by Sigmund Freud, George Eliot, Thomas Mann, and Zora Neale Hurston, and even musical and cinematic renditions. *All readings are in translation*.

Class Format: seminar **Requirements/Evaluation:** class participation, short written assignments, and two or three longer papers
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** students who have already taken a course in biblical literature

REL 203(S) Judaism: Before The Law (D) Crosslistings: REL 203/JWST 101
This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth–century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. In addition, the course will address non–Jewish depictions of Judaism as essentially legalistic. We will see how Judaism comes to be stigmatized as dead letter contrasted to living spirit, corrupt flesh contrasted to pure soul, and antagonistic particularism contrasted to benevolent universalism. We will investigate the origin and legacy of Immanuel Kant's claim that "strictly speaking Judaism is not a religion at all" but merely individuals "of a particular stock" who have established themselves under "purely political laws." We will trace this line of thought from Paul through Spinoza and Kant to contemporary thinkers like Alain Badiou. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts by Franz Rosenzweig, Leo Strauss and Joseph Soloveitchik, Shakespeare's *The Merchant of Venice*, Kafka's *The Trial* with his parable "Before The Law," short stories by Bernard Malamud, Woody Allen's film *Crimes and Misdemeanors*, and ethnographic accounts of contemporary Jewish observance. *All readings will be in translation.*
Class Format: seminar **Requirements/Evaluation:** class participation, three short papers, and a final take–home exam

REL 205 Ancient Wisdom Literature Crosslistings: REL 205/CLAS 205/COMP 217/JWST 205
The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of *hokhmah*, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's *Works and Days*, Aesop's fables, and fragments from the pre–Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's *Poor Richard's Almanack*. *All readings are in translation.*
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on class participation, short written assignments, and two longer papers

REL 206 The Book of Job and Joban Literature (W) Crosslistings: REL 206/COMP 206/JWST 206
The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self–examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's *The Trial*, Archibald MacLeish's *J.B.*, Robert Frost's "Masque of Reason," Carl Jung's *Answer to Job*, and William Blake's *Illustrations to the Book of Job*. *All readings are in translation.*
Class Format: discussion **Requirements/Evaluation:** evaluation will be based on class participation, weekly short written assignments, and two longer papers
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 19

REL 207(F) From Adam to Noah: Literary Imagination and the Primeval History in Genesis Crosslistings: REL 207/COMP 250/JWST 207/CLAS 207
How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re–imagining of the early history of humankind. We will then turn to several continuations of these variant traditions in medieval and early modern literature, with particular attention to the extensive material on the figures of Cain and Noah. *All readings are in translation.*
Class Format: discussion **Requirements/Evaluation:** evaluation will be based on class participation and several writing assignments
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** students who have already taken a course in Biblical literature

REL 208(S) Ancient Greek Religion Crosslistings: CLAS 208/REL 208
This course explores the nature and evolution of ancient Greek religion from the Bronze Age (1200s BCE) to the rise of Christianity, with a focus on ritual and cultic practices in their cultural and historical context. We will draw on the rich evidence provided by literary and documentary texts, and also take into account archaeological evidence, including works of art such as sculpture and vase painting. We will pay special attention to ritual in civic and political life, and its role in expressing and forming individual and group identity. We will also examine the intersection of religion and literature by reading works that describe or depict cultic practice, or that were composed for performance in ritual contexts. Readings include Homer's *Iliad*, Hesiod's *Theogony*, Euripides' *Bacchae*, Aristophanes' *Women at the Thesmophoria*, and selections from the *Homeric Hymns* and Pindar's *Odes*.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on several short papers, a midterm, a final research paper, and class participation
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 15 **Enrollment Preferences:** majors and potential majors in Classics and Religion
Distribution Notes: meets Division 2 requirement if registration is under REL; meets Division 1 requirement if registration is under CLAS

REL 209(F) Jewish America Crosslistings: REL 209/JWST 209
Who and what counts as "Jewish" in America? Does stand–up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster–bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster–bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand–up comedy, political magazines, theological texts, and television shows. We may, for instance, watch films like *The Jazz Singer* (1927 and 1980), *Exodus* and *Annie Hall*; read John Updike's *Bech: A Book*, Philip Roth's *Operation Shylock* or Cynthia Ozick's *The Puttermesser Papers*; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's *Dearborn Independent*, the *Menorah Journal* or *Commentary*; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of *Bridget Loves Bernie, Northern Exposure* and *Curb Your Enthusiasm*. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.
Class Format: seminar **Requirements/Evaluation:** class participation, two short papers, a midterm take–home exam, and a final paper interpreting an example of Jewishness in America chosen by the student
Prerequisites: none **Enrollment Limit:** 30 **Expected Class Size:** 25 **Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and students who are interested in either of these options
Distributional Requirements: Division 2

REL 210(F) The New Testament: Purpose, History and Method (W) Crosslistings: REL 210/CLAS 210/COMP 213
The New Testament is the most important collection of documents in the Christian religion. This course offers overviews and discussions of the origin and purpose of the writings, their influence throughout history, and the development of methods of readings of the texts. We start with the origin of the writings before they became collected into the New Testament, and ask: what forms of writings (genres) in Greco–Roman culture were available to the authors of the new scriptures, and how they were used for the purpose of shaping faith in Jesus Christ and creating communities? Why just these scriptures were included, and not others, for instance, the Gospel of Thomas, is another much discussed question. The impact of the New Testament writings upon society is a problematic history; for instance, they have been used to support negative attitudes to Jews, women and homosexuals. This raises the issue of how to read the New Testament. There are many different ways of reading the New Testament; perhaps the most common way to read it is as Scripture, important for one's religious faith. In this course, however, we will focus on scholarly and academic readings of the New Testament. But they, too, have gone through many changes, influenced by contemporary methods, e.g. historical–critical ones in the 19th and into 20th century, more recently, by literary, feminist and post–colonial readings. Through extensive readings of New Testament writings in their cultural and historical context, documentations of their use in history, and recent theories of interpretation, the aim is to gain an independent position on the New Testament as a historical and religious document.
Class Format: lecture/discussion **Requirements/Evaluation:** one class presentation; three 3–page papers, one 5– to 7–page paper, and a final paper (15 pages)
Prerequisites: none; open to all classes **Enrollment Limit:** 19 **Expected Class Size:** 10 **Enrollment Preferences:** sophomores

REL 212 The Development of Christianity: 30–600 C.E. (W) Crosslistings: REL 212/HIST 324
This class will introduce you to the history, writings, practices, and structures of early Christians between 30–600 CE. Who were "Christians" and how did they understand and define themselves in this time period? What historical and cultural factors influenced the ways in which Christians were perceived, could imagine themselves, and lived? While this class addresses the basic flow of events and major figures in early Christian history, it will also require you to develop a critical framework for the study of history in general. In addition, you will gain significant experience in the critical analysis of primary source materials. Special attention will be paid to the incredible diversity of early Christian thought and practice.
Class Format: lecture/discussion; in–class group work **Requirements/Evaluation:** active and informed participation, one reflection paper (1 page), two textual analysis papers (3–4 pages)—at least one to be revised (option to revise both)
(see "Extra Info" for additional requirements)
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** sophomores considering a major in Religion or History, then senior and junior majors in these departments

REL 213(F) Divine Kingship in the Ancient Mediterranean Crosslistings: CLAS 258/ANTH 258/HIST 394/REL 213
What is the relationship between politics and religion? How do kings legitimate their rule? Why did the ancient Greeks and Romans worship their emperors as gods? This course examines the origins and development of divine kingship in the ancient Mediterranean from its earliest beginnings in Pharaonic Egypt to the reign of the Christian Roman Emperors in the fourth century CE. We will address the various symbolic strategies employed by ancient kings to project their own divinity. These include portraiture, panegyric poetry, ritual processions, royal autobiography and monumental architecture, e.g., the Great Pyramids in Egypt and the Pantheon in Rome. We will also study the reception of royal art and ideology among the king's subjects. Special attention will be paid to the role of the Roman emperor–cult in shaping social, political and religious identity in the Roman Empire.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on classroom performance, quizzes, one 8– to 10–page paper, a midterm and a final exam
Prerequisites: none **Enrollment Limit:** 30 **Expected Class Size:** 20 **Enrollment Preferences:** majors or prospective majors in Classics, Anthropology, Art History, and History

REL 214(S) Religion and the State Crosslistings: REL 214/PSCI 271
The First Amendment of the U.S. Constitution begins: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." What does "religion" mean in this formulation? Should "religion" be singled–out for exclusion from government? Are "religious" reasons ever legitimate reasons for laws, policies or popular political action? Should "religious" organizations be exempt from otherwise generally applicable laws? Is "religion" good or necessary for democratic societies? In this course we will respond to these and related questions through an investigation of "religion" as a concept in political theory. Particular attention will be given to the modern liberal tradition and its critics. Coverage will range from modern classics to innovative contemporary arguments. Classics may include John Locke's *A Letter Concerning Toleration*, selections from Jean–Jacques Rousseau's *The Social Contract*, James Madison's *Memorial and Remonstrance Against Religious Assessments*, Immanuel Kant's *Religion Within the Boundaries of Mere Reason*, John Stewart Mill's *Three Essays On Religion*, and John Dewey's *A Common Faith*. More recent arguments may come from John Rawls, Alasdair MacIntyre, Nicholas Wolterstorff, Martha Nussbaum, Jeffrey Stout, Winnifred Sullivan, Brian Leiter and Andrew Koppelman.
Class Format: seminar **Requirements/Evaluation:** class participation, two short papers, a midterm take–home exam, and a final take–home exam
Prerequisites: none **Enrollment Limit:** 30 **Expected Class Size:** 25 **Enrollment Preferences:** Religion majors, those interested in being Religion majors, and Political Science majors concentrating on Political Theory

REL 216(S) Greek Art and the Gods Crosslistings: ARTH 238/CLAS 248/REL 216
In the *Iliad*, when the god Apollo is visualized, it is as a man, angry in his heart, coming down from the peaks of Olympos, bow and quiver on his shoulders, the arrows clanging as the god moves, "like the coming of night," to bring dogs, horses, and men to their deaths. By the end of the Classical period, one statue of the archer god depicted him as a boy teasing a lizard. In this course, we will examine the development of the images the Greek gods and goddesses, from their superhuman engagement in the heroic world of epic, to their sometimes sublime artistic presence, complex religious function, and transformation into metaphors in aesthetic and philosophical thought. The course will cover the basic stylistic, iconographical, narrative, and ritual aspects of the gods and goddesses in ancient Greek culture. The course will address in detail influential artistic monuments, literary forms, and social phenomena, including the sculptures of Olympia and the Parthenon; divine corporeality in poetry; the theology of mortal–immortal relations; the cultural functions of visual representations of gods, and the continued interest in the gods long after the end of antiquity. Readings assignments will include selections from Homer, Hesiod, Sappho, Aischylos, Euripides, Plato, Walter Burkert, Jean–Pierre Vernant, Nikolaus Himmelmann, Erika Simon, and Friedrich Nietzsche.
Class Format: lecture and discussion **Requirements/Evaluation:** midterm exam, final exam, final paper
Prerequisites: none **Enrollment Limit:** 30 **Expected Class Size:** 30 **Enrollment Preferences:** preference will be given to pre–registered Art–History majors needing to fulfill the pre–1400 requirement; otherwise, the course is open to any interested student

REL 217(F) Medieval England Crosslistings: HIST 231/REL 217
Across the entire world of the Middle Ages, no region has captured the modern pop–culture imagination as much as medieval England. From the Battle of Hastings to Magna Carta, from Braveheart to King Arthur, medieval English history and popular knowledge of the medieval past are closely linked. This course will survey the history of England from the Roman period through the reign of Richard II (AD 43—1399). We will find a great deal to detain us in these thirteen centuries, including the Anglo–Saxon settlement of England and subsequent conversion to Christianity, the Viking raids of the ninth and tenth centuries, the Norman Conquest, the growth of English common law, the murder of Thomas Beckett, Edward I's campaigns in Wales and Scotland, the Peasants' Revolt of 1381, and the beginning of the Hundred Years War. We will focus particularly on power and politics, but primary readings will add important social, cultural and religious context. Our meetings will emphasize lectures and discussion equally. No prior knowledge is expected.
Class Format: lecture/discussion **Requirements/Evaluation:** several short papers, a midterm and a final

REL 218 Gnosis, Gnostics, Gnosticism (W) Crosslistings: REL 218/COMP 218/CLAS 218/HIST 331
What is gnosis and Gnosticism? Who were the Gnostics? Salvation by knowledge, arch–heresy, an eternal source of mystical insights and experiences, secret esoteric teachings available only to a few. All these and more have been claims made about gnosis, Gnostics, and Gnosticism. This course will introduce you to the key ancient texts and ideas associated with Gnostics as well as to the debates over and claims made about Gnosticism in modern times. We shall explore neoplatonic, Jewish, and Christian thought, as well as modern spiritualism and esotericism. We shall also ask about how ancient Gnostics relate to later religious groups such as the Knights Templar and modern Theosophists. Readings include: Nag Hammadi writings in English, Irenaeus, *Against All Heresies*; David Brakke, *The Gnostics*; Elaine Pagels, *The Gnostic Gospels*; Karen King, *What is Gnosticism*? and *The Secret Revelation of John*.
Class Format: lecture/discussion **Requirements/Evaluation:** periodic reflection papers, 2 textual analysis papers, 2 historiographical analysis papers, and a final paper that entails a revision and expansion of an earlier paper
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** students with prior coursework in biblical or other ancient literature or history

REL 221(S) Modern Christian Thought
Christianity in the Western world has undergone numerous challenges since the early eighteenth century. Many thinkers have turned inward, developing pietistic theologies compatible with the modern world, while others have searched for an adequate expression of Christianity after the "Death of God." Another, remarkably resilient strand has actively turned against the Enlightenment in ironic ways, appropriating modern technologies, for example, while repudiating scientific discoveries that undermine their belief. This course will examine these issues, along with a careful consideration of the way gender, identity, and community have come to play a powerful role in contemporary expressions of Christian belief.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will consist of several short response papers, thoughtful interaction, a midterm, and a 10–page final paper

REL 224 U.S. Latina/o Religions (D) Crosslistings: LATS 224/AMST 224/REL 224
In this course, we will engage aspects of Latina/o religious experiences, practices, and expressions in the United States of America. Some attention will be given to historical contexts in Iberia and Latin America, as well as questions of how one studies Latina/o religions. Most of the course, however, will examine moments where religious expressions intersect with politics, popular culture, and daily life in the U.S.A. Given the plurality of Latina/o communities and religious lives in the U.S.A., we will engage certain selected religious traditions and practices by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film. Rooting ourselves in the social, political, cultural, and historical contexts in which particular Latina/o religious formations arose, this Exploring Diversity Initiative course also examines issues of social and institutional power relations that influence particular religious formations.
Class Format: discussion **Requirements/Evaluation:** based upon class participation, short writing exercises, a 5– to 8–page take–home midterm essay, and a 10– to 15–page final review essay
Prerequisites: none **Enrollment Limit:** none **Expected Class Size:** 15

REL 226(F) New Religions in North America Crosslistings: REL 226/AMST 226
This course explores contemporary North America religions from a historical, sociological, and philosophical perspective. We will examine the historical and contemporary experiences of America's ever–expanding religious diversity, prominently featuring the voices of those traditionally excluded from older, Protestant–informed accounts of American religion. The focus of the course will be the exploration of the ever–expanding variety of new religions in North America, challenging students to engage the numerous cultural, philosophical, and methodological issues involved with the study of marginal religions. New religions often highlight cultural anxieties, e.g. loss of identity in contemporary secular societies, responses to new technologies, changing gender roles, globalization, etc. The study of new religions becomes, then, a closer, reflexive examination of contemporary American culture and its underlying tensions. For example, the Raëlian Movement claims to have cloned the first human. Wicca, on the other hand, offers critiques of environmental depredation and traditional gender roles. In sum, we will explore the historical roots of the current boom in new religions, detail contemporary issues, and outline the possible forms new and emerging religions may assume in the coming years. This course will also have a website dedicated to the exploration of new religions, providing links to interesting sites, basic resources, and student essays/projects.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on the basis of their writing and presentation projects, three 5– to 7–page essays, along with their thoughtful discussion of the key issues raised in the course
Prerequisites: none; open to all **Enrollment Limit:** 30 **Expected Class Size:** 15

REL 227 Utopias and Americas Crosslistings: REL 227/LATS 227/AMST 227/ENVI 227
Where does the term "new world" come from? What do we mean by "utopia," "utopian," and "utopianism?" What relationships exist between the people who imagine utopias and the lands they inhabit? This course considers the relationship between utopian imaginations and the imaginations of the lands and peoples in the Western hemisphere. We will spend some time studying utopian theory, ancient proto–utopias, and utopias in Latin America, though our main focus will be on particular examples of utopianism in the U.S.A. We will attend to particular instances of utopian social dreaming that re–imagine time, space, environment, gender, family, education, and power. While the U.S.A. is the main focus of the class, students are encouraged to pursue and bring to class utopian perspectives from other parts of the Americas. Students are also strongly encouraged to take questions from class and engage utopian images not listed on this syllabus but pertinent to our classroom learning.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on class participation, short weekly writing assignments, a 5–page midterm paper, and a 10– to 15–page final research paper examining an American utopia
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 12

REL 229(S) Reel Jesus: Reading the Christian Bible and Film in the U.S.A. (W) Crosslistings: REL 229/AMST 229
In this course we examine some of the myriad ways that Christian biblical narratives have appeared in certain movies. What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture? How does an awareness of this scriptural dimension in a work of "popular culture" affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze how movies may interpret certain biblical texts in order to crystallize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures. Attention to the biblical imagination of U.S. cinema and the cinematic imagination of biblical texts will necessitate interdisciplinary study of text and representation and a concern with the implications of ways in which we read texts and films. While this course will read selected biblical and extra–canonical texts, including selections from canonical and non–canonical gospels, the letters of Paul, and the book of Revelation, our foci will be on the way that movies (and the people who make them and watch them) seek to make meaning out of and with reference to these biblical texts.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation based on participation, short writing exercises (including three 1–pg film analyses and three 1–pg text analyses), one 3–pg analytical essay that will also be revised, a 6–pg synthetic midterm essay, and a final 10–pg review essay
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 12

REL 230(S) Reading Reading: An Introduction to the Qur'an and Islam (W) Crosslistings: REL 230/COMP 260/ARAB 230
One of the two most consequential texts in human history, the Qur'an is more conscious of itself as text and the work of interpretation that is part of the life of a text. Because it is God's most important sign (and also because it is relatively short) millions have memorized it and the art of Qur'anic recitation is one of the supreme Islamic performing arts. Nevertheless it is primarily as a text that the Qur'an exists in itself and in the minds of Muslims. The text of the Qur'an will thus be the focus of this course, reading it extensively, intensively and repeatedly throughout the semester. We will attend to the structure and variety of styles and topics in the text and to the Qur'an's understanding of itself in relation to other forms of literary expression. We will place the form and content in the context of seventh century c.e. Arab society and attend to the life of the Prophet (PBUH) that provides one crucial framework to the text. Through the lens of *tafsir*, Qur'anic commentary, we will also use the text to give an initial survey of some of the main theological, philosophical, mystical and legal developments in the Islamic tradition. Finally we will explore some of the aspects of the place of the text in the life of Muslims, including the development of calligraphy and recitation.
Class Format: lecture/discussion **Requirements/Evaluation:** three essays (6–8 pages) based on class materials (at least one will have a revision process); students able to read the Arabic text may substitute work in a collateral reading group of the Qur'an in Arabic for one of the essays
Prerequisites: none; open to all **Enrollment Limit:** 19 **Expected Class Size:** 10

REL 231 The Origins of Islam: God, Empire and Apocalypse Crosslistings: REL 231/HIST 209/ARAB 231
Both Muslim and non–Muslim historians usually see the rise of Islam in the seventh century C.E. as a total break with the past. This course will challenge that assumption by placing the rise of Islam in the context of the history of late antiquity (c. 250–700 C.E.). The first portion of the course will examine the impact of Judeo–Christian monotheism in the ancient world, the rise of confessional empires, articulation of new ideas about holiness and its relation to sexuality and the transformations undergone by Judaism, Christianity, Zoroastrianism and Manichaeism. We shall examine the conversation of these traditions with classical paganism and philosophy, the internal struggle within traditions to define rules of interpretation, the impact of ascetic, iconoclastic and apocalyptic ideas and, finally, polemics among the traditions. We will then examine the career of Muhammad (PBUH) in the context of Arabia, the spread of the Islamic empire into Christian and Iranian worlds, the impact of apocalyptic expectations, the fixation of religious decision making within the tradition, the process of conversion, the encounter with the Late Antique heritage and religious diversity within the commonwealth of Islam. The course will end with the end of the Abbasid Caliphate in 1258. **Requirements/Evaluation:** one 5–page paper, self–scheduled final, and a final research project

REL 232(F) The Texting of the Divine: Language and Imagination in Islamic Thought (W) Crosslistings: REL 232/ARAB 232
This course will be an introduction to Islamic intellectual history with a focus on the themes of God's speech, the relation of reason and revelation, and the vision of a good and just society. The course will begin with a survey of the legacy of Neoplatonic thought in the early Islamic period and the interreligious polemic of Christians, Jews, Zoroastrians, philosophers and Muslims. Out of this arose two separated movements in Islam: theology (kalam) and philosophy. In the first portion of the course we will trace the rise of the Mu'tazila movement, their views on 'divine speech' and the Asharite and Maturidi response. We will then turn to the key figures of the classical Islamic tradition, al–Farabi, Ibn Sina (Avicenna), Ibn Rushd (Averroes) and Ibn 'ufayl. In the final portion we will examine the rise of Islamic mystical thought (Sufism) and the complicated interrelations of that rich movement with theology and philosophy in the figures of al–Ghazali, Suhrawardi, Ibn 'Arabi, Mulla Sadra and finally Muhammad Iqbal, "the father of Pakistan."
Class Format: seminar **Requirements/Evaluation:** three 6– to 8–page papers

REL 233 Islamic Mysticism: The Sufis (W)
Studying Sufism, the mystical tradition of Islam, is an excellent introduction to the Muslim world. The Sufis represent a delightful and many–faceted spiritual tradition that both enriches and criticizes orthodox Islam. This course will explore the origins of Sufism in the ascetic and revolutionary piety of the early Islamic community; the systematization of the Sufi path to God; Sufi themes in art and poetry; the development of the Sufi orders and techniques of ecstasy, both at high and popular levels. We will read in the classics of Sufi poetry and thought, including Rumi, Attar, Suhrawardi, and Ghazali; we will also explore the Sufi theosophy of Ibn Arabi. We will conclude with an examination of contemporary Sufi life in Pakistan, Egypt and Turkey.
Class Format: lecture/discussion **Requirements/Evaluation:** four 5– to 7–page papers based on the readings and revised in editing workshops
Prerequisites: none; open to all **Enrollment Limit:** 19 **Expected Class Size:** 19

REL 234 Shi'ism Ascendant? Crosslistings: REL 234/ARAB 234
This course will be a survey of Islamic history from the Shi'ite perspective or better perspectives. The purpose is to provide a survey of issues in Islamic social and intellectual history from the Shi'ite margin. On that margin, Shi'ism has always been an alliance of the dispossessed and the intellectuals (assuming the latter are not among the former) and functioned in Islam to provide a vocabulary of revolution, a highly developed philosophy of religion, and a pietistic fervor in contrast to which Sunnism emerged. One consequence, intended or not, of recent U.S. actions in the Middle East has been to inflame the Sunni/Shi'ite conflicts and raise fears of Shi'ite ascendancy. But sectarian conflict is, in fact, the exception rather than the rule in Islamic history because Sunnis and Shi'a have in most places been separated or lived relatively peacefully together where they intermixed. This is the fourth time in Islamic history when the specter of an ascendant Shi'ism has occupied the Muslim community. This course will compare the three earlier putative episodes of Shi'ite ascendancy in the eighth (in Iraq), tenth (in Egypt) and sixteenth centuries C.E. (in Iran) and set these in conversation with contemporary developments. We will focus on the role of early Shi'ism as the vocabulary of an alternative vision of the legitimacy of the Islamic state, the ideas of the imamate and martyrdom, the emergence of Isma'ili and Twelver versions of Shi'ism, the conversion of Safavid Iran to Shi'ism, ecumencial efforts in the mid twentieth century, the Iranian revolution of 1979 and after.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation based upon class participation and two short (4–6 page) essays and a final research paper (12–15 pages)

REL 235 Muhammad and the Rise of Islam (D) Crosslistings: HIST 206/REL 235/ARAB 206
This course will trace the historical development of Islam, one of the world's major religions and multi–cultural traditions, from early in the seventh century until the establishment of the Safavid Empire in 1501. The first part of the course will focus on the life and career of Muhammad, as prophet and statesman, and how he became an ideal for public and private behavior. The main part will consider the emergence of Islamic scripture, institutions, festivals, theology, and law and how a religion that had its origins in the Arabian Peninsula developed in multifaceted ways in Asia, Africa, and Europe. One major aim of this course is to give voice to Islamic texts and especially to how Muslims have defined themselves in multiple socio–historical contexts and how that context may have determined their interpretations of the Qur'an and the legacy of the Prophet Muhammad. Because the course explores the myriad reactions to the rise of Islam in different cultural communities, it is part of the Exploring Diversity Initiative.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on short quizzes and papers, a midterm, and final project
Prerequisites: none; open to all **Enrollment Limit:** 40 **Expected Class Size:** 25–30 **Enrollment Preferences:** students who are majoring in History, Religion, or Arabic Studies or intending to do so

REL 236 The Greater Game? Central Asia and its Neighbors Yesterday, Today and Tomorrow Crosslistings: REL 236/HIST 216/ASST 236/INST 101
The collapse of the Soviet Union, the recognition of untapped mineral wealth, and Islamic resurgence have all led to an increased focus on Central Asia and its neighbors, Russia, China, the Middle East. This course will be an introduction to the Caucasus, the Central Asian Republics, Xinjiang and Mongolia and the interests of their neighbors, including now the United States in those areas. This will be a lecture course that will introduce the salient themes and issues that are necessary for understanding these areas. The course will inevitably be deeply comparative focusing on themes of "the clash of civilizations," the construction of national identities, notions of ethnicity and the treatment of ethnic minorities, resurgent religious movements, and the relation of state and civil society. This course will also function as an introduction to doing social scientific research on these areas and special attention will be devoted to the preparation of a research paper.
Class Format: lecture/discussion **Requirements/Evaluation:** weekly responses, three short essays (4–6 pages), and one research paper (12–15 pages)

Prerequisites: none **Enrollment Limit:** 30 **Expected Class Size:** 15 **Enrollment Preferences:** first–year students and sophomores

REL 239(F) The Modern Middle East (D) Crosslistings: HIST 207/JWST 217/REL 239/ARAB 207/INST 101/L
This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination. This course is part of the Exploring Diversity Initiative because it compares the differences and similarities between different cultures and societies in the Middle East and the various ways they have responded to one another in the past.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on participation, 2 short papers, quizzes, midterm and final exam
Prerequisites: none; open to all **Enrollment Limit:** 40 **Expected Class Size:** 30–40 **Enrollment Preferences:** completion of course admission survey if overenrolled

REL 242(S) Women, Gender, and Sexuality in Islam Crosslistings: REL 242/ARAB 242/WGSS 242
The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women¿s own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.
Class Format: seminar **Requirements/Evaluation:** active class participation (including a presentation on the reading materials), short weekly reflections, and one final research paper (10–15 pages)
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 10 **Enrollment Preferences:** Religion, Women's, Gender and Sexuality Studies and Arabic majors

REL 244(F) Mind and Persons in Indian Thought Crosslistings: REL 244/ASST 244
In this course, we follow the conversation among Indian philosophers concerning the self and the nature of consciousness. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka philosophy, which radicalizes the critique of the self into a global anti–realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central ideas that have challenged philosophers in both traditions.
Class Format: lecture/discussion **Requirements/Evaluation:** full attendance and participation, three short essays (6 pages)
Prerequisites: prior exposure to Buddhism or philosophy, or permission of the instructor **Enrollment Limit:** 18 **Expected Class Size:** 18 **Enrollment Preferences:** selection based on the basis of relevant background

REL 245 Tibetan Civilization (D) Crosslistings: REL 245/ASST 247
Often depicted as Shangrila, a mythical and ideal country, Tibet has had the dubious privilege of being a focus of Western fantasies. One cannot but wonder about the motives and sources of this mythology. Although this course examines these representations, its main focus is an immersion in the cultural and historical aspects of Tibetan civilization, which give students the tools with which to understand Tibetan culture from the inside. As such this course is part of the Exploring Diversity Initiative. We first consider the early history of Tibet, the introduction of Buddhism, the relations between Buddhism and the indigenous religion, and some of the stages in the development of Tibetan Buddhism. We also examine the historical developments that led to the development of the institutions (such as the Dalai–Lama) unique to Tibet and some of the aspects of the culture that these institutions helped to create (such as gender roles, family structure and social stratification). Finally, we consider the more recent tragic events and examine the profound transformations that they have brought. Throughout the course, we consider the central role of the complex interaction between Buddhism and politics in Tibetan history, both in the pre–modern period and in more recent times, when the Tibetan people have faced the challenge of how to use their institutions and culture to resist oppression. In this way, we get a footing in the Tibetan world, and the indispensable assessment of Western representations of Tibet becomes not just an exercise in self–reflection but also a gate to a better understanding of a remarkable but tragically threatened civilization. This course, which explores in depth Tibetan cultural and the tragic cross–cultural misunderstandings that threaten its integrity, is part of the Exploring Diversity Initiative.

REL 246T(F) India's Identities: Religion, Caste, and Gender (D) (W) Crosslistings: REL 246/ANTH 246/WGSS 246/ASST 246
This course considers India's contradictory legacy as a booming Asian democracy and fragile society built upon deep and enduring divisions. India's rapidly growing populace and landscape is often described in terms of multiple identities or fragmenting oppositions: Hindu/Muslim, rich/poor, high caste/outcaste, male/female, and so forth. This course deconstructs the historic roots and ongoing causal factors that produce structural violence against women and religious minorities in modern India. It highlights the social practices that have produced critical axes of difference around the themes of religion, gender, and sexuality using key moments or regions of India as points of departure. It contrasts the explosive effects of religion, gender, and caste during the tragedy of Partition with the ongoing production of communal and gender–based violence in India today, using Kashmir and New Delhi as microcosms for our study. We will consider the ways that multiple subjectivities and polarized identities intersect with individual agency to produce a social landscape of hierarchy and conflict across India today. We are also interested in the socio–cultural forces that reproduce or shore up these binaries as much as third terms or middle paths that attempt to transcend or diffuse them. For instance, we explore the ways that Buddhism is and is not a middle way between Hindu/Muslim conflict in Indian Kashmir and how the notion of a third sex is and is not a middle term that transcends the gender binary of male/female. Course resources include ethnographic and sociological analyses, oral histories, and popular media that complicate our understanding India's diverse and fragmented society. This course fulfills the Exploring Diversity Initiative by theorizing the ways that difference has been used to effect profound historical, social, and individual changes in the Indian subcontinent.

REL 248(S) Body Politics in South Asia: Gender, Sex, Religion, and Nation (D) Crosslistings: REL 248/ASST 248/ANTH 248/WGSS 249/INST 248
This course examines the relationship between body, gender, sex, and society in South Asia, using three countries and religions——India, Sri Lanka, and Bangladesh, and Hinduism, Buddhism, and Islam——as its foil. The course uses the body as a lens by which to unpack South Asian discourses that link body and sexuality with nation, community, and population. In particular, it explores a South Asian sociology that links individual and social bodies in ways that occasion solidarity as well as social suffering, violence as well as communal cohesion. How do bodies come to signify the purity or prosperity of the nation or community and with what social or discursive effects? We begin by unpacking foundational theories of the body as proposed by Mauss, Foucault, Douglas, and Bourdieu in order to better understand how local discourses of the body help produce gender and other social hierarchies in South Asia. By considering how the human body can serve as a map for society and vice versa, we examine both classical discourses and modern institutional practices of the body including the temple, the monastery, the mosque, and the mendicant, as well as bodily practices such as yoga, celibacy, sex work, and new reproductive technologies. We also analyze how the body has served as a symbol of nation, community, and social health. Throughout, we are interested in the cross–cutting effects of gender and sex in perpetuating structural hierarchies and social suffering around the body in South Asia.

REL 250 Scholars, Saints and Immortals: Virtue Ethics in East Asia (D) Crosslistings: REL 250/ASST 250
In East Asian cultures, as in the United States, popular conceptions of morality typically take their shape, not from explicit rules, but from *moral paragons*—stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a pantheon of "secular saints" as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal scholar–bureaucrat to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of "Virtue Ethics." This approach has come to be seen by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro–American philosophers such as Nietzsche and MacIntyre as well as primary texts in translation by Chuang–tzu, Confucius, Shantideva and others. This course fulfills the Exploring Diversity Initiative by providing students with tools for cross–cultural analysis of ethics and moral paragons, as part of how societies manage difference and articulate hierarchies of privilege and power.

REL 251 Zen Buddhism: History and Historiography Crosslistings: REL 251/ASST 251
Because mystifying references to Zen are strewn throughout American popular culture–from episodes of the Simpsons to names of perfumes and snack foods–most Americans have an image of Zen Buddhism that is disconnected from anything actually practiced in East Asia. This course offers a corrective to this image by familiarizing students with both the history of Zen and the historiographical roots of these popular perceptions. This course will examine the origins of Zen (Ch'an) in China, trace its transmission to Japan, and cover its development in both cultural contexts. It will conclude with an examination of Zen's unique role in American popular culture. The course will enrich the conventional image of Zen by addressing its involvement with power and governance, gods and demons, mummies and sacred sites, sex and violence, nationalism and scholarship. Texts will include selections from primary works in translation (*The Platform Sutra of the Sixth Patriarch*, *The Gateless Barrier*, *The Lancet of Seated Meditation*) as well as selections from secondary literature including Suzuki, *Zen and Japanese Culture*, Victoria, *Zen at War*, and Faure, *The Rhetoric of Immediacy.*
Class Format: lecture/discussion **Requirements/Evaluation:** participation in class discussion, short response papers (2–3 pages), a mid term exam, and a take–home final exam

REL 253(S) Spiritual Crossroads: Religious Life in Southeast Asia (D) Crosslistings: ANTH 233/ASST 233/REL 253
No region of the world presents a richer tapestry of religious beliefs, practices, and institutions than Southeast Asia. Buddhism, Hinduism, Christianity and Islam are all to be found and all of them interpenetrate and contend with each other and with a deep undergirding of animism, shamanism, and mystical folk belief systems. This course will survey these religious traditions through time and space, looking in particular at the growing tension between religion and the state as fundamentalism and religious militancy have spread into the region in recent times. All of Southeast Asia will be covered, but particular attention will be devoted to Indonesia, where religious blending and the growth of new fundamentalism are both especially marked.

REL 255(F) Buddhism: Ideas and Practices Crosslistings: REL 255/ASST 255
This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?
Class Format: lecture/discussion **Requirements/Evaluation:** full attendance and active participation; two essays

REL 256 Engendering Buddhism: How Women and Men Shape and Are Shaped by Buddhism (D) (W) Crosslistings: REL 256/WGSS 256/ANTH 256/ASST 256
This course looks at how gender has shaped Buddhism as well as how Buddhism has shaped gender. Most generally, it considers the myriad ways that Buddhist soteriology and practice produce the very gender differences they purport to overcome. How have the Buddha and his far–flung disciples institutionalized gender differences in spite of their putative goal of transcending duality? We examine the varying experiences of women and men in Buddhist societies and literatures as a lens by which to analyze the pervasive operation of social and gender hierarchies. Last but not least, we discuss how well feminist and American revisions of Buddhism have transformed gender and other forms of difference. Our analysis revolves around several interdependent themes. (1) How do female and male bodies become the subject of a specific set of Buddhist gazes? What does Buddhist discourse say about the possibility of gaining enlightenment in the female body? (2) How do gender divisions reflect deeper social divisions such as class and race in Buddhist discourse? (3) How have feminist deconstructions of Buddhism transformed gender and social hierarchies in the contemporary world? This course fulfills the Exploring Diversity Initiative by seeking to theorize the ways that Buddhism has produced and reinscribed gender differences and social hierarchies.

REL 257(S) Tibetan Buddhism: Embodying Wisdom and Compassion
We begin by considering the basic ideas and practices of Tibetan Buddhist traditions and the ways in which the ideals of wisdom and compassion have shaped Tibetan culture. We then proceed to examine particular aspects of the tradition such as the role of the teacher or lama and his or her various manifestations, from the exotic figure of the tantric guru to that of the Dalai Lama, a charismatic world teacher engaged in both religious and political affairs. We also examine a wide range of lay and monastic practices, from the life of large monasteries and their unique culture to the practices of nuns and lay people. Throughout this course, we consider not just the variety of exoteric practice forms but also the esoteric tantric tradition that pervades Tibetan life. We examine the various meditative practices that revolve around this profound and often misunderstood tradition. In doing so, we do not consider tantra as just a set of strange practices sometimes revolving around sex and violence. Rather we examine how it manifests a philosophy of embodiment that has profound implications for thinking about who we are as human beings.

REL 259 Ethics of Jewish American Fiction (W) Crosslistings: REL 259/ENGL 259/JWST 259
After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes, but they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Cynthia Ozick, Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?
Class Format: seminar **Requirements/Evaluation:** one take–home exam on theoretical approaches to ethical criticism; five 5–page essays (one of which will be a slightly longer re–write)
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 18 **Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and English majors

REL 260(F) History of the Book Crosslistings: CLAS 200/ASST 200/HIST 392/REL 260/COMP 280
From ancient clay tablets, bamboo strips, and papyrus rolls to modern hardbacks, paperbacks, and e–readers, no object has so broadly and deeply represented the capacity for humans to create, preserve, and transmit knowledge, information, and ideas as the book. Books have been worshiped and condemned, circulated and censored, collected and destroyed. From works of art to ephemeral trash, they have been public and private, sacred and profane, magical and commonplace. Likewise, notions of the book have influenced every subsequent form of communication and transmission, whether we are browsing film and song "libraries" or "scrolling" down "pages" on the web. This course will explore aspects of the material, social, cultural, and intellectual history of the book, from the invention of the earliest writing systems through the modern development of digital media. Our inquiry will span the globe and the millennia, but we will pay special attention to the ancient and medieval Chinese, Greek, and Latin traditions and their enduring influence in the modern world. Topics will include orality and literacy, manuscript production, the invention and spread of printing, typography, reading culture, notions of authorship, libraries and collections, censorship, and the digital book. Through a variety of readings, hands–on exercises, and interactions with our abundant library resources, we will investigate how the changing form and function of the book interact across its long and diverse history. *All readings are in translation*.

REL 261(S) Rastafari: Dread, Politics, Agency Crosslistings: AFR 299/PSCI 233/REL 261
The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan–Africanism, Rastafari has evolved from a Caribbean theological movement to an international political actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio–visual works on the political economy of late colonial Jamaica, core Rastafari thinking, political theology, the role of reggae music, the notion of agency, and the influence of Rastafari on global politics.
Class Format: lecture **Requirements/Evaluation:** attendance and participation, weekly reading e–response papers, two short essays, and a group lyrics and politics final project

REL 262T Time and Blackness (W) Crosslistings: AFR 208/AMST 208/REL 262
The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, "Time and Blackness," we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from — and create —paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African–American "timescape"?
Class Format: tutorial **Requirements/Evaluation:** assignments will include six 2–page response papers; two 5–page writing assignments; and a final, 10–page review essay on how time is understood in a genre of writing
Prerequisites: none **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** preference will be given to concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

REL 265(S) Sacred Cinema: Black Religion and the Movies Crosslistings: AFR 316/REL 265/AMST 316
Although they represent different genres, what popular films *Madea's Family Reunion* (2006), *First Sunday* (2008), *The Princess and the Frog* (2009) have in common is that they each offer complex and at times contradictory images of black religious expression in North America. These films, which present varied perspectives of African American experience, implicitly and explicitly engage themes inherent to the study of religion, such as the role of faith in decision–making processes and the use of religious tradition as a means of reinforcing or contesting socio–cultural norms. This course is as much about the use of film to study black religious expression as it is about the use of paradigms of religious thought to study the intersections of gender, race, and religion in film. We will study films of different genres to facilitate discussion about the various dimensions of black religious expression. Conversely, we will use images, metaphors, and teachings found in Religious Studies to discuss what appears on screen. Through interdisciplinary, critical approaches in Film Studies and Popular Culture Studies, this course will examine how black religious expression pervades modern cinema, and will offer constructive strategies for engaging in dialogue with this phenomenon.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on class participation, film viewings, two review essays, and the completion of an original documentary/short film
Prerequisites: none **Enrollment Limit:** 13 **Expected Class Size:** 13 **Enrollment Preferences:** Africana Studies concentrators, Religion majors

REL 270T Father Abraham: The First Patriarch (W) Crosslistings: REL 270/JWST 270/COMP 272
The figure of Abraham in the Hebrew scriptures is interesting for at least two reasons: he comes first and seems more universal rather than particular. He first received the covenant and the promise of the land of Israel, but before the full revelation of the Torah to Moses. He fathers both the Jewish people and the Arabs and the significance of that wider identity was later captured both by Christianity in the work of Paul and in the Qur'an where Muhammad identified with Abraham as the prototypical and non–sectarian monotheist prophet. This course will trace the figure of Abraham by a close and multidisciplinary reading of the Jewish, Pagan, Christian and Muslim sources on Abraham. Our task is not to decide on the historicity of Abraham, but rather to explore the history of the figure and his continuing relevance for today in understanding Jewish/Christian/Muslim conflict and cooperation. We will begin with an intensive reading of the Genesis material on Abraham (12–25), where the issues of idolatry and monotheism, the covenant and circumcision, relations of the patriarch to his women and sons, and primal model of faith all are articulated. We will then turn to later Jewish developments in the figure of Abraham in midrash and apocalypse. We will then explore the view of Abraham in the classical world, the uses made of Abraham by Christianity as it broke from an emerging Rabbinic Judaism and the development of Abraham's specific connection with the view of the afterlife. We will then treat the figure of Abraham in the Qur'an and later Islamic traditions. We will conclude with an examination of the cult surrounding Abraham in the city of Hebron, a currently contested site on the West Bank where we will consider the current religious practice regarding Abraham by both Jews and Muslims. The purpose of this tutorial is to read closely a variety of primary religious texts and to explore the variety of tools available for the reading of those texts.
Class Format: tutorial; each student will write and present orally five 5– to 7–page essays every other week on the readings for the week; those not presenting an essay will be responsible for offering an oral critique of the work of their colleague. **Requirements/Evaluation:** in addition to weekly requirements, students will write a final 7– to 10–page essay; evaluation will be based on written work and critiques
Prerequisites: none; open to all **Enrollment Limit:** 10 **Expected Class Size:** 10

REL 273(F) Heroes, Saints and Celebrity (W) Crosslistings: ANTH 222/REL 273
This course examines the ways in which cultures select, ritually celebrate, institutionally harness, and ultimately devour people designated as 'extraordinary'. We will begin by considering cultural archetypes and theories of the hero and how heroism has been understood in different eras and cultural contexts. Using Weber's theory of charisma as a foundation, we will look at a number of specific case studies to evaluate the relationship between individual creativity and action and the demands of social conformity and control. Finally, we will examine how charisma is commoditized in the form of the celebrity in contemporary American culture.

REL 274(S) Ritual, Power and Transgression (W) Crosslistings: ANTH 299/REL 274
Anthropology began, in part, as an effort to study "savage" cultures before they disappeared under the onslaught of modern civilization, and indeed most of the societies investigated by early anthropologists no longer exist or survive in completely altered form. As they lost their original object of study, however, anthropologists also discovered that the tools and concepts developed in the study of "primitive" cultures could be applied to the contemporary world. Exploring this possibility, this course examines the relevance of fundamental anthropological concepts that have developed through the structural and symbolic study of myth and ritual to the contemporary world in which we live. The course is divided into four sections. In the first unit, we read and discuss the work of Mary Douglas, Victor Turner, and Marshall Sahlins on myth and ritual, focusing in particular on the ways in which different cultures construct categories of inclusion and exclusion, safe and dangerous, pure and impure, while also creating the "in between" spaces within which both creativity and transgression emerge. On this foundation, we move to the second unit in which we discuss the structural relationship between ritual, power, and transgression in western contexts, taking the majority of our examples from early modern European and American history. In the third section of the course, we consider what an anthropological perspective can reveal about some seminal events in 20th century history, and we end the course by considering how anthropological theory informs two critical areas of current concern: immigration and national security.
Class Format: seminar **Requirements/Evaluation:** class participation, two short response papers, 10–page research paper, final exam

REL 281(S) Religion and Science
In the last few years the deniers of religion such as Dennett and Dawkins have forcefully argued that recent scientific developments show the degree to which religion is irrelevant to a modern understanding of what it means to be human. Atran and Boyer have made a similar case, arguing that recent progresses in our understanding of human cognition demonstrate that religion is a purely natural phenomenon that has little if any value for human development. Theologians such as Haught and Polkinghorne have rejected these views, arguing that a proper understanding of scientific developments such as evolution and quantum mechanics suggests religiously relevant views of the universe and our place therein. This course considers these competing perspectives while offering critical reflections on the views and categories involved in these controversies. We also examine the works of reflective naturalists such as Bellah and Herrstein, who argue that far from showing the irrelevance of religious ideas and practices, the new mind and life sciences suggest a much more nuanced view according to which religion is both grounded in the natural world and central to the development of human culture. Hence, it cannot be easily discounted as irrelevant to a scientifically informed understanding of what it means to be human.

REL 284 What's At Work? (W)
Curse for sin, opposite of fun, or curiously peripheral, as in the now conventional career advice, "Do what you love and the money will follow," work has generally gotten short shrift, at least by the male authors with soft hands one usually reads in college. This course will examine shifting attitudes and approaches to human labor in the history of western thought. We will begin with a multifaceted consideration of why we work and the ways in which approaches to human labor intertwined with reflections on human inequality, especially slavery and its justification, and the identification between poverty and the resistance to hard work. With the abolition of slavery and consequent arrival of modernity, two trends are strikingly added to the traditional discourses on work: the workplace as the public site for the achievement of justice, e.g., a living wage, workplace safety and equality of opportunity; and the articulation of individual identity and worth in the context of work, e.g., notions of profession, career and status. The legacy of both those trends is still very much with us, but the twentieth century dislodged the focus on humans as laborers in favor of a view of them as consumers. That is in part a consequence of the continuing shift from a production to a service economy, but also is intimately connected with the fortunately incomplete licensing of desire and leisure that are becoming the hallmark of both our current consumer economy and workplace. These competing issues leave us with the central split in American society between the slightly larger portion of Americans who say they 'get a sense of identity from their jobs' and the remaining significant minority who describe their jobs as 'just what they do for a living.' This course will explore some of the reasons for this fundamental cleavage. In addition to readings in the classics of Western thought including the Bible, Hesiod, Plato, Aristotle, St. Augustine, Hobbes, Rousseau, Adam Smith, Kant, Hegel, Marx, Nietzsche, Freud and Weber, we shall explore contemporary portrayals of work and workplaces in literature and film and conclude with contemporary authors including Svendsen, Muirhead, Florida, Gini, Lindsay, Sennett.
Class Format: lecture/discussion **Requirements/Evaluation:** 4 essays (4–6 pages) in different genres: philosophical, ethnographic, ethical case study, personal reflection

REL 285T Haunted: Ghosts in the Study of Religion (W)
Haunting offers a powerful way to speak about forces that affect us profoundly while remaining invisible or elusive. "What is it that holds sway over us like an unconditional prescription? The distance between us and that which commands our moves–or their opposite, our immobility–approaches us: it is a distance that closes in on you at times, it announces a proximity closer than any intimacy or familiarity you have ever known" (Avital Ronell, Dictations: On Haunted Writing [1986] xvi–xvii). The figure of the ghost has been developed by those seeking to grapple with the ongoing effects of modern slavery, colonialism, state–sponsored terrorism, the holocaust, and personal trauma and loss. Building upon the insights about memory, history, and identity that haunting has been used to address, this course will challenge you to explore the study of religion by way of its "seething absences." We shall ask how the study of religion has endeavored to address loss, trauma, and its persistent effects, what "holds sway" over various approaches to the study of religion, as well as how "religion" constitutes its own ghostly presence, haunting other domains.
Class Format: tutorial; meeting in pairs, each student will either write and present a paper or respond to their partner's paper **Requirements/Evaluation:** two 1–page papers (written and presented), five 5–page papers, and five oral critiques (based on written notes) of their partner's paper; students will revise two papers

REL 286 Shopping: Desire, Compulsion and Consumption
If the workplace was the essential site of modernity, then the shopping mall is the quintessential site of postmodernity; the place where consumption trumps production and, it has been argued, our only remaining public space. This course will focus on the experience of shopping, focusing on three themes. First we will explore the manufacturing of desire on which consumption must depend. We will critique the tired critiques of advertising and explore in more depth the neurotic and erotic dimensions of the creation of desire for objects. We will then turn to some comparative and historical analysis contrasting the experience of shopping in traditional bazaars and contemporary malls, as well as exploring the history of consumerism from the eighteenth century through the current phenomena of globalization. Finally, we will explore the place of shopping in our collective imaginations, attending especially to the relation between the gendering of the shopping experience and expressions of contempt and outrage toward consumerism, with a special focus on the discourse on Christmas in American society.
Class Format: lecture/discussion **Requirements/Evaluation:** three essays (4–6 pages) and one ethnographic account (4–6 pages)

REL 287 The Dynamics of Globalization: Society, Religion and the Environment (D) Crosslistings: REL 287/ENVI 287
This course offers a theoretical reflection on the social, cultural and environmental dynamics of globalization and their consequences for the nature and place of religion. Rather than argue for or against globalization, we first examine the nature of this new configuration and its relation to (post)modernity, asking questions such as: What are the cultural and social dynamics of globalization? What are the effects on the nature of the state and the political practices that take place in the global world? What are its environmental consequences? We then shift to examining the role of religion, arguing that its renewed relevance is a function of the socio–cultural transformations that globalization brings about, particularly the loss of community and the increasing atomization of individuals. We conclude by examining some of the perspectives created by the new religious expressions that attempt to respond to this situation, from personal spiritual quests as manifested in interest in Buddhism, ecology or mountain climbing, to various forms of fundamentalism, such as Evangelicalism, the fastest growing religious movement in the Americas, and the most radical forms of Islamicism. Reading list: Harvey, *The Condition of Postmodernity*; Castells, *The Rise of the Network Society*; Bauman, *Globalization*; Kivisto, *Multiculturalism in a Global Society*; Casanova, *Public Religions in the Modern World*; Ortner, *Life and Death on Mt. Everest*; Matthews, *Global Cultura/ Individual Identity*; Shuck, *Mark of the Beast*; Roy, *Globalized Islam*. **Requirements/Evaluation:** a class presentation and a research paper (15 pages)

REL 288 Embodiment and Consciousness: A Cross–Cultural Exploration Crosslistings: REL 288/PHIL 288
This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation–based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind–sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau–Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.
Class Format: seminar **Requirements/Evaluation:** regular practice of meditation, a class presentation, a short essay (6–pages); a long final research paper (15 pages)
Prerequisites: some background in either Psychology, Cognitive Sciences, Philosophy or permission of instructor **Enrollment Limit:** 18 **Expected Class Size:** 18 **Enrollment Preferences:** Religion and Philosophy majors

REL 290T Explorations of the Afterlife (W)
From Heaven to Hell, Valhalla to Hades, the Fields of Aaru to the Land of Yellow Springs, all cultures have generated images of other worlds that lie beyond death. By considering examples from a range of different cultures, this tutorial will guide students on an exploration of the topographies of these shadow–lands. In an effort to map the continuities and discontinuities between these visions of the hereafter, we will consider them as reflections of existing social hierarchies, examining their underlying assumptions about punishment and redemption, family, and ethics. Along the way, we will discuss culturally specific notions of death and

mourning, attitudes towards the bodies of the dead, and controversies about the nature of the soul. Texts will include selections from primary works in translation, such as Virgil's *Aeneid*, Dante's *Inferno*, and *The Tibetan Book of the Dead*, as well as selections from secondary literature, including Teiser's *The Scripture on the Ten Kings*, Gauchet's *The Disenchantment of the World*, and Bremmer's *The Rise and Fall of the Afterlife*.

REL 291 Religion and the American Environmental Imagination (W) Crosslistings: ENVI 291/REL 291/SOC 291
This course examines the relationship between religious and environmental thought in the modern United States. Focusing on the complex and closely linked legacies of Christianity, secularism, and popular spirituality, we will explore the religious and anti–religious roots of contemporary environmental discourse. Along the way, we will pursue a set of vexing questions about environmental thought: Is environmentalism a religion? If so, what kind of religion is it? If not, why not (and why do we even ask)? Is anti–environmentalism religiously motivated? Could religion be the cause of our ecological crisis? Could it be the solution? For answers, we will look to the writings of thinkers such as John Muir, Edward Abbey, Rachel Carson, Aldo Leopold, and Wendell Berry, as well as a number of lesser–known authors. We will read these authors alongside recent scholarship in the social sciences and humanities to understand how their thinking was influenced by social and environmental trends such as urbanization, industrialization, immigration, and globalization. We will also ask how religion has intersected with gender, race, class, and ethnicity to shape environmental politics in the twenty–first century. Finally, we will pay particularly close attention to episodes of conflict and cooperation between the environmental movement and religious conservatives during the past forty years, and we will analyze popular religious media from this period alongside the writings and visual productions of environmentalists.
Class Format: seminar **Requirements/Evaluation:** a 15– to18–page research paper and several shorter writing assignments

REL 293 Religion, Play, and Politics
Is there a distinctive "play" element in human culture? If so, what should count as play? Some likely candidates may be: joking, games, festivals, fantasy, and leisure. What about the activities that we usually describe as "religious"? In this course we will investigate the relationship between religion and play. We will read from theorists in a wide variety of disciplines who have written about play: philosophers, sociologists, animal psychologists, anthropologists, and others. But we will pay particular attention to overlap in the study of play and the study of religion. We will ask, for instance: what is the play element in ritual, myth, and the devotional interpretation of texts? Is there something necessarily playful about the academic study of religion itself? Once we have investigated the relationship between religion and play, we will then consider the significance of this relationship for political thinking about religion. Perhaps we should respect religious diversity out of respect for the variety of ways that people want to play? How might a deeper understanding of play help us to address ongoing religious conflicts? We will read from Johan Huizinga, Brian Sutton–Smith, Gordon Burghardt, Victor Turner, Donald Winnicott, Bernard Suits, Sam Gill, Robert Bellah, Wendy Doniger, Friedrich Schiller, Hans–Georg Gadamer, Mikhail Bakhtin, Jacques Derrida, and others.
Class Format: lecture **Requirements/Evaluation:** three short papers (3–5pages) and one final research paper or project

REL 296 The History of the Holocaust Crosslistings: HIST 338/JWST 338/REL 296
In twenty–first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians' efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians' debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.
Class Format: mostly discussion **Requirements/Evaluation:** evaluation will be based on class participation, a map quiz, four papers (4 pages) based on class readings, and a final research paper (6–8 pages)
Prerequisites: none; open to first–year students with instructors permission **Enrollment Limit:** 25 **Expected Class Size:** 20–25 **Enrollment Preferences:** History majors and Jewish Studies concentrators

REL 300 Dialectics and the Archaeology of Knowledge
How might one perform a philosophical study of history? How do ideas (including philosophical, artistic and religious movements) advance over time? What makes something "thinkable" in one era, but inconceivable in another? What contemporary intellectual foundations rest on false universals?
This course will address these questions and provide students with methods for exploring the historical dimension of religion. It will focus on two approaches to the philosophy of history inspired by Kant. One school (Hegel, Marx) has focused on tracing dialectical formations as the background against which all history unfolds. Another school (Foucault, Agamben) performs "philosophical archeology," which Foucault described as "the history of that which renders necessary a certain form of thought." This course will introduce students to these intertwined bodies of theory, which promise to do nothing less than expose bare the very foundations of knowledge and transform the study of history from the stringing together of events into a philosophical enterprise. Thinkers to be considered may include: Kant, Hegel, Marx, Engels, Nietzsche, Foucault, Agamben, and Jameson.
Class Format: seminar **Requirements/Evaluation:** regular participation and attendance, short writing assignments, class presentations, 10– to 15–page final paper **Enrollment Limit:** 15 **Expected Class Size:** 15

REL 302T(S) Philosophy of Religion (W) Crosslistings: PHIL 281/REL 302
Our goal in this course will be to try to determine how far reason can justify belief in God. We will spend at least half of the semester examining the best–known philosophical arguments for and against the existence of God (including the ontological argument, the cosmological argument, the teleological argument, the argument from religious experience, the argument from evil, and the argument from religious disagreement). For each one, we will first look at historically important formulations of the argument and then turn to contemporary reformulations. Our aim will be to identify and then evaluate the strongest version of each argument. After working through these arguments, we will reflect more generally on the proper roles of reason and faith in justifying religious belief. In the final section of the course, we will examine the relationship between god and morality. Authors will include Plato, Anselm, Aquinas, Pascal, Paley, Hume, Kant, Kierkegaard, Freud, Marx, and several contemporary philosophers.
Class Format: tutorial; students meet with instructor in pairs for an hour each week; emphasis will be placed on developing skills in reading, interpretation and oral argument as well as critical reasoning and writing
Requirements/Evaluation: each student will write a 5– to 6–page paper every other week and comment on his or her tutorial partner's paper in alternate weeks
Prerequisites: one PHIL course or permission of the instructor **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** current and prospective Philosophy majors

REL 304 From Hermeneutics to Post–Coloniality and Beyond (D) Crosslistings: REL 304/COMP 344
This course explores and critiques some of the resources offered by "Theory" for making sense of our contemporary situation, focusing on the nature of interpretation and its role in the construction of the self in a global world. We start with Gadamer's hermeneutics, which offers a classical formulation of the philosophy of liberal arts education, stressing the importance of questioning one's prejudices. Although this approach offers important resources for understanding ourselves in a world of cultural differences, it also has limitations, which we explore through the works of Derrida, Foucault and Said. In this way, we question some of the notions central to understanding ourselves such as identity and difference, suggesting some of the difficulties in the ever more important yet problematic project of knowing oneself. We also suggest that representation is not innocent but always implicated in the world of power and its complexities, particularly within the colonial and postcolonial contexts explored by Said. We conclude with a critique of the constructivist paradigm central to this course done from the point of view of cognitive sciences and suggest that the future of "Theory" may well be in a dialogue with the emerging mind sciences. This course, which theorizes the possibilities of cross–cultural understanding, is part of the Exploring Diversity Initiative.
Reading list: H.G. Gadamer, *Truth and Method*. F. Saussure, *Course in General Linguistics.* J. Derrida, *Of Grammatology.* P. Rabinow, *Foucault Reader.* E. Said, *Orientalism.* Agamben, *Homo Sacer.*

REL 307 Thinking Gods: Cognitive Theories of Religion
Although it is still in its infancy, the so–called "cognitive turn" has already become one of the most exciting contemporary developments in the study of religion. During the past twenty years, scholars influenced by cognitive science have begun to formulate new models and challenge old assumptions about human religiosity and its relationship to the mind. In so doing, they have articulated theories about the evolutionary origins of religious concepts, reassessed the role of memory and of counterintuitive explanations in the perpetuation of religious ideas, and developed new concepts such as "theological incorrectness" and "systematic anthropomorphism." By examining the cutting–edge work produced by members of this movement on both sides of the Atlantic, this seminar for advanced students will trace the historical roots of the cognitive turn and introduce some of its most important recent products. Authors to be considered include Sigmund Freud, Ludwig Feuerbach, Jean–Pierre Dupuy, D. Jason Slone, Pascal Boyer, Veikko Anttonen, Scott Atran, Richard Dawkins, Dan Sperber, and Ilkka Pyysiäinen.
Class Format: seminar **Requirements/Evaluation:** active participation, class presentations, short writing assignments, and a take–home final exam
Prerequisites: REL 101 or permission of instructor **Enrollment Limit:** 19 **Expected Class Size:** 15 **Enrollment Preferences:** Religion majors and Cognitive Science concentrators

REL 308 Nietzche and Religion
Few thinkers have been as controversial or as outspoken about religion as the nineteenth century German theorist/philologist Friedrich Nietzsche. His work was not understood during his lifetime, or so he thought, and there are definitely controversies surrounding the way the writings of Nietzsche ought to be applied in the early twenty–first century. We will see Nietzsche as a lonely curmudgeon who hated his rigid, Lutheran upbringing, as well as his sister, Elisabeth Förster–Nietzsche. But we will also see the many fruitful dialogues created by his fractured personality and vitriolic books which, perhaps despite his intentions, speak to religion in both a destructive and constructive way, as well as to later thinkers.
Class Format: seminar **Requirements/Evaluation:** evaluation will consist of two 5– to 6–page response papers, a midterm exam, a 10– to 15–page final paper, and thoughtful participation
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 15 **Enrollment Preferences:** Religion majors
Distributional Requirements: Division 2 *Not Offered Academic Year 2014–2015*
SEM Instructor: Glenn Shuck

REL 309 Scriptures and Race Crosslistings: REL 309/AFR 309/LATS 309
What are "scriptures," and what is "race"? How and why did these two terms come to have any relationship to each other? How and why do peoples engage "scriptures"? In what ways have "scriptures" informed how peoples imagine themselves and others? How did "scriptures" and "race" inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that "scriptures" have been employed in order to understand and develop notions of "race," and we will examine how ideas about "race" have informed the concept of "scriptures" as well as practices of scriptural interpretation. While this course will focus on the relationships between constructions of "race" in the post–1492 American world and "Christian scriptures," we will also consider a few other historical moments and places where "race" is engaged, as well as other texts and practices identified with "scriptures."
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation based upon participation, short writing exercises, a 5– to 8–page take–home midterm essay, and a 10– to 15–page final essay
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 15

REL 310 Womanist/Black Feminist Thought (D) Crosslistings: AFR 310/REL 310/WGSS 310/AMST 309
This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color—particularly black women—are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies. Fulfilling the EDI requirement, this course will explore how womanism/black feminism can be a bridge for empathetic understanding of diverse experiences, and will examine the varied social, political, and historical contexts that led to the formulation of womanism/black feminism as a tool to critique power and privilege.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on class participation, three short response papers, and the completion of an original research paper or project

REL 311 Black Ministerial Imaginations: Griots, Athletes, and Maestros Crosslistings: AFR 311/REL 311
In one of the most memorable lines from the classic Souls of Black Folk, W. E. B. Du Bois described the Black minister as "the most unique personality developed on U. S. soil." This course will draw from Du Bois's social–psychological portrait of the minister to explore how the ministerial personality appears across a number of social arenas beyond the religious sphere, including politics, sports, and music. We will investigate the complex social dynamics of race and gender surrounding Black ministerial expressions, such as Barack Obama's campaign for the U.S. presidency; Mike Singletary's career as a Hall of Fame linebacker for the Chicago Bears, motivational speaker, and Head Coach for the San Francisco 49ers; and John Coltrane's "A Love Supreme."
Class Format: discussion **Requirements/Evaluation:** evaluation will be based upon class participation, a few short papers, and a final research paper
Prerequisites: none; open to all **Enrollment Limit:** 15 **Expected Class Size:** 10 **Enrollment Preferences:** Africana Studies concentrators

REL 315 The Sociology of Black Religious Experience Crosslistings: AFR 305/REL 315/SOC 305/AMST 304
The United House of Prayer For All People. The Nation of Islam. New Birth Missionary Baptist Church. The African–American Buddhist Retreat at Spirit Rock Meditation Center. While each of these groups reflects a different spiritual tradition, all are examples of the rich religious expressions of Black Americans. This course will introduce students to the landscape of Black religious practices in the United States. We will begin with a historical survey of the literature on Black religions. Our review will yield some of the primary themes of the Black religious experience—the injustices of modern racism, the significance of liberation, and continued meaning of Africa as a homeland. We will then investigate how secular processes like industrialization, commodification, and the modern media, alter understandings of the sacred in Black experience.
Class Format: seminar/discussion **Requirements/Evaluation:** evaluation will be based upon class participation, 2–3 short papers, and a final research paper
Prerequisites: none; open to all **Enrollment Limit:** 15 **Expected Class Size:** 10 **Enrollment Preferences:** Africana Studies concentrators and Anthropology/Sociology majors

REL 317(F) Disenchantment, Modernity, and the Death of God

A great many theorists have argued that the defining feature of modernity is the departure of the supernatural. They often argue that magic, religion, and some sense of cosmic significance have been replaced by technology, calculation, and bureaucratic protocol. This course will be driven by one question: Are they right? Put differently: Do cities and computers generate their own type of magic? Is God in fact dead? Religion clearly has not vanished, but has it become less authentic? Does the dissolution of Christian ethics produce nihilism or the positive revaluation of values? Does capitalism turn everything into a commodity or does it commercialize wonder? Does modernity mean alienation from nature, a withering of social community, the end of art, and a rejection of history, or is it humankind's liberation from the dogmas of the past? Will science and reason ultimately sweep away belief in ghosts, angels, and demons, or will we always be haunted?
Students will read the major theorists of secularization, modernization, and disenchantment and will conduct independent research projects on various modern attempts to revive magic and re–enchant the world. Students will be instructed in the use physical and digital archives for original primary text research. Possible topics for student exploration are vast and include: occult sciences and new religious movements such as the Golden Dawn, Spiritualism, Theosophy, Voodoo, Neo–paganism, Wicca; and various artistic movements including Symbolism and Surrealism—all of which promised to supply antidotes to the meaninglessness of the modern age. Authors to be read may include: Nietzsche, Novalis, Comte, Max Weber, Tonnies, Walter Benjamin, Bernard Stiegler.
Class Format: seminar **Requirements/Evaluation:** regular attendance and participation, short weekly reflection papers, and a 15– to 20–page research paper
Prerequisites: not open to first year students **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** Religion majors

REL 318 California: Myths, Peoples, Places (W) Crosslistings: LATS 318/AMST 318/REL 318/COMP 328/ENVI 318
"Now I wish you to know about the strangest thing ever found anywhere in written texts or in human memory...I tell you that on the right–hand side of the Indies there was an island called California, which was very close to the region of the Earthly Paradise." As far as we know, the name "California" was first written in this passage by Garcí Rodríguez de Montalvo, ca. 1510. Within a few decades, it came to be placed first on the peninsula of Baja California and then upon a region stretching up the Western coast of North America. What aspects of this vision are still drawn upon in how we imagine California today? How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as "sprawling multicultural dystopia," and California as "west of the west."
Class Format: seminar **Requirements/Evaluation:** this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3–page review essay with mandatory revision, one 5– to 8–page midterm review essay, and a final 10– to 15–page comparative review essay
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 15 **Enrollment Preferences:** none

REL 326T(S) Queer Temporalities (W) Crosslistings: REL 326/LATS 426/WGSS 326/COMP 326
How do we experience and represent time, and what factors might account for both our experiences and our representations? What are some of the ways that people experience and ritually mark the passing of time? What are some of the different ways that people have made sense of time and themselves in time? Especially for individuals and peoples who have been denied certain self–representation and narratives of place, how do competing notions of time, history, space, and location get negotiated? In this course, drawing from within the broad corpus of queer theory (including theorists such as Gloria Anzaldúa, Elizabeth Freeman, J. Halberstam, and José Esteban Mu&#241oz) we will examine some non–linear, non–normative, and interruptive approaches to making sense of time, space–time, and self within time. On the one hand, we will consider theorists who specifically question and challenge what José Esteban Mu&#241oz dubs the "linearity of straight time," and we will turn to a set of issues with regard to family and sexuality, especially critiques of normative lifecycle events and rituals that have reconfigured experiences and representations of time and place. On the other hand, we will also work with queer theory as it explores alternatives to normative conceptualizations of time and place that have already existed in the past. Hence we will look not only to queer theory as it reads more contemporary negotiations of sexuality, identity, time, and space–time; we will also consider how some contemporary theorists have read previous historical examples.
Class Format: tutorial **Requirements/Evaluation:** evaluation will be based on class attendance, analytical essays, responses, and revised essays
Prerequisites: none **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** majors and concentrators in Religion, Latina/o Studies, Comparative Literature, and Women's, Gender, and Sexuality Studies or students who have previous coursework in those programs
Distribution Notes: meets Division 2 requirement if registration is under REL, LATS or WGSS; meets Division 1 requirement if registration is under COMP
Extra Info: Pairs will meet with the instructor for one hour each week. Almost every week, one student from the pair will write a 5–page analysis of the week's reading. The other student will respond orally with a 2–page response to their partner's paper.
Pairs will also prepare a midterm synthesis, and students will revise two of their 5–page analytical papers: one from the first half of the semester, and one from the second half due at the end of the semester.

REL 327 Theory after Postmodernism: New Materialisms and Realism Crosslistings: REL 327/COMP 327
Since the 1970s much of the academy has labored under a particular form of linguistic skepticism (often called postmodernism or poststructuralism) that is directed at the destruction of stable conceptions of subjectivity and meaning. It is often said that everything is a text and that all knowledge is power. But just as the typewriter has given way to the computer and disco to dubsteb, as we exit postmodernity new philosophies are appearing on the conceptual horizon.
This course will layout this challenge to postmodernism by exploring the work of cutting edge theorists in French and American movements known as new materialism, speculative realism, and actor–network theory. Often drawing on work in ecology, feminism, science studies, neuroscience and complexity theory, these thinkers aim to reclaim knowledge of the real world, to suture the separation between the sciences and the humanities, and to overturn what they see as the dualism between matter (as dead or inert) and mind (as the locus of life and agency). By so doing, they claim to empower the object–world and dethrone humanity from the center of philosophy. Thinkers to be considered may include: Karen Barad, Jane Bennett, Bruno Latour, Catherine Malabou, Quentin Meillassoux and Bernard Stiegler.
While the relevance of these movements to the study of religion will be discussed, this course is intended for students of any major who wish to study critical, political, or philosophical theory.
Class Format: seminar **Requirements/Evaluation:** regular participation and attendance, regular short writing assignments, 10– to 15–page final paper
Prerequisites: none, although prior coursework in critical theory, political theory, or continental philosophy is strongly recommended **Enrollment Limit:** 15 **Expected Class Size:** 10 **Enrollment Preferences:** Religion, Philosophy and Comparative Literature majors
Distribution Notes: meets Division 2 requirement if registration is under REL; meets Division 1 requirement if registration is under COMP

REL 328(S) Witchcraft Crosslistings: HIST 328/REL 328
A wide variety of human cultures have accepted the existence of the supernatural, the reality of magic, and the possibility of magical transgression. Among the most common supernatural crimes is witchcraft, which societies can invoke to explain natural disasters and disease, and to blame these occurrences on specific individuals, often social outcasts. Witchcraft became a particular focus of fear and fascination in Early Modern Europe, when inquisitors, theologians and many ordinary people came to believe that Western Christendom was threatened by a vast, covert conspiracy of witches in league with the devil. Countless "witches"—most of them women—were accordingly tried, tortured and sometimes even executed. Our course will examine these bizarre events and consider what religious, cultural and intellectual factors might help explain them. We will begin by investigating the medieval legal and theological developments that enabled and encouraged the persecution of witches, and go on to study some of the most important and sensational witch trials of the later medieval and early modern periods. Throughout, we will encounter many strange and intriguing documents produced by the inquisitors who persecuted witches, the scholars who imagined their activities, and the laws that defined their crimes. No prior experience with European history is required for this seminar, which will emphasize thoughtful writing and discussion.
Class Format: seminar **Requirements/Evaluation:** several short papers and a final, longer essay
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 25 **Enrollment Preferences:** History and Religion majors
Distributional Requirements: Division 2 **Other Attributes:** HIST Group C Electives – Europe and Russia

REL 330 Modern Jewish Political Theory (W) Crosslistings: REL 330/PSCI 375/JWST 492
By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self–consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re–constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation–state, a semi–autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.
Class Format: seminar **Requirements/Evaluation:** six short (1–2 pages) response papers; two 6– to 8–page papers, each analyzing a different view in depth;
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 18 **Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track
Extra Info: a final 18– to 20–page paper that incorporates the two previously submitted 6–8 page papers, but also compares the two views and adjudicates between them
may not be taken on a pass/fail basis

REL 334 Imagining Joseph (W) Crosslistings: ANTH 334/COMP 334/JWST 334/REL 334

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, the figure of Joseph is one of the most fully–limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re–tellings, and back–story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar,s wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post–scriptural expressions together.
Class Format: seminar **Requirements/Evaluation:** 3– to 5–page weekly response papers; 15–page final paper; class participation
Prerequisites: none **Enrollment Limit:** 12 **Expected Class Size:** 10 **Enrollment Preferences:** Preference based on responses to a questionnaire

REL 337(S) Zen and Philosophy: The Kyoto School and its Legacy in Japanese Thought **Crosslistings:** REL 337/ASST 337/COMP 337
Popularly regarded as the most important philosophical movement in modern Japanese history, the Kyoto School creatively marshaled the resources of Buddhism to address the impasses of Western philosophy to startling effect. Although the members of the Kyoto School were not all of one mind, their shared aims were ambitious: to bridge the dualism between subject and object, to overcome nihilism, to explore the implications of absolute nothingness, and to surmount what they saw as the chasm between Japanese and European thought. After providing some brief background in Japanese Buddhism, we will read the writings of the core thinkers of the Kyoto School: Nishida Kitaro, Tanabe Hajime, Nishitani Keiji, and some of their later protégés. Thematically, we will explore issues in ethics, epistemology, phenomenology, metaphysics, and the philosophy of religion; and demonstrate the continued relevance of their insights in these areas. Finally, we will reflect on the group's engagement with Japanese nationalism. *All readings will be in translation.*
Class Format: seminar **Requirements/Evaluation:** regular participation and attendance, regular short writing assignments, 10– to 15–page final paper
Prerequisites: none, but previous coursework in Religion, Comparative Literature, Political theory, and/or Philosophy is strongly recommended **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** Religion, Asian Studies, and Comparative Literature majors

REL 405 Kings, Heroes, Gods, & Monsters: Historical Texts and Modern Identities in the Middle East (D) (W) Crosslistings: HIST 410/ARAB 410/JWST 410/REL 405
What role does ancient history play in modern societies? What is the role of myths and fables in the creation of national identities? This course will address the use and abuse of ancient history and archaeology in the modern Middle East. The first part will focus on some of the primary ancient texts, with special focus on Ferdowsi's epic *Shahnameh (Book of Kings)*; we will compare its themes and world view with those of the Icelandic sagas that share many similarities with the Iranian canon. In the second part of the course we will explore how ancient history, archaeology, and epic texts helped forge national identities in the modern Middle East. Our primary attention will be Iran and its relationship with the *Shahnameh*. But we will also consider the relationship of Biblical history to the establishment of modern Israel and Israeli nationalism, how contemporary Egypt relates to its Pharaonic past, the obsession with pre–Islamic history in modern Turkey, and the relationship between archaeological artifacts and ancient Mesopotamian history and 20th century Iraqi politics. Because of its comparative focus, this course is part of the Exploring Diversity Initiative.
Class Format: seminar **Requirements/Evaluation:** a final, 25–page research paper on the relationship between ancient history and a modern Middle Eastern country, shorter papers, and group work
Prerequisites: previous upper division work in History or courses on the Middle East **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** History majors, Jewish Studies concentrators, Arabic Studies majors, and other students with a strong background in Middle East studies

FRENCH

MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French–speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses above the 102 level. One of these courses must be the 400–level senior seminar during the student's final year at the College**.**

Students entering the major program at the 200–level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

1) at least three courses in French language and/or literature above the French 102 level;

2) the senior seminar during the student's final year at the College;

3) *Electives:* The remaining courses needed to complete the major must be drawn from at least *three* different departments and relate primarily to an aspect of the culture, history, society, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

History 331 The French and Haitian Revolutions
Religion 301 Psychology of Religion
All courses in French literature and language above the 103 level.

4) at least two literature courses that are taught in French.

THE DEGREE WITH HONORS IN FRENCH

Honors candidates are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three– to five–page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader).

This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether he/she can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493–W31–494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher. In addition, the student must take a proficiency test and achieve a score of "Advanced." The test will be administered by the department once a year during the month of April to all students desirous of obtaining the Certificate. Those interested should express their intent to the chair of the department by March 1 or earlier.

For students with no prior study of French, the course sequence will consist of RLFR 101–102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200–level or higher taken at Williams. For students starting the sequence at RLFR 103, five additional courses must be taken, including at least three French courses at the 200–level or higher. For all students starting at the French 103 level or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science).

See French Studies Major description above for list of possible electives in other departments.

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first–year students who register for any French course above the 101–102 level must take this test, regardless of their previous preparation.

STUDY ABROAD

French majors are strongly advised to complete part of the requirements for the major by studying abroad either during the academic year or the summer. Most American study–in–France programs require applicants to have completed a fifth–semester, college–level French course (French 105, for example) before they go abroad. A special affiliation with the Hamilton Junior Year in France program enables Williams students (who have completed 105) to participate in a comprehensive academic and cultural experience in a French–speaking environment. Credit for up to four courses towards the major can be granted at the discretion of the Department: up to 4 major credits for a semester or full year abroad. The final assignment of credit will be authorized in consultation with the student's major advisor once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance. Students interested in studying abroad need to consult with faculty members in French by the second semester of their first year. Early planning is essential. Because the academic quality of certain programs of study in France may well be beneath the pedagogical standards normally associated with a Williams education, students will receive major credit for only those programs recommended by the Department. Please consult a faculty member to find out which programs are acceptable. Normally, the Department does not administer proficiency exams (for study abroad) to any student who has not completed a French course at Williams. You can find general study away guidelines for French here.

RLFR 101(F) Introduction to French Language and Francophone Cultures
This year–long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video–observations, and film–viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French–speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*
Class Format: the class meets five hours a week **Requirements/Evaluation:** evaluation in both semester–long courses will be based on active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams
Prerequisites: none; for students who have taken less than two years of high school French **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** first– and second–year students and those with compelling justification for admission
Extra Info: students registered for RLFR 101–102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLFR 101 and 102) are taken
Distributional Requirements: Division 1
Fall 2014
LEC Section: 01 MWF 09:00 09:50 TR 08:55 09:45 Instructor: Sophie Saint–Just

RLFR 102(S) Introduction to French Language and Francophone Cultures
This year–long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video–observations, and film–viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French–speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco.*Conducted in French.*
Class Format: the class meets five hours a week **Requirements/Evaluation:** evaluation in both semester–long courses will be based on active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams
Prerequisites: none; for students who have taken less than two years of high school French **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** first– and second–year students and those with compelling justification for admission
Extra Info: students registered for RLFR 101–102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLFR 101 and 102) are taken

RLFR 103(F) Intermediate Studies in French Language and Francophone Cultures
This first–semester intermediate course builds on RLFR 101–102, with added focus on French–speaking cultures around the globe. The course prepares students for future study in French by increasing comprehension and communication skills, by refining lexical and cultural awareness, and by improving reading and writing. Daily work involves an expanded review of core grammatical structures and an exploration of various media, including film, music, and print. *Conducted in French.*
Class Format: lecture four hours a week with the professor, plus a fifth hour conference meeting with the French Teaching Assistants **Requirements/Evaluation:** active class participation, online workbook exercises, compositions (2 drafts), weekly quizzes, midterm, and final examination
Prerequisites: RLFR 101–102 or examination placement **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** first– and second–year students and those with compelling justification for admission
Dept. Notes: students should seriously consider taking RLFR 103 AND 105 if they intend to enroll in more advanced French literature courses at the 200–level and above, or if they anticipate studying in France or a Francophone country during their junior year
Distributional Requirements: Division 1

RLFR 104(S) Intermediate French II: Intermediate Studies in French Language and Francophone Culture
As a continuation of RLFR 103, this course explores the diverse cultural and political identities in the Francophone world through short literary texts and films from France, Africa, the Caribbean and the Middle East while building on linguistic skills in French. The course will provide an in–depth advanced review of grammar structures, but will emphasize the application of those structures in activities of composition, reading, oral presentation and discussion. *Conducted in French.*
Class Format: class meets three hours a week plus a fourth conference hour with French teaching associates **Requirements/Evaluation:** class participation, short papers, oral class presentations, quizzes and exams
Prerequisites: RLFR 103; this course is primarily for continuing RLFR 103 students; students who have placed at the advanced intermediate level on the placement exam should register for RLFR 105 **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** continuing 103 students and potential French majors
Dept. Notes: after successfully completing RLFR 104, students may register for RLFR 201
Distributional Requirements: Division 1
Spring 2015

RLFR 105(F) Advanced French: Advanced Studies in French Language and Francophone Culture
In this course, we will concentrate on expanding your vocabulary and polishing your written and oral skills while focusing on the analysis and discussion of French and Francophone cultures and the concepts that define them. We will explore key myths and practices linked to national identity in France and seek to understand the history of contemporary national identity debates. Topics of discussion will include: What is a nation? What is the Republic? How is a national identity constructed? What does it mean to be French today? Which are contemporary topics in the Francophone world? How are they represented in the Francophone press? (Print, television, radio, internet) How are these events and controversies situated in a larger historical and philosophical context?*Conducted in French.*
Class Format: lecture/confrence **Requirements/Evaluation:** class participation, short papers, presentations, quizzes and final exam
Prerequisites: RLFR 103, or examination placement **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** students continuing their French studies at Williams and first– and second–year students

RLFR 106 French Food Cultures
Two years ago, the French gastronomic meal won a place on UNESCO's representative list of "intangible cultural heritage." Yet, as current political and cultural tensions in France suggest, French food has never been more controversial. This course combines an intensive grammar review with a critical and experiential study of French food cultures. Modules focus on gastronomy and the art of dégustation, the role of food in debates on religious, national, and regional identities, public health policy, and the war on malbouffe. In addition to analyzing a broad range of texts, film, and other media, students will engage and strengthen their grammar and vocabulary when conducting field interviews, visiting local producers, and experimenting in our class kitchen. *Conducted in French.*
Class Format: lecture/seminar **Requirements/Evaluation:** active class participation, weekly online postings, three short papers, an oral presentation or cooking demonstration, final examination
Prerequisites: RLFR 105, or by French placement exam, or permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors and those with compelling justification for admission
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
LEC Instructor: Annelle Curulla

RLFR 107(S) Advanced Conversation in French: French and Francophone Identities in the Media
This course in Advanced Conversation in French is designed to develop students' skills in spoken French while learning about French and Francophone cultures. Students will increase vocabulary and fluency through interactive discussions, and will improve their pronunciation and both oral and written comprehension through different media: the press, television, movies, plays, and songs. We will discuss questions of French and Francophone identities, the Second World War, immigration, and current events. Conversation will improve students' ability to communicate effectively and to analyze culture through different media. Class activities will include listening to recordings, reading newspapers, conversation, and debates. *Conducted in French.*
Class Format: lecture **Requirements/Evaluation:** evaluation based on class participation, quizzes, midterm, and a final oral presentation
Prerequisites: RLFR 104 or RLFR 105 or permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 20
Distributional Requirements: Division 1
Spring 2015
SEM Section: 01 TR 09:55 11:10 Instructor: Sophie Saint–Just

RLFR 201 The Voice and the Book: Studies in Medieval and Early Modern France
We are a society of silent readers. Our eyes move back and forth over words on a screen or page, and the act feels private, interior. In earlier times, however, people interacted differently with texts. Besides silent reading, texts were transmitted through recitation and improvisation for groups of listeners. This course offers an introduction to the key periods, artistic movements, and genres of medieval and early modern France as they come to bear on the relationship between literature and orality. How did literary forms circulate and develop before and after the invention of the printing press? When did people who write become "writers?" Who read, heard, and performed texts? Who didn't? Over the course of the semester, students will complete regular creative and analytical exercises, visit the Chapin Library and Special Collections, meet with guest speakers, and practice declamation and performance. Readings to include anonymous authors as well as Marie de France, Villon, Labé, Ronsard, Molière, La Fontaine, Lafayette, Voltaire, Rousseau. *Conducted in French.*
Class Format: lecture/seminar **Requirements/Evaluation:** active class participation, weekly online postings, three short papers, recitation, micro–performance, and final examination
Prerequisites: RLFR 105, or by French placement exam, or permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors and those with compelling justification for admission
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
LEC Instructor: Annelle Curulla

RLFR 202(F) War and Resistance: Two Centuries of War Literature in France, 1804–2004 Crosslistings: RLFR 202/WGSS 201
In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to France's controversial role in the "War on Terror" (at the opening of the twenty–first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth– and twentieth–centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: exceptional performance in RLFR 105; Strong performance in RLFR 106 or 107; Successful performance in RLFR 201 or 203; or by Placement Test; or by Permission of the Instructor. **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1
Fall 2014
SEM Section: 01 TR 09:55 11:10 Instructor: Brian Martin

RLFR 203 Introduction to Francophone Studies (D) Crosslistings: RLFR 203/AFR 204
The Francophone world, stretching across Europe, Africa, the Middle East, Asia, the Caribbean and the Americas, has often been described as a family joined by a shared language and condition born of colonial history. Through fiction and film, this course will examine what it means to be Francophone, and how writers and filmmakers from the Francophone world have approached the idea of family both literally and metaphorically in order to explore questions of identity, origins, colonialism, resistance, nationhood and interconnectedness in a global community. This course invites students to enter into critical engagement with cultural constructions of difference, colonial and post–colonial constructions of subjectivity, culturally contested imaginations and treatment of gender and race, and the very idea of the Francophone itself. Authors we will read include: Driss Chraibi (Morocco), Dany Laferrière (Haiti), Maryse Condé (Guadeloupe), Aimé Césaire (Martinique), Linda Lê (Vietnam) and Fatou Diome (Senegal). Films studied include *Moolaadé* (Ousmane Sembène), *La vie sur terre* (Abderrahman Sissoko) and *Abouna* (Mahamet–Saleh Haroun). *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, informal response papers, two short papers, and final paper
Prerequisites: RLFR 105 or above or results of the College Placement Examination, or permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors or certificate candidates, and Africana Studies concentrators

Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1 Exploring Diversity
Other Attributes: INST African Studies Electives
INST Borders, Exiles + Diaspora Studies Electives
Not Offered Academic Year 2014–2015
SEM Instructor: Katarzyna Pieprzak

RLFR 205(S) France Noire
In this course we will study the lives and times of a variety of people who self–identify and are identified as "Black" or *"Noir,"* people for whom France has been (and continues to be) a site of exile, immigration, and a contested home. How have understandings of "blackness," "race," and belonging diverged and converged for people of African descent throughout France's changing political history? How has the Black diaspora in France impacted French ideas of nation, identity and citizenship? We will examine these questions through literature and film from the 19th and early 20th centuries, with some colonial and postcolonial interventions. Readings and films by Mme de Duras (France), Aimé Césaire (Martinique), Josephine Baker (US), Ousmane Sembène (Senegal) and Bernard Dadié (Côte d'Ivoire). *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, two short 5–page papers, in–class presentation and final 10–page paper
Prerequisites: RLFR 105 or above, or by permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 15 **Enrollment Preferences:** given to French and Africana Studies majors and concentrators
Distributional Requirements: Division 1
Spring 2015

RLFR 224 Sexuality and Seduction in Nineteenth and Twentieth–Century France (D) Crosslistings: RLFR 224/WGSS 224
In 1857, both Flaubert's *Madame Bovary* and Baudelaire's *Les Fleurs du mal* were put on trial for sexual indecency and "crimes against public morality." In 1868, *Le Figaro* attacked Zola's novel *Thérèse Raquin* as "putrid literature" for its depiction of adultery, murder, and scandalous sexuality in nineteenth–century Paris. A century later, Gide, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, inter–generational lovers, and bi–racial relationships. In this course, we will examine a wide range of issues on eroticism and sexuality in nineteenth– and twentieth– century French literature, including marriage and adultery, seduction and desire, love and betrayal, prostitution and fetishism, gay and lesbian identity, cross–dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d'Aurevilly, Gide, Proust, Colette, Duras, and Guibert. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: RLFR 106 or 107; another 200–level course such as RLFR 201, 202, 203; or by placement test; or by permission of the instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors and certificate students; Women's, Gender and Sexuality Studies majors; Comparative Literature majors and those with compelling justification for admission
Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1 Exploring Diversity
Not Offered Academic Year 2014–2015
SEM Instructor: Brian Martin

RLFR 230 Introduction to French Stylistics: The Art of Pastiche (W)
Generally speaking, *pasticheurs* are derivative artists. Yet many of France's most original authors were agile *pasticheurs*, among them La Bruyère, Proust, and the experimental writers of the OuLiPo movement. What might the art of pastiche suggest about the relationship between imitation and creation, tradition and innovation, and past and present? Discussion of such questions will be grounded in the study of short texts by Rimbaud (as Villon), Zalmanski (as Madame de Sévigné), Janin (as Diderot), Flaubert (as Chateaubriand), and Queneau (as Proust). Analysis and explication of pastiches will strengthen students' technical grasp of French. In the second half of the semester, students will apply their rhetorical, syntactical, and stylistic knowledge through weekly pastiche exercises, submitted as a final portfolio at semester's end. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, individual meetings, biweekly postings, 3 compositions (2 drafts each) and final portfolio
Prerequisites: RLFR 105–106 or examination placement **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** preference will be given to majors and those completing a French Certificate
Distributional Requirements: Division 1 Writing Intensive
Not Offered Academic Year 2014–2015
SEM Instructor: Annelle Curulla

RLFR 232(S) Love, Sex, Madness in Afro–diasporic Women's Writings Crosslistings: RLFR 232/AFR 232
This course explores the themes of love, sex, and madness in fiction and films by and/or about women of African descent. From the Caribbean to West Africa, from Europe to the US, these three themes function as the lenses through which women have challenged traditional ideas of citizenship, family, gender roles and political power. What, for example, is the connection between the Duvalier regime in Haiti and women's sexual desire? How does the figure of "the mad Creole woman" challenge the exportation of Victorian values to the Caribbean? How might an African woman's body be read as a site of anticolonial resistance? These are some of the questions we will work through as we examine works by Marie Vieux–Chauvet, Maryse Condé, Toni Morrison, Zora Neale Hurston, Tsitsi Dangarembga, and Chimamanda Adichie. *Conducted in English. For students seeking RLFR credit, select readings will be in French, and written work will be in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, weekly reading response papers, a 5– to 7–page paper and final project
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** given to French and Africana Studies majors and concentrators
Extra Info: may not be taken on a pass/fail basis; not available for the Gaudino option
Distributional Requirements: Division 1
Spring 2015
SEM Section: 01 TF 01:10 02:25 Instructor: Annette Joseph–Gabriel

RLFR 250(S) Women in Print:Gender, Power, and Publishing in Seventeenth–and Eighteenth–Century France
This course introduces students to seventeenth–and eighteenth–century French studies through an investigation of women in print. How did women participate as writers, artisans, distributors, and consumers of print? What do their ideas and practices tell us about the shifting power dynamics within the book trade and beyond? After a brief historical introduction, the course will focus on a correspondence, advice manuals, political tracts, tragedies, memoir–novels, erotic fiction, and other works by Bernard, Charrière, Duras, Graffigny, Guyot, Lafayette, Scudéry, and others famous and forgotten. Consideration will also be given to the book as a material object through readings as well as visits to archival collections. Key issues: censorship and publicity; the invention of the author; gender and canon formation; Old Regime social hierarchies; patronage, publics, and pay. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, weekly online postings, two short papers and final paper
Prerequisites: French 201, 202, or 203, or by placement test, or by permission of the instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French, Comparative Literature, Women's, Gender and Sexuality Studies majors, and those with compelling justification for admission

RLFR 309 Contemporary Short Stories from North Africa: Fast Cars, Movies, Money, Love and War Crosslistings: RLFR 309/AFR 307
Today the countries of North Africa are experiencing rapid social change. Rap music can be heard spilling out of windows while television sets broadcast a call to prayer. In the market place, those selling their goods compete to be heard over the ringing of cell–phones. Old and new exist side by side, albeit sometimes very uncomfortably. During the past decade, literature has emerged in both French and Arabic examining the effects of globalization: unequal modernization, unemployment, cultural change and cultural resistance. In this course, we will read short stories that address these issues as well as analyze films, sociological texts and Moroccan, Algerian and Tunisian newspapers on the web in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zafzaf, Ahmed Bouzfour, Soumaya Zahy and Abdelhak Serhane among others.*Conducted in French.*
Class Format: lecture/discussion **Requirements/Evaluation:** active class participation, reading journal, two short papers, an oral presentation and a final paper
Prerequisites: RLFR 201, 202 or 203 or permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors and those with compelling justification for admission
Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1 **Other Attributes:** ARAB Arabic Studies Electives
Not Offered Academic Year 2014–2015

RLFR 312(F) Francographic Islands (D) Crosslistings: RLFR 312/COMP 312/AFR 312
Utopia, paradise, shipwreck, abandonment, exile, death. Man's fascination and obsession with the island as place of discovery, beauty and imprisonment stretches across the centuries. In this class, we will read French literary and imagined islands alongside islands constructed by Francophone Caribbean, Indian Ocean and non–Western writers in French. What does the island symbolize in individual, community, national, and imperial imaginations? And how does the island become an agent in discussions of gender, race, modernity and history? Readings will include works by Paul Gauguin, Pierre Loti, Aimé Césaire, Michel Tournier, Ananda Devi, Maryse Condé, Patrick Chamoiseau and Edouard Glissant. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, weekly response papers, midterm essay and final essay
Prerequisites: open to students who have taken a literature course in RLFR at Williams, or permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 15 **Enrollment Preferences:** French majors and certificate candidates, Comparative Literature majors, and Africana Studies concentrators
Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1 Exploring Diversity
Fall 2014
SEM Section: 01 MR 02:35 03:50 Instructor: Katarzyna Pieprzak

RLFR 314 Between the Two World Wars
The period from 1913 to 1939 was an adventurous time for the French novel. In this course, we will study novels by Gide, Proust, Colette, Camus, Martin du Gard, Mauriac, Malraux, and Sartre. Although there is great diversity among these authors, they were all reacting to the aftermath of the First World War and the breakdown of traditional French culture. Through the popular character of the rebellious adolescent, they experimented with revolt against the stifling social order of Church and family. The real challenge of the period, however, concerned not a break with the past or discoveries of new levels of consciousness and freedom, but rather the mature acceptance of responsibility for the future and the articulation of fresh spiritual and political visions. *Conducted in French.* **Requirements/Evaluation:** several short papers and oral class presentations
Prerequisites: any RLFR literature course or permission of the instructor
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
LEC Instructor: Susan Dunn

RLFR 316(F) Paris on Fire: Incendiary Voices from the City of Light (1830–2005) Crosslistings: RLFR 316/WGSS 315

During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been fêted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914–18, 1940–44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler's ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty–first century? To answer this question, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: RLFR 201, or 202, or 203; or another RLFR 200–level course; or permission of the instructor. **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors and certificate students; Women's, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission
Distribution Notes: meets Division 1 requirement if registration is under RLFR; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1 **Other Attributes:** INST – Urbanizing World Electives

RLFR 318 Twentieth–Century Novel: From Adversity to Modernity Crosslistings: RLFR 318/COMP 318
In his futurist novel *Paris in the Twentieth Century* (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high–speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of twentieth–century novels and their focus on adversity, dignity, and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth–century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, and Begag. Lectures to include discussions of Gide and Proust, Sartre and Beauvoir, Cixous and Foucault, Jelloun and Djébar. Films to include works by Fassbinder, Annaud, Lioret, Ducastel, Martineau, Téchiné, and Charef. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: a 200–level course such as RLFR 201, 202, 203; or by placement test; or by permission of the instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission; seniors returning from study abroad (in France or another Francophone country) are particularly welcome
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*

RLFR 320T Slums and Housing Projects: Writing Urban Margins in French and Francophone Literature (W)
In this course we will explore the politics and poetics of fiction that engages marginalized urban spaces in France and the francophone world. From the depiction of informal settlements in Martinique in Patrick Chamoiseau's epic novel *Texaco* to the shantytowns of Casablanca in Mahi Binebine's *Les étoiles de Sidi Moumen* to the Parisian housing projects in Gisèle Pineau's *Un papillon dans la cité* and Didier Mandin's *Banlieue Voltaire*, we will explore how literature represents neighborhoods that exist in the face of dominant discourses of urban redevelopment that work to destroy them. What voices and histories emerge from these spaces under aggression? And how does literature claim to speak from and for these marginalized communities? Readings will include both literary works and theoretical readings from urban studies and geography. *Conducted in French.*
Class Format: tutorial **Requirements/Evaluation:** six 5–page tutorial papers
Prerequisites: any RLFR literature course **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** French and Comparative Literature majors
Extra Info: may not be taken on a pass/fail basis
Distributional Requirements: Division 1 Writing Intensive
Not Offered Academic Year 2014–2015
TUT

RLFR 322 Joan of Arc in French Literature and Culture
Burned as a heretic in 1431 and sainted in 1920, Joan of Arc has remained one of France's most contentious figures. This course examines stories of Joan of Arc between the Hundred Years War and the 2012 presidential elections. Discussions will be informed by readings from Pizan, Voltaire, Michelet, Delteil, Anouilh, and others. Students will also analyze iconography, film, political speeches, and schoolbooks. Throughout the semester, we will examine the relationships between gender and identity, religiosity and secularism, nationalism and biography, and the extreme right's enduring johannic obsession.
Conducted in French.
Class Format: seminar **Requirements/Evaluation:** active class participation, weekly online postings, two compositions (2 drafts), and final research project
Prerequisites: any 200–level or above RLFR course, or by permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** will be given to majors and those completing a Certificate in French
Distributional Requirements: Division 1 Writing Intensive
Not Offered Academic Year 2014–2015
SEM Instructor: Annelle Curulla

RLFR 326(S) Molière in Performance
Like Shakespeare, the work of France's greatest playwright is less a timeless monument than a living body, perpetually in motion, yet constantly changing. This course offers a dual approach to the theater of Molière. The first half of the semester will focus on readings and analysis of printed plays: *Le Dépit amoureux*, *L'Ecole des femmes*, *Tartuffe*, *Le Misanthrope*, *L'Avare*, *Le Bourgeois gentilhomme*, *Les Fourberies de Scapin*, and *Le Malade imaginaire*, among others. We will consider the broader socio–political, intellectual, and aesthetic forces at work in the Age of Louis XIV, as well as the formal and thematic features of each play. Turning from the seventeenth century to the twentieth, the second half of the semester will examine modern interpretations of Molière, especially those of major theater directors including Jouvet, Planchon, Vitez, and Mnouchkine. Discussions will be informed by viewings as well as interviews, reviews, and critical essays. Throughout the semester, we will explore the dynamic relationships between tradition and innovation, elite and popular culture, actors and audience, past and present. The semester culminates in student–led micro–performances inspired by our readings, viewings, and discussions. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, weekly online postings, two short papers, final performance project and accompanying paper
Prerequisites: French 201, 202, or 203, or by placement test, or by permission of the instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French, Comparative Literature, Theater, and Women's, Gender and Sexuality Studies majors, and those with compelling justification for admission

RLFR 370 Displaying, Collecting and Preserving the Other: Museums and French Imperialism Crosslistings: RLFR 370/AFR 370/COMP 370
This course will explore relationships between culture and imperialism in France by exploring how the colonial "Other" has been conceived, displayed and collected in French museums, world's fairs and galleries from the 19th century to the present. Through readings in museum history and theory, we will explore the imperial histories of the Louvre and the Musée de l'Homme, the role of Parisian World's Fairs in ordering the colonial world, French colonial photography and the creation a body of consumable subjects, and the discourse of collection and preservation in French colonial architecture. Drawing on museum theory, we will also critically examine contemporary Parisian museums such as the Musée du Quai Branly, the Institut du Monde Arabe and the Cité nationale de l'histoire de l'immigration. In addition to readings and discussion, the class will engage in a semester–long group project to design a new museum of French history and identity. The group will present all aspects of their museum including location, design, exhibit concept, narrative, and more. *This course will be conducted in English. For students seeking RLFR credit, select readings will be in French, and written work will be in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, response papers, 2 short essays and a final group project
Prerequisites: for students taking the course as RLFR: RLFR 201 or above, or permission of instructor; for students taking the course as COMP or AFR: no prerequisites **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** French and Comparative Literature majors, and concentrators in Africana Studies
Distribution Notes: meets Division 1 requirement if registration is under RLFR or COMP; meets Division 2 requirement if registration is under AFR
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
SEM Instructor: Katarzyna Pieprzak

RLFR 410 Senior Seminar: Landscapes of Movement and Migration in French
How do migration and movement construct and disrupt landscapes of identity—home, city and nation—in the French–speaking world? How do migration and movement contribute to conditions of alienation, nostalgia and violence? This seminar explores such fundamental questions and asks us to think about how in an increasingly mobile and de–territorialized world, place is imagined, experienced and remembered. Over the course of the semester, we will examine theoretical texts on memory, space, identity and movement, and analyze literary and film narratives of migration that focus on: the immigration experience in France, the construction of an Atlantic identity between Africa, the Caribbean, Europe and the Americas, internal migration between the country and the city, clandestine migration between Africa and Europe, population displacement due to war, and the possibility of creating portable places of memory. Works by Nora, Benjamin, Deleuze, Barthes, Charef, Chamoiseau, Glissant, Diome, Condé, Mernissi, Poulain, Pineau, Sembene, and Binebine among others. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** weekly 1–page response papers, short mid–term paper and a final research paper
Prerequisites: any RLFR course above 203, or permission of instructor **Enrollment Limit:** 15 **Expected Class Size:** 10 **Enrollment Preferences:** seniors who are French majors or completing the Certificate in French, but open to advanced students of French
Extra Info: qualified students in first, second, or third years of their career at Williams can enroll in the Senior Seminar with the permission of the instructor; however, this will not replace the senior seminar requirement in the senior year of French majors
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
SEM Instructor: Katarzyna Pieprzak

RLFR 412(S) Senior Seminar: Nineteenth–Century Novel: From Desperate Housewives to Extreme Makeovers Crosslistings: RLFR 412/WGSS 408
In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth–century novel and its boundless ability to echo the historical past and reverberate in the cultural present. Desperate housewives, sex in the city, queer eyes for straight guys, and extreme makeovers fill the pages of the nineteenth–century novel. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Maupassant and Zola, the novel became an extraordinary forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth–century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social–climbing lover Julien Sorel, the ambitious undergraduate Rastignac, the domestically–abused Gervaise, and the man–eating courtesan Nana became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these characters continue to haunt our twenty–first century present. Reinterpreted by such contemporary actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth–century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, and Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, and Chabrol. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: a 200–level or 300–level RLFR literature course at Williams; or by permission of the instructor **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** French majors and certificate students; Women's, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission

RLFR 415 Senior Seminar: Banned In France: Literature and Censorship in the Eighteenth–Century
Censorship is probably as old as culture itself, but recent global debates over network neutrality, media regulation, and copyright reveal a growing sense of urgency over what role, if any, censorship should play in the digital age. This seminar will explore the role of censorship in eighteenth–century France, another complex period transformed in part by unprecedented access to knowledge. Students will critically assess a range of works that were, before or after publication, repressed or altered by various religious and civil authorities, editors, publishers, and, in some cases, audiences. Discussions will focus on the formal and thematic content of each work, as well as its broader place in Enlightenment and French Revolutionary literature and culture. Analysis of such historically–specific concepts as tolerance, obscenity, and public censorship will be supported by critical work and commentary from the eighteenth century and the present day. As a central feature of the course, students will conduct a semester–long research project that will draw on readings from Voltaire, Diderot, Rousseau, Sade, Beaumarchais, Chénier, Gouges, Charrière, Staël, and others. Key issues include copyright and the literary market, self–censorship, public opinion and public censure, gender and canon formation, blasphemy, pornography, and the politics of incitement. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, weekly online postings, semester–long research project involving an abstract and annotated bibliography at mid–term, and final research paper
Prerequisites: any 200–level RLFR course **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** senior French majors or students completing the Certificate in French, but open to advanced students of French
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*

RLFR 511(F) Intensive Grammar and Translation
This course is designed to offer students a thorough and systematic review of sentence structures and grammar. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.
Class Format: classes meet twice weekly and are conducted in English **Requirements/Evaluation:** evaluation will be based on class participation, papers, a midterm, and a final examination
Prerequisites: a strong interest and need to learn French **Enrollment Preferences:** although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor
Distributional Requirements: Division 1

RLFR 512(S) Readings in French Art History and Criticism
This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read (excerpts from museum catalogues; the *Gazette des Beaux–Arts* and other publications; *Salons* by Diderot, Baudelaire, and Thoré; artists on their works; and critics such as Francastel, Ch. Sterling, M. Faré, Valéry, Focillon) will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French acurately. Grammar will be reviewed in context.
Class Format: seminar **Requirements/Evaluation:** evaluation is based on class participation, papers, a midterm, and a final examination
Prerequisites: RLFR 511 or permission of instructor; undergraduates are welcome with instructor's permission

SPANISH

The Spanish major consists of nine courses above the 103–104 level. These nine courses include 105, 106, any 200 level or above (excluding RLSP 205 and RLSP 303), and 403. At least one 200–level course must be completed at Williams. In addition, one course must be focused primarily on literature of the period prior to 1800 C.E. Other courses, taken at overseas programs, may be used to satisfy the requirements of the major, with approval of the department. The Spanish faculty strongly suggests that students take 201 and 200 at some point in their studies, and especially recommends that they do so before rather than after studying abroad.

The major seeks to provide training in literary analysis and linguistic expression, as well as an appreciation of Hispanic civilization, through the study of the major writers of the Spanish–speaking world.

Students majoring in Spanish may replace one of their Spanish electives with a course in Comparative Literature, with one course in Latin–American Studies that is 200–level or higher, or with a course in Linguistics or Latina/o Studies.

Inasmuch as all courses in Spanish assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

Courses numbered in the 100s are language courses, with 105 and 106 combining grammar and literature. RLSP 200 and RLSP 201 focus on civilization and culture, while other 200–level classes serve as gateway courses for literary study, in ascending order of difficulty; they are thus suitable for first–years and sophomores. Courses in the 300s require both serious grounding in the study of literature and an advanced command of the language. The 400–level course offered annually is the senior seminar, serving as "capstone course" to the Spanish major.

THE DEGREE WITH HONORS IN SPANISH

Candidates for a senior thesis must have maintained a 3.5 GPA in the major by the time of proposal submission. Two alternative routes are available to those who wish to apply for the degree with honors.

The first of these involves the writing of a senior thesis. Honors candidates are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three– to five–page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader).

This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether he/she can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493–W31–494). The thesis will be written in Spanish and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in Spanish. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

The second route is a group of three clearly related courses (offered by the Department of Romance Languages or by other departments, such as History, Art, Philosophy, English, etc.), only one of which may be counted in the nine courses comprising the major. One of the courses will be an Independent Study (plus senior year WSP 030) in the spring of the senior year, at the end of which the student will write an essay that synthesizes the content of the three related courses. Students may apply for this route by November 2 of the senior year.

In the case of both routes to the degree with honors, the department's recommendation for graduation with honors will be based on the originality and thoroughness of the finished project.

THE CERTIFICATE IN SPANISH

The Certificate in Spanish Language and Culture consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher. In addition, the student must take a proficiency test and achieve a score of "Advanced." The test will be administered by the department once a year during the month of April to all students desirous of obtaining the Certificate. Those so interested should express their intent to the chair of the department by March 1 or earlier.

For students with no prior Spanish background, the course sequence will consist of Spanish 101–102, Spanish 103 and 104, and three courses in Spanish above the 104 level, with at least one of these courses at the 200–level or higher taken at Williams. If the student starts out the sequence at Spanish 103, in addition to the three courses in Spanish beyond the 104 level (including a 200–level course or higher), two electives may be taken in other departments. One elective should be in Spanish or Latin–American cultural history (art, literature, drama, music) and the other in Spanish or Latin–American intellectual, political, or social history. Spanish 200, 201, or 208 can be counted for the elective requirement.

Electives may be considered from a variety of departments and programs. However, students should consult with the chair of Romance Languages before making any enrollment decisions.

PLACEMENT

A placement test in Spanish is administered at Williams at the opening of the fall semester. Incoming first–year students who wish to register for any Spanish courses above the 101 level must take this test.

STUDY ABROAD

Spanish majors, as well as non–majors interested in further exposure to the language and the culture, are strongly encouraged to include study in Spain or Latin America as part of their program at Williams. Through its special ties with the Hamilton College Academic Year in Spain, the department offers a comprehensive linguistic and cultural experience in a Spanish–speaking environment, for periods either of a semester or a year. Credit for up to four courses can be granted at the discretion of the Department for study overseas. Students interested in study abroad should consult with a member of the department at their earliest convenience. You can find general study away guidelines for Spanish here.

RLSP 101(F) Elementary Spanish
This course focuses on grammar, elementary composition, practice in conversation, and reading of easy modern prose. It is taught by the intensive oral method.
Class Format: the class meets five hours a week students will complete workbook and lab exercises weekly **Requirements/Evaluation:** evaluation will be based on participation, regular homework exercises, quizzes, a midterm, and a final exam
Prerequisites: none; this course is for students who have studied less than two years of Spanish in secondary school **Enrollment Limit:** 20
Extra Info: students registered for RLSP 101–102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLSP 101 and 102) are taken
Distributional Requirements: Division 1

RLSP 103(F) Intermediate Spanish
This course is a continuation of Spanish 101–102. It is designed to help students improve their proficiency in each of the major skill–groups (listening, speaking, reading and writing) while providing an introduction to the cultures of the Spanish–speaking world. Classroom activities and homework are designed to increase vocabulary and improve your ability to handle daily life in a Spanish–speaking country, to express your views on complex subjects such as art and politics, and to increase your knowledge of the cultural traditions of Latin America and Spain. Film screenings and readings in Hispanic literature, culture and politics will provide material for in–class discussion and some writing assignments. This course provides the linguistic and cultural training that is necessary to engage the diverse Spanish–speaking communities of Latin America,Spain and the US; it will help to prepare students for further literary and cultural studies as well as provide skills that are increasingly essential in fields such as medicine, law, and education. *Conducted in Spanish.*
Class Format: class meets four hours a week **Requirements/Evaluation:** regular attendance and active in–class participation, workbook exercises and weekly compositions, quizzes, midterm and final exams
Prerequisites: RLSP 101–102 or placement exam results **Enrollment Limit:** 20 **Expected Class Size:** 20
Distributional Requirements: Division 1

RLSP 105(F) Advanced Composition and Conversation
This course involves intensive practice in speaking and writing. Students are also expected to participate actively in daily conversations based on the study of our grammar book,as well as selected short stories by Latin American and Peninsular writers. In addition, they will write frequent compositions and perform regular,written grammar exercises.*Conducted in Spanish*. Students who successfully complete this course with a grade of B – or above may not take 106, inasmuch as the grammatical content of 106 is very similar to 105. Such students should now enroll in a 200–level class if they wish to continue studying Spanish.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on homework, class participation, compositions, a midterm, and a final exam; this course requires students to have produced 15–20 or more pages of writing by the end of the semester
Prerequisites: RLSP 103, Spanish 104 or results of the Williams College placement exam **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** first–years, then sophomores, then juniors, and then seniors, with priority to those considering a major in Spanish
Distributional Requirements: Division 1
Fall 2014

RLSP 199(F) Spanish in Action: Advanced Communication & Culture for Everyday Life
This is an advanced communication and culture course that uses real–world materials. This class serves as a bridge between Spanish 105 or Spanish 106 and advanced classes on literature and culture. Through the use of multimedia materials and engagement with local native speakers students will develop their communication and analytical skills as they improve their understanding of contemporary Hispanic/Latino culture and their ability to comprehend and respond to a variety of cultural and social issues and situations. Emphasis will be placed on activities that promote effective speaking and writing skills with the use of advanced structures and complex vocabulary. Students will complete at least one research project and related oral presentation. This course will have a service–learning component in which students engage with the Latino community. *Conducted in Spanish*.
Class Format: seminar/discussion **Requirements/Evaluation:** active participation in class discussions, engagement with native speakers, short writing assignments, and a final research paper and oral presentation
Prerequisites: RLSP 105, RLSP 106, Williams College Placement Exam, or permission of instructor **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** students who take the Williams College Placement exam and place into RLSP 199, students who have completed RLSP 105 or RLSP 106 and are planning to go abroad, and students returning from one semester abroad
Extra Info: may not be taken on a pass/fail basis; not available for the Gaudino option
Distributional Requirements: Division 1
Fall 2014

RLSP 201(F) The Spanish Labyrinth
Do Spaniards really dance flamenco and have dinner at 10:00 pm? Does everyone in Barcelona speak Catalan? How can you learn to separate the stereotypical images of Spain from reality? Is there really one "Spain", or is the country a complex composite of ancient and diverse cultural remnants mixed with recent influxes? How has the vulnerable peninsula survived centuries of violent upheavals and divisiveness; dramatic economic rises and collapses?
In this course we will approach Spain by studying examples of its literary and artistic production, from periods of brilliant cultural exchange, as well as in times of censorship and repression. Some topics of focus will be the Inquisition, the Civil War and contemporary Spain's obsession with its own recent past. Secondary texts will also be provided for historical and socio–political background and reference.
Conducted in Spanish.
Class Format: seminar **Requirements/Evaluation:** active participation in class discussions, oral presentations, short writing assignments, a midterm and a final essay
Prerequisites: RLSP 105, permission of instructor **Enrollment Limit:** 18 **Expected Class Size:** 18 **Enrollment Preferences:** Spanish majors and certificate candidates
Distributional Requirements: Division 1 **Other Attributes:** INST Borders, Exiles + Diaspora Studies Electives
Fall 2014

RLSP 202T 1898: Spain's Fin de Siglo and the Crisis of Ideas (W)
In this tutorial we will read the works of some of modern Spain's influential writers from the late part of the nineteenth century and the first three decades of the twentieth. Our aim is to understand how fiction and philosophy represented this significant time in Spain's history. The loss of the war with the U.S. in 1898, the turbulent shifts of power within the country, Spanish regional identities, and the cultural and intellectual movements that shaped Spain on the eve of the Civil War are among the key issues we will address. Our primary sources—largely fiction and poetry by artists such as Miguel de Unamuno, Azorín, Ramiro de Maeztú, Antonio Machado, Pío Baroja—will be complemented with a rigorous study of the cultural landscape of Spain at that time. Our principal engagement with philosophy will be through José Ortega y Gasset, in particular his output from the 1920s.
Class Format: tutorial **Requirements/Evaluation:** students will be teamed in groups of two, & alternate in writing essays &critiquing these each week; essays will be 5 to 8 pages long; evaluation is based on the essay & the critique of the essay, as well as punctuality with submission of wkly assgmnts
Prerequisites: RLSP 105, or results of the Williams College Placement Exam, or permission of the instructor **Enrollment Limit:** 10 **Expected Class Size:** 10
Extra Info: may not be taken on a pass/fail basis
Distributional Requirements: Division 1 Writing Intensive
Not Offered Academic Year 2014–2015
TUT Instructor: Leyla Rouhi

RLSP 203 From Modernismo to El Boom de la Novela (W)
A survey of some of the leading imaginative writers of Hispanic America. Readings will begin with the modernista poets and go on to include fiction of Mexico by Rulfo, a wide sampling of verse by Pablo Neruda, and narratives of the "Boom" period by authors such as Borges, Cortázar, Lispector, and García Márquez. *Conducted in Spanish.*
Class Format: lecture
Prerequisites: RLSP 105 or higher **Enrollment Limit:** 22
Distributional Requirements: Division 1 Writing Intensive

Not Offered Academic Year 2014–2015
LEC Instructor: Gene Bell–Villada

RLSP 204(S) Icons and Imaginaries: Culture and Politics in Latin America (D)
This course provides an overview of Latin American culture and politics by focusing on some of the most recognizable names and faces from the continent's turbulent history: Christopher Columbus, Hernán Cortés and Malintzín, Simón Bolívar, José Martí, Pancho Villa, Eva Perón, Frida Kahlo, Che Guevara, Rigoberta Menchú and Hugo Chávez. In addition to exploring the controversies surrounding each figure and her or his influence within a specific historical context, we'll also unpack some of the overarching issues of Latin American culture and politics: How are nations and nationalism constructed through processes of representation, and what roles do specific iconic figures play in that process? How can popular culture challenge elite representations of the nation and its heroes/heroines, and how durable are the images it produces as expressions of collective will? What opportunities are available to women and sexual minorities in a political culture that has been historically dominated by macho military types? This course fulfills the EDI requirement by enabling students to appreciate the figures that have influenced generations of Latin American women and men and their sense of what is politically possible, while challenging the class to identify the operations of power at work in the construction of the figures themselves. *Conducted in Spanish.*
Class Format: lecture/discussion **Requirements/Evaluation:** political and cultural essays, literature and films, three 5–page papers
Prerequisites: any course in the Spanish Department numbered 199 or higher or permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** Spanish majors and qualified first–year students
Distributional Requirements: Division 1 Exploring Diversity

RLSP 208(S) The Spanish Civil War in Literature and Film
The Spanish Civil War (1936–1939) has generated a vast bibliography and filmography that to this day reflect widely antagonistic interpretations of the conflict itself, its roots, and its impact. From the Spanish perspective, the war is the most important single event in understanding modern Spain. The ideals, passions, and consequences of the Spanish Civil War still divide Spaniards and have been recreated and relived by writers, artists, and filmmakers, and debated by historians. The course will begin with a historical introduction to the origins, development, and outcome of the war. Was the Spanish war a national struggle or an international struggle played out on Spanish soil? Along with studying internal Spanish political divisions, we will also consider the impact of the foreign policy positions of other countries–including Germany, Italy, the United States, and Russia—vis–a–vis Spain, as well as the role of the thousands of foreign volunteers who formed the International Brigades and came from all over the world to fight against Franco. With this historical basis, we will see how the themes and issues of the war are reflected in Spanish poetry, short fiction, novels, and films from the time of the war up through the present day. Readings will include works by Ayala, Cernuda, Neruda, Goytisolo, Sender, Fernan–Gomez, and Matute. Films will include documentaries as well as classic and contemporary features. *Conducted in Spanish.* **Requirements/Evaluation:** evaluations will be based on lively class participation, an oral report, short written assignments, and two papers
Prerequisites: RLSP 201, permission of instructor, or results of the Williams College Placement Exam **Enrollment Limit:** 20
Distributional Requirements: Division 1
Spring 2015

RLSP 209 Spanish for Heritage Speakers: Introduction to Latina/o Cultural Production Crosslistings: LATS 209/RLSP 209
This lecture and discussion course focuses on the acquisition and improvement of critical communication and analytical skills in Spanish for use both in and outside of the United States. We address all four of the primary language skills (listening, reading, writing, and speaking), with particular attention to the unique needs of students who have received a majority of their exposure to the Spanish language in an informal/domestic environment. Through the use of materials and vocabulary taken from a variety of real–life contexts, but with primary emphasis on the diverse U.S. Latina/o communities, this course aims to sharpen heritage speakers'—sociolinguistic competency and ability to interpret musical, cinematic, and literary texts in Spanish.
Class Format: discussion **Requirements/Evaluation:** evaluation will be based on student participation, grammar homework, 2 oral exams, and 3–4 written essays
Prerequisites: none; however, students who have completed the majority of their formal education in a Spanish–speaking country are not permitted to enroll in this course without prior permission of the instructor
Enrollment Limit: 12 **Expected Class Size:** 12 **Enrollment Preferences:** Latina/o Studies concentrators or Spanish majors by seniority
Distribution Notes: meets Division 2 requirement if registration is under LATS; meets Division 1 requirement if registration is under RLSP
may not be taken on a pass/fail basis
Distributional Requirements: Division 2 **Other Attributes:** LATS Core Electives
Not Offered Academic Year 2014–2015
SEM Instructor: Maria Elena Cepeda

RLSP 211 A Survey of Spanish Literature from the 11th to the 17th Centuries (D)
This course will introduce the student to some of the major works of Spanish literature from its beginnings through the Golden Age. We will study the historical context in which the works were written as well as the literary history of the periods in question. Students will learn methods of textual analysis through readings of relevant literary criticism. Readings will include selected canonical prose, poetry, and drama of the periods; special emphasis will be given to the myth of the coexistence of three religions in Iberia and the often misguided idea of dividing this literature into the categories of 'medieval' and 'Renaissance'. *Conducted in Spanish.*This course fulfills the pre–1800 requirement for the Spanish major **Requirements/Evaluation:** evaluation will be based on class participation, short paper assignments, and a final paper
Prerequisites: RLSP 105 or 106 or permission of instructor
Distributional Requirements: Division 1 Exploring Diversity
Not Offered Academic Year 2014–2015
LEC Instructor: Leyla Rouhi

RLSP 217T Love in the Spanish Golden Age (W)
The principal focus of this course is the Spanish "comedia" of the seventeenth century (with supplemental readings from prose and poetry) to provide us with a dynamic and critical understanding of the theme of love as constructed by the greatest dramatists and authors of the period. Works by Lope de Vega, Tirso de Molina, Calderón, Cervantes, San Juan de la Cruz, and others will show us how the theme was treated from diverse perspectives, and how it related to key concepts such as honor, religion, and artistic creativity. *Conducted in Spanish or English depending on student ability.*
Class Format: tutorial **Requirements/Evaluation:** students will meet with the instructor each week in groups of two, one student will read a 5–pg paper, left in advance for the tutorial partner, and the other will critique the paper; evaluation is based on the quality of the wkly essays& critiques
Prerequisites: RLSP 105 and above or permission of instructor **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** students with a background in literature
Extra Info: may not be taken on a pass/fail basis
as well as evidence of preparation, punctuality of submission, and quality of discussion; by the end of the semester each student will have produced around 25 pages of writing
Distributional Requirements: Division 1 Writing Intensive
Not Offered Academic Year 2014–2015
TUT Instructor: Leyla Rouhi

RLSP 220 Modern Spanish Women: Literature and Life Crosslistings: RLSP 220/WGSS 222
From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films and graphic materials, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, and the transition to democracy.
Class Format: seminar
Prerequisites: RLSP 201, permission of the instructor, or acceptable results of the Williams College Placement Exam **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** Spanish and Comparative Literature majors
Distribution Notes: meets Division 1 requirement if registration is under RLSP; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
SEM Instructor: David Colbert–Goicoa

RLSP 221(F) Women in Latin America
Latin American feminism is conventionally read like any other form of feminism, as an absence attempting to become present. Pivoting around a selection of short stories by the likes of the Ocampos, Bombal, Garro, Valenzuela, Poniatowska, Peri Rossi, Allende, and Schweblin, along with criticism and political contextualization, we will discuss such conventional readings, comparing different responses to superstructural power within Latin America while also asking whether more general, pan–American points can or should be made. There may be some background reading in English. *Conducted in Spanish.*
Class Format: seminar/discussion **Requirements/Evaluation:** two 5–page papers over the first half, and a 12–15–page research project over the second half, all of which will be defended in class
Prerequisites: RLSP 105 or 106, placement test results, or permission of the instructor **Enrollment Limit:** 18 **Expected Class Size:** 18 **Enrollment Preferences:** none
Distributional Requirements: Division 1
Fall 2014
SEM Section: 01 TF 02:35 03:50 Instructor: Jonathan Pitcher

RLSP 223T(F) Colonial Landscapes: Latin America's Contemporary Environmental Literature (D) (W) Crosslistings: RLSP 223/ENVI 223/COMP 263
"It is not by coincidence that our societies are both racist and anti–ecological," wrote the Chilean sociologist Fernando Mires in his now–classic study, *The Discourse of Nature*. This tutorial explores works of contemporary literature that implicitly and explicitly link Latin America's ongoing environmental crisis to the region's long and multi–layered history of colonialism: novels by Sylvia Iparraguirre (Argentina), Mayra Montero (Puerto Rico), Giaconda Belli (Nicaragua), Luis Sepúlveda (Chile); poetry by Homero Aridjis (México); essays by Octavio Paz (Mexico), Eduardo Viveiros de Castro (Brazil), and more. Representing a wide variety of geographies, literary styles and ideological perspectives, these writers nevertheless converge in challenging us to consider the effects of environmental crisis within structures of power that are radically unequal at the local, national, and global levels; and to recognize that consciousness of environmental vulnerability can prompt new forms of inclusion and community as well as exclusion. Topics to be explored also include the role of indigenous cosmologies in contemporary environmental politics, the place of urban ecologies within the environmental imaginary, and the ongoing debates among academic critics and others regarding the scope and methodologies of ecocriticism as an approach to Latin American literature.
Students have the option of tutorial in Spanish or in English; partners will be assigned accordingly. Each tutorial pair will meet with me for one hour during the week, during which time we will discuss a 5–page paper that one of the partners has submitted the night before. This adds up to a substantial amount of (reading and) writing for each student in the course, i.e., six 5–page essays over the course of the semester. This tutorial meets the goals of the Exploring Diversity Initiative by challenging students to position themselves, intellectually and imaginatively, in the space of those excluded from modernity's material benefits as they struggle to brace themselves against its catastrophic environmental effects.
Class Format: tutorial **Requirements/Evaluation:** each tutorial pair will meet with me for one hour during the week, during which time we will discuss a 5–page paper that one of the partners has submitted the night before
Prerequisites: none **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** students majoring in Spanish or Environmental Studies

RLSP 230(S) Fantastic Fictions
Jorge Luis Borges may be the least Latin American of all Latin American authors, or perhaps the most. In the wake of his own statement that "Every writer creates his own precursors" he has already provided the theoretical premise for so much subsequent work that this can only be a selective course. While our primary focus will be the fantastic in Borges' short stories, with initial forays into the work of Silvina Ocampo, Adolfo Bioy Casares, María Luisa Bombal, and Juan José Arreola, we will also study his influence on Julio Cortázar, Luisa Valenzuela, Cristina Peri Rossi, and Roberto Bola&#241o. The course will include at least some consideration of Borges' impact on the visual arts, and his abiding legacy beyond Latin America. *Conducted in Spanish.*
Class Format: seminar **Requirements/Evaluation:** active discussion of ideas, one oral presentation, two short papers, and one final paper
Prerequisites: RLSP 105, placement test results, or permission of the instructor **Enrollment Limit:** 15
Distributional Requirements: Division 1
Spring 2015
SEM Section: 01 TF 02:35 03:50 Instructor: Jonathan Pitcher

RLSP 238 The Textual City (W)
This course will chart the development of identity within the postcolonial Latin American city, focusing on (though by no means limited to) Buenos Aires as a touchstone case. The latter will be read both literally and as a guiding metaphor, as a reality ordered by ideas. We will use interdisciplinary theoretical models as discursive markers, selected from history, architecture, politics, philosophy, literature, and photography, in order to problematize urban design, the site of real dystopia, as the organizer of symbolic space, and vice versa. Spatio–cultural discussion will focus on the dominant narratives of public topography, most notably that of capitalism, and private, individualized responses to them, not least in the work of Carriego, Girondo, Borges, Arlt, Cortázar, Walsh, Sebreli, Piglia and Schweblin. *Conducted in Spanish, with some secondary / tertiary reading in English*
Class Format: lecture/seminar **Requirements/Evaluation:** two 5–page papers over the first half, and a 12– to 15–page research project (with preliminary presentation) over the second half, all of which will be defended through active participation
Prerequisites: RLSP 201 and above, or permission of the instructor **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** none
Distributional Requirements: Division 1 Writing Intensive
Not Offered Academic Year 2014–2015
LEC Instructor: Jonathan Pitcher

RLSP 242 Latin American Travel Writing (W)

Beyond Columbus' errant journey into the abyss and the ensuing quest for El Dorado, or Darwin's *Voyage of the Beagle*, Latin America's interior has often enticed its own learned population. Their travels, in space, time and thought, do not merely present a physical confrontation with alterity, with the continent's supposed heart of darkness, but an intellectual clearing, an origin, from which a more equitable politics may begin. To name but one example, Alejo Carpentier's *Los pasos perdidos*, the tale of a New York composer's journey to the beginning of society and music, is often seen as the touchstone of Latin American identity. Through accounts of real and fictitious travels, from Carpentier to the crassest of guidebooks, we will study such quests for self. These domestic departures will frame debates on ethics, representation, and epistemology. For comparison's sake, there will be occasional primary and secondary texts on English. Readings will include work by Sarmiento, Gorriti, Mansilla, Vasconcelos, Borges, Bioy Casares, Che Guevara, Allende, Sepúlveda, and Crosthwaite. *Conducted in Spanish*.
Class Format: lecture/discussion **Requirements/Evaluation:** two 5–page papers over the first half, and a 12–to15–page research project over the second half, all of which will be defended through active participation
Prerequisites: RLSP 201 and above, or permission of the instructor **Enrollment Limit:** 20 **Expected Class Size:** 20
Distributional Requirements: Division 1 Writing Intensive
Not Offered Academic Year 2014–2015
LEC Instructor: Jonathan Pitcher

RLSP 301(S) Cervantes' "Don Quijote" (D) (W)
We will devote the entire semester to the study of one novel: Miguel de Cervantes' *Don Quijote*, published in the early part of the 17th century. We will try to understand the reasons for the novel's immense and ongoing influence on Western literature and thought. To do so, we will study Cervantes' masterful handling of issues that continue to have an uncanny relevance to our lives today: relationships between men and women, the perception of Muslims by Christians and vice versa, the role of fiction in life, the shapes of mental illness, how we decide who we are, how our governments and families and friends decide who we are, the fun and annoyance of going on a totally disorganized road trip with someone else, the meaning of justice, and the meaning of storytelling, to name a few things. In the process, we will continually set things in context and make sure that we understand what was going on in Cervantes' world that might better explain what goes on in his novel. Finally, we will find that even an entire semester is not enough to engage fully with this extraordinary work, but we will be very glad that we made some headway.
Conducted in Spanish
Class Format: lecture/discussion **Requirements/Evaluation:** active class participation; two to three short projects and one final research project
Prerequisites: any 200–level RLSP course at Williams that is conducted in Spanish, or permission of instructor **Enrollment Limit:** 20 **Expected Class Size:** 15 **Enrollment Preferences:** Spanish majors and Comp Lit majors with the appropriate command of Spanish

RLSP 303 Cervantes' "Don Quixote" in English Translation Crosslistings: COMP 350/RLSP 303/ENGL 308
A close study of one of the most influential and early European novels. *Don Quixote* by Miguel de Cervantes (1547–1616 C.E) was a hit in its day in the seventeenth century, and has not ceased to influence artists and thinkers since. Moving between humorous and serious tones, Cervantes takes on several issues in the *Quixote*: the point of fiction in real life, the complications of relationships between men and women, the meaning of madness, the experience of religious co–existence, the shapes of friendship, and the task of literary criticism, just to name a few. We will read the book in a fine modern English–language translation, and set it in several relevant contexts to better understand its original intellectual horizon—seventeenth–century Spain—as well as the reasons for its continuing relevance.
Class Format: seminar **Requirements/Evaluation:** active participation, three short papers, and a final project designed in consultation with the instructor
Prerequisites: any 200–level literature course in foreign languages, COMP, or ENGL, or permission of the instructor. **Enrollment Limit:** 30 **Expected Class Size:** 30 **Enrollment Preferences:** Comp Lit majors and upperclass students
Dept. Notes: does not count toward the major in Spanish

Not Offered Academic Year 2014–2015
SEM Instructor: Leyla Rouhi

RLSP 306T Latino Writing: Literature by U.S. Hispanics (W) Crosslistings: RLSP 306/COMP 302
Writing by U.S. Hispanics constitutes a new voice in American letters. In this tutorial, we will read and discuss work by U.S. Latinos and examine the social backgrounds to their texts. The experiences of immigration and assimilation, and the specific complexities of being both Hispanic and North American will be addressed. Authors to be studied: Jose Antonio Villarreal, Tomas Rivera, Richard Rodriguez, Sandra Cisneros, Rudolfo Anaya, Piri Thomas, Oscar Hijuelos, Cristina Garcia, Junot Diaz and historical texts by Carey McWilliams, and Rodolfo Acuña. Given the absence of a critical consensus around these recent titles, our task is to gain some sense of their common traits as a tradition, and place them within the larger body of literature of the Americas and the world. The tutorial will examine one work or set of authors per week. A student will bring, written out in full, an oral presentation focusing on the artistic features and sociocultural content of the assigned reading. Questioning of the presenter, on the part of the second tutee and the tutor, will follow. The course is designed to accommodate both Spanish and English speaking students. A student able to read and speak Spanish will be paired with another student of similar proficiency. Students who neither read nor speak Spanish will be paired together.
Class Format: tutorial **Requirements/Evaluation:** five short oral presentations/papers (about 20–25 minutes) and a final longer one (about 40–45 minutes)
Prerequisites: some previous course work in any literature beyond the 100 level is helpful; students selecting the Spanish option for credit toward the Spanish major must have taken at least one 200–level RLSP course or seek permission of the tutor **Enrollment Limit:** 10
Extra Info: may not be taken on a pass/fail basis

RLSP 308 The Subject of Empire: Race, Gender and Power in the Colonial Era (D)
This class studies Latin American literature of the colonial era (1492–1898) from the perspective of the constitution of the subject: the autobiographical 'yo' that is both the subject of discourse and the object of sovereign power. Our readings will include the most outstanding texts of the group collectively known as the Chronicles of the Conquest —the letters of Christopher Columbus and Hernán Cortés and Bernal Díaz del Castillo's *True History of the Conquest of New Spain*, among others—whose authors endeavor to establish their historical authority and legitimate their actions before the Spanish king. We will also read later works in which racially and sexually marginalized subjects struggle to contest the identities and the conditions imposed on them by a distant sovereign through far–reaching institutional networks: the *mestizo* historian known as El Inca Garcilaso de la Vega, the cross–dressed soldier Catalina de Erauso, the poet Sor Juana Inés de la Cruz, and the slave Juan Francisco Manzano.
This course fulfills the objectives of the Exploring Diversity Initiative by challenging students to examine the historical negotiation of individual and collective identities within the context of violent, exploitative and exclusionary structures of power.
Class Format: lecture/discussion **Requirements/Evaluation:** one short (7–page) paper, one longer (15–20 page) paper, proposal, bibliography, discussion–leading
Prerequisites: RLSP 200, 204, LATS/RLSP 209 or permission of instructor **Enrollment Limit:** 19 **Expected Class Size:** 12 **Enrollment Preferences:** majors in Spanish
Distributional Requirements: Division 1 Exploring Diversity

Not Offered Academic Year 2014–2015
LEC Instructor: Jennifer French

RLSP 318 Three Spanish Medieval Masterpieces and the Myth of Co–existence (D)
A common assumption about Spain is that in its medieval period members of the three religions co–existed in harmony, worked together, and influenced one another. This is an attractive myth for sure, but also a very simplistic one. It does not begin to take into account the complexity of Iberia, whose regional identities, crises of sovereignty and complicated allegiances were hardly ever constant in the medieval period. The very notions of "influence" and "co–existence," which have long governed general assumptions about medieval Spain, become problematic if considered in the context of the actual time and place in which they are supposed to have occurred. Centered on the thorough reading of three masterpieces of the medieval period —*El Cid, El libro de buen amor* and *La Celestina*— we will explore, specifically, Castilian culture across three different periods, with an attempt to make connections to key concepts that will give us a nuanced and fair understanding of medieval Spain's extraordinarily rich and multifaceted identities.
Class Format: seminar **Requirements/Evaluation:** active class participation; three short papers; one research paper; one collaborative presentation
Prerequisites: any RLSP 200–level class or permission of instructor **Enrollment Limit:** 15 **Expected Class Size:** 12 **Enrollment Preferences:** seniors and juniors in RLSP, Comparative Literature majors with Spanish focus

RLSP 352 Writing after the Disaster: The Literature of Exile Crosslistings: COMP 352/JWST 352/RLSP 352
This course will consider different kinds of works (poetry, memoirs, fiction, essay) written by authors forced to live in exile as a consequence of political and/or religious persecution. Our point of departure will be the paradigmatic expulsion and subsequent diaspora of the Jews of Spain and Portugal. Most assignments, however, will be drawn from twentieth century texts written during, or in the wake of, the massive destruction and displacements brought about by the Spanish Civil War and World War II. How is the life lost portrayed? How are the concepts of home and the past intertwined? What kind of life or literature are possible for the deracinated survivor? We will discuss the role of writing and remembrance in relation to political history, as well as in the context of individual survival. Readings might include works by Nuñez de Reinoso, León, Cernuda, Semprún, Benjamin, Nancy, and Blanchot.
Class Format: seminar **Requirements/Evaluation:** active participation in class discussions, an oral presentation, several short writing assignments, a midterm paper and a final paper
Prerequisites: COMP 111 or an equivalent ENGL course **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** majors in Comparative Literature
Distribution Notes: meets Division 1 requirement if registration is under COMP or RLSP; meets Division 2 requirement if registration is under JWST

RLSP 402 Senior Seminar: Writing Latin Americas Environmental Crisis

Disappearing rain forests, melting glacier ice, sprawling garbage dumps, toxic fields and water: the state of environmental crisis is as real in Latin America as it is elsewhere on the planet, and its impact on the regions poor, marginalized and indigenous communities is extremely severe. This seminar explores the socio–cultural context and ramifications of the current crisis by examining Latin Americas environmental literature of the 20th and 21st centuries. Readings will range from literary classics by writers like Jos Eustacio Rivera, Octavio Paz and Giaconda Belli to the blogs of contemporary environmental activists. Keeping in mind the role of neocolonialism and globalization in accelerating environmental degradation, well explore the influence of Latin Americas heterogeneous cultural traditions on the relationship between human groups and the natural world, the significance of race, gender, class and ethnicity for an individual or collective sense of place, the phenomenon of environmental trauma, and the representational challenges and strategies available to environmentally–engaged writers and artists. As the capstone experience for the Spanish major, class meetings will follow a seminar format.
Class Format: seminar **Requirements/Evaluation:** written assignments (one 5–7 page paper and one 15–20 page paper) students will also be evaluated on the basis of their regular participation and performance as discussion leaders
Prerequisites: one 300–level RLSP course or permission of instructor **Enrollment Limit:** 15 **Expected Class Size:** 12 **Enrollment Preferences:** senior Spanish majors

RLSP 402 Senior Seminar Madrid: 1939–2004
In this course we will examine life in Madrid during two key periods: the Franco Dictatorship (1939–1975), and the first three decades of democracy (1975–2004). We will consider how representations of urban landscapes (churches, convents, prisons, museums, slums, bars and schools) has shaped and reflected the lives of madrileñas and madrileños past and present. We will study works by 20th century and contemporary Spanish authors, filmmakers, photographers, and journalists, as well as period advertisements and examples of popular culture. How was Madrid's image as international capital of art, sun, soccer and bullfighting forged? What remnants of the past lurk behind this appealing façade? How do the Atocha train Station bombings of 2004 relate to unresolved political tensions from 1939?
Class Format: seminar **Requirements/Evaluation:** active participation in class discussions, oral presentations, short writing assignments, a midterm and a final essay
Prerequisites: any 300 level RLSP course or permission of the instructor **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** Spanish majors and certificate candidates
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
SEM Instructor: Soledad Fox

RLSP 402(F) Senior Seminar: Power, Repression, and Dictatorship in the Latin–American Novel
Military dictatorship is among the most crucial factors in Latin–American society and history, and some of the continent's leading novelists have taken it upon themselves to depict the experience in their work. In this course we will examine both the fact of dictatorship itself and the diverse representation thereof in Spanish–American fiction. Novels by García Márquez, Vargas Llosa, Poniatowska, and Tomas Eloy Martínez will be closely studied. Students will also read *Absalom! Absalom!* by Faulkner, whose influence on Latin–American authors' techniques of representation has been decisive and profound. *Conducted in Spanish.*
Class Format: seminar **Requirements/Evaluation:** three papers based on the readings, one oral report on the life and personality of a given dictator, and a final exam
Prerequisites: any 300–level RLSP course or two 200–level RLSP courses or permission of the instructor

RUSSIAN (Div. I)

Chair, Professor Julie Cassiday

Professors: CASSIDAY, GOLDSTEIN**, VAN DE STADT. Visiting Assistant Professor: LADYGINA. Teaching Associate: SHLYAKHOVA

LANGUAGE STUDY

The department provides language instruction to enable the student to acquire all four linguistic skills: understanding, speaking, reading, and writing. Russian 101–W88–102 covers the basics of Russian grammar. Russian 151 through 252 offer additional instruction in grammar and provide extensive practice in reading and conversation.

STUDY ABROAD

The department strongly encourages students desiring to attain fluency in Russian to spend a semester or year studying in Russia or one of the former Soviet republics. Students generally apply to one of several approved foreign study programs. Russian 152 or the equivalent and junior standing are normally prerequisite for study abroad. You can find general study away guidelines for Russian here.

LITERATURE AND CULTURE IN TRANSLATION

The department regularly offers courses on Russian literature and culture in English for those students who have little or no knowledge of Russian, but who wish to become acquainted with the major achievements in Russian literary and cultural history.

THE CERTIFICATE IN RUSSIAN

To enhance a student's educational and professional profiles, the Certificate in Russian offers a useful tool for using the language in a wide variety of disciplines. The sequence of language and culture courses is designed to supplement a student's major at Williams by enabling the student to expand his or her knowledge in a related field.

Students who enter Williams with previous training in Russian may substitute more advanced courses for all the 100–level courses; they can also be exempted from up to two of the required courses. Thus, in order to earn a certificate a student must take no fewer than five courses (including three courses in Russian) after enrolling at Williams. The student must achieve proficiency at the level of a B in RUSS 251 or the equivalent.

Required Courses

101
102
151
152
one additional course conducted in Russian

Electives

—at least one course on Russian cultural history
—at least one course on Russian intellectual, political, or social history, or post–Soviet economics

THE MAJOR

The Russian major offers students an interdisciplinary approach to the intellectual and cultural history of Russia and the former Soviet republics. Students complete the major by combining courses in Russian language and literature with courses in history, political science, music, economics, and art. The major requires a minimum of ten courses of

which at least six must be conducted in Russian, at least two must be at the 300–level, and one at the 400–level. In addition, students may take up to four related courses offered by other departments and taught in English.

Examples of appropriate courses in other departments are:

History 140 Fin–de Siècle Russia: Cultural Splendor, Imperial Decay
History 240 Muscovy and the Russian Empire
History 241 The Rise of the Soviet Union
History 440 Reform, Revolution, Terror: Russia, 1900–1939
Sociology 332 Communism and its Aftermath

Students selecting the major must typically complete Russian 152 or the equivalent by the end of the junior year. Majors will normally be expected to take the 400–level seminar offered in their senior year, even if they have previously taken another version of it. Russian majors may receive major credit for summer language study (in consultation with the department) and for as many as four courses taken during study abroad.

THE DEGREE WITH HONORS IN RUSSIAN

At the beginning of the second semester of the senior year, students may nominate themselves to candidacy for the degree with honors. By the end of the junior year at the latest, however, they will have established in consultation with the department their qualifications for embarking on the project, the pattern of study to be followed, and the standards of performance.

Students earn a degree with honors by submitting a senior thesis (493–W31–494) of honors quality.

RUSS 101(F) Elementary Russian
An introduction to contemporary standard Russian, this course provides opportunities to acquire basic proficiency in all five language skills—listening comprehension, speaking, reading, writing, and culture—through immersion, intensive use of authentic materials, and a strong emphasis on the spoken word in all class activities. Greater emphasis is placed on writing in the second semester. For students who already know some Russian, consultation with the department is required before registering for any Russian language course in the sequence 101 through 252.
Class Format: the class meets five hours a week **Requirements/Evaluation:** active class participation, completion of all assignments, quizzes, tests, and a final exam
Prerequisites: none **Enrollment Limit:** 15 **Expected Class Size:** 6
Extra Info: students registered for RUSS 101–102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RUSS 101 and 102) are taken

RUSS 151(F) Continuing Russian
This course develops all five skills—listening comprehension, speaking, reading, writing, and culture—for students who have completed at least one year of college–level Russian. Coursework includes a systematic review of Russian grammar, as well as an examination of a variety of authentic materials from Russian and Soviet culture, current events, and daily life. Intermediate students will concentrate on expanding their vocabulary, while more advanced students will focus on reading and writing about unabridged texts in Russian. Students who complete the yearlong sequence of RUSS 151 and RUSS 152 should be well prepared to undertake study abroad in Russia and are encouraged to do so. Each year this course is custom designed to meet the needs of those students who enroll, so that both intermediate and advanced students can benefit from taking RUSS 151 and/or RUSS 152 more than once, which may be done with the permission of the instructor.
Class Format: the class meets four hours a week, three with the professor and the fourth with the Russian Teaching Associate (time to be arranged) **Requirements/Evaluation:** active class participation, completion of all assignments, quizzes, and a final exam
Prerequisites: completion of at least one year of college–level Russian (RUSS 101–102) or permission of the instructor **Enrollment Limit:** none **Expected Class Size:** 4–6

RUSS 203 Nineteenth–Century Russian Literature in Translation Crosslistings: RUSS 203/COMP 203
Whereas 18th–century Russian literature was largely derivative and imitative, 19th–century Russian literature —literature of The Golden Age— developed into a distinct national literature. It acquired its own style, developed along its own trajectory, and engaged with local social and political topics. This course will offer a survey of major works of Russian 19th–century fiction from Pushkin, the "father" of modern Russian literature, through Dostoevsky, Tolstoy, and Chekhov. Primary materials will be supplemented by readings in cultural and intellectual history (Chaadaev, Belinsky, Herzen, Pisarev, and Dobrolyubov) to help us better understand the milieu in which 19th–century Russian literature developed. The course will consist of short introductory lectures and discussions devoted to analyzing stylistic, cultural, and ideological idiosyncrasies of our primary texts. In addition to examining each author's distinctive style and contribution to Russian and world literature, we will explore a number of critical themes that have come to define the 19th–century Russian intellectual discourse: the rise of the Russian Empire and its encounter with East and West; the haunting duality of Russian urban and rural life; and the role of the Russian nobility and intelligentsia in Russia's cultural and socio–political transformation.
Class Format: lecture/discussion **Requirements/Evaluation:** requirements will include a short term paper, a midterm, and a final
Prerequisites: none **Enrollment Limit:** 30 **Expected Class Size:** 12 **Enrollment Preferences:** Russian or Comp

RUSS 204(S) From Revolution to Perestroika Crosslistings: RUSS 204/COMP 204
Whether despite or precisely because of the enormous historical and political turbulence in twentieth–century Russia, the intensity of its cultural life was equally unprecedented. Over the past century, Russian literature went through a number of major stages that defined its poetics and ideology: the Silver Age and its decline; the Revolution, the Civil War and the rise of Socialist Realism; the Second World War; the Thaw and de–Stalinization; another wave of tightening of the regime during the stagnation period; the dissident movement and the Cold War; and finally, the dissolution of the Soviet empire and the rise of Russian post–modern and post–Soviet aesthetics. As we discuss these and other topics of twentieth–century Russian culture, we will explore a broad array of genres, including poetry, short fiction, non–fiction, the novel, theater, and film. Our readings will include works by Block, Babel, Bulgakov, Olesha, Zamyatin, Ahmatova, Shalamov, Erofeev, Petrushevskaya, Pelevin, and other representative authors.
All readings and discussions will be in English.
Class Format: seminar **Requirements/Evaluation:** participation (25%); blog posts (20%); midterm (15); term paper (20%); final exam (20%)
Prerequisites: none **Enrollment Limit:** 15 **Expected Class Size:** 12 **Enrollment Preferences:** Russian majors

RUSS 206 Topics in Russian Culture: Feasting and Fasting in Russian History
This course will use the methodology of food history to explore the broader historical, economic, and artistic conditions that gave rise to Russian culture. We will examine culinary practice as well as the social context of cooking and eating in Russia. In order to elucidate the important interplay between culture and cuisine, we will discuss such issues as the domestic roles of women and serfs, the etiquette of the table, the role of drinking and temperance movements, and the importance of feasts and fasts in the Russian Orthodox Church calendar. Short stories, memoirs, and cookery books will provide insight into class and gender differences, cooking techniques, and the specific tastes that characterize Russian cuisine. This class will present Russian culture from a predominantly domestic point of view that originates from the wooden spoon as much as from the scepter. *Knowledge of Russian is not required.*
Class Format: lecture/discussion **Requirements/Evaluation:** active class participation, weekly response papers, one 6–page paper, midterm and final exams; participation in a communal feast
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** students who can demonstrate an interest in Russian culture

RUSS 208 Twentieth–Century Russian Art and the Birth of Abstraction Crosslistings: RUSS 208/ARTH 266
Such revolutionary artistic movements as Cubo–Futurism, Suprematism, and Constructivism profoundly influenced the development of twentieth–century art throughout the Western world—just as the 1917 Russian Revolution upset the world's political balance. This course will investigate Russian art within a cultural framework and explore the relationship between artistic production and politics. We will begin with a brief overview of important developments in Russian art that prefigured the twentieth–century artistic revolution: the introduction of icons from Byzantium, the founding of St. Petersburg and the rise of Western–style portraiture, and the fin–de–siècle movements that united painting with music and ballet. However, the focus of the course will be 1910–1930, when radical innovation was the order of the day and revolutionary ideas sparked entirely new conceptions of art. We will then look at the Socialist Realist style of the Stalin era, Soviet dissident art and Moscow conceptualism, ending the semester with an exploration of current trends in post–Soviet Russian art.
Class Format: lecture/discussion **Requirements/Evaluation:** active class participation, weekly response papers; one 6– to 8–page paper and a final exam
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 19
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
LEC Instructor: Darra Goldstein

RUSS 210T Tolstoy: The Major Novels (W) Crosslistings: RUSS 210/COMP 207
This tutorial will focus on Lev Tolstoy's four novelistic masterpiece—*War and Peace*, *Anna Karenina*, *Resurrection*, and *Hadji Murat*—placing them in their appropriate historical, social, and philosophical context. For each week of class, students will read a significant portion of a novel by Tolstoy, as well as a selection of secondary literature taken from those works that inspired the author, reactions that arose at the time of the novel's publication, and scholarship that seeks to explain the power and enduring significance of these novels. Students will meet with the professor in pairs, with one student writing a five–page paper for each class session and the other student providing a critique of the paper. *For those students without Russian language skills, all works will be read in English translation. For those students who have completed at least three years of college–level Russian, all primary readings, a significant portion of secondary readings, discussion, and writing assignments will be completed in Russian.*
Class Format: tutorial **Requirements/Evaluation:** evaluation will be based on completion of weekly reading and writing assignments and active discussion during tutorial sessions
Prerequisites: for students taking the tutorial in ENGL: none; for students taking the tutorial in RUSS: either RUSS 252 or permission of instructor **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** Russian, Comparative Literature, and Literary Studies majors

TUT Instructor: Julie Cassiday

RUSS 213(F) From Putin to Pussy Riot: Discourses of Post–Soviet Gender (D) Crosslistings: RUSS 213/INST 213/WGSS 214
Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarrely gendered media stunt. For example, Russian president Vladimir Putin has been photographed topless while fishing on vacation in Siberia, while the feminist punk–rock collective Pussy Riot protested Putin's regime by performing in day–glo balaclavas in Russia's largest cathedral. This course examines related post–Soviet media spectacles in the attempt to understand the Western press's fascination with Russia, as well as key social trends defining the post–Soviet era. We will focus on the ways in which gender and sexuality have come to mark post–Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so–called crisis of masculinity in post–Soviet Russia, the trafficking of women from the Former Soviet Union, the revival of indigenous practices such as bride kidnapping in Kyrgyzstan and Buzkashi in Tajikistan, the Ukrainian feminist collective Femen, the Eurovision Song Context, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how concepts, such as feminism, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post–Soviet East at the very time they have attained normative status in the West. This course is part of the Exploring Diversity Initiative because it engages in cultural comparison, explores how power and privilege are allocated differently in post–Soviet societies than in Western liberal democracies, and engages in the critical theorization of post–Soviet culture and discourse.
All readings will be in English.
Class Format: seminar **Requirements/Evaluation:** active participation in class discussions, response papers based on assignments for class, 2 papers (3–5 pages each) on relevant current events in the post–Soviet world, and a final project

RUSS 256(S) Chekhov and His Time (W) Crosslistings: RUSS 256/COMP 257
Anton Chekhov's influence throughout the world is hard to overestimate: he has been credited with forever redefining the way people write stories and act in plays, and with conveying universal lessons about art to an international audience. At the same time, Chekhov is very much a product of his own time and place, turn–of–the–century Russia. This course will venture to reconcile the universal and the Russian Chekhov. The course will consist of three parts. We will begin by analyzing the development of Chekhov¿s short stories from the early 1880s to the late 1890s, examining not only how they work, but also what they have to tell us about living deeply and well. In the second part of the course, we will contextualize Chekhov in his own milieu, looking at how his literary works address the most discussed social and philosophical questions of his time. We will conclude the course with three of Chekhov's mature plays—*Seagull, Uncle Vanya,* and *The Cherry Orchard*—analyzing how the plays recycle the situations, characters, and language of Chekhov's earlier stories and assessing Chekhov's debt to and influence on the Russian theater of his time, especially his complex relationship with Stanislavsky. Assignments will combine traditional literary analysis with more creative interpretations. Students will write their own Chekhovian stories and perform one of Chekhov's short plays of their choice.
Class Format: seminar **Requirements/Evaluation:** participation (30%), Chekhovian story (20%), midterm (20%), final paper (30%)
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 12 **Enrollment Preferences:** Russian and Comparative Literature majors

RUSS 331T The Brothers Karamazov (W) Crosslistings: RUSS 331/COMP 331/ENGL 371
Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so–called "accursed questions" through the unique artistic form of The Brothers Karamazov.

Class Format: tutorial **Requirements/Evaluation:** evaluation will be based on completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions
Prerequisites: at least one 200–level literature class **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** students majoring or considering a major in Russian, Comparative Literature, or English
Extra Info: may not be taken on a pass/fail basis; not available for the Gaudino option

RUSS 343 Spectacles on His Nose and Autumn on his Heart: The Oeuvre of Isaac Babel (D) (W) Crosslistings: RUSS 343/COMP 343/JWST 343/INST 343
Known alternately as "master of the short story" and "Russian Maupassant," Isaac Babel was not only one of the most celebrated and intriguing authors of early Soviet Russia, but also a cultural figure of profound national and international significance. For a number of reasons (political, aesthetic, professional, ethical) Babel was not prolific and this will allow us to read almost all of his creative output, something we rarely get to do in the course of a single semester. Babel's writing is extremely varied—it includes sketches, journalistic prose, short stories, plays, movie scripts, one unfinished novel—and richly intertextual. This will afford us the opportunity to read the work of some of his contemporaries and predecessors, from both Russia and abroad, with whom he fashioned brilliant literary conversations, among them Guy de Maupassant, Anton Chekhov, Sholem Aleichem, and Ivan Turgenev. Babel saw self–definition as the core of his writing and as an EDI offering, this course will ask students to reflect on what it meant to be a Russian, a Jew, and a non–party author—an outsider, insider, and problematic hybrid rolled into one—in the highly unsettled, and unsettling, 1920s and 1930s. *All course readings will be in translation, but students are highly encouraged to read in the original (Russian, French, Yiddish) whenever possible.*
Class Format: seminar **Requirements/Evaluation:** active class participation, frequent short writing assignments, a final project, and an oral presentation
Prerequisites: none **Enrollment Limit:** 12 **Expected Class Size:** 10 **Enrollment Preferences:** Russian and COMP majors, JWST and INST concentrators
Distribution Notes: meets Division 1 requirement if registration is under RUSS or COMP; meets Division 2 requirement if registration is under JWST or INST
Distributional Requirements: Division 1 Exploring Diversity Writing Intensive
Other Attributes: INST Russian + Eurasian Studies Electives
Not Offered Academic Year 2014–2015
SEM Instructor: Janneke van de Stadt

RUSS 401(F) Senior Seminar:Representations of the Caucasus in Russian Literature and Film (W)
Media coverage of the recent Chechen wars and terrorists acts in Moscow has exposed the troubled relationship between Russia and the Caucasus, a conflict that is hundreds of years old. Over the past two centuries, Russian writers and filmmakers have addressed this tension in central works of poetry, prose, and film. This course offers a survey of the most emblematic representations of the Caucasus in Russian cultural productions of the 19th, 20th, and 21st centuries. We will focus on literary works by Pushkin, Lermontov, Tolstoy, Esenin, Mayakovsky, Pristavkin, Pelevin, and Politkovskaya, and will analyze a number of relevant films—*Kidnapping, Caucasian Style* (1966); *The Color of Pomegranates* (1968); *Prisoner of the Caucasus* (1996); *War* (2002); and *Aleksandra* (2007). We will strive to investigate how the Russian writers and filmmakers have used the image of the Caucasian Other to address the issue of Russia's self–representation, and to what degree contemporary Russian artists have transformed the image of the Caucasians compared to the Romantic period.
The course will be conducted entirely in Russian. All readings and viewings will be in Russian.
Class Format: seminar **Requirements/Evaluation:** requirements will consist of four short essays, a conference–style presentation, and a final paper
Prerequisites: Russian 251, 252 or consent of instructor **Enrollment Limit:** 10 **Expected Class Size:** 4 **Enrollment Preferences:** Russian majors
Extra Info: may not be taken on a pass/fail basis; not available for the Gaudino option
Distributional Requirements: Division 1 Writing Intensive

SCIENCE AND TECHNOLOGY STUDIES (Div. II)

Chair, Professor DONALD deB. BEAVER

Advisory Committee: Professors: ALTSCHULER, D. BEAVER, DETHIER, KAPLAN, THOMAN. Associate Professor: MLADENOVIC.

Science and Technology Studies (SCST) is an interdisciplinary program concerned with science and technology and their relationship to society. In addition to being concerned with the historical development and a philosophical understanding of the ideas and institutions of science and technology; Science and Technology Studies also examines their ethical, economic, social, and political implications.

The role that science and technology have played in shaping modern industrial societies is generally acknowledged, but few members of those societies, including scientists and engineers, possess any understanding of how that process has occurred or much knowledge of the complex technical and social interactions that direct change in either science or society. The Science and Technology Studies Program is intended to help create a coherent course of study for students interested in these questions by providing a broad range of perspectives. At present, courses are offered which examine the history or philosophy of science and technology, the sociology and psychology of science, the economics of research and development and technological change, science and public policy, technology assessment, technology and the environment, scientometrics, and ethical–value issues.

To complete the requirements of the program, students must complete six courses. The introductory course and senior seminar are required and three elective courses are chosen from the list of designated electives. Students may choose to concentrate their electives in a single area such as technology, American studies, philosophy, history of science, economics, environment, current science, or current technology, but are encouraged to take at least one elective in history, history of science, or philosophy. The sixth course necessary to complete the program is one semester of laboratory or field science in addition to the College's three–course science requirement. Other science courses of particular interest include Chemistry 110 and Biology 134.

The program is administered by a chair and an advisory committee of faculty who teach in the program. Students who wish to enroll normally register with the chair by the fall of their junior year.

STUDY AWAY
You can find general study away guidelines for Science and Technology Studies here.

Students can check with the program chair to see if other courses not listed here might count as electives.

Elective Courses
ASTR 336/HSCI 336 Science, Pseudoscience, and the Two Cultures
BIOL 134/ENVI 134 The Tropics: Biology and Social Issues
CHEM 113 Chemistry and Crime: From Sherlock Holmes to Modern Forensic Science
ENVI 307/PSCI 317 Environmental Law
ENVI 402/MAST 402 Senior Seminar: Perspectives on Environmental Studies

HIST 374 American Medical History
HSCI 240/HIST 295 Technology and Science in American Culture
PHIL 209 Philosophy of Science
SOC 368 Technology and Modern Society

Courses of Related Interest
ANSO 205 Ways of Knowing
ARTH 257 Architecture 1700–1900
ENVI 302 Environmental Planning Workshop
GEOS 103/ENVI 103 Global Warming and Natural Disasters
HIST 165/LEAD 165 Going Nuclear: American Culture in the Atomic Age
HIST 475/LEAD 475 Modern Warfare and Military Leadership
HSCI 224/HIST 294 Scientific Revolutions: 1543–1927
HSCI 320/HIST 293 History of Medicine
PHYS 107 Newton, Einstein, and Beyond

SCST 101(F) Science, Technology, and Human Values Crosslistings: HSCI 101/SCST 101
A study of the natures and roles of science and technology in today's society, and of the problems which technical advances pose for human values. An introduction to science–technology studies. Topics include: scientific creativity, the Two Cultures, the norms and values of science, the Manhattan Project and Big Science, the ethics and social responsibility of science, appropriate technology, technology assessment, and various problems which spring from dependencies engendered by living in a technological society, e.g., computers and privacy, automation and dehumanization, biomedical engineering.
Class Format: seminar **Requirements/Evaluation:** two or three short exercises, two papers (3–5 pages and 5–7 pages), and two hour exams
Prerequisites: none **Enrollment Limit:** 20 **Enrollment Preferences:** first–years and sophomores
Distributional Requirements: Division 2
Fall 2014
SEM Section: 01 MWF 10:00 10:50 Instructor: Donald Beaver

SCST 263(S) Cold War Technocultures Crosslistings: SOC 263/AMST 263/HIST 363/HSCI 263/SCST 263
With the Soviet Union¿s collapse at the end of the twentieth century and the emergence of the United States as an unchallenged victor and "new world" hegemon, have we lost a sense of the drama, fear, and unbridled terror that permeated American life during the Cold War? In this course we will set out to understand Cold War American culture(s) by examining the intersection of politics, aesthetics, and a range of major technoscientific developments during this period. The course will take shape in three parts. Part I will explore the emergence and role of the computer in shaping the distinctly American style of thought aimed at Soviet "containment". We will furthermore trace historical treads connecting MIT's legendary Whirlwind computer, the SAGE continental air defense system, nuclear wargaming at the RAND Corporation, artificial intelligence, and the advanced technologies, management strategies, and atrocities of the Vietnam War. Part II takes up the symbolic potency of the space race, which we will use as a conduit through which to explore the following events and developments: Sputnik, Yuri Gagarin's spaceflight, the Apollo moon landing, and American civil defense; the postwar science of cybernetics and the emergence of the now iconic cyborg; the Club of Rome's {Limits to Growth}report and the Gaia hypothesis; plans backed by NASA for the industrialization, humanization, and colonization of outer space; and Ronald Reagan's Strategic Defense Initiative, '"Star Wars". Finally, case studies considered in Part III will focus on moments of conflict and resistance, appropriation, and unintended consequences of the preceding and other Cold War technological developments, among them antipsychiatry and environmentalism; Project Cybersyn, an infrastructural causality of the US/CIA–backed Chilean coup of 1973; the American counterculture and the countercultural roots of neoliberalism(s).
Class Format: seminar **Requirements/Evaluation:** weekly discussion precis, film screenings, class presentations, and a final research project decided in consultation with the instructor
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** preference will be given to students with a demonstrated interest in the study of Cold War science and technology
Distributional Requirements: Division 2
Spring 2015
SEM Section: 01 W 01:10 03:50 Instructor: Grant Shoffstall

SCST 309(S) Environmental Politics and Policy (W) Crosslistings: ENVI 309/HSCI 309/SCST 309/PSCI 301
This course will provide an overview of environmental policy¿making, with an emphasis on the ways in which policies are developed and implemented at the local, state and national level. Special attention will be paid to the variety of actors that shape environmental outcomes, including legislators, administrators, the science community, civil society and the private sector. Following an examination of different models of environmental policy¿making, this course will focus on several case studies, including on the management of public lands, air and water pollution, climate change and endangered species protection.
Class Format: seminar **Requirements/Evaluation:** evaluation is based on several shorter writing assignments, a semester–long research project, and participation
Prerequisites: ENVI 101 or permission of instructor **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** Environmental Policy & Environmental Science majors & Environmental Studies concentrators; but other students interested in public policy are welcome
Dept. Notes: requirement for the Environmental Policy major and the Environmental Studies concentration
Distributional Requirements: Division 2 Writing Intensive
Other Attributes: ENVI Environmental Policy

SCST 371(S) Science, Technology, and (Bio)medicalization Crosslistings: SOC 371/HSCI 371/SCST 371
"Medicalization" is a term that appears with great frequency in historical and broadly social scientific studies of twentieth century American medicine. In brief, medicalization refers to those processes by which a myriad of previously {non}medical problems, once defined as ethical–religious, legal or social (e.g. drug and alcohol addition, shyness, obesity), are brought within the purview of medical science and redefined as medical problems, usually in terms of "illness" or "disorder". We will begin the course by attending to the history of medicalization and its consequences. Taking guidance from key theoretical works and exemplary case studies, we will arrive at an understanding of medicalization as a {technical} process, and modern medicine as a quite potent form of {social control}. We will then move from a consideration of medicalization to biomedicalization; from the management of human life to transformations of "life itself" by way of post–World War II technoscientific interventions aimed at "optimizing" the vitality of individuals, groups, and entire populations. In particular, we will consider empirical case studies of technoscientific developments that have made possible the work of optimization that defines biomedicalization: molecular biology, pharmacogenomics, biotechnologies, imaging techniques (EEG, PET, and fMRI), robotics, and transplant medicine, among others. Finally, we will attend to how processes of biomedical optimization have produced new ways of seeing, knowing, and imagining human bodies, such that biology is increasingly less representative of "destiny" than it is of possibility. To this end, the course will conclude with a consideration of speculative technoscience and the ethics and politics of human enhancement.
Class Format: lecture **Requirements/Evaluation:** weekly discussion précis, science–fiction book review essay, class presentations, and a take–home midterm
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 20–25 **Enrollment Preferences:** preference will be given to Anthropology and Sociology students
Distributional Requirements: Division 2 **Other Attributes:** PHLH Bioethics + Interpretations of Health
Spring 2015
LEC Section: 01 MWF 08:30 09:45 Instructor: Grant Shoffstall

SCST 401 Senior Seminar: Critical Perspectives on Science and Technology
A research–oriented course designed to give students direct experience in evaluating and assessing scientific and technological issues. Students initially study particular techniques and methodologies by employing a case study approach. They then apply these methods to a major research project. Students may choose topics from fields such as biotechnology, computers, biomedical engineering, energy, and other resource development. Students will apply their background of historical, philosophical, and technological perspectives in carrying out their study.
Class Format: studio **Requirements/Evaluation:** research paper or project **Enrollment Limit:** 5
Distributional Requirements: Division 2 **Other Attributes:** ENVP SC–B Group Electives
Not Offered Academic Year 2014–2015
SEM Instructor: Donald Beaver

THEATRE (Div. I)

Chair, Professor DAVID EPPEL

Professors: BAKER–WHITE, EPPEL. Associate Professors: HOLZAPFEL, SANGARE. Assistant Professor: MORRIS. Lecturers: BROTHERS, CATALANO, PETHICA. Visiting Lecturer: MANSOUR§§.

As a reflection of the theatre's historical relationship to literature and the arts, stage production is studied in the context of the literary and artistic movements, which have informed theatrical endeavor. The major in Theatre emphasizes the collaborative nature of the discipline by drawing upon courses offered by faculty of the Language, Literature, Music, and Art Departments. Although students will be equipped to proceed to graduate and professional schools in theatre, the major is primarily directed toward those interested in studying the theatre as an artistic phenomenon and as an interpretive tool. Because a deep understanding of theatre requires training and experience with the synthesis on stage, the major includes curricular study of production and performance, as well as continued participation in departmental stage production.

The production arm of the Department of Theatre operates under the supervision of the departmental faculty. Major departmental productions as well as laboratory and experimental productions of all kinds are mounted on the new stages of the '62 Center for Theatre and Dance. Participation in acting or technical work is open to all members of the Williams College community. Students majoring in Theatre will be asked to consult regularly with departmental advisors in devising the sequence of courses and production participation that will constitute their major.

MAJOR

The Major in Theatre consists of nine courses.

Six required courses are:
Theatre 101(F) Introduction to Theatre
Theatre 103(S) Acting I OR Theatre 204 Acting II
Theatre 201 Theatrical Staging and Design: The Collaborative Process
Theatre 244 Introduction to Theatre Technology
Theatre 248 The Modern Theatre: Plays and Performance OR Theatre 229 Modern Drama
Theatre 406 Senior Seminar

Three elective courses must be taken from the department's other offerings. One of those electives must be at the 300–level or higher. Substitutions of other Williams' courses, or of Study Abroad courses, will be made only with the consent of the department Chair. Students should consult with the department Chair regularly in planning a balance of practice and scholarship in their elective choices.

All majors in Theatre are required to participate in a minimum of four department productions in addition to the laboratory requirement for Theatre 244. Participation in at least two of the four must be in technical production and one of those two must be in stage management.

THE DEGREE WITH HONORS IN THEATRE

Candidates for Honors will apply for admission through the submission of a portfolio to the Department Chair by February of their junior year, as well as a description of their proposed project. The project description is a written essay of approximately 750–1000 words that describes in detail the nature, goals, methodology and approximate budget, if applicable, of the proposed course of study to be undertaken in the pursuit of Honors. When developing their project proposal, candidates are encouraged to familiarize themselves with successful past Honors projects from materials provided by the Department. The portfolio will be comprised of four parts:

1. The first part will include a list of the courses students have taken relevant to their work towards the major. This list will include courses offered by the Theatre Department, but may also include classes taken in other Departments. Students should also list and describe relevant independent studies and production credits.
2. The second part of the portfolio will include a selection of materials developed for these courses and productions listed in Part 1. The selection should include at least three papers or samples of other written work, and might also include design projects, director's notebooks, studio art projects, actor's journals or other forms of documentation of the candidate's work. For students who have taken a semester away, it is particularly important that they provide the Department with a detailed picture of their activities while studying off–campus. Course descriptions and syllabi should be submitted in addition to a list of courses taken and activities performed.
3. The third part of the portfolio is an annotated bibliography of approximately twelve dramatic or critical texts the student has read, and that he or she feels have had particular relevance in his or her Theatre education to date. Annotations should be based upon a particular angle of engagement with the text, that reflects the area or areas that the student has chosen to emphasize in his or her theatrical training. For instance, one might choose to write from the point of view of an actor, a designer, a director, a playwright, or a dramaturg. Generally annotations should be one or two paragraphs long.
4. The portfolio should conclude with a retrospective essay that reflects on the materials that are being submitted. Students should look for connections between the various aspects of their work, state any theoretical positions that they have come to embrace, assess their strengths and weaknesses, and discuss their educational goals for their work with the Department during their Senior year.

The portfolio will be examined alongside the student's record and his or her project description; a determination will then be made as to admission into the Honors program. Students intending to apply for Honors should meet with the Department Chair or designated Honors Coordinator by the end of the fall semester of their junior year. Once a student is admitted to the Honors program, the department Chair will assign an Honors Project Advisor, who will work with the student to specify a timeline and work program for the completion of the Honors Project. At a minimum, this will entail enrollment in Theatre 493 or 494, plus W32, plus one other course offered either within the department or elsewhere that the candidate and thesis advisor designate as contributing specifically to the overall goals of the honors work. This honors elective may not fulfill any other portion of the Theatre Major, or any other major the student may be pursuing. All honors candidates will present their completed projects to the Department Honors Committee for evaluation.

STUDY ABROAD

The Theatre Department attempts to work individually with majors and prospective majors who desire to study abroad. In general, with careful planning it is usually quite easy for students to complete the major in Theatre if they study abroad for one semester of their junior year. For those wishing to study abroad for more than one semester of junior year, a more complicated situation may arise, but one that can often be successfully managed through close consultation with the department chair. Students are encouraged to consult with the chair early in their Williams careers if they anticipate a combination of Theatre major and study abroad. You can find general study away guidelines for Theatre here.

THE NATIONAL THEATRE INSTITUTE

The Department of Theatre is affiliated with the National Theatre Institute, which offers additional theatre study through its resident semester program. The Institute is fully accredited by Connecticut College and is a member of the Twelve–College Exchange. Limited numbers of Williams students can therefore be selected to take a full semester of intensive theatre study at the NTI, located at the Eugene O'Neill Memorial Theatre Centre in Waterford, Connecticut. During the semester, students from participating colleges live and work as members of a theatre company gaining experience with professional theatre artists in a workshop environment. Early application is essential.

THEA 101(F) Introduction to Theatre (D) Crosslistings: THEA 101/COMP 151
This introductory course serves as a general gateway to the study of Theatre. The course investigates principal areas of Theatre practice, including the Play and Playwright, Actor, Director, Designer, Audience, and Company. Through lectures, class discussions, performance practice, and hands–on laboratory sessions, students will encounter dramatic texts and theatrical contexts from a variety of traditions around the globe. Dramatists covered may include: Sophocles, Shakespeare, Zeami, Molière, Chekhov, Beckett, and Parks. Students are expected to complete reading and writing assignments, as well as to participate in practical projects in the labs. This course is open to all and welcomes non–Theatre majors. For students interested in the Theatre major, this course fulfills a primary requirement and should be taken during one's first or second year. This course meets the Exploring Diversity distinction because it engages in both a comparative and empathetic study of a broad range of theatrical cultures, examining their unique histories and appreciating their diverse artistries.
Class Format: lecture **Requirements/Evaluation:** three short papers; in–class writing; mid–term Company studio presentation; final Company performance and portfolio
Prerequisites: none **Enrollment Limit:** none **Expected Class Size:** 30 **Enrollment Preferences:** none
Distributional Requirements: Division 1 Exploring Diversity
Fall 2014
LEC Section: 01 MR 01:10 02:25 Instructor: Amy Holzapfel
LAB Section: 02 T 02:35 03:50 Instructor: Amy Holzapfel

THEA 103(F,S) Acting I
This course deals with the development of intellectual and emotional resources required for the actor and will explore an acting technique based on the work of Russian actor and director Constantin Stanislavsky. Students will examine the power of public presence through theory and practice while expanding their talents, sensitivity, and imagination.
Class Format: studio **Requirements/Evaluation:** evaluation will be based on committed participation in class, preparation and performance of assigned material, and some modest written assignments
Prerequisites: none **Enrollment Limit:** 14 **Expected Class Size:** 14 **Enrollment Preferences:** first–year students or sophomores considering the Theatre major
Dept. Notes: course is a prerequisite for THEA 204
Distributional Requirements: Division 1
Fall 2014
STU Section: 01 MR 01:10 02:25 Instructor: Omar Sangare
Spring 2015
STU Section: 01 MR 01:10 02:25 Instructor: Omar Sangare

THEA 104 Critical Approaches to Theatre and Performance (D) Crosslistings: THEA 104/COMP 104
This introductory critical survey course will explore a variety of theatre and performance traditions from around the globe, from antiquity to the present day. Through close analysis of select texts and performance practices in a seminar format, the course will consider what role theatre plays in the establishment and growth of culture, politics, and aesthetics. Topics may include: Ancient Greek theatre, Classical Indian performance, Renaissance English theatre, Japanese Noh and Kabuki, popular American traditions, modern European theatre, and postmodern performance. Films and other media will be utilized when relevant. Regular in–class visits to the Williams College Museum of Art will occur, as well. This course meets the criteria of the Exploring Diversity Initiative as it engages in a cross–cultural investigation of performance and explores how theatre is deeply embedded in power relations.
Class Format: seminar **Requirements/Evaluation:** 5 structured writing&creative assignments based on thematic elements of the course, as well as a final "Company" performance; in–class participation, writing, & discussion
Prerequisites: none **Enrollment Limit:** 18 **Expected Class Size:** 14 **Enrollment Preferences:** Theater majors and Comparative Literature majors
Dept. Notes: this course is a requirement for and is suggested as an introduction to the major in Theatre
Extra Info: participation in all LABS; all students enrolled in the course are also required to attend the departmental theatre productions
Distributional Requirements: Division 1 Exploring Diversity
Other Attributes: PERF Interdepartmental Electives
Not Offered Academic Year 2014–2015
SEM Instructor: Amy Holzapfel

THEA 201(F) Theatrical Staging and Design: Process of Collaboration Crosslistings: THEA 201/ARTS 201

This course examines the designer's and director's creative process and collaborative roles in the creation of theater. Over a series of practical projects in staging and mise–en–scene, as well as scenic, costume, and lighting design we will try different techniques for eliciting an initial creative response to a text, developing that response into a point–of–view, and solving the practical needs of the production. Particular emphases will be placed on how directors and designers work together to imagine the fictional world(s) of theatrical productions, how design elements synthesize with one another, with the work of the actors and director, and with the larger intellectual, emotional, and physical context of the work as a whole. The course will be team–taught with the dual perspectives of directing and design prompting students to adopt various creative roles throughout the series of assigned projects. Basic presentation skills and technique, as well as methodologies for critical feedback, will be taught as crucial elements of staging and design development.
Class Format: studio **Requirements/Evaluation:** evaluation will be based upon committed class participation and thoughtful, timely completion of all assignments and projects
Prerequisites: none **Enrollment Limit:** 14 **Expected Class Size:** 12 **Enrollment Preferences:** Theatre majors
Dept. Notes: this course is a prerequisite for all upper–level design and directing courses; this course does not count toward the Art major
Materials/Lab Fee: materials and copying $125 to be added to the students' term bill
Distributional Requirements: Division 1
Fall 2014
STU Section: 01 MW 11:00 12:50 Instructor: Robert Baker–White and David Gurcay–Morris
LAB Section: 02 W 01:10 03:50 Instructor: Robert Baker–White and David Gurcay–Morris

THEA 204(S) Acting II
Students will continue to develop technical skills, and the emotional and intellectual resources, required for the actor. The focus will be on the issues of characterization, textual understanding and emotional depth. The means of study and experimentation will be intense scene work requiring thorough preparation and creative collaboration. Improvisation and other exercises will be used to complement the textual work. The dramatic texts providing scenes for class will be from the early realist works onward. Students will be expected to have had previous acting experience, either through completion of Theatre 103 or through other relevant experience.
Class Format: studio **Requirements/Evaluation:** although there will be some modest written assignments, evaluation in the course will principally reflect the degree of committed participation in the preparation and performance of acting exercises
Prerequisites: THEA 103 or, for students with significant prior theatrical experience, permission of the instructor **Enrollment Limit:** 14 **Expected Class Size:** 10 **Enrollment Preferences:** students intending to major in Theatre
Dept. Notes: this course is a prerequisite for THEA 306
Distributional Requirements: Division 1 **Other Attributes:** PERF Interdepartmental Electives
Spring 2015
STU Section: 01 MW 11:00 12:50 Instructor: Robert Baker–White

THEA 214(S) Playwriting (W) Crosslistings: THEA 214/ENGL 214
A studio course designed for those interested in writing and creating works for the theatre. The course will include a study of playwriting in various styles and genres, a series of set exercises involving structure and the use of dialogue, as well as individual projects. We will read and we will write, beginning with small exercises and working toward a longer final project. Students will be expected to share in and respond to each other's work on a weekly basis, and to present their own work regularly. At the end of the term, we will share our collaborative work with the community as part of an open studio experience.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on attendance, completion of all class assignments, and class participation
Prerequisites: none **Enrollment Limit:** 14 **Expected Class Size:** 14 **Enrollment Preferences:** Theatre and English majors
Distributional Requirements: Division 1 Writing Intensive
Spring 2015
SEM Section: 01 TR 11:20 12:35 Instructor: Mona Mansour

THEA 228 Theatrical Self–Production the Cartographic Imagination
In today's theater world, self–production can be a vital, engaging, and necessary method of creating and producing theatrical works. This course examines theatrical self–production and the ways in which artists exploit this model in pursuit of their individual and collective ambitions. Through an examination of innovative, non–traditional models for performance creation, this class will form its own unique structure for developing and producing a new theatrical performance for public presentation. Operating within carefully chosen constraints, students will share equally the administrative, artistic, and production roles in the public presentation of their work on stage. Thus, a major emphasis of the course will be on experiential education, which provides an invaluable opportunity to encounter firsthand the highly complex relationship between artistry and production. To best advise and mentor students in all levels of design, direction and performance, the course will include additional guest classes with practitioners from the profession, as well as the Department of Theater who can help to provide the full range of skills necessary for students to realize their goals. Group presentations of the creative development process will provide opportunities for guidance, critique, and sustained mentorship on the path to a final performance. This year, 228 will investigate the performance possibilities contained in the idea of The Map, and in the act of mapping space and spatial relationships.
Class Format: seminar **Requirements/Evaluation:** students will contribute to the creation of a final performance piece by the group as a whole; evaluation based on committed class participation, contribution to the collective work of the class, group and individual presentations, and self–evaluation
Prerequisites: none; students from a broad range of curricular disciplines are welcome, but some prior experience in theatre or theatre studies is perferable **Enrollment Limit:** 16 **Expected Class Size:** 12 **Enrollment Preferences:** the instructors will seek to balance the course by level of prior theatrical experience
Distributional Requirements: Division 1 **Other Attributes:** EXPE Experiential Education Courses
Not Offered Academic Year 2014–2015
SEM Instructor: David Eppel

THEA 229(F) Modern Drama Crosslistings: ENGL 202/THEA 229/COMP 202
An introduction to major plays and key movements in European and American theatre since the late nineteenth century. Our focus will be on close reading, with attention also to questions of performance and production. Plays to be discussed will likely include: Ibsen, *Hedda Gabler*; Wilde, *The Importance of Being Earnest*; Chekhov, *The Cherry Orchard*; Pirandello, *Six Characters in Search of an Author*; Brecht, *Mother Courage*; Miller, *Death of a Salesman*; Beckett, *Endgame*; Hansberry, *A Raisin in the Sun*; Pinter, *Betrayal*; Churchill, *Cloud Nine*; Stoppard, *Arcadia*.
Class Format: lecture **Requirements/Evaluation:** two 5–page papers; regular journal responses; a final exam; and active participation in class discussions
Prerequisites: none **Enrollment Limit:** 18 **Expected Class Size:** 18 **Enrollment Preferences:** English and Theatre majors
Dept. Notes: satisfies the THEA 248 requirement for Theatre Major
Extra Info: may not be taken on a pass/fail basis
Distributional Requirements: Division 1 **Other Attributes:** ENGL Literary Histories C
Fall 2014
SEM Section: 01 TR 11:20 12:35 Instructor: James Pethica

THEA 236 Political Theatre Making
Placing twentieth–century theatricality in the context of its historical roots in Western theatre, this course will examine a broad range of types of protest movements. From the biting observations of the British class system by playwrights such as Oscar Wilde, Noel Coward, and John Osborne, to mid–century American political writers such as Clifford Odets and Edward Albee, and Italy's Dario Fo, to the relentless satire of contemporary South African performers such as Pieter Dirk–Uys, we will investigate dramatic writing and performance style as aspects of social and political resistance. Other groups studied may include the protest theatre of Johannesburg's Market Theatre, Luiz Valdez's Teatro Campesino, and a younger generation of post–apartheid experimentation in multi–ethnic South African theatre.
Class Format: seminar **Requirements/Evaluation:** a semester–length research project, including a substantial paper, based on the hypothetical creation of a theatre company within specific historical, social, and political contexts
Prerequisites: none, though first–year students must get permission of instructor **Enrollment Limit:** 15
Distributional Requirements: Division 1 **Other Attributes:** PERF Interdepartmental Electives
Not Offered Academic Year 2014–2015
SEM

THEA 241(S) Performing Masculinity in Global Popular Culture (D) Crosslistings: WGSS 240/AMST 241/LATS 241/THEA 241/SOC 240
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products – ranging from beer to deodorant to cigarettes — had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch–identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half–life of the boy band in the US and in Asia (e.g., J/K–Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.
Class Format: seminar **Requirements/Evaluation:** masculinity journal, mid–term essay, visual analyses of pop culture artifact, choice of final essay or 8–10 page final paper, short field trip reaction essay
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** in the event of over–enrollment, a short statement of interest will be solicited
Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS, SOC or WGSS; meets Division 1 requirement if registration is under THEA

LAB Section: 02 W 01:10 03:50 Instructor: Cosmo Catalano

THEA 245 (Re)presenting Sex: Shakespeare on Page and Stage Crosslistings: EXPR 245/THEA 245/WGSS 245
This experimental course approaches the question of how sex and sexual identity are portrayed in Shakespeare from two different directions–close reading focused on the page and acting centered on the stage. These two critical modes–reading the text versus performing the script–are often treated in compartmentalized fashion as separate, even incompatible activities. Our goal is to take up the challenge of bringing the two

perspectives together within the framework of a single, integrated course. The teaching method is to bridge the gap between the two modes not by magically dissolving, but by actively engaging, the tensions between them. For example, no performance can include all the possible interpretations; performance decisions raise questions about what alternatives have been left out. Similarly, when all interpretive possibilities are held in imaginative suspension, the specifics of bodily movement and face–to–face interaction whose meanings emerge when enacted are lost. We propose to put the two orientations in a productive and innovative dialogue that enables students to experience the tension from both sides, to articulate the opportunities and limits of each side, and to combine their respective strengths. The mix of assignments (papers and scene work) will vary depending on whether students designate themselves as primarily scholars or actors, but some overlap will be built in to ensure that scholars gain understanding of acting and actors gain access to scholarship. All students will be expected to demonstrate versatility in traversing the full spectrum from interpretation through reading to interpretation through performance.The specific topic that will bring these theoretical issues into focus is the matter of sex and sexual identity, as illuminated through the analysis of language, psychology, and theatrical embodiment. Six plays will be studied in depth: *The Merchant of Venice*, *Twelfth Night*, *Othello*, *King Lear*, *Antony and Cleopatra*, and *The Winter's Tale*.
Class Format: lecture/discussion, with additional periods set aside for scene presentation **Requirements/Evaluation:** evaluation will be based on several short papers and a final exam All students will take the final: "scholar" students will have rigorous expectations in the writing of papers; "actor" students will have intensive (graded) performance expectations
Prerequisites: none; students wishing to enroll as Acting Students should consult with instructors **Enrollment Limit:** 20 **Expected Class Size:** 15
Distribution Notes: meets Division 1 requirement if registration is under EXPR or THEA; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
LEC Instructor: Robert Baker–White

THEA 248 The Modern Theatre: Plays and Performance Crosslistings: THEA 248/COMP 248/ENGL 234
A survey of major trends in playwriting and performance practice from the late nineteenth century to the end of the twentieth. We will read major playwrights from a variety of national traditions, always considering their works in the context of evolutionary and revolutionary transformations of theatre practice. Artists and movements may include Realism and Naturalism (Stanislavsky, Antoine, Ibsen, Strindberg, Chekhov, Shaw), the Epic Theatre (Brecht, Piscator), The Theatre of Cruelty (Artaud), the "Absurd," (Beckett, Genet, Pinter) the collectivist avant–garde (Grotowski, Living Theatre, Open Theatre), and more recent playwriting.
Class Format: lecture/discussion format will focus on dialectical interplay between dramatic writing and trends in acting, directing, design, theatre architecture and the actor/audience relationship **Requirements/Evaluation:** active participation in class discussion, midterm exam, one major paper
Prerequisites: none **Enrollment Limit:** 18 **Expected Class Size:** 14 **Enrollment Preferences:** Theatre majors
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
LEC Instructor: Robert Baker–White

THEA 250T Gender, Sexuality and the Modern Stage (D) (W) Crosslistings: THEA 250/ENGL 253/WGSS 250/COMP 247
This interdisciplinary tutorial explores aspects of gender sexuality, performativity, and representations of the body in modern theatre and art. Close analysis of plays by dramatists –such as Sophie Treadwell, Lillian Hellman, Caryl Churchill, Milcha Sanchez–Scott, Ntozake Shange, Tony Kushner, Tim Miller, Naomi Iizuka, Paula Vogel, Suzan–Lori Parks, Tarell McCraney, and Sarah Kane – will occur alongside consideration of works by both artists and celebrities, such as Cindy Sherman, Karen Finley and Lady Gaga. Our approach to this varied material will be comparative and will be enriched by readings of select work by contemporary theorists, such as Judith Butler, bell hooks, Cherríe Moraga, Eve K. Sedgwick, and Donna Haraway. This course meets the criteria of the Exploring Diversity Initiative as it draws focus towards the diversity of race, class and ethnicity represented by the subjects of our study as well as towards the political power of theatre and performance.
Class Format: tutorial **Requirements/Evaluation:** students will meet with instructor in pairs for an hour each week; they will write a 5–7–page paper every other week (five in all), and comment on their partner's papers in alternate weeks
Prerequisites: none **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** majors in Theatre, English or Women's, Gender and Sexuality Studies
Distribution Notes: meets Division 1 requirement if registration is under THEA, COMP or ENGL; meets Division 2 requirement if registration is under WGSS
Extra Info: emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response
may not be taken on a pass/fail basis
Distributional Requirements: Division 1 Exploring Diversity Writing Intensive
Other Attributes: PERF Interdepartmental Electives
WGSS Theory Courses

TUT Instructor: Amy Holzapfel

THEA 262 Performing Greece and Rome Crosslistings: CLAS 262/THEA 262/COMP 270
This course explores the fluidity of genres by focusing on tragedy and comedy. Each began as a grafted thing, a hybrid, a fusion of poetic, musical and dance genres previously developed for a variety of occasions outside the Theater of Dionysus. Fusion continued to energize both genres, and we will attend to its effects as we read several tragedies by Aeschylus, Sophocles, and Euripides and comedies by Aristophanes from fifth–century Athens; a comedy by Menander from the early post–Alexandrian Greek world; comedies by Plautus and Terence from republican Rome; and a tragedy by Seneca from the imperial Rome of Nero. We will also read short selections from (or read about) the genres out of which tragedy and comedy were created and re–created, and into which they sometimes made their own incursions (e.g., heroic epic, women's laments, choral and solo lyric poetry, wisdom poetry, oratory, philosophical texts, histories, mime, farce, various kinds of dance, music and visual arts). We will especially attend to the ways tragedy and comedy inflected one another. Critical readings, along with modern productions of ancient tragedies and comedies, will guide us as we consider all these generic exchanges in light of changing conditions and occasions of theatrical performance, other public spectacles shaping the expectations of theater audiences, and the development of writing and reading as modes of performance.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on participation in class, several very short essays, and two longer essays, one of which may be replaced by an original script, design project, musical composition, or live performance
Prerequisites: none **Enrollment Limit:** 15 **Expected Class Size:** 10 **Enrollment Preferences:** if oversubscribed, preference given to majors or prospective majors in Classics, Theatre, Comparative Literature, English or an other literature, and to students engaged in performing or studio arts
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
SEM Instructor: Meredith Hoppin

THEA 275T Lying, Cheating, Stealing: Hidden Knowledge in American Drama (W) Crosslistings: THEA 275/COMP 275/ENGL 224
The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is quietly disregarding the rules? The revelation of hidden knowledge—what Aristotle called anagnorisis—lies at the base of what drama is, and how theatre functions. Theatre is lying as much as lying is theatre. So it should not be a surprise that playwrights often deliver plots and characters that pit playing against truth, and that oppose concealment and revelation as keys to dramatic action. But it should also not surprise that in the modern era, clarity in the dialectic of "truth and falsehood" has eroded as well. Relativity of honesty, contingency with regard to certain knowledge, "truthiness"—these too have a place in the modern theatre. This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty–first. Beginning with excerpted critical and historical writings on secrecy and lying (*The Adventures of Pinocchio*, Machievelli's The Prince, Thomas Carlson's *Lying and Deception: Theory and Practice*, Sissela Bok's *Secrets*, Martin Jay's *The Virtues of Mendacity*, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Edward Albee, Suzan–Lori Parks, Sarah Ruhl, Sam Shepard, Eugene O'Neill, Arthur Miller, David Mamet, Amy Herzog, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from *American* drama about a national relationship to honesty and its opposites.
Class Format: tutorial **Requirements/Evaluation:** weekly papers/response papers; weekly meeting with instructor and tutorial partner
Prerequisites: none **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** Theatre majors, English majors
Extra Info: may not be taken on a pass/fail basis

THEA 284 Writing for Film, Video, and Performance (W) Crosslistings: ARTS 284/THEA 284
This is a writing workshop for the time–based arts. We will study the use of language in a variety of kinds of film, video, and performance–based artworks. We will study examples in avant–garde film, video art, performance art, essay films, and explore the use of language and syntax of these forms in relation to, and in contrast with, popular cultural forms. The second half of the course will focus primarily on narrative screenwriting. The main goal of this course is to identify and generate a thematic, tonal, and narrative sensibility that is specific to each student. Students will create monologues, voiceovers, screenplays and avant–garde forms, and will also write several response papers about the use of language in film, video, and performance.
Class Format: studio **Requirements/Evaluation:** grades will be based on in–class writing, weekly assignments, participation in workshop discussion and critiques, and video–sketches that visually demonstrate ideas generated through writing **Enrollment Limit:** 19 **Expected Class Size:** 10 **Enrollment Preferences:** students will be asked for writing samples
Distributional Requirements: Division 1 Writing Intensive
Not Offered Academic Year 2014–2015
STU Instructor: Joshua Thorson

THEA 302(S) Scenic Design Crosslistings: THEA 302/ARTS 221
This course focuses on the artistic, intellectual, and practical roles of a set designer in the development of works of theatre. Grounded in textual analysis and research, a range of techniques will be explored and utilized to create theoretical stage designs for several plays, musicals and/or operas over the course of the semester. Emphasis will be on 3–dimensional modeling as the primary means of process and presentation, but sketching, drafting, and digital tools will also be important factors in course work. Unique, diverse, and strong points of view will be encouraged.
Class Format: studio **Requirements/Evaluation:** evaluation will be based upon committed class participation and thoughtful, timely completion of all assignments and projects
Prerequisites: THEA 201 or permission of instructor **Enrollment Limit:** 10 **Expected Class Size:** 8 **Enrollment Preferences:** Theatre majors
Dept. Notes: this course does not count toward the Art major
Materials/Lab Fee: lab fee of $125 to be added to the student's term bill
Distributional Requirements: Division 1
Spring 2015
STU Section: 01 MW 09:00 10:50 Instructor: David Gurcay–Morris

THEA 303 Stage Lighting
A study of the art and techniques of stage lighting. This class will provide instruction in the basic physics of light and color; the use of angle, intensity, color, texture and movement of light as compositional tools; various kinds of stage lighting instruments and their uses; conceptual development of a lighting design; translation of concept into light plot and channel hookup; focusing the plot in the theater; and writing cues.
Texts for the course will be the texts and scores of the plays, operas and other dramatic works that we will examine from the lighting designer's perspective, supplemented with readings that address the technical aspects of stage lighting. The class format will be a combination of lecture/discussion sessions and practical labs.Every effort will be made to provide students with lighting design opportunities on departmental productions as a part of their coursework, in accordance with students' abilities and interests and in consultation with directors and other faculty. Students are encouraged to seek out lighting design opportunities outside the department as well, and may incorporate these projects into their coursework.
Class Format: lecture **Requirements/Evaluation:** evaluation will be based on class participation, successful completion of weekly projects, thorough technical understanding of a basic stage lighting system, and performance on a final exam
Prerequisites: THEA 201 or permission from the instructor **Enrollment Limit:** 12 **Expected Class Size:** 8

Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
LEC Instructor: Julie Seitel

THEA 305(F) Costume Design Crosslistings: THEA 305/ARTS 200
This course is both an introductory and an intensive study of the art of costume design. The course focuses on the designer's process: script analysis, collaboration, research, color theory, basic design principles, rendering techniques, fabric research, organizational skills and presentation of designs.
Class Format: studio **Requirements/Evaluation:** evaluation will be based on multiple design assignments including a detailed final design project, costume labs, image and research files, costume sketchbook, short papers, committed participation, and attendance
Prerequisites: successful completion of any 200–level course in any of the fine or performing arts or permission of the instructor **Enrollment Limit:** 10 **Expected Class Size:** 8 **Enrollment Preferences:** Theater and Art Studio, sophomores and juniors
Dept. Notes: does not satisfy any requirements for the Art major
Extra Info: students are required to attend two to three theatre department or approved performances during the semester; students will also be expected to partake in intelligent critiques of fellow classmates' design work
Distributional Requirements: Division 1
Fall 2014
STU Section: 01 TF 01:10 03:50 Instructor: Deborah Brothers

THEA 306(F) Acting III: Physical Theatre and Body Language
This course for advanced students of acting will focus on particular aspects of performance as determined by the instructor in each semester in which the course is taught. Topics may include acting in verse drama, movement for the actor, voice, performing Shakespeare, aspects of physical theatre, non–realist acting, etc. The course will be taught by members of the Theatre faculty and/or Guest Artists, and may be repeated by students as instructors and topics change. Texts and reading assignments will vary depending on each semester's focus.
This semester Theatre 306 will focus on processes of Physical Theatre. The class is open to students interested in developing their ability in communication through the art of body language. Assigned research, analysis, discussions, and improvised exercises on stage will give us the opportunity to expand our understanding of physical vocabulary and will help us to express our intentions by evocative behavior. Based on various theatre techniques,this course will hone artistic skills for performance and improve students' confidence in their interactions with other people.
Class Format: studio **Requirements/Evaluation:** evaluation will be based on committed participation in class, and preparation and performance of assigned material
Prerequisites: permission of the instructor **Enrollment Limit:** 10 **Expected Class Size:** 10
Distributional Requirements: Division 1
Fall 2014
STU Section: 01 MR 02:35 03:50 Instructor: Omar Sangare

THEA 307 Stage Direction
An introduction to the resources available to the Stage Director for translating interpretive concepts into stageworthy physical realization. Kinetic and visual directorial controls, as well as textual implications and elements of dramatic structure, and strategies of working with actors and other collaborators will be studied in detail. Most assignments will involve hands–on directing projects presented in class for collective critique.
Class Format: studio **Requirements/Evaluation:** evaluation will be based principally on committed participation in the preparation and performance of production exercises; there will be some written assignments, including the assembly of directing production books and critiques of several productions
Prerequisites: THEA 103 and THEA 201 or permission of instructor **Enrollment Limit:** 12 **Expected Class Size:** 8 **Enrollment Preferences:** those who have also taken THEA 204
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
STU Instructor: David Eppel

THEA 308 Directing Workshop
This is a studio workshop dealing with the preparation, performance, and evaluation of brief dramatic exercises and one–act plays. The emphasis will be on the director's confrontation with the text, the actors, and the directorial controls chosen in support of interpretative concept.
Class Format: workshop
Prerequisites: THEA 201, 204, 307 or permission of the instructor
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
LEC Instructor: Tina Shepard

THEA 317 Black Migrations: African American Performance at Home and Abroad Crosslistings: AFR 317/COMP 319/DANC 317/ENGL 317/THEA 317/A
In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography.
Class Format: seminar/discussion **Requirements/Evaluation:** evaluation will be based upon class participation, one 5– to 7–page paper analyzing a performance/text, student–led class facilitation, final performance/ presentation
Prerequisites: none; open to all **Enrollment Limit:** 15 **Expected Class Size:** 10
Distribution Notes: meets Division 2 requirement if registration is under AFR or AMST; meets Division 1 requirement if registration is under COMP, DANC, ENGL or THEA
Distributional Requirements: Division 2 **Other Attributes:** AFR Core Electives
AMST Arts in Context Electives
AMST Comp Studies in Race, Ethnicity, Diaspora
Not Offered Academic Year 2014–2015

THEA 322(F) Race, Gender, and Performance from Literature to Social Media (D) Crosslistings: WGSS 330/COMP 339/AMST 332/LATS 335/THEA 322
What different conversations around the topic of "diversity" might be had if we think of race, gender, and sexuality as performative? How might the analytic of performance equip us in this course to identify marginalized modes of being and to enact anti–xenophobic strategies for everyday practice? In this course we will study multiple forms of contemporary performance (including performance art, visual art, sound art, social media, literature, politics, and performance of everyday life) by artists of diverse racial, gender, and sexual identification to think about belonging and alternative forms of world–making.
We will explore these questions in a United States context through engagement with cultural texts that destabilize ideological binaries of female/male, black/white, heterosexual/homosexual, subject/object, and human/non–human, including scholarship in critical ethnic studies, queer of color critique, and affect studies. We will begin with linguistic philosopher J.L. Austin's theory of the performative speech act, and proceed with theorists including Judith Butler and José Esteban Muñoz to consider gender and racial performativities. Artists studied will range from the conceptual (including Adrian Piper, Nao Bustamante, and Yoko Ono) to the popular (including Rihanna, Miley Cyrus, R. Kelly). This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces? This EDI course will critically engage with diversity from the heterogeneous and multiple perspectives of racial, sexual, and gender minorities, asking students not only to examine the diversity of human experience but to explore the political stakes of creative expression through interdisciplinary methods and forms.
Class Format: seminar **Requirements/Evaluation:** in–class participation, student presentation, two reading responses, performance analysis, office hours meeting, end–of–term paper
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 15

THEA 325T A Room that Pretends to be Another Room: Scenography in Theory and Practice
How have designers and directors thought about theatrical space? How successfully have their theories aligned with their practice? How are the ideas of the great European and American scenographers being re–imagined, reused, or abused on today's stages? In this tutorial we will take a hybrid approach to the study of scenography, blending theoretical, historical, and critical readings about stage design with a studio component that focuses on formulating an artistic response to those ideas. Our study of scenography will span a hundred years from Robert Edmund Jones to Nature Theater of Oklahoma, examining the ideas of Josef Svoboda, Bertolt Brecht and Caspar Neher, Mielziner, Lee, and Conklin; Wilson, Foreman, and The Wooster Group; and contemporary New York experimental theater. Assignments will alternate between writing short papers and creating preliminary scenic designs; both done in response to the designers or periods being examined in the readings. Introductory drawing and/or some scale model–making experience would be useful, but is not absolutely required.
Class Format: tutorial **Requirements/Evaluation:** evaluation will be based on critical analysis & discussion of readings, and active participation in critiques of creative work; assignments will consist of response papers alternating with design projects
Prerequisites: one of the following: THEA 101, THEA 201 (ARTS 201), THEA 248, ARTS 100; or permission of the instructor **Enrollment Limit:** 10 **Expected Class Size:** 6 **Enrollment Preferences:** will be given to Theatre majors
Extra Info: that include visual research, sketches and/or scale models; there will be a final public presentation or display of all students' work at the end of the semester
may not be taken on a pass/fail basis
Materials/Lab Fee: fee of up to $100 for materials and copying to be added to student term bill
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*

THEA 330 New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City Crosslistings: THEA 330/COMP 330/AMST 331
This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre–flooding and current re–building. Reading selections will include examples such as *Harper's Weekly* (Lafrcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *New Orleans Sketches* (William Faulkner), *The Moviegoer* (Walker Percy), *A Confederacy of Dunces* (John Kennedy O"Toole), *Why New Orleans Matters* (Tom Piazza), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar*

Named Desire, *An Interview with a Vampire*, *The Curious Case of Benjamin Briton*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.
Class Format: seminar **Requirements/Evaluation:** will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance
Prerequisites: none **Enrollment Limit:** 10 **Expected Class Size:** 6 **Enrollment Preferences:** students who have taken THEA 101

AMST Space and Place Electives
Not Offered Academic Year 2014–2015
SEM Instructor: Deborah Brothers

THEA 331(F) Hamlet (W) Crosslistings: THEA 331/ENGL 354
As Michel Foucault observed, "the face of madness has haunted the imagination" of Western culture—not just because the loss of rationality is a source of both crisis and intrigue, but because madness "deals not so much with truth and the world as with man and whatever truth about himself he is able to perceive." Hamlet, the character who feigns madness, and whose rationality and feeling are also tested well beyond that feigning, has likewise haunted the Western literary canon, raising fundamental questions about self–performance and the value of language and rationality. This course will study Shakespeare's *Hamlet* and its legacies. We will consider its literary antecedents (including Kyd's *The Spanish Tragedy*) and the theatrical and historical contexts in which it was written, prior to comprehensive study of the play. We will pay close textual and bibliographic attention to the differences between the two Quarto texts of 1603 of 1604 and the First Folio text of 1623, and to what these can tell us about performance and publication practices during the playwright's lifetime. Class exchanges with the Theatre Department production of the play will engage with questions of interpretation and performance for their work–in–progress. We will also assess at least two film versions of the play. The latter portion of the course will consider the ways *Hamlet* has haunted, and inspired, other writers over the past 400 years. Readings will Chekhov's *The Seagull*; Stoppard's *Rosencrantz and Guildenstern are Dead*; Heiner Muller's *Hamletmachine*; Martin McDonagh's *A Skull in Connemara*; and criticism by T.S.Eliot, Stephen Greenblatt and others.
Class Format: seminar **Requirements/Evaluation:** two 7+ page papers; several shorter critical response papers; active class participation
Prerequisites: a 100–level English course, a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate, or permission of the instructor **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** Theatre, English and Comparative Literature majors

THEA 335(S) The Culture of Carnival (D) Crosslistings: THEA 335/COMP 338
Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.
Class Format: studio **Requirements/Evaluation:** students will be evaluated on regular active class participation, one oral presentation including a, 5–page essay, one 15–page research final paper and participation in a group project/public parade.
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 18 **Enrollment Preferences:** sophomores and first–year students

Spring 2015
STU Section: 01 TF 01:10 02:25 Instructor: Deborah Brothers

THEA 336(S) The Abbey Theatre (W) Crosslistings: THEA 336/ENGL 346
The Irish Literary Theatre was launched in 1899, offering brief seasons of work performed by amateurs. It aimed to provide a forum for distinctively Irish writing, to escape the constraints and conventions of London commercial drama, and to encourage artistic expression "outside" of political considerations (though all the while benefitting from the fact that British censorship laws did not apply in Ireland). By 1904 the Irish Literary Theatre had evolved into the Abbey Theatre, a year–round professional company; and this in turn eventually became Ireland's National Theatre. This course will trace the evolution of modern Irish drama from these beginnings to the present day, with a core focus on work produced by the Abbey and its rivals. Readings will include plays by Yeats, Edward Martyn, J.M.Synge, Lady Gregory, Sean O'Casey, Lennox Robinson, Brendan Behan, John B. Keane, Brian Friel, Frank McGuinness, Martin McDonagh, Marina Carr, Enda Walsh, and Conor McPherson. We will consider production and reception histories, as well as the specific political and literary contexts in which these plays were written.
Class Format: seminar **Requirements/Evaluation:** two 6+ page papers; several short journal–style writing assignments; active participation in discussion
Prerequisites: a 100–level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** Theatre majors, English majors or permission of instructor
Extra Info: may not be taken on a pass/fail basis
Distributional Requirements: Division 1 Writing Intensive
Other Attributes: ENGL Literary Histories C

THEA 339 Introduction to Dramaturgy: The Art of Classical Adaptation
The dramaturg is an important collaborator in the theatrical production process, playing the multi–faceted role of historian, cultural critic, audience educator, and overall supporter of the production team. Working closely with the director, the dramaturg helps to shape a production and facilitate the demanding process of creating a world on stage. This course will introduce students to the fundamentals of production dramaturgy, applying our study of the practice to the topic of classical adaptation and translation. Sophocles' *Antigone* and Euripides' *Hippolytus* will serve as two of our foundational texts, from which we'll consider adaptations by Racine, Anouilh, Brecht, Gambaro, and LeCompte. We'll also view how modern directors have interpreted the classics through unique productions, such as Breuer's *The Gospel at Colonus*, Brook's *Mahabharata*, Mnouchkine's *Les Atrides*, and Ninagawa's *Medea*.
Class Format: seminar; assignments will be project–based and will range from making image boards to writing program notes **Requirements/Evaluation:** as a final assignment, students will research and write their own mini–adaptations of classical works and present their material to one another through informal, staged readings
Prerequisites: this course will serve as the Junior Seminar for majors in the Department of Theatre; enrollment for non–majors is possible with permission of instructor **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** Theatre majors
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
SEM Instructor: Amy Holzapfel

THEA 342 Solo Performance
This is an acting course in which students will study the art and skill of monologue. We will look at the concepts of soliloquy and monologue and "one–person performance", both from the points of view of content, and context—that is the relationship between the performer and the work, and between the performer and the audience. The course will culminate in a performance during the Theatre Department's annual *Dialogue One Festival*. **Requirements/Evaluation:** students will identify an historical figure on which to base their final monologues, and the work will entail intensive study of that person
Prerequisites: THEA 103 or permission of the instructor **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** Theatre majors
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
STU Instructor: David Eppel

THEA 345(S) Contemporary Theatre and Performance Crosslistings: THEA 345/ENGL 349/COMP 355
As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on it today's theatre and in performance now? What are the hot topics? Who are the writers and directors of our recent past and present moment? This seminar course will consider both experimental and mainstream drama and performance from roughly the past twenty years, focusing on topics such as: auteur–directors, new realism, identity theatre, environmental theatre, performance art, cyber–plays, and the "virtuosic theatre" of the new century. Artists and groups to be considered may include: The Wooster Group, Richard Foreman, Robert Wilson, Edward Albee, Sam Shepard, David Mamet, Caryl Churchill, Tony Kushner, David Henry–Hwang, Suzan–Lori Parks, Sarah Kane, Will Eno, Richard Maxwell, Annie Baker, and others.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on written and dramaturgical–based assignments, an oral presentation, as well as in–class discussions and a creative writing and/or performance project
Prerequisites: none **Enrollment Limit:** 18 **Expected Class Size:** 15 **Enrollment Preferences:** Theatre, Art History, English or Comparative Literature majors
Distributional Requirements: Division 1
Spring 2015
SEM Section: 01 TF 01:10 02:25 Instructor: Amy Holzapfel

THEA 346 To Be Or Not To Be: Theatrical Decision–Making
In this advanced acting course, students will examine a wide range of motivations, decisions, mistakes, and consequences that dramatic characters encounter. Through discussions and analysis of selected play, students will find key moments that define tragedy, and will explore the ways in which characters change their behavior to resolve conflict. How do characters respond to problems? Could they make better choices? What can we change about our own decision–making? How do we protect ourselves from mistakes? Fundamental dilemmas will be examined through theory and improvisation. The results of our exploration will be presented in a final performance. This theatrical experience will prepare students for future challenges on the stage of life.
Class Format: studio **Requirements/Evaluation:** evaluation will be based on committed participation in class, and preparation and performance of assigned material
Prerequisites: None **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** Theatre majors
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
STU Instructor: Omar Sangare

THEA 349(S) Shakespearean Comedy Crosslistings: ENGL 345/THEA 349
Among Shakespeare's most beloved, delightful, and fascinating plays are four comedies: *A Midsummer Night's Dream, As You Like It, Twelfth Night*, and *Much Ado About Nothing*. This seminar examines the language, theatricality, characterization, and comic elements through close scrutiny and discussion. Students will present brief seminar reports, memorize a few brief passages, and write three 5–page essays, to be discussed with the instructor individually and revised. The essays and discussions will test various theories of comedy and concentrate on Shakespearean language.
Class Format: seminar **Requirements/Evaluation:** three 5–page papers, seminar reports, participation in discussions
Prerequisites: a 100–level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** English majors

Distributional Requirements: Division 1 **Other Attributes:** ENGL Literary Histories A

THEA 360(S) The Body as Book: Memory and Reenactment in Dance & Theater **Crosslistings:** THEA 360/DANC 303/COMP 360
What does it mean to conceive of the body as a book? This unique interdisciplinary studio/seminar course examines how dance and theater channel, preserve and transmit stories and cultural memory through individual and collective bodies. Dance and theater are traditionally defined as ephemeral arts, bounded by the limits of linear time and space. Yet, as Rebecca Schneider writes, "time is decidedly folded and fraught." Repetition and reenactment are forms of remembering, and performance is often not what disappears but what remains.How do we pass on knowledge in visceral and affective ways? What is a "repertoire"? What are the benefits and risks of continuity over time?
Taught as part of the Books Unbound curricular initiative, and in conjunction with the opening of the Sawyer–Stetson Library, the course will complete a project in which the class "embodies" material, first by exploring stories embodied by individual members of the class, and then by translating them through performance by the collective, culminating in dance/theatre pieces performed in the new library. Over the term, we will also study modern and contemporary American artists, such as: Martha Graham, The Wooster Group, Alvin Ailey, Meredith Monk, Anne Bogart, Ralph Lemon, Elevator Repair Service, Bill T. Jones, Marina Abramovic, José Limon, and Suzan–Lori Parks. We will also collaborate with professional artists invited to Williams to create and present dance and theater pieces in the new library.
Class Format: studio/seminar **Requirements/Evaluation:** evaluation will be based on collaborative–based project work, individual research, writing and final performances
Prerequisites: no prior dance or theatre training is required **Enrollment Limit:** 14 **Expected Class Size:** 10 **Enrollment Preferences:** students majoring in Dance, Theatre, American Studies and Art

THEA 406(S) Senior Seminar: 20th Century Struggle Theatre
For Spring 2015, the seminar will explore the nature of the impact that theatre exerts on communities in general, and on societies existing under specific, circumscribed sociopolitical systems. The seminar will investigate the power of theatre to influence, enlighten and transform its audiences within a commonly lived political system. In many societies in the 20th and 21st centuries, the theatre has been a space where, within that famed "two hour traffic of our stage", struggle has been a major theme, and opposition can, somehow, be voiced. The theatre is a place of parable and of storytelling, a place where comedy and satire as well as tragedy find within their audiences a recognition and an identification. Put this way, theatre can be and has been a powerful, sometimes even dangerous tool. The Seminar will look at "Struggle Theatre" in the 20th Century. Anti–apartheid South African protest theatre of the 1950's though the 1980's will be highlighted next to theatre movements in Eastern Europe during the Cold War; the United States during the Depression, and the Viet Nam war years; Brazil, Chile, Argentina and other South American countries during their periods of military dictatorships. Readings will include theorists from literary studies, anthropology, cultural studies, and related fields, as well as primary texts from drama and other arts.
Class Format: seminar and studio **Requirements/Evaluation:** project work, and presentation of original research and analysis in a public setting at the end of the semester
Prerequisites: limited to senior Theatre majors **Enrollment Limit:** 7 **Expected Class Size:** 7 **Enrollment Preferences:** Theatre majors only
Distributional Requirements: Division 1

WOMEN'S, GENDER and SEXUALITY STUDIES (Div. II)

Chair, Professor LUCIE SCHMIDT

Advisory Committee: Professors: DRUXES, KENT*, SCHMIDT. Associate Professors: DUBOW*, R. MANIGAULT–BRYANT, MARTIN. Visiting Associate Professor: HONDERICH§. Assistant Professors: COHEN, MITCHELL, NJOYA. Visiting Assistant Professor: COWDEN. Bolin fellow: HUANG. Librarian: SHRIVER. Queer Life Coordinator: ADKINS. Health Educator: DENELLI–HESS.

Women's, Gender and Sexuality Studies can be defined as the study of how gender is constructed, how it is inflected by differences of race, ethnicity, sexuality, class, and so on, how gender affects the experiences and situations of men and women, and how assumptions about gender influence the construction of knowledge and experience. Scholarship in Women's, Gender and Sexuality Studies has brought neglected material into established fields and raised important methodological questions that cross disciplinary boundaries and challenge established intellectual frameworks. The program in Women's, Gender and Sexuality Studies thus includes courses from a wide variety of disciplines that focus in a coherent way on gender issues and/or sexuality issues, as well as core courses that acquaint students with the interdisciplinarity of the field.

THE MAJOR

The Women's, Gender and Sexuality Studies major encourages students' exposure to the interdisciplinary character of feminist and sexuality–focused scholarship. In addition, majors are required to gain some knowledge of methods within a field or discipline (3 courses in one of the categories listed below), to appreciate the importance of diversity (racial, sexual, class, ethnic, national, etc.) in scholarship on gender and sexuality, to gain exposure to feminist and/or queer theory, and to pursue work at an advanced level (3 courses at the 300–level).

In order to ensure that students reflect about the paths that they choose through the major, each major will be assigned to an advisor in the spring of the sophomore year. With the advisor, the student will establish a revisable course of study for the following two years. Students interested in declaring a major should contact the chair of the Program (Schmidt, x3143).

Required Courses

The major consists of at least 9 courses. The following are required:

Introduction to Women's, Gender and Sexuality Studies (WGSS 101)
Junior/Senior Seminar in Women's, Gender and Sexuality Studies (The seminar explores topics in Women's, Gender and Sexuality Studies, and varies from year to year. Majors may take more than one seminar, space permitting.)

Note: Historically the Junior/Senior Seminar has always been numbered WGSS 402. Beginning in 2014–15, each iteration of the course will have its own course number. This year it is WGSS 404 (Before We Were Queer).

Students can check with the program chair to see if other courses not listed here might count as electives.

Distribution Requirements

1. One of the following theory courses:

Offered 2014–2015:
WGSS 272/ANTH 272 Sex and the Reproduction of Society
WGSS 306/AFR 306/AMST 306/LATS 306/COMP 304 Queer of Color Critique
WGSS 313/AMST 313/LATS 313 Gender, Race, and the Power of Personal Aesthetics
WGSS 327/PHIL 327 Foucault
WGSS 330/AMST 332/COMP 339/ LATS 335/ THEA 322 Race, Gender, and Performance from Literature to Social Media
WGSS 373/PHIL 373/PSCI 373 Antigone
WGSS 412/COMP 412/ENGL 412 Feminist and Queer Interventions in Literary Theory

Not currently offered:
WGSS 225/PHIL 225 Classics in Western Feminist Thought
WGSS 236/PSCI 236 Sex, Gender, and Political Theory
WGSS 238/PSCI 239 Science, Gender and Power
WGSS 250T/THEA 250T Gender, Sexuality & the Modern Stage
WGSS 271/PHIL 271 Woman as "Other"
WGSS 307/REL 306 Feminist Approaches to Religion
WGSS 310/AFR 310/REL 310AMST 309 Womanist/Black Feminist Thought
WGSS 321/PHIL 320 Recent Continental Feminist Theory
WGSS 322T/PHIL 321T Critical Theory
WGSS 338/AMST 339/LATS 338 Latina/o Musical Cultures: Gender, Race, Sexuality and the Dynamics of the Everyday
WGSS 396/ENGL394 Modern Pleasure
WGSS 457/HIST 457 Gender, Law, and Politics in U.S. History

Or, students may petition the chair to have another course accepted.

2. Racial, Sexual, and Cultural Diversity

Majors must take at least *one* of the following:

Offered 2014–2015:
WGSS 202 Introduction to Sexuality Studies
WGSS 246/REL 246/ANTH 246/ India's Identities: Religion, Caste, and Gender
WGSS 249/REL 248/ASST 248/ANTH 248 Body Politics, Gender and Religion in South Asia
WGSS 306/AFR 306/AMST 306/LATS 306/COMP 304 Queer of Color Critique
WGSS 308/HIST 308/AFR 308 Gender and Society in Modern Africa
WGSS 313/AMST 313/LATS 313 Gender, Race, Beauty, and the Power of Personal Aesthetics
WGSS 330/AMST 332/COMP 339/ LATS 335/ THEA 322 Race, Gender, and Performance from Literature to Social Media
WGSS 386/HIST 386/LATS 386 Latinas in the Global Economy: Work, Migration, and Households

Not currently offered:
WGSS 200/COMP 212 Nordic Lights: Literary and Cultural Diversity in Modern Scandinavia
WGSS 211/ECON 211 Gender in the Global Economy
WGSS 213T/AFR 213T Race, Gender, and the Alien Body: Octavia Butler's Science Fiction
WGSS 256/REL 256/ANTH 256/ASST 256 Engendering Buddhism: How Women and Men Shape and Are Shaped by Buddhism
WGSS 310/AFR 310/REL 310/AMST 309 Womanist/Black Feminist Thought
WGSS 319/HIST 319/ASST 319 Gender and the Family in Chinese History
WGSS 338/AMST 339/LATS 338 Latina/o Musical Cultures: Gender, Race, Sexuality and the Dynamics of the Everyday
WGSS 343T/INTR 343T/AMST 343T/AFR 343T Representations of Racial–Sexual Violence from Enslavement to Emancipation
WGSS 378/HIST 378 The History of Sexuality in America
WGSS 379/HIST 379/AFR 379 Black Women in the United States
WGSS 382/LATS 382/HIST 382 Latina/o Politics
WGSS 383/HIST 383 Whiteness and Race in the History of the United States

Or, students may petition the chair to have another course accepted.

3. Thematic Cluster

At least three of the seven electives, with at least one at the 300–level, should be identified by majors as comprising a thematic group. This requirement aims to have majors create some focus and depth within their interdisciplinary study by forming a cluster sharing common approaches, themes, or issues.

a. Literary or artistic expression
b. Historical perspectives
c. Forms of political and social organization
d. Theorizing gender across cultural differences and/or disciplines
e. Queer Studies
f. Ethnicity and Race

4. Interdisciplinary electives must be taken in at least three departments/programs and at least two divisions.

5. Three of the seven electives must be at the 300 level.

THE DEGREE WITH HONORS IN Women's, Gender and Sexuality Studies

Honors in Women's, Gender and Sexuality Studies may be granted to majors after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded honors by the Women's, Gender and Sexuality Studies Committee.

The honors project may be fall semester (plus winter study) or a year–long project. It may consist of a conventional research thesis of 40–70 pages or of other modes of presentation (e.g., art, music, poetry, theater, fiction). Proposals for non–thesis projects should include evidence of experience and competence in the chosen mode.

A student may become a candidate for honors in Women's, Gender and Sexuality Studies after the following criteria are met:

1). in April of the junior year, submission and Women's, Gender and Sexuality Studies Committee approval of a 4– to 6–page project proposal, in which the ideas, aim, general methodology, and preliminary bibliography for the project are outlined and a faculty advisor is named; prior to submission of this proposal, students must consult with a reference librarian.
2). at the end of the junior year, cumulative grade point average of 3.5 from courses taken in the major;
3). in the first week of classes of the senior year, submission and approval by the faculty advisor and second reader of a 5– to 10–page "Plan of Action" (an overview of what has already been completed and a schedule of what needs to be accomplished to finish the project). Where appropriate, students pursuing honors will continue to consult with the second reader over the course of the semester(s).

All honors work, including the public presentation, will be evaluated by the Women's, Gender and Sexuality Studies Committee. It will decide on the awarding of honors; the advisor will award the grade(s)

STUDY ABROAD

The Williams College Women's, Gender and Sexuality Studies Program encourages potential majors to study abroad in order to enhance their education and gain international perspectives on gender and women's issues and feminism. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. There are several semester–long programs with a specific focus on women and/or gender administered by other U.S. Colleges that would especially enrich the educational experience of our majors:

Antioch College: Comparative Women's Studies in Europe fall semester
Augsburg College, Center for Global Education: Crossing Borders: Gender and Social Change in Mesoamerica fall semester; and Social and Environmental Justice in Latin America spring semester

School for International Training:
The Balkans: Women and Democratization, fall or spring semester
Jamaica: Gender and Development, fall or spring semester
Mali: Gender and Development, fall or spring semester
The Netherlands: Identity, Gender and Sexuality, fall or spring semester

You can find general study away guidelines for Women's, Gender and Sexuality Studies here.

WGSS 101(F,S) Women's, Gender and Sexuality Studies (D) (W)
This discussion and lecture course introduces students to a range of issues, theories, and controversies within feminism, gender studies, and sexuality studies. It has several aims: to provide critical and analytical tools for thinking about gender; to explore key issues facing women and sexual minorities in the U.S. (and other) societies, and to discuss strategies for confronting them. The course will examine issues such as: body politics, sexuality, reproductive rights, sexual violence, gender and work, motherhood and family, homophobia, transgendered people's experiences in the US and abroad. Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist, gender, and sexuality studies and as a vehicle for developing skills in writing and research, as well as analytical tools for further work in the field. This course meets the requirements of the Exploring Diversity Initiative in that its main emphases are on challenging the notion of one universalizing category of "woman," and to recognize the diverse ways in which national, sexual, ethnic, racial, classed and other kinds of differences produce multiple and often divergent relations of gendered power. It also whenever possible contextualizes within a global frame the central issues that have made up and continue to define the U.S. feminist tradition, in order to encourage students to recognize the role cultural difference plays in a variety of feminist issues and to decenter the U.S as a reference point for all feminist theory and politics. During days with lectures, two sections may combine for team–teaching. Otherwise, the sections meet separately for discussion.
Class Format: lecture and seminar **Requirements/Evaluation:** 1 short (3 page) essay, 1 final paper proposal/abstract, 1 annotated bibliography, 1 final paper of 7–9 pages (w/revisions); evaluation will be based on these assignments and class participation
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 19

WGSS 129 Blacks, Jews, and Women in the Age of the French Revolution (D) (W) Crosslistings: HIST 129/WGSS 129
The French Revolution was an important turning point in world history. Besides ushering in an age of *liberté* (liberty) and *égalité* (equality), it also postulated the existence of a new revolutionary *fraternité* (brotherhood) between peoples of all backgrounds. Would revolutionary fraternity include women, African slaves, and Jews in the new democratic polity? French men and women debated these questions in ways that have had a direct impact on our contemporary discussions of race, gender, religious freedom and ethnicity. In this course, we will explore these debates, their Enlightenment roots, and the legacy of these debates for France's minorities today. Students will be introduced to various types of historical sources (rare books, art, opera, plays), as well as to the lively historiographical debates between historians of France concerning methodology, politics, and the goal of historical research.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on class participation, oral reports, 1–2 short papers, a 15– to 20–page research paper, and a final examination (may be an oral and/or take–home exam); the class will also be expected to go on a couple of field trips
Prerequisites: first–year or sophomore standing; juniors or seniors with permission of the instructor **Enrollment Limit:** 19 **Expected Class Size:** 15–19 **Enrollment Preferences:** first–year students, and then sophomores, who have not previously taken a 100–level seminar

WGSS 152(S) The Fourteenth Amendment and the Meanings of Equality (D) (W) Crosslistings: HIST 152/WGSS 152
For more than a century, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; and the battles over incorporating the Bill of Rights into the 14th Amendment. We will pay particular attention to how debates over the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality, and how the 14th Amendment has transformed the promise and experience of American citizenship.
Class Format: discussion **Requirements/Evaluation:** evaluation will be based on class discussion, three short analytical papers, and a final research paper
Prerequisites: first–year or sophomore standing; juniors or seniors with permission of the instructor **Enrollment Limit:** 19 **Expected Class Size:** 15–19 **Enrollment Preferences:** first–year students, and then to sophomores who have not previously taken a 100–level seminar

Spring 2015
SEM Section: 01 TR 11:20 12:35 Instructor: Sara Dubow

WGSS 178T Marriage and the American Nation (W) Crosslistings: HIST 178/WGSS 178
This tutorial explores the transformation of marriage as an institution, idea, and experience from colonial times through the beginning of the twenty–first century. What is marriage? Is it a private agreement or a public contract? A legal bond or a religious sacrament? A right or a privilege? Who can enter it? Who determines when it is over, and on what grounds? Examining the long history of American debates about these questions, we will consider the complex ways that beliefs and policies regarding marriage have affected national understandings of gender roles, of racial difference, of the meaning of citizenship, and of the function and reach of government. We will explore many of the controversies associated with marriage over the last 400 years, including interracial marriage, polygamy, divorce, domestic violence, property rights, custody, cohabitation, working mothers, and same–sex marriage.
Class Format: tutorial **Requirements/Evaluation:** students meet in wkly 1–hr sessions with the instructor & a classmate; each wk, students will alternate between writing a 5– to 7–pg paper on the assigned readings (presented orally in class) & writing & presenting a 2–pg critique of classmate's paper
Prerequisites: first–year or sophomore standing; juniors or seniors with permission of the instructor **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** sophomores, and then first–year students who have not previously taken a 100–level tutorial
Extra Info: the course will conclude with a final paper that examines one of the issues raised in class in greater depth
may not be taken on a pass/fail basis; not available for the Gaudino option
Distributional Requirements: Division 2 Writing Intensive
Other Attributes: HIST Group F Electives – U.S. + Canada
Not Offered Academic Year 2014–2015
TUT Instructor: Sara Dubow

WGSS 200 Nordic Lights: Literary and Cultural Diversity in Modern Scandinavia (D) Crosslistings: COMP 212/WGSS 200
Mythologized as the land of the aurora borealis and the midnight sun, Scandinavia's five distinct nations—Iceland, Norway, Sweden, Denmark, and Finland—are often mistakenly associated with blond–haired and blue–eyed uniformity. Modern Scandinavia, however, is a place of great social and cultural diversity. From medieval Viking sagas to contemporary Nordic rap, the Scandinavian literary tradition is rich in tales of global exploration, childhood imagination, sexual revolution, and multicultural confrontation. Through readings of nineteenth–century drama, twentieth–century novels, and twenty–first century cinema, we will investigate a wide range of issues on class, ethnicity, and identity, including the indigenous reindeer–herding Sami people, Danish colonialism and the Greenlandic Inuit, Norwegian collaboration and resistance during World War II, and Nordic emigration (to North America) and immigration (from Africa, Asia, Latin America, and the Middle East). Discussion will also focus on Scandinavia's leadership in gender equality and sexual liberation, Scandinavian political isolation and integration (into both the UN and the EU), and the global effects of Nordic pop (ABBA to Bjork), glamour (Greta Garbo to Helena Christensen), technology (Volvo to Nokia), and design (IKEA to H&M). Readings to include works by Henrik Ibsen, August Strindberg, Hans Christian Andersen, Karen Blixen, Astrid Lindgren, Halldór Laxness, Reidar Jönsson, and Peter Hoeg. Films to include works by Ingmar Bergman, Lasse Hallström, Bille August, Colin Nutley, Lukas Moodysson, Josef Fares, Tomas Alfredson and Tomas Vinterberg. *All readings and discussions in English.*
Class Format: seminar **Requirements/Evaluation:** active participation, two short papers, an oral presentation, and a final paper
Prerequisites: none **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** Comparative Literature and Women's, Gender and Sexuality Studies majors and those with compelling justification for admission
Distribution Notes: meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1 Exploring Diversity

WGSS 201(F) War and Resistance: Two Centuries of War Literature in France, 1804–2004 Crosslistings: RLFR 202/WGSS 201
In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to France's controversial role in the "War on Terror" (at the opening of the twenty–first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth– and twentieth–centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. *Conducted in French.*

Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: exceptional performance in RLFR 105; Strong performance in RLFR 106 or 107; Successful performance in RLFR 201 or 203; or by Placement Test; or by Permission of the Instructor. **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission
Dept. Notes: formerly RLFR 110

WGSS 202(F) Introduction to Sexuality Studies (D)
This course will offer an introduction to the burgeoning interdisciplinary field of gay/lesbian/bisexual/transgender/queer studies, in part through examining historical, legal, literary, filmic, cultural studies, sociological, and popular texts, as well as work done under the umbrella of queer theory. Subjects covered may include the following: histories of sexualities in the U.S., feminism and its relation to queer studies; how sexuality is racialized; transgender and intersex theory and activism; globalization and sexuality; and strategies of resistance and visibility such as those evidenced by AIDS activism/theory and debates over gay marriage. An essential part of the course will be exploring how race, class, religion, and nationality contribute to the construction and lived experience of modern gender and sexual identities. Readings may include works by Foucault, Butler, Sedgwick, Warner, Berlant, Stryker, Puar, Ferguson, Muñoz, Freeman, El–Tayeb, Halberstam, Crimp, Lorde, Najmabadi, and Massad. This class meets the requirements of the Exploring Diversity Initiative in that it emphasizes empathetic understanding of gender and sexual diversity; studying relations of power and privilege as they apply to sexual, gender, racial, class and national identities and practices; and foregrounds critical theorization of gender and sexuality.
Class Format: discussion **Requirements/Evaluation:** paper proposal and annotated bib, 8–10 page final paper, LGBT prison pen–pal reflection
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** WGSS majors, short statement of interest in case of over–enrollment

WGSS 203 Chicana/o Film and Video (D) Crosslistings: LATS 203/ARTH 203/WGSS 203/AMST 205
Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.–Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o–produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity.Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres. By introducing various interdisciplinary approaches and theoretical methods related to race, representation, and the media, the course fulfills the Exploring Diversity Initiative's themes of critical theorization and power and privilege.
Class Format: film screenings will be scheduled as a lab **Requirements/Evaluation:** evaluation will be based on one short paper, mid–term exam, final exam and take home essays
Prerequisites: none **Enrollment Limit:** 30 **Expected Class Size:** 20
Distribution Notes: meets Division 2 requirement if registration is under AMST, LATS or WGSS; meets Division 1 requirement if registration is under ARTH

WGSS 204 The Experience of Sexuality: Gender & Sexuality in 20th–century American Memoirs (D) Crosslistings: WGSS 204/COMP 244
Focusing on first–person accounts of LGBTQ sexualities, this course examines how changing social and political realities have affected sexual desires and identities, and how individuals represent their experiences of these historical and conceptual shifts. How do these representations of sexuality challenge prevailing ideas about desire and identity? How do they navigate the gender limitations imposed by our language? How do other social identifications, such as race, ethnicity, class, and gender, shape these experiences of sexuality? We will read memoirs, autobiographies, and personal essays that reflect a range of LGBTQ identities and experiences, including works by Martin Duberman, Audre Lorde, Leslie Feinberg, Alison Bechdel, Reinaldo Arenas, Kate Bornstein, Gloria Anzaldùa, Samuel Delany, David Wojnarowicz, and Michelle Tea. These narratives will be accompanied by a variety of queer and feminist theories of sexuality, some of which interrogate the historical and conceptual limitations of "experience" and "identity." This course fulfills the requirements of the Exploring Diversity Initiative in that it investigates institutions of power and privilege as they have impacted LGBTQ communities, emphasizes empathetic understanding of gender and sexual diversity, and focuses on critical theorization of intersecting differences and identities.
Class Format: seminar **Requirements/Evaluation:** intensive reading; active class participation; two 5–page papers and final 10–page paper
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 15 **Enrollment Preferences:** WGSS majors
Distribution Notes: meets Division 2 requirement if registration is under WGSS; meets Division 1 requirement if registration is under COMP

WGSS 205(F) Gender and Economics Crosslistings: ECON 203/WGSS 205
This course uses economic analysis to explore how gender differences can lead to differences in economic outcomes, in both households and the labor market. Questions to be covered include: How does the family function as an economic unit? How do individuals allocate time between the labor market and the household? How have changes in family structure affected women's employment, and vice–versa? What are possible explanations for gender differences in labor force participation, occupational choice, and earnings? What is the role of government in addressing gender issues in the home and the workplace? How successful are government policies that primarily affect women (e.g., comparable worth policies, AFDC/TANF, subsidization of child care)? The course will focus on the current experience of women in the United States, but will place these gender differences in a historical and cross–cultural context.
Class Format: lecture/discussion **Requirements/Evaluation:** weekly discussion papers, two midterms, and a final paper and presentation
Prerequisites: ECON 110 **Enrollment Limit:** 25 **Expected Class Size:** 25

WGSS 206(S) Shakespeare, Sex, and Power Crosslistings: ENGL 201/WGSS 206
Writing at a time of enormous social, religious, and political upheaval, Shakespeare is remarkably astute about the power of sex and the allure of power. To what extent or in what ways do his all–male cast, cross–dressed heroines, and sonnets to a young man and a dark lady embody or contest social norms, gender roles, and the power structure? Looking closely at Shakespeare's language and literary and dramatic forms, this course will examine some of his most erotic and powerful works: *Romeo and Juliet, As You Like It, Much Ado about Nothing, Sonnets, Hamlet, Othello*, and *Antony and Cleopatra*. We will also watch scenes from recent films to explore differences between theater and cinema, early modern and contemporary views of gender and sexuality, popular culture and high art.
Class Format: seminar **Requirements/Evaluation:** two 5–page papers and a final exam
Prerequisites: a 100–level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam **Enrollment Limit:** 25 **Expected Class Size:** 20 **Enrollment Preferences:** ENGL and WGSS majors and potential majors
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under WGSS

WGSS 209(S) Poverty in America Crosslistings: PSCI 209/WGSS 209
Although some protest that the U.S. is heading toward European–style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?
Class Format: lecture/discussion **Requirements/Evaluation:** class participation, two or three short papers, and a final paper
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 25 **Enrollment Preferences:** Political Science, Political Economy, and Women's, Gender and Sexuality Studies majors and concentrators in Public Health

SEM Instructor: Joy James

WGSS 211 Gender in the Global Economy Crosslistings: WGSS 211/ECON 211
This course will present a feminist economic analysis of the global economy, and some of the urgent issues facing women in poor countries. The course will start by developing theoretical resources: these will include feminist critiques of economics theory, work on care labor and the shifting boundaries between markets, governments and households, theories of household bargaining, and discussions of intersectionality and difference. Then we will discuss a series of interlinked issues which may include the contradictory effects of structural adjustment and its successors; the informal sector and the 'invisible assembly line'; the economics of sex work and global sex trafficking; microcredit; the economics of the HIV/AIDS pandemic. We will finish by looking at community–based activism, non–governmental organizations, and the possibilities for first–world/third–world alliances.
Class Format: lecture/discussion **Requirements/Evaluation:** reaction papers, midterm exam, research paper;participation in class discussion will count for part of the grade
Prerequisites: none **Enrollment Limit:** 30 **Expected Class Size:** 20 **Enrollment Preferences:** Women's, Gender and Sexuality Studies majors
Extra Info: additional requirements: two oral responses to seminar papers; two 2–page seminar response papers; one response to a peer's final paper

WGSS 212 Ethics and Reproductive Technologies (W) Crosslistings: PHIL 212/WGSS 212
In her groundbreaking book, *The Tentative Pregnancy*, Barbara Katz Rothman writes that "[t]he technological revolution in reproduction is forcing us to confront the very meaning of motherhood, to examine the nature and origins of the mother–child bond, and to replace—or to let us think we can replace—chance with choice." Taking this as our starting point, in this course we will examine a number of conceptual and ethical issues in the use and development of technologies related to human reproduction, drawing out their implications for such core concepts as "motherhood" and "parenthood," family and genetic relatedness, exploitation and commodification, and reproductive rights and society's interests in reproductive activities. Topics will range from consideration of "mundane" technologies such as in vitro fertilization (IVF), prenatal genetic screening and testing, and surrogacy, to the more extraordinary, including pre–implantation diagnosis (PID), post–menopausal reproduction, post–mortem gamete procurement, reproductive cloning and embryo splitting, and in utero medical interventions. Background readings include sources rooted in traditional modes of bioethical analysis as well as those incorporating feminist approaches.
Class Format: discussion **Requirements/Evaluation:** active participation in class discussions, four to five short reflection papers, and two longer papers (5–10 pages)
Prerequisites: none, but introductory–level course in PHIL and/or WGSS highly recommended **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** Women's, Gender and Sexuality Studies majors

WGSS 213T Race, Gender, and the Alien Body: Octavia Butler's Science Fiction (W) Crosslistings: AFR 213/WGSS 213
Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947–2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on — and often disrupt — modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post–race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best–selling text *Kindred* (1979), the haunting dystopian novel *Parable of the Sower* (1994), the popular vampire text *Fledgling* (2005), and the collection *Bloodchild and Other Stories* (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book *Dawn* (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender', 'alien' and 'body' are interrogated in her writings.
Class Format: tutorial **Requirements/Evaluation:** attendance, paired weekly reflection/response papers, a 5– to 7–page creative writing assignment, and a final essay of 10 pages
Prerequisites: none **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies

WGSS 214(F) From Putin to Pussy Riot: Discourses of Post–Soviet Gender (D) Crosslistings: RUSS 213/INST 213/WGSS 214
Before 1991, Russians typically appeared in the Western media as macho villains in the nuclear arms race or a James Bond film. Today, however, news from the Former Soviet Union often sounds like a bizarrely gendered media stunt. For example, Russian president Vladimir Putin has been photographed topless while fishing on vacation in Siberia, while the feminist punk–rock collective Pussy Riot protested Putin's regime by performing in day–glo balaclavas in Russia's largest cathedral. This course examines related post–Soviet media spectacles in the attempt to understand the Western press's fascination with Russia, as well as key social trends defining the post–Soviet era. We will focus on the ways in which gender and sexuality have come to mark post–Soviet culture and discourse as different from those in the West. In addition to Vladimir Putin and Pussy Riot, we will consider the so–called crisis of masculinity in post–Soviet Russia, the trafficking of women from the Former Soviet Union, the revival of indigenous practices such as bride kidnapping in Kyrgyzstan and Buzkashi in Tajikistan, the Ukrainian feminist collective Femen, the Eurovision Song Context, and the 2013 legislation in the Russian Federation banning homosexual propaganda among minors. We will try to understand how concepts, such as feminism, tolerance of sexual minorities, and performed gender, have been deemed dangerous in the post–Soviet East at the very time they have attained normative status in the West. This course is part of the Exploring Diversity Initiative because it engages in cultural comparison, explores how power and privilege are allocated differently in post–Soviet societies than in Western liberal democracies, and engages in the critical theorization of post–Soviet culture and discourse.
All readings will be in English.
Class Format: seminar **Requirements/Evaluation:** active participation in class discussions, response papers based on assignments for class, 2 papers (3–5 pages each) on relevant current events in the post–Soviet world, and a final project
Prerequisites: none **Enrollment Limit:** none **Expected Class Size:** 15 **Enrollment Preferences:** none

WGSS 222 Modern Spanish Women: Literature and Life Crosslistings: RLSP 220/WGSS 222
From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films and graphic materials, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, and the transition to democracy.
Class Format: seminar
Prerequisites: RLSP 201, permission of the instructor, or acceptable results of the Williams College Placement Exam **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** Spanish and Comparative Literature majors
Distribution Notes: meets Division 1 requirement if registration is under RLSP; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*

WGSS 224 Sexuality and Seduction in Nineteenth and Twentieth–Century France (D) Crosslistings: RLFR 224/WGSS 224
In 1857, both Flaubert's *Madame Bovary* and Baudelaire's *Les Fleurs du mal* were put on trial for sexual indecency and "crimes against public morality." In 1868, *Le Figaro* attacked Zola's novel *Thérèse Raquin* as "putrid literature" for its depiction of adultery, murder, and scandalous sexuality in nineteenth–century Paris. A century later, Gide, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, inter–generational lovers, and bi–racial relationships. In this course, we will examine a wide range of issues on eroticism and sexuality in nineteenth– and twentieth– century French literature, including marriage and adultery, seduction and desire, love and betrayal, prostitution and fetishism, gay and lesbian identity, cross–dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d'Aurevilly, Gide, Proust, Colette, Duras, and Guibert. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: RLFR 106 or 107; another 200–level course such as RLFR 201, 202, 203; or by placement test; or by permission of the instructor **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** French majors and certificate students; Women's, Gender and Sexuality Studies majors; Comparative Literature majors and those with compelling justification for admission

WGSS 225 Classics in Western Feminist Thought (W) Crosslistings: PHIL 225/WGSS 225
This course provides an introduction to feminist thought through readings of seminal feminist texts from the Enlightenment to the present. Special attention will be given to feminist revisions (including those by woman of color) of traditional and contemporary emancipatory theories such as liberalism, Marxism, psychoanalysis, poststructuralism, and queer theory as well as transnational feminism. Authors read may include the following: Mary Wollstonecraft, John Stuart Mill, Elizabeth Cady Stanton, Alexandra Kollantai, Sojourner Truth, Harriet Jacobs, Emma Goldman, Charlotte Perkins Gilman, Adrienne Rich, Marilyn Frye, Gloria Anzaldua, Audre Lorde, Catherine MacKinnon, Judith Butler, Iris Young, Nancy Fraser, Gayatri Spivak, and Chandra Mohanty. We conclude the course with an exploration of the wide range of feminist analyses of issues concerning prostitution and pornography.
Class Format: discussion **Requirements/Evaluation:** several 2–page essays, one 4–page essay, one 6–page essay (including a draft) and participation in in–class exercises including short oral presentations
Prerequisites: WGSS 101, or PHIL 101, or permission of instructor **Enrollment Limit:** 19 **Expected Class Size:** 10
Distributional Requirements: Division 2 Writing Intensive
Other Attributes: AMST Critical and Cultural Theory Electives
WGSS Theory Courses

WGSS 228 Feminist Bioethics (D) (W) Crosslistings: PHIL 228/WGSS 228
In this course we'll explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we'll explore topics that might traditionally be considered "women's issues" in health care, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues. As a course offered under the Exploring Diversity Initiative, this class is designed to improve students' ability to recognize both the existence and the effects of gender disparities within the health care context, and in particular, how power and privilege within and beyond medicine contribute to gender inequalities in health and medical treatment. Moreover, students will theorize about ways of conceptualizing and of reforming health care interactions in order to reduce or eliminate those gender inequalities.
Class Format: lecture/discussion **Requirements/Evaluation:** active participation in class discussions, two mid–length papers (7–10 pp. each), one oral presentation, and periodic short writing assignments (four or five, app. 2 pp. each)
Prerequisites: none, although previous coursework in WGSS is desirable **Enrollment Limit:** 19 **Expected Class Size:** 8–10 **Enrollment Preferences:** Women's, Gender and Sexuality Studies and Philosophy majors

WGSS 230 Gender, Sexuality, and Global HIV/AIDS (D) Crosslistings: WGSS 230/AFR 230
The global pandemic of HIV/AIDS is now entering into its fourth decade. Throughout this history sexuality, gender and race and inequality have played a central role in the spread of the virus, and its apparent entrenchment in certain communities. This class will use a gendered, interdisciplinary perspective to investigate the pandemic's social, economic and political causes, impact, and conundrums — the problems it poses for scholarship, activism, public policy, and public health. Issues discussed will include the role of transaction sex and economic structures in both susceptibility to HIV and vulnerability to its impact; stigma and its challenges for HIV prevention, testing and treatment uptake; the role of positive youth in the next stages of the pandemic; and the evolving expressions of biopower in the global AIDS response. The class will look at examples of successful policies and activism as well as the failures, corruption and complacency that have characterized the global pandemic. There will be a particular geographical focus on experiences in the U.S. and sub–Saharan Africa. The class is an EDI course because of its focus on diversity and difference, as they shape the different ways that the HI virus plays out on the bodies of people in different global locations, and its discussion of the ways that global and local contexts of colonialism. patriarchy, and heteronormativity have inevitably shaped relationships between policy makers, researchers, activists, and those living with HIV and ultimately the content of their policies and interventions.
Class Format: seminar **Requirements/Evaluation:** two short papers and a research paper.; class participation will form part of the grade

WGSS 234 Masculinities (W) Crosslistings: ANTH 234/WGSS 234
What does it mean to be a man? This course approaches masculinity in its various forms as a culturally constructed category and as an achieved aspect of social identity. We will look at characteristics of manhood as they are imagined cross–culturally: man as warrior, lover, husband, father, protector, provider, disciplinarian, abuser; we will look at how manhood is variously achieved and how it can be lost; and we will look at forms of masculinity as they articulate with modes of sexuality and gender. The course will make extensive use of cinema in exploring these themes.
Class Format: seminar **Requirements/Evaluation:** attendance at film screenings, active leading and participation in class discussions, two 7–page papers, final 12–page paper
Prerequisites: none; open to all **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** Anthropology and Sociology majors and to achieve gender balance
Distributional Requirements: Division 2 Writing Intensive
Not Offered Academic Year 2014–2015
SEM Instructor: Peter Just

WGSS 236 Sex, Gender, and Political Theory Crosslistings: PSCI 236/WGSS 236
This course offers a feminist reading of some of the most important concepts and theoretical concerns in the study of politics: freedom, justice, equality, obligation, alienation and objectification. Each of these terms will be evaluated from the perspective of its potential to address social inequities of sex, gender, race and class. Is welfare a problem for freedom theory? In what way might a pregnancy be experienced as a form of alienation, and how does this pose a challenge for theories of justice? Is it possible to treat another person as equal and at the same time an object of one's sexual desire? We will identify the analytical tools and strategies that feminist theorists have employed in order to bring these and other concerns into political theory scholarship, reconstructing traditional ideas of politics and public life in the process. Theorists whose work we will read include Susan Moller Okin, Nancy Hirschmann, Martha Nussbaum, Iris Marion Young, Drucilla Cornell, Gayatri Spivak, Dorothy Roberts, Judith Butler, Linda Zerilli and Catherine Mackinnon.
Class Format: lecture/discussion **Requirements/Evaluation:** one oral presentation and three papers (3 pages, 7 pages and 8–10 pages)
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 21 **Enrollment Preferences:** Political Science and concentrators in Political Theory

LEC Instructor: Nimu Njoya

WGSS 238 Science, Gender and Power Crosslistings: PSCI 239/WGSS 238
This course considers debates in feminism about the relationship between science, gender and power in politics. On the one hand, shifting ideas about gender have influenced the development of the sciences through history: for example, some feminists argue that science has historically been premised upon a view of women as objects, not subjects, of knowledge. On the other hand, shifting ideas about science have strongly influenced the development of feminist theory and practice: for example, debates about reproductive rights are often couched in terms of a conflict between reliable scientific knowledge of embryos, STDs, etc. and an unscientific, patriarchal worldview. Do science and technology serve to transform or reinforce power imbalances based on gender, race, and sexuality? Should feminist theory embrace objectivity and model itself upon scientific procedures of knowledge production? Or should feminists reject objectivity as a myth told by the powerful about their own knowledge–claims and develop an alternative approach to knowledge? What is "objectivity" anyway, and how has this norm changed through history? What kinds of alternatives to objectivity exist, and should they, too, count as "science"? Rather than treating science as a monolith, we will endeavor to understand the implications of various sciences—as practiced and envisioned in various, historically specific situations—for gender and politics. Readings may include texts by Rene Descartes, Andreas Vesalius, Londa Schiebinger, Anne Fausto–Sterling, Helen Longino, Nancy Harstock, Sandra Harding, bell hooks, Donna Haraway, Mary Hawkesworth, and Octavia Butler.
Class Format: seminar **Requirements/Evaluation:** three 5– to 7–page papers and class participation
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 21 **Enrollment Preferences:** Political Science majors and Women's, Gender and Sexuality Studies majors

WGSS 240(S) Performing Masculinity in Global Popular Culture (D) Crosslistings: WGSS 240/AMST 241/LATS 241/THEA 241/SOC 240
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products – ranging from beer to deodorant to cigarettes — had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch–identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half–life of the boy band in the US and in Asia (e.g., J/K–Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.
Class Format: seminar **Requirements/Evaluation:** masculinity journal, mid–term essay, visual analyses of pop culture artifact, choice of final essay or 8–10 page final paper, short field trip reaction essay
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** in the event of over–enrollment, a short statement of interest will be solicited

WGSS 241T(S) Sex and Gender in Ancient Greece and Rome (D) (W) Crosslistings: CLAS 241/COMP 241/WGSS 241
In the ancient Mediterranean world, sexuality and gender shaped a broad range of attitudes and actions. These categories created and reinforced difference in virtually every aspect of life, from the household to the political arena. This course examines the diverse discourses and practices around sexuality and gender in the cultures of ancient Greece and Rome, while also dismantling false assumptions about the continuity of the "classical" past with our own contemporary norms and values. We will carefully analyze, contextualize, and compare a variety of texts, including selections from tragedy and comedy (Euripides, Terence), epic (Homer, Ovid) and lyric poetry (Sappho, Catullus), novels, epitaphs, and early saints' lives, in order to gain a deeper and more complex understanding of how gender and sexuality were expressed, experienced, and regulated in Greece and Rome. Our emphasis will be on ancient texts, but selections from contemporary criticism and theory will enrich the methodological framework through which we approach those primary sources. The course fulfills the EDI requirement by providing sufficient context for students to make independent investigations of how literary and religious texts and practices engaged with political and social institutions to maintain different life courses and different systems of reckoning for the value of men's lives, women's lives, and the lives of individuals who didn't fit easily into either category. Additionally, the course will promote students' capacity to critically evaluate two past cultures that have long been important sources for intellectual and cultural traditions in the West, and which are still invoked today, sometimes misleadingly, to explain or justify positions and practices of privilege or oppression.
Class Format: tutorial **Requirements/Evaluation:** five to six weekly tutorial papers, five to six responses, a midterm self–evaluation and conference with instructor, a mid–length final paper (approximately eight pages) consisting of a revision and expansion of a previously written paper
Prerequisites: none **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** majors or intended majors in Classics, WGSS, and Comparative Literature
Dept. Notes: meets Division 1 requirement if registration is under CLAS or COMP; meets Division 2 requirement if registration is under WGSS

WGSS 242(S) Women, Gender, and Sexuality in Islam Crosslistings: REL 242/ARAB 242/WGSS 242
The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women¿s own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.
Class Format: seminar **Requirements/Evaluation:** active class participation (including a presentation on the reading materials), short weekly reflections, and one final research paper (10–15 pages)
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 10 **Enrollment Preferences:** Religion, Women's, Gender and Sexuality Studies and Arabic majors
Distributional Requirements: Division 2

WGSS 244T(F) Actually Existing Alternative Economies (D) (W)
Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, competition and individualism. However movements in countries including Brazil, France, Canada and Spain are demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including 'Solidarity Economy' and 'New Economy' to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, 'a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.' In this tutorial we will learn and debate about some of the activities being named and built under this label, such as the networks of worker–owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, open source development, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker–owned cooperatives, ranging from Victorian England through African–American experiences throughout the 20th century, to examples in post–Independence Africa. The ILO declared 2012 the International Year of Cooperatives and argued that they are a particularly appropriate form to African development. Is this plausible, and what role might coops play in AIDS–affected communities? Feminist geographers Julie Graham and Katherine Gibson developed practices of 'mapping' local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a 'script' of local helplessness to resist the 'rape' of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? And finally, why is the solidarity economy now so much more advanced in other countries than the US? The course fulfills the Exploring Diversity Initiatives requirement because of its central focus on the diversity of economic institutions within and across countries.
Class Format: tutorial **Requirements/Evaluation:** students will meet Professor every week in pairs. Each week one student will write a 5–7 page essay and the other student will offer a critique
Prerequisites: none; open to sophomores and above **Enrollment Limit:** 10 **Expected Class Size:** 8 **Enrollment Preferences:** seniors

WGSS 245 (Re)presenting Sex: Shakespeare on Page and Stage Crosslistings: EXPR 245/THEA 245/WGSS 245
This experimental course approaches the question of how sex and sexual identity are portrayed in Shakespeare from two different directions–close reading focused on the page and acting centered on the stage. These two critical modes–reading the text versus performing the script–are often treated in compartmentalized fashion as separate, even incompatible activities. Our goal is to take up the challenge of bringing the two perspectives together within the framework of a single, integrated course. The teaching method is to bridge the gap between the two modes not by magically dissolving, but by actively engaging, the tensions between them. For example, no performance can include all the possible interpretations; performance decisions raise questions about what alternatives have been left out. Similarly, when all interpretive possibilities are held in imaginative suspension, the specifics of bodily movement and face–to–face interaction whose meanings emerge when enacted are lost. We propose to put the two orientations in a productive and innovative dialogue that enables students to experience the tension from both sides, to articulate the opportunities and limits of each side, and to combine their respective strengths. The mix of assignments (papers and scene work) will vary depending on whether students designate themselves as primarily scholars or actors, but some overlap will be built in to ensure that scholars gain understanding of acting and actors gain access to scholarship. All students will be expected to demonstrate versatility in traversing the full spectrum from interpretation through reading to interpretation through performance.The specific topic that will bring these theoretical issues into focus is the matter of sex and sexual identity, as illuminated through the analysis of language, psychology, and theatrical embodiment. Six plays will be studied in depth: *The Merchant of Venice*, *Twelfth Night*, *Othello*, *King Lear*, *Antony and Cleopatra*, and *The Winter's Tale*.
Class Format: lecture/discussion, with additional periods set aside for scene presentation **Requirements/Evaluation:** evaluation will be based on several short papers and a final exam All students will take the final: "scholar" students will have rigorous expectations in the writing of papers; "actor" students will have intensive (graded) performance expectations
Prerequisites: none; students wishing to enroll as Acting Students should consult with instructors **Enrollment Limit:** 20 **Expected Class Size:** 15

WGSS 246T(F) India's Identities: Religion, Caste, and Gender (D) (W) Crosslistings: REL 246/ANTH 246/WGSS 246/ASST 246
This course considers India's contradictory legacy as a booming Asian democracy and fragile society built upon deep and enduring divisions. India's rapidly growing populace and landscape is often described in terms of multiple identities or fragmenting oppositions: Hindu/Muslim, rich/poor, high caste/outcaste, male/female, and so forth. This course deconstructs the historic roots and ongoing causal factors that produce structural violence against women and religious minorities in modern India. It highlights the social practices that have produced critical axes of difference around the themes of religion, gender, and sexuality using key moments or regions of India as points of departure. It contrasts the explosive effects of religion, gender, and caste during the tragedy of Partition with the ongoing production of communal and gender–based violence in India today, using Kashmir and New Delhi as microcosms for our study. We will consider the ways that multiple subjectivities and polarized identities intersect with individual agency to produce a social landscape of hierarchy and conflict across India today. We are also interested in the socio–cultural forces that reproduce or shore up these binaries as much as third terms or middle paths that attempt to transcend or diffuse them. For instance, we explore the ways that Buddhism is and is not a middle way between Hindu/Muslim conflict in Indian Kashmir and how the notion of a third sex is and is not a middle term that transcends the gender binary of male/female. Course resources include ethnographic and sociological analyses, oral histories, and popular media that complicate our understanding India's diverse and fragmented society. This course fulfills the Exploring Diversity Initiative by theorizing the ways that difference has been used to effect profound historical, social, and individual changes in the Indian subcontinent.

WGSS 248T(F) Carmen, 1845 to Now (D) (W) Crosslistings: MUS 278/WGSS 248
The story of the gypsy *femme fatale* Carmen has endured for over 150 years. In Western culture she exemplifies the seductive, exotic, independent, and forbidden woman who drives an upstanding man to a life of crime and finally murder. This course explores a broad array of treatments of this archetypal narrative, starting with Prosper Mérimée's 1845 novella on which Bizet based his beloved 1875 opera *Carmen*. We will consider various staged and film versions of the opera itself, including Francesco Rosi's stunning 1984 movie, and discuss various other film transformations of the story, from DeMille's 1915 silent film through Hammerstein's 1954 all–black musical *Carmen Jones*, to the MTV version *A Hip Hopera* of 2004. Comic approaches will also be assessed, from Charlie Chaplin's *Carmen Burlesque* of 1915 through Spike Jones' 1952 *Carmen Murdered!* and *The Naked Carmen* of 1970. We will explore remarkable dance interpretations ranging from Carlos Saura's 1983 flamenco version through David Bourne's choreography in his 2001 gay reading called *The Car Man.* This course satisfies the EDI requirement through a critical examination of the way in which the Carmen story has served as a stage on which multifaceted textual and musical constructions and conflicts of individual and group identities, encompassing gender and sexuality, nationality, ethnicity, and class are played out.
Class Format: tutorial; after initial group meetings to discuss Mérimée's novella and Bizet's music, students will meet with the instructor in pairs for one hour each week **Requirements/Evaluation:** each student will write a 5– to 6–page essay every other week (five in all), and provide peer reviews in alternate weeks; evaluation will be based on the quality of written work, discussions, and oral presentation
Prerequisites: none; ability to read music useful but not necessary **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** sophomores and juniors

WGSS 249(S) Body Politics in South Asia: Gender, Sex, Religion, and Nation (D) Crosslistings: REL 248/ASST 248/ANTH 248/WGSS 249/INST 248
This course examines the relationship between body, gender, sex, and society in South Asia, using three countries and religions——India, Sri Lanka, and Bangladesh, and Hinduism, Buddhism, and Islam——as its foil. The course uses the body as a lens by which to unpack South Asian discourses that link body and sexuality with nation, community, and population. In particular, it explores a South Asian sociology that links individual and social bodies in ways that occasion solidarity as well as social suffering, violence as well as communal cohesion. How do bodies come to signify the purity or prosperity of the nation or community and with what social or discursive effects? We begin by unpacking foundational theories of the body as proposed by Mauss, Foucault, Douglas, and Bourdieu in order to better understand how local discourses of the body help produce gender and other social hierarchies in South Asia. By considering how the human body can serve as a map for society and vice versa, we examine both classical discourses and modern institutional practices of the body including the temple, the monastery, the mosque, and the mendicant, as well as bodily practices such as yoga, celibacy, sex work, and new reproductive technologies. We also analyze how the body has served as a symbol of nation, community, and social health. Throughout, we are interested in the cross–cutting effects of gender and sex in perpetuating structural hierarchies and social suffering around the body in South Asia.
Class Format: seminar **Requirements/Evaluation:** class presentations, class blog, final paper, attendance & participation in class discussions

WGSS 250T Gender, Sexuality and the Modern Stage (D) (W) Crosslistings: THEA 250/ENGL 253/WGSS 250/COMP 247
This interdisciplinary tutorial explores aspects of gender sexuality, performativity, and representations of the body in modern theatre and art. Close analysis of plays by dramatists –such as Sophie Treadwell, Lillian Hellman, Caryl Churchill, Milcha Sanchez–Scott, Ntozake Shange, Tony Kushner, Tim Miller, Naomi Iizuka, Paula Vogel, Suzan–Lori Parks, Tarell McCraney, and Sarah Kane – will occur alongside consideration of works by both artists and celebrities, such as Cindy Sherman, Karen Finley and Lady Gaga. Our approach to this varied material will be comparative and will be enriched by readings of select work by contemporary theorists, such as Judith Butler, bell hooks, Cherríe Moraga, Eve K. Sedgwick, and Donna Haraway. This course meets the criteria of the Exploring Diversity Initiative as it draws focus towards the diversity of race, class and ethnicity represented by the subjects of our study as well as towards the political power of theatre and performance.
Class Format: tutorial **Requirements/Evaluation:** students will meet with instructor in pairs for an hour each week; they will write a 5–7–page paper every other week (five in all), and comment on their partner's papers in alternate weeks

WGSS 251(F) Arab Women Memoirs: Writing Feminist History Crosslistings: ARAB 252/COMP 252/WGSS 251/HIST 309
This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first–voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self–representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women's blogs and watch films that focus on first–person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tuqan (*A Mountainous Journey: An Autobiography*), Fatima Mernissi (*Dreams of Trespass: Tales of a Harem Girlhood*), Leila Ahmed (*A Border Passage: From Cairo to America—a Woman's Journey*), Fadia Faqir and Shirley Eber (*In the House of Silence: Autobiographical Essays by Arab Women Writers*), and Jumanah Haddad (*I Killed Scheherazade: Confessions of an Angry Arab Woman*), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.
Class Format: seminar **Requirements/Evaluation:** active class participation, several short response papers, three short papers (3–5 pages), and a final paper (7–10 pages)
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 15 **Enrollment Preferences:** none

WGSS 252 Modern Women Writers and the City (W) Crosslistings: COMP 243/WGSS 252
Ambivalence has always been a vital part of literary responses to city life. Whether they praise the city or blame it, women writers react to the urban environment in a significantly different way from men. While male writers have often emphasized alienation and strangeness, women writers have celebrated the mobility and public life of the city as liberating. We will look at issues of women's work, class politics, sexual freedom or restriction, rituals of consumption, the conservation of memory by architecture, and community–building in cities like London, New York, Berlin, Paris. We will examine novels and short stories about the modern city by writers as diverse as Virginia Woolf, Gertrude Stein, Anzia Yezierska, Ann Petry, Jean Rhys, Marguerite Duras, Margaret Drabble Ntozake Shange, Verena Stefan and Jhumpa Lahiri and Edwidge Danticat. We will consider theoretical approaches to urban spaces by feminists (Beatriz Colomina, Elizabeth Wilson), architectural historians (Christine Boyer) and anthropologists and sociologists (Janet Abu–Lughod, David Sibley, Michael Sorkin). Several contemporary films will be discussed. *All readings in English.*
Class Format: seminar/discussion **Requirements/Evaluation:** two short papers of 3–5 pages, one of 5–7 pages, and one final paper of 8–10 pages
Prerequisites: COMP 111 or a 100–level ENGL course **Enrollment Limit:** 19 **Expected Class Size:** 19

WGSS 253(F) Art in the Age of the Revolution, 1760–1860 Crosslistings: ARTH 253/WGSS 253
A social history beginning with art of the pre–Revolutionary period and ending with realism. Major topics include changing definitions of neoclassicism and romanticism, the dramatic impact of the revolutions of 1789, 1830, and 1848, the monarchies and republics framing the Napoleonic Empire, the shift from history painting to scenes of everyday life, and landscape painting as an autonomous art form. We will also consider proscriptions and controversies in art–making and representation during this period.The course stresses French artists such as Greuze, Vigée–Lebrun, David, Ingres, Delacroix, Géricault, Corot, and Courbet, but also includes Goya, Constable, Turner, and Friedrich.
Class Format: lecture **Requirements/Evaluation:** two–page position paper related to assigned readings, hour test, and final exam or research paper; a conference at the Clark Art Institute and a field trip to New York may also be required
Prerequisites: two semesters of ARTH 101–102, 103 or permission of instructor **Enrollment Limit:** 30

WGSS 256 Engendering Buddhism: How Women and Men Shape and Are Shaped by Buddhism (D) (W) Crosslistings: REL 256/WGSS 256/ANTH 256/ASST 256
This course looks at how gender has shaped Buddhism as well as how Buddhism has shaped gender. Most generally, it considers the myriad ways that Buddhist soteriology and practice produce the very gender differences they purport to overcome. How have the Buddha and his far–flung disciples institutionalized gender differences in spite of their putative goal of transcending duality? We examine the varying experiences of women and men in Buddhist societies and literatures as a lens by which to analyze the pervasive operation of social and gender hierarchies. Last but not least, we discuss how well feminist and American revisions of Buddhism have transformed gender and other forms of difference. Our analysis revolves around several interdependent themes. (1) How do female and male bodies become the subject of a specific set of Buddhist gazes? What does Buddhist discourse say about the possibility of gaining enlightenment in the female body? (2) How do gender divisions reflect deeper social divisions such as class and race in Buddhist discourse? (3)

How have feminist deconstructions of Buddhism transformed gender and social hierarchies in the contemporary world? This course fulfills the Exploring Diversity Initiative by seeking to theorize the ways that Buddhism has produced and reinscribed gender differences and social hierarchies.
Class Format: seminar **Requirements/Evaluation:** two midterm papers, weekly GLOW participation, final research papers, and class participation

WGSS 261 The Saint and the Countess: The Lost Voices of Medieval Women (W) Crosslistings: MUS 261/WGSS 261
Very few female voices from the Middle Ages are audible today; most of the music, poetry, and other writings that survives reveals the creativity and expresses the attitudes of men. This course will explore the experiences and viewpoints of medieval women through the lens of the poetry and songs of two exceptional 12th–century figures: the German abbess Hildegard of Bingen, whose long and immensely productive life was shaped by the requirements of monastic culture; and the French Countess of Dia in Provence, whose elusive life and works exemplify the dynamics of aristocratic court culture. We will ask how these and other musical women active in both the sacred and the secular spheres (such as the nun Birgitta of Sweden, and Queen Blanche of Castile) negotiated their places and made their voices heard within the patriarchal society of their time. We will examine the ways in which these contrasting environments informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs. Along the way we will critically assess how these lost voices have been recreated to speak to us today through recordings and film.
Class Format: seminar **Requirements/Evaluation:** evaluation based on several short papers and presentations, and a final project and presentation
Prerequisites: ability to read music useful but not required **Enrollment Limit:** 10 **Expected Class Size:** 8 **Enrollment Preferences:** given to current or prospective majors in Music, WGSS, History, Comparative Literature and Religion

WGSS 262(S) Language, Gender, and Sexuality Crosslistings: ANTH 262/WGSS 262
Social scientists have long argued that gendered identities are "voiced" or performed. This insight draws our attention to the tremendous role that language and spoken interaction play in the reproduction and transformation of gendered relations and systems of sexuality. This class analyzes gendered and sexual difference through the lens of language and communicative practice. On one hand, we use the tools of linguistic anthropology to ask about how systems of gender and sexuality are reproduced through everyday interactions. On the other hand, we examine how interactive norms regarding gender and sexuality then shape political, economic, and social processes beyond face–to–face interactions. In doing so, we will read a range of ethnographic material, both from the US and beyond, that examines how gender shapes interactions, whether in the context of a basketball game, a medical training course, a courtroom, a religious revival movement, or an international crisis. We will put this material in critical conversation with theorists of gender and sexuality who have argued for the interactive, discursive nature of these categories, such as Michel Foucault and Judith Butler, asking what linguistic anthropology, in particular, can tell us about the connections between language, gender, and sexuality.
Class Format: lecture **Requirements/Evaluation:** 1–page response papers (5 total, graded pass/fail); mid–term essay exam (5–7 pages); final essay exam (5–7 pages)
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** Anth/Soc majors; WGSS majors

WGSS 271T Woman as "Other" (D) (W) Crosslistings: PHIL 271/WGSS 271
At mid–century, Simone de Beauvoir, existential philosopher and perhaps the greatest feminist theorist of the twentieth century, described woman as "living in a world where men compel her to assume the status of the Other." At the same time, Beauvoir asserts: "One is not born a woman, one becomes one." How, given their objectification, can women become subjects for themselves? Is authenticity even possible? Must the relation between self and other inevitably be one of objectification and domination? Is reciprocity and mutuality in self–other relations possible? In our efforts to deepen our understanding of these important philosophical questions, questions that have been at the center of social and political thought at least since Hegel introduced the dialectic of master and slave, we will engage in close readings of writings by Beauvoir (including autobiography and biography), as well as philosophers responding to her—Frantz Fanon, Luce Irigary and Judith Butler. This course has been designated EDI because it explores identity formation under conditions of inequality.
Class Format: tutorial; students will work in pairs **Requirements/Evaluation:** each student will write/present orally a 5–page essay every other week; those not presenting essays will prepare oral critiques of partners' essays; evaluation based on written work, oral presentations of essays and critiques
Prerequisites: one course in either PHIL or WGSS **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** current and prospective Philosophy and Women's, Gender and Sexuality Studies majors

WGSS 272(F) Sex and the Reproduction of Society Crosslistings: ANTH 272/WGSS 272
Why is reproduction such a controversial subject in society today, especially in areas of medicine, culture, and religion? And why is the reproductive body subject to such highly ideological and yet contradictory types of practices and discourses across the globe? This course seeks to examine the myriad ways that societies police the range of practices surrounding reproduction—including fertility, conception, pregnancy, birth, abortion, and motherhood. We will pursue a comparative analysis of reproduction across major societies and cultures, through an in–depth look at specialized topics such as the new reproductive technologies, the medicalization and ritualization of obstetrics in America, the continuing controversies over abortion across the globe, and the ongoing debates about the rise of women and the 'End of Men'. Throughout the course, we remain focused on the cultural, social, and medical construction of birth and reproduction more generally. To this end, we explore the varying ritual and medical practices that surround reproduction in different cultural contexts, from high tech to low tech settings and societies. We will deconstruct the process of human reproduction through readings culled from a variety of cultures and disciplines including anthropology, medicine, religious studies, sociology, and gender and sexuality studies.
Class Format: seminar **Requirements/Evaluation:** in–class presentations, attendance, class blog, final research paper

WGSS 301(F) Sexual Economies (D) Crosslistings: WGSS 301/AMST 334/ANTH 301
This course examines various forms of sexual labor in a variety of global contexts with an emphasis on contemporary anthropological and sociological research and its implications for public policy. Our topics include: (a) traditional sex work (e.g., pornography, escorting, street prostitution, brothels, sex tourism), (b) sexualized labor without physical contact (e.g., stripping, burlesque, phone/online sex), and also (c) contemporary debates about sex trafficking and sex worker migration. Because of our ethnographic focus, the readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, and backgrounds in order to explore the broader social implications of our subject matter. A key component of this course is a field trip to New York City to meet with sex workers and sex worker rights advocates. (Note: students should be advised that we will necessarily encounter and discuss adult content and images that some may find offensive.)
Class Format: seminar **Requirements/Evaluation:** mid–term essay, an 8– to 10–page final research paper, field trip reaction paper
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** WGSS majors; short statement of interest

WGSS 306(S) Queer of Color Critique: Race, Sex and Urban Life (D) Crosslistings: WGSS 306/AMST 306/AFR 306/LATS 306/COMP 304

This seminar is an introduction to queer of color critique, a field of scholarship that seeks to intervene in the predominantly white canon of queer studies. We will examine the history of this line of critique, beginning with Black and Chicana feminisms and extending into present day issues and activism highlighting intersectionality, exploring how and why QOCC became a necessary intervention into the then still emerging field of queer studies. Our texts include scholarly works as well as science fiction novels, plays, films, diaries, and graphic novels. Methodologically, we draw on many fields of study, including anthropology, literary studies, feminist studies, and ethnic studies. We focus primarily but by no means exclusively on US contexts, paying particular attention to the role that urban environments have served for queer communities of color. Topics include: feminisms of color, inter–racial desire and fetishization, orientalism and colonial fantasy, black queer science fiction, transgender subjectivities, and the political economy of sexual desire. A key feature of this course will also be the inclusion of numerous and diverse authors to appear on Skype or in person to answer questions about their work as we read it in class.
Class Format: discussion/lecture **Requirements/Evaluation:** mid–term essay, choice of final exam essay or 8–10 page research paper, responses to performance/special events
Prerequisites: none **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** WGSS majors, students considering a WGSS major

WGSS 307 Feminist Approaches to Religion (D) (W) Crosslistings: REL 306/WGSS 307
What does feminist theory have to offer the study of religion? How have participants in various religious traditions helped to produce and enact feminisms? Feminisms and religion have a long though often troubled history of interconnection. In this course, we shall explore a range of feminist theoretical analyses that have either emerged out of particular religious contexts or have been applied to the study of religious traditions and practices. We shall consider how conflicts within feminism—especially those pertaining to issues of sexuality, race, class, nationality, ethnicity, and religious affiliation—make a difference for the ways that religion is interpreted and practiced.
Class Format: seminar **Requirements/Evaluation:** one "position paper" for class discussion (3 pages), one analytical essay (4 pages), participation in writing workshop on drafts of final papers, one 15–page final paper
Prerequisites: none; open to all **Enrollment Limit:** 19 **Expected Class Size:** 15 **Enrollment Preferences:** majors in Religion and Women's, Gender and Sexuality Studies

WGSS 309 Everyday Life in Literature and Film Crosslistings: COMP 308/WGSS 309
To bring the all too familiar everyday to our attention, artists and writers have made it strange. What happens when we view everyday life from elsewhere? While everyday culture has often been experienced as repressive and alienating in modern Western societies, a new importance assigned to everyday life made it liberating in Japan during the twenties and in contemporary China. The contours of the everyday are delightfully vague, and it always exceeds theorizing. For instance, is its privileged place the street or the home? Is it lived largely in institutions that regulate our daily lives, or is it lived between and outside them? Everyday objects and commodities like the potato, the postcard, the car, clothes, housing, etc., will be analyzed. Fiction by Leo Tolstoy, Franz Kafka, Georges Perec, Manil Suri, Ha Jin, and Banana Yoshimoto. Films by Chantal Akerman, Pedro Almodovar, Benoit Jaquot, and Pierre Jeunet. Art projects that transform the everyday will also be discussed, including those of Sophie Calle, Mary Kelley, Mierle Laderman Ukeles, and Christine Hill. Short theoretical excerpts from Freud, Kracauer, Goffman, Lefebvre, de Beauvoir, Friedan, Debord, Foucault, and Bourdieu. *All works not originally in English will be read in English translation.*
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on two short oral reports on everyday objects and their history, two 3– to 5–page papers, and a 10– to 12–page final paper or creative project
Prerequisites: one 200–level literature course **Enrollment Limit:** 20 **Expected Class Size:** 10 **Enrollment Preferences:** students majoring in Comparative Literature
Distribution Notes: meets Division 1 requirement if registration is under COMP; meets Division 2 requirement if registration is under WGSS

WGSS 310 Womanist/Black Feminist Thought (D) Crosslistings: AFR 310/REL 310/WGSS 310/AMST 309
This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color—particularly black women—are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies. Fulfilling the EDI requirement, this course will explore how womanism/black feminism can be a bridge for empathetic understanding of diverse experiences, and will examine the varied social, political, and historical contexts that led to the formulation of womanism/black feminism as a tool to critique power and privilege.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on class participation, three short response papers, and the completion of an original research paper or project
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 20 **Enrollment Preferences:** Africana Studies concentrators, Women's, Gender and Sexuality Studies majors, Religion majors

WGSS 312(F) An American Family and "Reality" Television (W) Crosslistings: ARTH 310/WGSS 312/AMST 333/COMP 316
An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so–called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television.
In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 16–to 20–page research paper will be prepared in stages, including a 6– to 8–page midterm essay that will be revised and expanded over the course of the semester.
Class Format: seminar **Requirements/Evaluation:** class presentations, research assignments, and final 16– to 20–page research paper
Prerequisites: none **Enrollment Limit:** 19 **Expected Class Size:** 14 **Enrollment Preferences:** junior majors, followed by senior majors

WGSS 313(F) Gender, Race, and the Power of Personal Aesthetics (D) Crosslistings: LATS 313/AMST 313/WGSS 313
This course focuses on the politics of personal aesthetics among U.S. women of color in an era of viral video clips, the 24–hour news cycle, and e–commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno–racial identity, and class inform personal style, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal aesthetics among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as a tactic of resistance challenge traditional understandings of what it means to be a "feminist" in the first place? Readings include works by Susan Bordo, Ginetta Candelario, Patricia Hill Collins, Amira Jarmakani, Nadine Naber, Lisa Nakamura, Frances Negrón–Muntaner, Kobena Mercer, and Catherine Ramírez, among others.
Class Format: seminar **Requirements/Evaluation:** participation, one student–led discussion period, two written essays of 5–7 pages, final take–home exam
Prerequisites: LATS 105, AMST 201, WGSS 101 or permission of the instructor; first year students are not permitted to take this course **Enrollment Limit:** 12 **Expected Class Size:** 12 **Enrollment Preferences:** Latina/o Studies concentrators, American Studies majors, and Women's, Gender and Sexuality Studies majors by seniority

WGSS 314(F) Paradoxes of Human Rights: Addressing Violence Against Women (W) Crosslistings: ANTH 312/WGSS 314/INST 313
In recent decades, violence against women has become a major target for human rights activism. Most people take the connection between violence against women and human rights activism for granted. Yet gendered and sexual violence have only recently been framed as human rights issues. In this course, we examine this recent transformation, focusing on the paradoxes and possibilities of a human rights framework for addressing issues of gendered violence. We will do so by comparing different humanitarian and human rights–based interventions as they play out in places from Trinidad and Tobago to the American college campus. We'll explore a range of research on the topic in order to complicate and expand our understanding of both gendered and sexual violence as well as the institutional interventions designed to engage it. Along the way, we will examine the history of human rights as a means to imagine social justice. In the first half of the course, we will read critical texts concerning violence, human rights, humanitarianism, and gender. We will then turn to historical and ethnographic studies of human rights, finishing with several case studies of human rights work on gender and violence.
Class Format: seminar **Requirements/Evaluation:** 1.5 page response papers (3 total); midterm assignment (5–7 pages); final research paper (12–15 pages)

WGSS 315(F) Paris on Fire: Incendiary Voices from the City of Light (1830–2005) Crosslistings: RLFR 316/WGSS 315
During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been fêted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914–18, 1940–44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler's ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty–first century? To answer this question, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper

WGSS 317(F) The New Woman in Weimar Culture (W) Crosslistings: GERM 317/WGSS 317
This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War II and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker–Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgrad Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. *Taught in German.*
Class Format: taught seminar style in German for the German students and as a tutorial in English for non German speaking students **Requirements/Evaluation:** papers and oral presentations
Prerequisites: for students taking it in German: GERM 201 or the equivalent; for students taking the course in English: one college–level literature course **Enrollment Limit:** 19 **Expected Class Size:** 8

WGSS 319 Gender and the Family in Chinese History (D) Crosslistings: HIST 319/WGSS 319/ASST 319
Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generational, and sexual roles in different historical periods. Beginning in the late imperial period (16th–18th Centuries), we will examine the religious, marital, sexual, and childrearing practices associated with the "orthodox" Confucian family. We will then explore the wide variety of "heterodox" practices in imperial China, debates over and critiques of the family system in the twentieth century, and configurations of gender and family in contemporary China. As an EDI course, this class makes use of anthropological and gender studies methods to analyze both the specificities of Chinese ideas and practices regarding family, gender and sexuality as well as the considerable variety among these ideas and practices at different points in time.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on class participation, several short papers, and a final paper

WGSS 320(S) Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture Crosslistings: AFR 320/AMST 320/WGSS 320
Whether presented as maternal saints, divas, video vixens, or bitches, black female celebrities navigate a tumultuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes of black women in popular media forms, discuss the history of the "politics of respectability" within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocative questions relevant to discussions of contemporary black sexual politics: Should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women's bodies? Do these women best exemplify the reiteration of problematic characterizations? Are they positive models for demonstrating female empowerment, agency, or "fierceness?" This course explores the histories of representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on class participation, short response papers, and the completion of an original research paper or project

WGSS 321 Recent Continental Feminist Theory (D) Crosslistings: PHIL 320/WGSS 321
This course explores developments in recent feminist thought influenced by philosophical currents in France and Germany (poststructuralism and critical theory.) Depending upon the year in which the course is offered, we explore topics such as self and society, sexual difference, embodiment, critiques of reason, the psyche, new materialist theories, queer feminism, and transnational feminism. We will read from works by authors such as the following; Sandra Bartky, Iris Young, Judith Butler, Elizabeth Grosz, Luce Irigaray, Jessica Benjamin, Gayle Rubin, Rosi Braidotti, Eve Sedgwick, Lynne Huffer, Sara Ahmed, Jasbir Puar, and Wendy Brown. Fiction and film may also be included.
Class Format: seminar **Requirements/Evaluation:** some of the following: frequent short essays, two or three 4– to 5–page essays, class presentations, or a final project in lieu of one of the papers; students in the class will be consulted about alternatives to this plan
Prerequisites: WGSS 101, and a second course in WGSS, or permission of instructor **Enrollment Limit:** 19 **Expected Class Size:** 8–10 **Enrollment Preferences:** Women's, Gender and Sexuality Studies majors and Philosophy majors

WGSS 322T Critical Theory: The Enlightenment and its Critics (D) (W) Crosslistings: PHIL 321/WGSS 322
"Dare to know! Have courage to use your own reason–that is the motto of Enlightenment." Thus the 18th century German philosopher Immanuel Kant exhorts his contemporaries to muster the courage to cultivate their capacity for reason. Modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress depend upon it. Yet in 19th and 20th centuries we find the promise of Enlightenment tempered by the rise of nationalism and the persistence of racism, sexism, genocide, terrorism, and religious extremism as well as the emergence of wars of mass destruction, environmental degradation, and the potential for manipulation of populations by consumerist mass media. Can the promise of Enlightenment be redeemed?
In this tutorial we begin with short readings by Kant, Hegel and Marx, key sources for critical social theory in the 20th century. Possible other figures read may include: Max Horkheimer, Theodor Adorno, Herbert Marcuse, Walter Benjamin, Jurgen Habermas, Nancy Fraser, Amy Allen, Noelle McAfee, Judith Butler, Elizabeth Grosz, Michel Foucault, Jean Baudrillard, and Gilles Deleuze, Georgio Agamben, Frantz Fanon, Edward Said and Achille Mbembe, as well as current critiques of neoliberal capitalism.
Although we will not directly address diversity issues except insofar as cultural, racial, class, sexual and other differences are bound up within power or domination relations, insofar as the course examines social and political power, oppression and domination, and the possibility or viability of the idea of human emancipation it meets the EDI requirement. This tutorial will be adapted for WGSS students seeking to meet a theory requirement.

Class Format: tutorial, students will work in pairs and meet for 75 minutes each week with the professor **Requirements/Evaluation:** each student will write and present a 5– to 6–page paper every other week and a commentary on his or her partner's essay on alternate weeks;
Prerequisites: demonstrated background in modern philosophy, critical theory, political theory, or continental philosophy **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** current and prospective Philosophy majors and students with a sufficient background in political or critical theory
Extra Info: evaluations are based on written work as well as level of preparation and intellectual engagement in tutorial meetings

WGSS 326T(S) Queer Temporalities (W) Crosslistings: REL 326/LATS 426/WGSS 326/COMP 326
How do we experience and represent time, and what factors might account for both our experiences and our representations? What are some of the ways that people experience and ritually mark the passing of time? What are some of the different ways that people have made sense of time and themselves in time? Especially for individuals and peoples who have been denied certain self–representation and narratives of place, how do competing notions of time, history, space, and location get negotiated? In this course, drawing from within the broad corpus of queer theory (including theorists such as Gloria Anzaldúa, Elizabeth Freeman, J. Halberstam, and José Esteban Mu&#241oz) we will examine some non–linear, non–normative, and interruptive approaches to making sense of time, space–time, and self within time. On the one hand, we will consider theorists who specifically question and challenge what José Esteban Mu&#241oz dubs the "linearity of straight time," and we will turn to a set of issues with regard to family and sexuality, especially critiques of normative lifecycle events and rituals that have reconfigured experiences and representations of time and place. On the other hand, we will also work with queer theory as it explores alternatives to normative conceptualizations of time and place that have already existed in the past. Hence we will look not only to queer theory as it reads more contemporary negotiations of sexuality, identity, time, and space–time; we will also consider how some contemporary theorists have read previous historical examples.
Class Format: tutorial **Requirements/Evaluation:** evaluation will be based on class attendance, analytical essays, responses, and revised essays
Prerequisites: none **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** majors and concentrators in Religion, Latina/o Studies, Comparative Literature, and Women's, Gender, and Sexuality Studies or students who have previous coursework in those programs
Distribution Notes: meets Division 2 requirement if registration is under REL, LATS or WGSS; meets Division 1 requirement if registration is under COMP
Extra Info: Pairs will meet with the instructor for one hour each week. Almost every week, one student from the pair will write a 5–page analysis of the week's reading. The other student will respond orally with a 2–page response to their partner's paper.
Pairs will also prepare a midterm synthesis, and students will revise two of their 5–page analytical papers: one from the first half of the semester, and one from the second half due at the end of the semester.
May not be taken on a pass/fail basis
Distributional Requirements: Division 2 Writing Intensive

WGSS 327T(F) Foucault (D) (W) Crosslistings: PHIL 327/WGSS 327
This course begins with a brief introduction to some of Foucault's early writings but focuses on a close reading of a selection of middle and late texts that have become central to debates about the significance of his work such as: *Discipline and Punish, The History of Sexuality* (vols. 1–3), and selected interviews and course lectures. We examine debates in the Foucault literature about freedom, power, ethics, and the nature of critical theory. This course has been designated EDI because it engages questions concerning power, social differences and social and political freedom.
Class Format: tutorial **Requirements/Evaluation:** evaluation will be based on written work (six 5– to 6–page papers), oral presentations of that work, and on oral critiques
Prerequisites: at least two courses in PHIL or WGSS, or permission of instructor **Enrollment Limit:** 10 **Expected Class Size:** 8–10 **Enrollment Preferences:** current or prospective Philosophy and Women's, Gender and Sexuality Studies majors
Dept. Notes: meets History requirement only if registration is under PHIL

WGSS 328(F) Narrating Other Minds: Austen, Eliot, Woolf Crosslistings: ENGL 328/WGSS 328
At roughly fifty–year intervals, Britain produced three brilliant female novelists— Jane Austen, George Eliot, and Virginia Woolf— who would each become renowned, in her own way, for her ability to combine minutely detailed social observation with a rich depiction of the inner lives of her characters. This course will examine some of their major fiction— with an emphasis on Austen and Eliot— in the context of recent critical debate about the nature and implications of their narrative methods for representing the consciousnesses of characters, and of the authorial narrative voices that mediate among them. Questions to be considered: how is our understanding of novelistic characters and consciousness shaped by our real–life experience in interpreting the thoughts and character of others, and vice versa? Do "omniscient" narrators lay claim to a privileged kind of knowing presumed to be unavailable either to their character or to readers, or are they modelling humanly available interpretive stances toward a world of others? Why does "free indirect discourse"— which blurs the distinction between the consciousness of narrator and character— feature so prominently in the work of all three? Possible texts include Austen's *Emma* and *Persuasion*, Eliot"s *Middlemarch, Daniel Deronda,* and *The Lifted Veil*, and Woolf's *The Waves.*
Class Format: seminar **Requirements/Evaluation:** three 5– to 8–page essay and several shorter assignments
Prerequisites: a 100–level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam **Enrollment Limit:** 25 **Expected Class Size:** 25
Distribution Notes: meets Division 1 requirement if registration is under ENGL; meets Division 2 requirement if registration is under WGSS

WGSS 329(F) Premodern Sexualities (D) Crosslistings: ENGL 329/WGSS 329
Is it possible that a European Middle Ages so beholden to the cultural authority of the Catholic Church could model forms of desire relevant to 21st–century discourse about sexual identity? In this course, we will think about what medieval texts can tell us about desire and how we might understand its modes within a wider perspective of a history of sexuality. In addition to investigating the theme of courtly love in medieval romance, we will explore troubadour poetry, saint's lives, theological treatises, courtesy manuals, and mystical visions. We will frame our investigation around some of the most influential narratives regarding the evolution of sexuality, including those of Michel Foucault, David Halperin and Karma Lochrie, in order to analyze how medieval texts uphold and sometimes challenge received notions about how, when, and whether these categories emerged. In our investigation, we will cover the paradox of virginity, the rise of a knightly class as an experiment in the homosocial, the poetics of desire, the sexuality of grammar, and more.
By investigating the varied modes of sexuality depicted in the narratives and practices of the European Middle Ages, Premodern Sexualities will challenge students to think critically about theorizations of gender/sexuality pre– and post–modern.
Class Format: seminar **Requirements/Evaluation:** participation in class discussion, two presentations, short position papers, one 5– to 8–page paper, one 8– to 10–page paper
Prerequisites: a 100–level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam **Enrollment Limit:** 25 **Expected Class Size:** 25 **Enrollment Preferences:** English majors

WGSS 330(F) Race, Gender, and Performance from Literature to Social Media (D) Crosslistings: WGSS 330/COMP 339/AMST 332/LATS 335/THEA 322
What different conversations around the topic of "diversity" might be had if we think of race, gender, and sexuality as performative? How might the analytic of performance equip us in this course to identify marginalized modes of being and to enact anti–xenophobic strategies for everyday practice? In this course we will study multiple forms of contemporary performance (including performance art, visual art, sound art, social media, literature, politics, and performance of everyday life) by artists of diverse racial, gender, and sexual identification to think about belonging and alternative forms of world–making.
We will explore these questions in a United States context through engagement with cultural texts that destabilize ideological binaries of female/male, black/white, heterosexual/homosexual, subject/object, and human/non–human, including scholarship in critical ethnic studies, queer of color critique, and affect studies. We will begin with linguistic philosopher J.L. Austin's theory of the performative speech act, and proceed with theorists including Judith Butler and José Esteban Muñoz to consider gender and racial performativities. Artists studied will range from the conceptual (including Adrian Piper, Nao Bustamante, and Yoko Ono) to the popular (including Rihanna, Miley Cyrus, R. Kelly). This course will engage foundational texts to performance studies and offer an interdisciplinary approach to scholarship in gender and sexuality studies, critical ethnic studies, and performance studies from the 1970s to the present. This course recognizes a suspicion for diversity discourses that universalize human experience and asks: how do we resist normativizing forces without reinforcing the regulating logics of those forces? This EDI course will critically engage with diversity from the heterogeneous and multiple perspectives of racial, sexual, and gender minorities, asking students not only to examine the diversity of human experience but to explore the political stakes of creative expression through interdisciplinary methods and forms.
Class Format: seminar **Requirements/Evaluation:** in–class participation, student presentation, two reading responses, performance analysis, office hours meeting, end–of–term paper

WGSS 331(F) Queering Europe: Sexualities and Politics since 1850 (D) Crosslistings: HIST 332/WGSS 331
This course explores the construction, articulation, and politics of queer sexual desire in Europe from the later nineteenth century to the present. By placing queer sexualities in their broader social and political context the course examines the ways in which sexuality has become central to questions of identity, personal and national, in modern European society. Topics include: the role of the new science of sexology in specifying

various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homophile organizing and the 1970s Gay Liberation Movement; and the recent politics of gay marriage. The course will focus primarily on Britain, France, and Germany, but also on Italy and Russia. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians. Several films will also be discussed. "Queering Europe" meets the requirements of the Exploring Diversity Initiative insofar as it explores how sexual difference has been constituted, contested, and experienced and how what we assume to be the "sexual norm" has a profoundly political history.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on class discussion, the posting of four 500 word response papers, two 6– to 8–page interpretive essays, and a final research paper of approximately 12–15 pages
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 15–20 **Enrollment Preferences:** junior and senior History and WGSS majors

WGSS 332 Postwar Britain: Gender, Race, Sexuality, and Social Change, 1945–1990 Crosslistings: HIST 333/WGSS 332
A major theme in British historiography is the enormous social change that has taken place in Britain since the end of the Second World War. In the 1950s, sociologists argued about the extent to which postwar affluence was leading to the "embourgeoisement" of the working class; in the 1960s, the advent of the so–called "Permissive Society" witnessed the flourishing of a new culture of sex, drugs, and rock 'n roll; in the 1970s, the feminist and gay movements challenged gender roles that earlier had seemed so secure; in the 1980s, Thatcherism sought to halt the nation's apparent terminal decline, repudiating much of the progressive legislation of earlier decades; finally, throughout this period successive ways of immigration challenged the cultural homogeneity of white Britain. This course will explore these themes, addressing the question of what it meant to be "postwar" in Britain, charting the gradual emergence of a new politics of class, gender, race, and sexuality in Britain that the made the nation in 1990, at the end of the postwar period, a radically different place from what it had been in 1945. In attempting to make sense of these complex changes, we will consider a variety of documents and works by recent historians, along with a dozen films, which students will be required to view outside of class.
Class Format: seminar **Requirements/Evaluation:** class discussion, two 8–10 page interpretive essays, and a self–scheduled final examination
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 15–20 **Enrollment Preferences:** preference given to junior and senior History and WGSS majors

WGSS 333(S) The Nineteenth–Century British Novel Crosslistings: ENGL 333/WGSS 333
Imagine this: a form of art and entertainment that purports to be able to represent everything–intimate, even inaccessible human thoughts and feelings, love, class, the city, shopping, sexuality, bureaucracy, social bonds, industrialization, nationalism, even modernity itself. In this course we will try to understand the scope of the nineteenth–century British novel's jaw–dropping representational aspirations: its claim to comprehend in its pages both the dizzying complexity of new social, political, and economic structures, as well as delineate in finest detail the texture of individual minds and lives. We will pay attention to the fictional modes by which apparently intractable social problems are resolved, through a sleight of hand act we seem never to tire of, in the realm of romantic love. And while we might think of the novel as an *Empire of the Little*, endlessly occupied with giving significance to the smallest acts of ordinary human life, we will think about the broader historical and social conditions the novel both represents in its pages, and is a crucial not–so–silent partner in promoting and contesting. We will also interest ourselves in the kind of under–the–counter work the Victorian novel does on behalf of British empire, as well as empire's own behind–the–scenes work for the novel. Since so many of these stories of everyday life seem as familiar to us as everyday life, we will work hard to maintain what is strange and specific about the nineteenth century even as we recognize within these works the birth of so much that is modern in our own culture.
Class Format: seminar **Requirements/Evaluation:** 2 papers, a series of shorter response papers, regular and substantial contributions to class discussion

WGSS 338 Latina/o Musical Cultures: Gender, Race, Sexuality and the Dynamics of the Everyday (D) (W) Crosslistings: LATS 338/AMST 339/WGSS 338
In this class we will investigate Latina/o popular musical and dance forms, with particular emphasis on questions of gender, sexuality, and ethno–racial identity. We will focus on the following questions, among others: How are the various facets of Latina/o identity expressed through the "popular" or the everyday? In what ways do categories of difference such as gender, sexuality, and ethno–racial identity inform the performance as well as the interpretation of Latina/o musical forms? How are we to understand cultural phenomenon such as the most recent Latin music "boom"? Employing cultural studies concepts and methods, students will conduct an original semester–long research project in stages and complete one ethnographic exercise.
Class Format: seminar **Requirements/Evaluation:** class participation, one semester–long original research project conducted in stages, one ethnographic exercise
Prerequisites: prior courses in AMST, LATS, or WGSS; not open to first–year students **Enrollment Limit:** 12 **Expected Class Size:** 12 **Enrollment Preferences:** Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority

WGSS 339 Stereotypes, Prejudice, and Discrimination (D) (W) Crosslistings: PSYC 341/WGSS 339
This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people's perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.
Class Format: empirical lab course **Requirements/Evaluation:** weekly brief papers, oral reports, two longer papers
Prerequisites: PSYC 201 and 242 **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** senior, then junior Psychology majors

WGSS 341(F) Cinematic Representations of Work and Migration after the Wall Crosslistings: COMP 341/WGSS 341/ENGL 302
The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Agustin, Angela Melitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: *Illegal, Working Man's Death, NordSud.com, Lichter* (Lights), *Code Unknown, The Flower Bridge, Occident, Since Otar Left, Losers and Winners, Whore's Glory, Le Havre* and *Time Out*.
Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper

WGSS 353(S) Gender & Psychopathology Crosslistings: PSYC 353/WGSS 353
This course will address a range of topics related to the intersection of gender and psychopathology. We will begin the class by discussing the meaning of "gender" and the various mechanisms by which biological sex, gender identity, gender roles and sexual orientation may relate to our understanding of the development, presentation and treatment of psychological disorders. We will also discuss historical and current controversies regarding the classification of psychological disorders concerning sexual orientation and gender identity. The rest of the course will address gender differences in specific psychological disorders and the biological, psychological and social mechanisms contributing to these differences. All students will design and conduct an empirical research project based on the readings and concepts discussed in class.
Class Format: empirical lab course **Requirements/Evaluation:** weekly response papers, midterm exam, a written report and oral presentation of the empirical research project
Prerequisites: PSYC 201 and PSYC 252 **Enrollment Limit:** 16 **Expected Class Size:** 12 **Enrollment Preferences:** preference will be given to Psychology and WGSS majors

WGSS 361T(F) Writing about Bodies (W) Crosslistings: ARTH 361/INTR 361/WGSS 361
The goal is to think about describing bodies from a variety of disciplinary approaches and genres of writing. Its focus is on living bodies, or bodies that were once alive, with an emphasis on bodies that move i.e., performing bodies—actors, dancers, singers—and what makes them unique. We will also consider objects associated with bodies, and the ways they are animated, including how they are animated when the person who had them dies. The course is meant for juniors, seniors, and graduate students who wish to analyze bodies from different disciplinary formations—art, theatre, literature, anthropology, philosophy—and who have a particular interest in writing. We will read scholarly writing, fiction, New Yorker profiles, as well as memoir/autobiography, and take each as a model through which to write about a person or an object redolent of a person.
Possible readings: Roland Barthes on cultural theory and representation; Zine Magubane and Zadie Smith on othered bodies; Tamar Garb on portraiture; Elaine Scary on the body in pain; Joan Acocella, Hilton Als, Judith Thurman and other writers on the arts; Judith Butler and Peggy Phelan on the performative body; Joseph Roach, Diana Taylor, and Michael Taussig on the body, memory, and ritual; Marvin Carlson and Terry Castle on haunting; and Bill Brown on things. These will be supplemented by selected tapes of live performances as well as films.
Class Format: tutorial **Requirements/Evaluation:** alternating weekly essays (4–5 pages) and responses (2–4 pages) as well as discussion; a final paper that distills the writer's own project from these cumulative exercises
Prerequisites: ARTH 101–102, or permission of the instructor; a writing sample that conveys the kind of subject you might be interested in pursuing **Enrollment Limit:** 10 **Expected Class Size:** 10
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under INTR or WGSS

WGSS 362(S) Difference and Desire (D) Crosslistings: ENGL 362/AMST 362/WGSS 362
Do we desire that which is different from us, or the same? Why are we taught to celebrate and embrace "difference," but most often in terms closer to sheer tolerance than attraction? Can difference—–or sameness—–be characterized as a moral good? Politically, is difference a goal or an obstacle? How and where do we encounter the "other" in ways that change who we are? This course will probably not answer these questions tidily but will definitely bring them up over and over again, refining them through close reading of poetry, graphic novels, fiction, philosophy, and film from the latter half of the twentieth century and into the twenty–first. We will encounter literary works by Roland Barthes, Alison Bechdel, Junot Díaz, Marguerite Duras, Ariana Reines, Adrian Tomine, Monique Truong, as well as films by Rainer Warner Fassbinder, Isaac Julien, and Eric Rohmer. As we court these scintillating primary texts, we will also flirt with secondary authors in psychoanalysis, queer theory, feminism, black studies, and postcolonial studies. As the aim of our course is to explore and interrogate the notion of social difference itself, we will participate in the College's Exploring Diversity Initiative. This EDI course will focus on the power relation between queer sexuality and heteronormativity in twentieth–century culture, as well as on the relationship between queerness as lived experience (cultural practice) and queerness as metaphor (institutional and psychic life).
Class Format: seminar **Requirements/Evaluation:** one 5–page paper and one 8– to 10–page paper, and steady and thoughtful class participation
Prerequisites: a 100–level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam **Enrollment Limit:** 25 **Expected Class Size:** 25 **Enrollment Preferences:** English majors

WGSS 373(S) Antigone (W) Crosslistings: PSCI 373/PHIL 373/WGSS 373
Two and a half millennia of commentary and reinterpretation of Sophocles' Antigone have placed her at the center of debates in philosophy, law, ethics and politics. As a young woman who publicly defies the law in order to bury a brother who died fighting against his own city, Antigone becomes the target and the inaugurator of critical debates about agency and fate, individuality and membership, traditional versus civic religion, speech and silence, gender and the public–private distinction in political thought. Does Sophocles' character open up critical inquiry into some of the most important categories of ethical and political thought, as many commentators have claimed, or does the tragedy of Antigone instead reinforce traditional notions of filial duty, kinship ties, gendered citizenship, the place of women, and the nature of authority? Who was Antigone then, and who could she become today as the production and reception of the play move into more global and experimental territory?
Class Format: seminar and four weeks of tutorial **Requirements/Evaluation:** two 5–page tutorial papers, two 2–page commentaries on tutorial partner's paper, 6 short critical response essays for seminar meetings, and regular attendance and participation
Prerequisites: demonstrated background in political theory, philosophy, feminist and gender theory, and/or critical theory **Enrollment Limit:** 19 **Expected Class Size:** 19 **Enrollment Preferences:** demonstrated background in political theory, philosophy, feminist and gender theory, and/or critical theory

WGSS 376(F) Sex, Gender, and the Law in U.S. History (D) Crosslistings: HIST 376/WGSS 376/JLST 376
This course explores how the law in America has defined and regulated gender and sexuality. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. We will examine how assumptions about gender and sexuality have informed the creation and development of American law, contested interpretations of the Constitution, and the changing meanings of citizenship; We will consider how seemingly gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others. Finally, we will examine the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on two short (4–5 page) papers; one longer (10–12 page) paper; an in–class presentation, and participation in class discussion
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 25 **Enrollment Preferences:** History majors; WGSS majors; Justice & Law Studies concentrators

WGSS 378 The History of Sexuality in America Crosslistings: HIST 378/WGSS 378
Sex is often thought of as an unchanging need, behavior, or instinct—a form of experience without history. And yet even in the recent past, sexual desires, acts, identities, attitudes, and technologies have undergone profound transformations. This course explores those transformations, tracing the shifting and contested meanings and experiences of sex and sexuality from the pre–colonial period to the present, and examining how and why sexuality has become so central to identities, culture, politics, and history. To understand how sexuality has been regulated by the state and what sexuality has meant to ordinary Americans in the past, we will use a wide range of primary sources, including as private letters, law cases, photographs, films, and music. Many of the topics are relevant to contemporary public debates, including controversies over censorship, sexual violence, gay and lesbian sexualities, transgender identities and politics, abortion, and sexually transmitted diseases.
Class Format: lecture/discussion **Requirements/Evaluation:** evaluation will be based on class participation, a midterm examination, several short papers, and a 10– to 12–page research paper
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 20–25 **Enrollment Preferences:** preference given to History majors and Women's and Gender Studies majors

WGSS 379 Black Women in the United States (D) Crosslistings: HIST 379/AFR 379/WGSS 379
As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard "historical" texts. This course meets the requirements of the Exploring Diversity Initiative in that it focuses on empathetic understanding, power and privilege, especially in relation to class, gender, and race within a U.S. context.
Class Format: discussion **Requirements/Evaluation:** evaluation will be based on student participation, three papers, and a brief oral presentation
Prerequisites: none **Enrollment Limit:** 25 **Expected Class Size:** 15–20 **Enrollment Preferences:** History majors and Africana Studies concentrators
Distributional Requirements: Division 2 Exploring Diversity

WGSS 380(F) Amiri Baraka and Audre Lorde (D) Crosslistings: ENGL 380/AMST 380/WGSS 380/AFR 382
In both literary content and political disposition, Audre Lorde and Amiri Baraka were radically different people. Lorde was a queer feminist icon credited with furthering the concepts of intersectional identity and black feminism, while Baraka was accused throughout his career of obliviously brazen machismo and criticized for his use of homophobic invective. Baraka endorsed the very notions of leadership and community from which Lorde crafted an identity of marginality, and Lorde endorsed a community–bound poetics contrasted to Baraka's avant–gardism. But for all their differences, Lorde and Baraka were arguably the two most significant African American writers of the late twentieth century, and, however surprisingly, they staked similar conceptual territory, addressing such themes as the possibility of spiritual self–discovery, the possibility of liberatory consciousness, the significance of emotions in building community, and the relationship between sexuality and racial identity. We will explore such issues by way of closely attending to their texts, and since another similarity between them was a prolific range of genre, we will have the opportunity to delve into poetry, essays, fiction, drama, and memoir, with a slight but definite preference for their poetry. We will also place these writers in their political and philosophical contexts, sampling secondary sources on the Black Arts movement, queer theory, contemporary American and African American poetry, and transnational black studies. As we will be discussing two writers whose collective contribution to minority discourse is nothing short of monumental, our course will participate in the College's Exploring Diversity Initiative. Specifically, this EDI course will emphasize the ongoing historical negotiation between blackness and white supremacy in the contemporary period, in addition to the relationship between queer sexuality and blackness.
Class Format: seminar **Requirements/Evaluation:** one 5–page paper and one 8– to 10–page paper, and steady and thoughtful class participation
Prerequisites: a 100–level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam **Enrollment Limit:** 25 **Expected Class Size:** 25 **Enrollment Preferences:** English majors

WGSS 381(S) Who's Afraid of Failure? (D) Crosslistings: ENGL 381/AMST 381/AFR 380/WGSS 381/COMP 381
Success is demanding, as any Williams student knows, and all that discipline–hard work, sacrifice, perseverance–can come to seem an end in itself. But as the great theorist of children's animation and stoner movies Jack Halberstam has noted, sometimes failure turns out to be a better bet than success: it can reveal the blindspots of dominant ideologies, while opening up alternative ways of living in the world. This course will take a long detour through meditations on failure emerging from queer theory, Asian American studies, and black studies, with a particular interest in what failure can reveal about higher education and related disciplinary institutions, such as prisons or the so–called "internment camps" for Japanese Americans during World War II. This course fulfills the Exploring Diversity requirement by considering how the stigmatization of difference and justification of social inequality are inscribed in supposedly neutral rubrics of success and failure.
Readings may include Halberstam's *Queer Art of Failure*, Junot Diaz's *Brief Wondrous Life of Oscar Wao*, and works by Fred Moten, Roderick Ferguson, Angela Davis, Hisaye Yamamoto, Toshio Mori, Nella Larsen, Victor Lavalle, and others. Students will also have the opportunity to bring these concepts to bear on other social concerns and/or cultural objects (music, film, etc.) of their choice, as we attempt to figure out just what a course in cultural criticism might be good for in a society infatuated with success. What are you planning to do with that liberal–arts degree, anyway?
Class Format: seminar **Requirements/Evaluation:** class participation, frequent short writing assignments, a midterm take–home exam, and a final project
Prerequisites: a 100–level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor **Enrollment Limit:** 25 **Expected Class Size:** 10 **Enrollment Preferences:** English majors and Africana Studies concentrators

WGSS 382 Latina/o Politics (D) Crosslistings: LATS 382/HIST 382/WGSS 382
This course explores Latina/o politics from World War II to the present. Defining politics broadly, we will examine everything from electoral politics to grassroots activism. We will explore the relationship between Latinas/os and the U.S. political system, as well as the ways in which dynamics internal to Latina/o communities shape political issues and political participation. Specific topics include Mexican Americans and Puerto Ricans struggles for political inclusion in the aftermath of World War II, Cuban exile politics and their impact, the political and social movements of the 1960s and 1970s, key electoral campaigns, the recent appointment in 2008 of the first Latina as a Supreme Court justice, and on–going debates over immigration. With an assessment of power relations at its core, this Exploring Diversity Initiative course explores the ways in which Latinos and Latinas have been excluded from or differentially included in the U.S. political system, as well as how the U.S. political system reflects dominant hierarchies of race, class, and gender. We will also interrogate how Latinas/os have sought to make U.S. politics more inclusive and at times have struggled to transform U.S. politics.
Class Format: discussion **Requirements/Evaluation:** evaluation will be based on class participation including short assignments in preparation for discussion; three short essays based on course readings (3–5 pages each); and a final paper (7–10 pages)
Prerequisites: none **Enrollment Limit:** none **Expected Class Size:** 20 **Enrollment Preferences:** Latina/o Studies concentrators and History majors; open to first year students

WGSS 383 Whiteness and Race in the History of the United States (D) Crosslistings: HIST 383/WGSS 383/AMST 383
If race is socially and historically constructed, then the study of race relations in the U.S. extends to the topic of whiteness. And if we are never without the past, then "whiteness" must be a part of current discussions about politics, citizenship, and social issues. Focusing on how historians have written about whiteness in American history, this course uses the prism of race to explore social, political, and economic development in U.S. history. The class follows the development of "whiteness" through a chronology that begins in colonial Virginia, travels through immigration in the nineteenth century, examines racial politics and popular culture in the twentieth century, and ends with a look at the current election season. This course is framed by several questions: What is whiteness, and what has it meant in the history of the United States? Who is (and is not) white? What about other analytical categories, like gender and class (or region or ethnicity or sexuality): how have these experiences shaped and been shaped by the racial category of whiteness? Because historically whiteness has carried overtones of power, privilege, and wealth in the United States, the course necessarily critiques the roots of racial disparities. This class is not for the faint–hearted. Informed participation is necessary to its success. The course fulfills the requirements for the Exploring Diversity Initiative because it examines the differences and similarities between white Americans and other American cultures, and because it explores whiteness as a prism for understanding the operations of power and privilege in American society.
Class Format: discussion **Requirements/Evaluation:** evaluation will be based on class participation, the leading of two class discussions related to the writing of two 3– to 5–page review/response papers, and a final bibliographical research project **Enrollment Limit:** 25 **Expected Class Size:** 20–25 **Enrollment Preferences:** students in History, Africana Studies and Women's, Gender and Sexuality Studies

WGSS 386(F) Latinas in the Global Economy: Work, Migration, and Households (D) Crosslistings: LATS 386/HIST 386/WGSS 386
An increasingly global economy, from 1945 to the present, has affected Latinas in their home countries and in the United States. The garment industry, one of the first industries to go global, has relied extensively on Latina workers in their home countries and in the United States. Domestic work, a traditional field of women's work, also crosses borders. Challenging the myth that labor migration is a male phenomenon and that women simply follow the men, this course explores how the global economy makes Latinas labor migrants. What impact has the global economy and economic development had on Latinas' work and their households in their home countries? How have economic changes and government policies shaped Latinas' migrations and their incorporation in the changing U.S. economy? How have Puerto Rican, Mexican, Cuban, Dominican, Salvadoran, and Guatemalan women confronted the challenges created by a globalizing economy and balanced demands to meet their households' needs? This EDI course explores the impact of U.S. hierarchies of race, ethnicity, gender and class on Latinas' labor migrations and economic incorporation in the United States, as well as the myriad ways in which they confront, negotiate, and at times challenge those dominant U.S. hierarchies.
Class Format: discussion **Requirements/Evaluation:** evaluation based on class participation and group presentations, short writing assignments, two short essays, and a final paper that will be presented to the class

WGSS 389(S) The Fiction of Virginia Woolf Crosslistings: ENGL 389/WGSS 389
"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self–conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction. This course will explore the evolution of the innovative narrative techniques by which she tried to bridge the gap between the experience of consciousness and its representation in language. Accompanying concerns will be Woolf's challenges to stable gender roles, her conception of the relationship of gender to creativity, and the ways in which her powerful lyric impulses are reflected in her fiction. We will read most of the major novels, including *The Voyage Out*, *Jacob's Room*, *Mrs. Dalloway*, *To the Lighthouse*, *Orlando*, *The Waves*, and *Between the Acts*, together with selected short fiction and critical essays. The course will be taught largely by discussion.
Class Format: seminar **Requirements/Evaluation:** weekly journal entries, one 5– to 7–page paper and one 10– to 12–page paper
Prerequisites: a 100–level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first years **Enrollment Limit:** 25 **Expected Class Size:** 20 **Enrollment Preferences:** none

WGSS 390T Donne, Shakespeare, and Wroth (W) Crosslistings: ENGL 390/WGSS 390
"Wit! Wonder–exciting vigour, intenseness and peculiarity of thought," Samuel Coleridge wrote, "this is the wit of Donne!" There are no greater, wittier, or more daringly original lyric poems in the English language than Donne's *Songs and Sonnets*, *Shakespeare's Sonnets*, or Mary Wroth's *Pamphilia to Amphilathus*, the first collection of secular poems written and published by an Englishwoman. This tutorial will explore the following questions. What are these writers' stylistic characteristics? How peculiar or unconventional are these poems, and what innovations do they seek? What is the impact of their coterie audience? How do questions of sexuality and gender animate these poems? To what extent are biography and history pertinent or helpful in understanding this poetry? Why have these poems inspired such provocative critical responses from modernists, and more recently, post–modernists and gender studies?
Class Format: tutorial; students will meet with the instructor in pairs for an hour each week **Requirements/Evaluation:** students will write a 5– to 7–page paper every other week (five in all), and comment on their partners' papers in alternate weeks
Prerequisites: a 100–level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam **Enrollment Limit:** 10 **Expected Class Size:** 10 **Enrollment Preferences:** English and WGSS majors or potential majors

WGSS 402 Global Sex: Identities, Migration, Globalization (D)
This course reveals how different cultures construct sexual identities, and what happens when dominant paradigms (i.e. the Euro–American LGBT model) become enmeshed in globalization, capitalism, and consumerism. Why do we find gay bears and drag queens trafficking in North American iconography flourishing in countries like Brazil and South Africa? Why does Madonna still turn out gay crowds in Indonesia and Russia? As global gay culture spreads, what happens to people with their own local conceptions of gender/sexuality (e.g., "Two Spirit" Native Americans?) How have free trade and the internet transformed queer lives, queer sex, and people's understandings of their sexual selves? We begin with a focus on alternative gender/sexual formations around the world. Next we ask what happens when it's not only identities that are on the move, but actual bodies. Here, we focus on queer diasporas, refugees, and migrants. Our final unit brings us into the global flows of capitalism itself to interrogate the role of consumerism in sexual culture, tackling thorny issues of gay gentrification, tourism, pinkwashing/homonationalism, global gay cinematic representations, and the neocolonial potential of NGOs. Ultimately, this class reveals that sexuality is infused in global economic and political affairs in ways that are often overlooked.
Class Format: seminar **Requirements/Evaluation:** comparative class presentation, mid–term essay, project proposal/abstract, final paper, field trip reaction paper
Prerequisites: none **Enrollment Limit:** 20 **Expected Class Size:** 20 **Enrollment Preferences:** preference given to WGSS majors

WGSS 404(S) Senior Seminar: Before We Were Queer: Gay and Lesbian Lives before 1990 (D) Crosslistings: WGSS 404/COMP 402
Reclaimed by activists in the 1990s as an expression of defiance and pride, the word *queer* has come to be identified with a wide range of lesbian, gay, bisexual, and transgender identities, as well as entire fields of intellectual theory, popular culture, and political engagement. The past 25 years of queer studies, media, and activism (1990–2015) have led to unprecedented visibility and great advances for many LGBT people, especially in North America and Western Europe: from breakthroughs in the treatment of HIV/AIDS, to victories for Gays in the Military, Employment Non–Discrimination, and Gay Marriage in 16 US states and another 16 countries around the world. For many, however, this new era of queer life during the past 2 decades has eclipsed the time before, when those who were pejoratively labeled as queer struggled with homophobic discrimination, isolation, and violence, by seeking one another out in major cities, specific neighborhoods, underground bars, and in the narrative spaces of novels and films. As a result, many young people born after 1990 are largely unaware of these struggles that predate their lives, the internet, and social media; and several LGBT leaders worry that this has left many 18–25 year olds with a false sense of security, a decreasing interest in political engagement, alarming new rates of sexually transmitted infections, and a growing disinterest in queer social spaces beyond the virtual. In this course, we will explore the literary, cinematic, and cultural history of gay and lesbian lives before the 1990s, and consider what has been gained and lost. Topics to include the early twentieth–century isolation of the closet, (1890s–1950s), the formation of clandestine gay and lesbian communities during and after World War II (1940s–60s), the Stonewall riots and the first decade of Gay Liberation (1969–1979), and the devastating losses and community responses to AIDS (1979–1995). For its critical engagement with cultural diversity, comparative investigation of gender, sexuality, and ethnicity, and historical analysis of queer identities, this course fulfills the goals of the Exploring Diversity Initiative.
Class Format: seminar **Requirements/Evaluation:** active participation, two short papers, an oral presentation, and a final paper
Prerequisites: senior or junior majors in WGSS, majors in COMP, or permission of instructor **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** WGSS majors, then COMP majors, and those with compelling justification for admission

WGSS 406 Coming of Age in the Polis (W) Crosslistings: CLGR 406/WGSS 406
Studying a society's modes of rearing its young, and especially the ways it prepares and tests adolescents for their "coming of age" into their adult roles, provides an excellent approach to exploring its fundamental values and institutional practices. Archaic and classical Greek literature not only reflects but actively reflects upon the socialization of boys and girls in the Greek polis. In this course we will read in Greek selections from the Homeric Hymns to Demeter and Apollo and, in its entirety, a tragedy (e.g., Sophocles' *Philoctetes*), examining these texts through the lens of "coming of age." We will read in English brief selections from Homeric epic and from elegiac and lyric poetry (monodic and choral), and several Athenian tragedies and perhaps a comedy. We will also read critical literature on childrearing, religious cults for boys and girls of different ages, and the role of dance, song and poetry in preparing the young for their adult roles, particularly in fifth–century Athens.
Students will be divided into tutorial pairs chiefly according to their previous experience in Greek courses. Students will meet with the instructor once a week either individually or in pairs to present their translations of the Greek assigned for that week, and they will also meet once a week in pairs for the oral presentation of written 5–page reports. At the latter meeting, each student will alternate between making a formal presentation one week and, in the next week, offering an oral critique of the other student's presentation.
Class Format: tutorial **Requirements/Evaluation:** evaluation will be based on the translations, reports, and critiques presented in the tutorial sessions
Prerequisites: CLGR 201 or permission of instructor **Enrollment Limit:** 10 **Expected Class Size:** 6–8
Distribution Notes: meets Division 1 requirement if registration is under CLGR; meets Division 2 requirement if registration is under WGSS
Extra Info: may not be taken on a pass/fail basis

WGSS 408(S) Senior Seminar: Nineteenth–Century Novel: From Desperate Housewives to Extreme Makeovers Crosslistings: RLFR 412/WGSS 408
In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth–century novel and its boundless ability to echo the historical past and reverberate in the cultural present. Desperate housewives, sex in the city, queer eyes for straight guys, and extreme makeovers fill the pages of the nineteenth–century novel. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Maupassant and Zola, the novel became an extraordinary forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth–century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social–climbing lover Julien Sorel, the ambitious undergraduate Rastignac, the domestically–abused Gervaise, and the man–eating courtesan Nana became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these characters continue to haunt our twenty–first century present. Reinterpreted by such contemporary actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth–century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, and Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, and Chabrol. *Conducted in French.*
Class Format: seminar **Requirements/Evaluation:** active class participation, two short papers, an oral presentation, and a final paper
Prerequisites: a 200–level or 300–level RLFR literature course at Williams; or by permission of the instructor **Enrollment Limit:** 16 **Expected Class Size:** 16 **Enrollment Preferences:** French majors and certificate students; Women's, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission

WGSS 409(F) Transnationalism and Difference: Comparative Perspectives (D) (W) Crosslistings: LATS 409/AMST 411/WGSS 409
In the age of satellite television, e–mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno–racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethno–racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

Class Format: seminar **Requirements/Evaluation:** evaluation to be based on student participation, an original 12–15 page research paper conducted in stages, and peer editing
Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing **Enrollment Limit:** 12 **Expected Class Size:** 10 **Enrollment Preferences:** Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority

WGSS 412(S) Feminist and Queer Interventions in Literary Theory Crosslistings: ENGL 412/COMP 412/WGSS 412
Feminist scholars have worked, with increasing success from the 1960s onward, to shed light on previously unrecognized women writers and situate gender and sexuality at the center of the study of literature. Building on this foundation, we will investigate the profound methodological impact of feminist and queer literary criticism. We will examine the ways in which such scholarship has not only challenged the neglect of gender and sexuality but also generated new theoretical frameworks and approaches to interpretation. Our investigation will be guided by questions such as: What is the relationship between feminist and queer theories and other interpretive approaches such as new criticism, poststructuralism, psychoanalysis, critical race theory, new historicism, and postcolonial theory? In what ways do feminist and queer theories differ and disagree about literary studies? What constitutes a feminist reading practice or queer method of interpretation? Our discussions will explore the historically contingent, varied, and contested nature of feminist and queer criticism, and what becomes possible (or impossible) when thinking and reading within these frameworks.
Class Format: seminar with elements of a colloquium, including independent research and some student–selected readings and discussion topics **Requirements/Evaluation:** group discussion facilitation; 5–page essay; 12– to 15–page final paper, with oral presentation
Prerequisites: a 300–level English course, or instructor permission **Enrollment Limit:** 15 **Expected Class Size:** 15 **Enrollment Preferences:** English and/or WGSS majors

WGSS 426 Pictures That Rocked the Nation: Courbet and Manet in Second Empire France (D) Crosslistings: ARTH 426/WGSS 426
How do we recognize or see diversity in the works of canonical artists? If modernist painting has often been understood to put pressure on existing power relations, the stylistic innovation that defines it has just as often been used to veil its controversial subject matter. The aim of this course is two–fold: 1) to call attention to difference through comparative analysis and to consider how and why identifying it is meaningful; 2) to detail the changes in historiography since the 1970s that have enabled discussions of difference (sex, class, race, ethnicity, sexuality) and the challenges they present. The course demonstrates that the Second Empire (1851–1870) in France was an especially fertile period for innovations in style and subject matter that generated both outrage and incomprehension. In the wake of the revolution of 1848, realism and its rallying cry ("il faut être de son temps") brought home subjects that heretofore had been safely displaced to the classical or exotic worlds as they were imagined by the West. The Second Empire coincided with the birth of mass culture so that artists had access to new types of imagery and increasing contact with racy and controversial subjects.
This course will investigate polemical works by Gustave Courbet (i.e. Burial at Ornans, Origin of the World) and Edouard Manet (i.e. Olympia, The Execution of Emperor Maximilian) through the lens of critical writings of the 1850s and 1860s (i.e. Baudelaire, Proudhon, Zola) as well as revisionist writings from the 1970s to the present (Homi Bhahba, T.J. Clark, Richard Dyer, Michael Fried, Tamar Garb, Sander Gilman, Zine Magubane, Linda Nochlin, and Gayatri Spivak). We will consider the relationship of Manet's and Courbet's works to academic ones, including orientalist paintings by Ingres and Gérôme, and to vanguard pictures of the next generation (i.e. the homoerotic work of Caillebotte and Bazille, the "sex workers" of Degas's toilette scenes). Finally, we will examine the legacy of Courbet and Manet during the period when difference began to be represented in the work of artists such as Judy Chicago, Yasumasa Morimura, Cindy Sherman, Samuel Fosso, and Carrie Mae Weems.
Class Format: seminar **Requirements/Evaluation:** weekly 1– to 2–page position papers; oral presentation and final research paper, 10–15 pages
Prerequisites: ARTH 101–102 or permission of instructor **Enrollment Limit:** 12 **Expected Class Size:** 12 **Enrollment Preferences:** students with course work in French history or literature and/or Women's, Gender and Sexuality Studies

WGSS 449 Poses & gestures in 17th–century European art Crosslistings: ARTH 449/WGSS 449
Art of the 1600s represents a highpoint in artists' ability and interest in conveying "the passions of the soul" through the actions of the body. The range of feelings represented had never been broader than at this time. In the seminar we will distinguish unusual from conventional poses (e.g, melancholy, wonder, musing),track how long the conventional poses had been in use, and differentiate poses and gestures that had unisex use from those that remained gender–specific or preferred. We will also examine which poses, if any, individual artists (e.g., Caravaggio, Artimesia Gentileschi, Rubens, Rembrandt, Leyster, Bernini, and Poussin) favored.
Class Format: seminar **Requirements/Evaluation:** two oral reports (5 min. and 20 min.), an 18– to 20–page paper (half due mid–way through the semester, the whole at the end, and class discussion
Prerequisites: ARTH 102 **Enrollment Limit:** 14 **Expected Class Size:** 14 **Enrollment Preferences:** Art History majors
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
SEM

WGSS 451 Ideal Bodies: The Modern Nude and Its Dilemmas Crosslistings: ARTH 451/WGSS 451
Since the nineteenth century, the female nude has been so dominant that the very term "nude" has come to stand for the female body. This course looks at both male and female nudes from the time of the French revolution to the present in order to order how and why this gendering occurred. We will explore the ways in which certain types of bodies have been defined in opposition to the white western ideal, and thereby exoticized and marginalized. Our prime focus is the work of David, Ingres, Courbet, Gericault, Manet and Renoir but more popular nineteenth–century images as well as selected works by artists working in the twentieth and twenty–first centuries will be discussed.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on biweekly 1–page papers, short reports, an oral presentation and a 10– to 20–page paper
Prerequisites: Two semesters of ARTH 101–102–103; permission of instructor required **Enrollment Limit:** 12 **Enrollment Preferences:** junior and senior Art majors, Women's, Gender and Sexuality Studies majors, French majors, and History majors with a concentration in European studies.
Distribution Notes: meets Division 1 requirement if registration is under ARTH; meets Division 2 requirement if registration is under WGSS
Distributional Requirements: Division 1 *Not Offered Academic Year 2014–2015*
SEM Instructor: Carol Ockman

WGSS 452 Women in America, 1620–1865 Crosslistings: HIST 452/WGSS 452
This course will explore the diversity of American women's experiences from the colonial era through the Civil War. We will pay particular attention to the roles women filled—as slaves, nuns, housewives, mothers, and workers, as well as depictions of women as witches, paragons of virtue, and urban consumers. In our reading of historiography and primary texts we will analyze the ways in which literacy and artistic culture as well as geopolitical events shaped women's lives. As we study works of history, we will also read modern works of feminist and race theory to further our understanding of connections between ideology and practice, between narrative and argument.
Class Format: seminar **Requirements/Evaluation:** a research paper (20–25 pages), based on reading and analysis of a set of primary sources, a literature review, class participation, and an informal reading journal
Prerequisites: none **Enrollment Limit:** 15 **Expected Class Size:** 10–15 **Enrollment Preferences:** advanced History majors and to Women's, Gender and Sexuality Studies majors
Distributional Requirements: Division 2 **Other Attributes:** HIST Group F Electives – U.S. + Canada
HIST Group G Electives – Premodern
Not Offered Academic Year 2014–2015
SEM Instructor: Gretchen Long

WGSS 457 Gender, Law, and Politics in U.S. History Crosslistings: HIST 457/WGSS 457
This seminar explores the legal history of the United States as a gendered system. It examines how women have shaped the meanings of American citizenship through pursuit of political rights and obligations such as suffrage, jury duty, and military service; how those political struggles have varied across race, religion, and class; and how the legal system has shaped gender relations for both women and men through regulation of such issues as marriage, divorce, work, reproduction, and the family. While we will read some court cases, the focus of the seminar is on the broader relationship between law and society. Readings will address not only the history of statutory law, and of the lawsuits and trials testing those laws, but also the social history of the impact of the law and the political history of efforts to change laws.
Class Format: seminar **Requirements/Evaluation:** evaluation will be based on an extensive (20–25 page) research paper that makes use of primary and secondary sources, brief papers on the weekly readings, and class participation
Prerequisites: none **Enrollment Limit:** 15 **Expected Class Size:** 10–15 **Enrollment Preferences:** senior History majors
Distributional Requirements: Division 2 **Other Attributes:** HIST Group F Electives – U.S. + Canada

WILLIAMS–EXETER PROGRAMME AT OXFORD UNIVERSITY

Director, Professor MARLENE SANDSTROM

THE PROGRAMME

Williams College offers a year–long program of studies at Oxford University in co–operation with Exeter College (founded in 1314), one of the constituent colleges of the University. Williams students will be enrolled as Visiting Students at Exeter and as such will be undergraduate members of the University, eligible for access to virtually all of its facilities, libraries, and resources. As Visiting Students in Oxford, students admitted to the Programme will be fully integrated into the intellectual and social life of one of the world's great universities.

Although students on the Programme will be members of Exeter College, entitled to make full use of Exeter facilities (including the College Library), dine regularly in Hall, and join all College clubs and organizations on the same terms as other undergraduates at Exeter, students will reside in Ephraim Williams House, a compound of four buildings owned by Williams College, roughly 1.4 miles north of the city centre. Up to six students from Exeter College will normally reside in Ephraim Williams House each year, responsible for helping to integrate Williams students into the life of the College and the University. A resident director (and member of the Williams faculty) administers Ephraim Williams House, oversees the academic program, and serves as both the primary academic and personal advisor to Williams students in Oxford.

Students on the Williams–Exeter Programme are required to be in residence in Oxford from Thursday, 2 October 2014, until at least 22 June 2014 with two breaks for vacations between the three terms. Students enroll for the full academic year, which consists of three eight–week terms of instruction: MICHAELMAS TERM (12 October to 6 December 2014), HILARY TERM (18 January to 14 March 2015), and TRINITY TERM (26 April to 20 June 2014). Students are expected to be in residence to write their first tutorial papers in the week (0th Week) before the eight weeks of instruction begin and to remain in residence during the week (9th Week) after the term ends in order to sit final examinations. Between the three terms there are two intervening five week vacations, during which students may be expected to continue reading as preparation for their upcoming tutorials. Students are required to arrive in Oxford by 2 October 2014 for the ten–day orientation.

THE TUTORIAL SYSTEM

Undergraduate instruction at Oxford University is largely carried out through individual or small–group tutorials, in which students meet weekly with their tutor to present and discuss an essay they have written, based on an extensive amount of reading undertaken from an assigned reading list they will receive at the beginning of each term. In addition to the weekly tutorial, students are usually expected to attend a course of lectures offered by the University that corresponds to the material being addressed in their tutorials.

Each student will plan a course of study for the three terms of the academic year in consultation with the director of the Programme. In his or her capacity as the Tutor for Visiting Students at Exeter College, the director, working closely with Exeter's subject tutors, will arrange the teaching for the students, monitor student progress, be in regular contact with the student's tutors, supervise the examinations that students sit at the end of each academic term, and report on each student's academic progress to the Senior Tutor at Exeter College. There are no "add/drop" periods at Oxford; once a student has made a commitment to a particular tutorial course, and the director has then secured a tutor to teach that course, students cannot back out or change the terms of the tutorial. All tutorials at Oxford are graded, although in exceptional circumstances a tutorial may be converted to pass/fail before the end of the fourth week of term with the permission of the Programme director.

Over the course of the three terms, students are required to enroll in a minimum of FIVE tutorial courses (each consisting of eight individual tutorial meetings and generally requiring the preparation of eight essays). Although some students take the minimum five tutorial courses, most have enrolled in two tutorials per term for a total of six tutorials over their time at Oxford.

GRADES AND CREDIT

Grades for each tutorial course reflect the grade assigned to all eight tutorial sessions, including their related essays, considered together, as well as the grade for the final examination. Final examinations last three hours and are always sat in the ninth week of term, following the eight weeks of instruction. For some tutorial courses, tutors may elect to offer the student the option of a final paper or project in lieu of an examination.

Upon satisfactory completion of the requirements for the Williams–Exeter Programme at Oxford University, students receive academic credit for a regular Williams academic year, with each eight–session tutorial plus final examination counting as the equivalent of 1.6 regular semester courses taken at Williams. Grades eventually become a part of their Williams transcript and will be included in the computation of their Grade Point Average.

Tutorial courses in Oxford may be used toward fulfilling the divisional distribution requirement; a student may earn a maximum of three distribution requirements, with no more than one from each division, for the year. All tutorial courses at Oxford meet the Williams College "Writing Intensive" designation, except for those in the studio arts, mathematics, and the sciences.

Tutorial courses in Oxford may also be used to meet major requirements. Students are encouraged to check with their department chair(s) to confirm official department policy.

THE COURSE OF STUDY

In addition to the opportunity to pursue British and Commonwealth Studies, Williams students in Oxford will be able to pursue tutorials in fields in which Oxford is particularly noted (Economics, English Literature, Modern History, Philosophy, Politics, Classics, Theology, the Natural Sciences, etc.). Exeter College also has fellows in English Language and Literature (with interests ranging from the Renaissance–including Shakespeare–to the early nineteenth century), in Politics (with interests in international relations and comparative politics), and in History (with an interest in the medieval period) committed to teaching Williams students, and students are thus encouraged to consider undertaking at least one tutorial course in these fields as part of their course of study.

What follows is a PARTIAL list of tutorial courses normally available to students studying on the Williams–Exeter Programme at Oxford. The tutorials listed below represent a selection of some of the standard "papers" (courses) that comprise the Oxford degrees in various subjects and that are taught in tutorial format, although most are not offered every Oxford term. It needs to be emphasized that this is only a partial list, that the tutorial offerings at Oxford University are incredibly rich, and that one of the attractions of the Programme is that it enables students to define, develop, and pursue their academic interests. Students are therefore encouraged to explore all the courses offered at Oxford even if they are not listed in this Catalog.

Tutorial courses are not offered every term and are often accompanied by scheduled lectures. Although the term in which the lectures are delivered is sometimes listed below, as is the term in which students should take the tutorials (MT–Michaelmas Term; HT–Hilary Term; TT–Trinity Term), these change from year to year. It is therefore imperative that students consult the relevant "faculty" webpages to make sure when the lectures and/or tutorials they wish to take are actually offered. Sometimes, where appropriate, prerequisites are also listed.

THE COURSE OF STUDY

A full summary of the list of courses offered by subject can be found at: http://www.ox.ac.uk/admissions/undergraduate_courses/courses/index.html. Although some course descriptions are provided below, detailed descriptions of all the courses listed in this catalog can be found on the websites of respective departments or faculties the links of which can be found at: http://www.ox.ac.uk/divisions/department_az.html. For a full list of lectures in all divisions at the university, visit: http://www.admin.ox.ac.uk/pubs/lectures/

NON–CREDIT FOREIGN LANGUAGE STUDY

In addition to their regular tutorial courses, students may begin or continue the study of a wide range of foreign languages on a non–credit basis through a variety of arrangements available through the University as well as a number of other educational and cultural institutions in the city of Oxford. The Programme normally subsidizes such study.

STUDENT LIFE

By virtue of the fact that, while in Oxford, they are officially Visiting Students at the University–and full members of Exeter College–Williams students are offered every opportunity to become fully integrated into student life in Oxford. Both Exeter College and Oxford University are home to an exceptional variety of sports clubs, debating societies, interest groups, cultural organizations, and social activities, virtually all of which are available to Visiting Student members of the University. Students are encouraged to participate fully in the social life of Exeter College–to dine in Hall as often as they wish, to frequent the College bar, to use the College's athletic facilities, and to become members of the various College clubs and organizations. Furthermore, Williams students also have access to the University's athletic events, concerts, theatrical productions, museums, and libraries. All Williams students in Oxford are encouraged to join the Oxford Union, which, in addition to its debating activities and club rooms, possesses dining facilities and the largest lending library in the University.

At the Ephraim Williams House, all Williams students are housed in large double rooms and enjoy full access to the House's library, common rooms, laundry facilities, computer lab, and a large dining room, in which a weekly catered meal is served during the eight weeks of term. There are also a number of small kitchens in the House that students may use. The entire facility has high–speed wireless internet access. Bedrooms are hard wired for high–speed internet access and are fully equipped with furnishings, bed linens, and a telephone. The grounds include a courtyard, sheltered bike racks, barbecue facilities, and gardens. A number of student jobs are available during the academic year for students who wish to earn a little spending money by helping to maintain the facilities and organize Programme activities. Ephraim Williams House is a short bike or bus ride (or a twenty–minute walk) from Exeter College and the center of town, and is within easy walking distance of the University parks and the local shops, restaurants and banks of Summertown. The Programme will partially subsidize student bus passes to facilitate travel around Oxford.

Before the academic year begins—on Sunday, 12 October 2014—ten days of orientation activities are scheduled. Students are expected to be in residence for all of these many activities, some of which take place in Ephraim Williams House, others at Exeter College. At this time students will become acquainted with the workings of the Programme, of Exeter College, and of the University, and will be familiarized with the rules and regulations they are expected to abide by during their residence in Oxford.

Throughout the academic year, provision will be made for trips to a few of sites of historical, cultural, or political interest. In the past these have included the Cotswolds, Salisbury, Stratford, Stonehenge, Bath, Wells, Warwick Castle, Blenheim Palace, and various sites of interest in London. Students will also be given the opportunity to attend a number of theatrical productions and other cultural events. Oxford's proximity to London gives students ready access to that city's multiple attractions and many resources. The Oxford–London train service is frequent and the journey takes just over an hour. The buses to London run even more regularly (and are generally cheaper), and the one–way journey takes about ninety minutes.

During the summer before students arrive in Oxford, they will receive a copy of the latest edition of Ephs Among the Dreaming Spires, which will further explain the perks, policies, and procedures of the Programme, the rules and regulations they are expected to follow, and tips for how best to enjoy a fulfilling year in and around Oxford.

ILLNESS AND INSURANCE

Students must ensure they are covered either by the Williams College health insurance policy or by some other comprehensive health insurance plan (generally a family health insurance policy). While in Britain, students will be covered by the National Health Service (NHS) for routine visits at the Group Medical Practice used by Exeter College and for emergency hospital treatment. The Programme also works with a physician in private practice attached to a local private hospital. Prescription drugs are available through the NHS for a nominal fee. There are limited outpatient psychological counseling services available through the NHS and the Programme, although, as Visiting Students at the University, Williams students are entitled to make use of the University Counseling Centre. Any extensive or long–term counseling, however, would need to be covered by the student's personal health insurance policy. Finally, students are not likely to be covered under the NHS for medical services received in foreign countries, especially those countries that do not enjoy membership of the European Union.

FEES

The tuition and room fees paid by students on the Williams–Exeter Programme at Oxford are the same as those for a year spent in residence at Williams. Students are responsible for some of their own meals and for all of their personal expenses. They are also responsible for arranging and funding the cost of their air travel to and from Britain, although they may select to take the group flight to London arranged by the Programme at competitive rates. They are provided with three meals a day for the first four or five days in Oxford and with a weekly catered meal in Ephraim Williams House during the eight weeks of term. They may also eat breakfast, lunch, and/or dinner on any day of the week at Exeter. Students will not be charged the full Williams board fee during their year in Oxford, but they will pay a proportion of the board fee to help cover these costs. For planning purposes, students and their parents should expect the cost of a year on the Programme to be roughly the same as a year at Williams. Financial aid eligibility will be figured on the usual basis of tuition, fees, room, board, and personal and book expenses, as if the student were at Williams for the year. Similarly, the normal self–help contribution would be expected. Since the academic year ends later at Oxford than at Williams, the summer earning expectations for students for the following year will be reduced by one half and the difference will be made up by additional Williams aid.

APPLICATION

Admission to the Programme is on a competitive but flexible basis. Students must apply to the Dean's Office by the prescribed deadline (normally early in February) and, prior to applying, should consult with the chair of their major department. Any questions students might have about curricular offerings at Oxford can also be raised with the director of the Programme in Oxford. In addition to completing the formal application form, students can expect to be interviewed at Williams and will subsequently need to complete an application for Visiting Student status at Oxford University. All admissions to the Programme are subject to approval by Exeter College. Students can expect to be notified of acceptance before Spring Break. It is normally expected that they will have completed the College's distribution requirement by the end of their sophomore year. In making its decisions, the Admissions Committee of the Williams–Exeter Programme at Oxford University takes student GPA into account, with a minimum GPA requirement of 3.0, expects all applicants to have demonstrated capacity for rigorous independent work and extensive essay writing, and looks favorably on those students whose intellectual maturity, curiosity and enthusiasm would best prepare them for a demanding course of study in Oxford. All applicants must identify two Williams faculty members who are willing to provide references. Because of the emphasis at Oxford on weekly written work for each tutorial course, at least one of those faculty members should be able to offer an assessment of the applicant's writing ability.

WILLIAMS–MYSTIC MARITIME STUDIES PROGRAM

Director, JAMES T. CARLTON

Faculty: JAMES T. CARLTON *(Williams College)*, LISA A. GILBERT *(Williams College),* GLENN S. GORDINIER *(Mystic Seaport Museum; University of Connecticut)*, CATHERINE ROBINSON HALL *(Mystic Seaport Museum);* MARY K. BERCAW–EDWARDS *(University of Connecticut; Mystic Seaport Museum)*, RICHARD J. KING *(Mystic Seaport Museum).*

The Williams College–Mystic Seaport Maritime Studies Program offers students a unique opportunity to explore the ocean, travel the Atlantic, Pacific, and Gulf coasts, and undertake original research of their own design in the humanities and sciences. Sophomores, juniors, and seniors of all majors welcome. A term at Williams–Mystic includes credit for one semester plus one winter study requirement, as well as intensive writing course credit. Four Williams courses are offered as an integrated, multidisciplinary curriculum in the semester–long program at Mystic Seaport, in Mystic, Connecticut: Maritime History, Literature of the Sea, Marine Policy, and either Marine Ecology or Oceanographic Processes (see the Maritime Studies section in this catalog). Travel includes an offshore voyage on the open ocean sailing aboard a tall ship, a seminar along the Pacific Coast, and a Louisiana field seminar, all of which are cross–disciplinary and interdisciplinary exercises. The Fall 2013 semester will include a field seminar to the Hawaiian Islands. Students live in historic, cooperative, co–ed houses at Mystic Seaport, the world's largest maritime museum, and have full access to world–class maritime collections, a maritime library, a state–of–the–art Marine Sciences teaching and research center, and diverse coastal habitats (where field research can be undertaken in a wide variety of environments, ranging from tidepools and salt marshes to sandy beaches and estuaries). Students also participate in maritime skills under professional instruction, with choices such as celestial navigation, music of the sea, boat building, or small boat handling and sailing. Williams–Mystic seeks candidates who are willing to try new things and work in a compelling academic environment. No sailing experience necessary. Participation in Williams–Mystic can also be used in partial fulfillment of the Maritime Studies Concentration at Williams. Interested students should email admissions@williamsmystic.org, call (860–572–5359), visit the website (http://mystic.williams.edu/), or obtain a Williams–Mystic catalog from the Dean's office. Applications are on the web and at the Dean's office.

MAST 211(F,S) Oceanographic Processes Crosslistings: MAST 211/GEOS 210
This course examines ocean and coastal environmental science issues including carbon dioxide and the ocean's role in climate, El Niño and other ocean–atmosphere oscillations that influence our weather, coastal erosion and other hazards, coastal pollution, and fisheries. The focus is on controlling processes with regional comparisons. Blue water oceanography is conducted in the Atlantic and comparative coastal oceanography includes trips to southern New England shores, and the West and Gulf coasts of the US as part of the Williams–Mystic program.
Class Format: lecture/laboratory, including coastal and near–shore field trips, 11 days offshore, and a laboratory or field research project **Requirements/Evaluation:** two tests, a research project, and a presentation
Extra Info: offered only at Mystic Seaport
Distributional Requirements: Division 3 **Other Attributes:** ENVI Natural World Electives

LEC Section: 01 TBA Instructor: Lisa Gilbert

MAST 231(F,S) Literature of the Sea (W) Crosslistings: MAST 231/ENGL 231
Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser–known American novelists, travel writers, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example—depending on fall or spring semester—Hemingway when sailing on the Straits of Florida, Steinbeck when exploring Cannery Row on Monterey Bay,

and Twain on a steamboat on the Mississippi. We read Rachel Carson beside the Mystic River estuary, Chopin on the sands of the Gulf of Mexico, Kipling out on Georges Bank, and Melville's masterpiece *Moby–Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty–one. In the classroom we examine these works through a mixture of lecture, small–group discussion, and formal and creative writing. To further appreciation and analysis, this interdisciplinary course uses students' emerging knowledge of maritime history and marine science. Other authors and poets include, depending on fall or spring: Richard Henry Dana, Jr., Walt Whitman, Jack London, Joseph Conrad, T.S. Eliot, Langston Hughes, Elizabeth Bishop, Frederick Douglass, Timothy Egan, and Ursula K. Le Guin.
Class Format: small group tutorials with weekly lectures, including coastal and near–shore field trips, and 10 days at sea **Requirements/Evaluation:** regular papers, class participation, journal–writing, and a final paper
Extra Info: offered only at Mystic Seaport
Distributional Requirements: Division 1 Writing Intensive

MAST 311(F,S) Marine Ecology Crosslistings: MAST 311/BIOL 231
Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.
Class Format: lecture/laboratory, including coastal and near–shore field trips, 10 days offshore, and a laboratory or field research project **Requirements/Evaluation:** two tests, a research project, and a presentation
Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor
Extra Info: offered only at Mystic Seaport

Spring 2015
LEC Section: 01 TBA Instructor: James Carlton

MAST 351(F,S) Marine Policy Crosslistings: MAST 351/ENVI 351/PSCI 319
This seminar utilizes the interdisciplinary background of the other Williams–Mystic courses to examine national and international contemporary issues in our relationship with ocean and coastal resources. This seminar takes a topical approach to the study of marine law and policy, examining fisheries, harbor development, coastal zone management, admiralty law, law of the sea, marine pollution, and shipping.
Class Format: lecture, discussions, guest lectures by active professionals, and includes coastal and near–shore field trips, and 10 days offshore **Requirements/Evaluation:** an independent research paper, a presentation, and a final exam
Dept. Notes: this course satisfies the Environmental Policy requirement for the Environmental Policy major and the Environmental studies concentration
Extra Info: offered only at Mystic Seaport

MAST 352(F,S) America and the Sea, 1600–Present (W) Crosslistings: MAST 352/HIST 352
This course focuses on the history of America's relationship to the sea from the age of discovery through the heyday of merchant sail to the triumph of steam and the challenges of the twentieth century. Readings in primary sources and secondary works on the social, economic, and diplomatic implications of maritime activities culminate in a research paper. Topics such as shipbuilding, whaling, and fisheries are studied through museum exhibits and artifacts in the material culture component of the course.
Class Format: lecture/discussion, including coastal and near–shore field trips, 10 days offshore, and an independent, primary source research paper **Requirements/Evaluation:** an hour test, two papers, and a final exam Student papers will be a 5–page minimum and a 15–page minimum essay; the 15–page paper will be critiqued in three steps, as an outline, a draft, and a final paper, with attention to reasoning and style
Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor
Extra Info: offered only at Mystic Seaport

WILLIAMS PROGRAM IN TEACHING

Director, SUSAN ENGEL

The program in teaching is designed to enable Williams Undergraduates to study the ideas, questions, and practices involved in good teaching at all levels. The program seeks to promote and facilitate an exchange of ideas about teachers, learners and schools, within and beyond the Williams campus. The program offers a range of opportunities including courses on education, intensive supervised student teaching, workshops, advising, lecture series, and ongoing peer groups for those who teach. Students may participate in a variety of ways, ranging from taking one course to a sustained in–depth study of teaching and learning geared to those who want to become teachers, or educational psychologists. We seek to connect students with one another, to bring in expert teachers to provide mentoring, and to create links across the curriculum so that students can see the vital connections between what they study (French, Algebra or Biology for instance) and the process of teaching those topics to elementary and high school students. The program is open to any student interested in education and offers opportunities for all levels of interest, including those who want to find out about certification and graduate study.

The following provides a sample outline of the sequence of courses and experiences that an interested student might take

PSYC 101 Intro to Psych (required for further psychology courses);
PSYC 232 Developmental Psychology and/or
PSYC 242 Social Psychology;
PSYC 272 Psychology of Education;
PSYC 327 Optimizing Learning and Memory
PSYC 336 Adolescence;
PSYC 372 Advanced Seminar in Teaching and Learning
At least one Winter Study in an intensive teaching practicum. The major programs are in Berkshire County (under PSYC) or in New York City (under SPEC), although other opportunities may be listed elsewhere in the Winter Study section of the course catalogue.

No specific major is required to participate in the program—although some lend themselves easily to certification, such as Mathematics, English, Biology, American history, or French, almost all of our majors can provide the basis of teacher certification. Alternately, students can major in Psychology, take a concentration of courses in a different field, and then pursue that content area more intensively in graduate work.

Other courses of interest include:

LATS/AMST 332 Latinos and Education: The Politics of Schooling, Language, and Latino Studies
MATH 285 Teaching Mathematics
PHIL 242 Philosophy of Education: Why Are You Here?

PHIL 331 Contemporary Epistemology
PHIL/AMST 379 American Pragmatism
PSCI 410 Civic Education in America
PSYC 327 Cognition and Education
PSYC 331T Risk and Resilience in Early Development
PSYC 332 Cognitive Development
PSYC 350 Child Psychopathology
PSYC 351 Childhood Peer Relations

THE BOOK UNBOUND

"The Book Unbound" is a year–long initiative centered around the theme of books, libraries, and information, in conjunction with the opening of the new Sawyer Library. It focuses on exploring the diverse ways in which people preserve and convey ideas, creative works, data, and other forms of information. Courses offered as part of the initiative will engage with these topics from a range of critical and creative perspectives. Students and faculty participating in these courses will have numerous opportunities throughout the year to discuss and share their questions and findings.

EXPERIENTIAL EDUCATION COURSES

. A complete description of each course may be found in the relevant department's section. Students may obtain detailed information about experiential elements in a specific course from its instructor.

Students interested in incorporating fieldwork into courses not listed here should contact the Coordinator for help. Inclusion of experiential components depends on permission of the instructor.

SEMESTER COURSES:

AFR 245/MUS 242(F) Monk and the Bebop Revolution
AMST 201(F,S) Introduction to American Studies
ARTH/ENVI 201(F) American Landscape History
[ARTH 308/ENVI 308(S) The North–American Park Idea–last offered spring 2009]
ARTH 508(S) Art and Conservation: An Inquiry into History, Methods and Materials
BIOL 220/ENVI 220(S) Field Botany and Plant Natural History
BIOL 302/ENVI 312(F) Communities and Ecosystems
CHIN 352/LATS 383(S) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language
[ENGL 376(F) Documentary Technologies–last offered fall 2008]
ENVI 102(S) Introduction to Environmental Science
ENVI 302(F) Environmental Planning Workshop
ENVI 397/398(F,S) Independent Study of Environmental Problems
EXPR/MATH/PHIL/ENGL/ARTS 309(F) Exploring Creativity
GEOS 105(F) Geology Outdoors
GEOS 206/ENVI 206(S) Renewable Energy and the Sustainable Campus
GEOS/ENVI 214(S) Remote Sensing and Geographic Information Systems
LATS 220/AMST 221(F) Introduction to Urban Studies: Shaping and Living the City
LATS/THEA 230/ WGST 231(F) Approaching Performance Studies
[LATS 331(F) Sound and Movement in the Afro–Latin Diaspora–last offered fall 2008]
LING 400(F) Linguistics Research Seminar
MAST/GEOS/ENVI 104(S) Oceanography
MAST 211/GEOS 210(F,S) Oceanographic Processes (Williams/Mystic Program)
MAST 311/BIOL 231(F,S) Marine Ecology (Williams/Mystic Program)
MAST /ENVI 351(F,S) Marine Policy (Williams/Mystic Program)
MAST/HIST 352(F,S) America and the Sea, 1600–Present (Williams/Mystic Program)
MUS/AFR 235(F) African Rhythm, African Sensibility
POEC 402(S) Political Economy of Public Policy Issues
PSYC 352(S) Clinical and Community Psychology
PSYC 372(F) Advanced Seminar in Teaching and Learning
REL 286(F) Shopping, Desire, Compulsion and Consumption
RUSS 206(S) Topics in Russian Culture: Feasting and Fasting in Russian History
[WNY 307T(F,S) Work/Ethics: Frameworks for Observing People at Work (Williams in New York Program) – last offered spring2009]
[WNY 308(F) Explorations in the Urban Outback (Williams in New York Program) – last offered fall 2008]
[WNY 309(F) Covering the Other: A Course in Cross–Cultural and Community–based Film (Williams in New York Program) – last offered fall 2008]
[WNY 310(S) Art, Space and the City (Williams in New York Program) – last offered spring 2009]

[WNY 311(S) Imagining New York City (Williams in New York Program) – last offered spring 2009]

WINTER STUDY:

AFR 025/WGST 24 Youth, Gender and Social Activism in Tanzania
AMST 011 Singing School: Sacred Choral Traditions in the Berkshires and Beyond
AMST 015 Contemporary American Songwriting
ANSO 010 Meditation–Based Stress Reduction: Adopting a Mindfulness Practice
ANSO 011 Berkshire Farm Center Internship
ANSO 012 Children and the Courts: Internship in the Crisis in Child Abuse
ARTS 019 Introduction to the Craft and Art of Blacksmithing
CHIN 013 Theory and Practice of Chinese Cooking
CHIN 025 Study Tour to Taiwan
BIOL 014 Gestures of Time: A Visual Exploration
BIOL 015 From Populations to Species: Understanding the Evolution of Diversity
BIOL 021 Science Beyond Williams
CHEM 010 Zymurgy
CHEM 011/SPEC 011 Science for Kids
CHEM 016 Glass and Glassblowing
CSCI 010 Designing and Building a Desktop Computer
ECON 012 Negotiation: Theory and Practice
ECON 025 The Political Economy of Social Cohesion: Lessons from South Africa's Miracle
ENVI 010 The Winter Naturalist's Journal
ENVI 012 The Changing Forest
ENVI 014 Green Design Workshop and LEED Certification Course
ENVI 015 Get Focused and Step It Up–Climate Change Activism
ENVI 016 Problems with Plastics
ENVI 025 Sustainable Eleuthera: Energy, Environment and Economic Development
GEOS 012 Landscape Photography
HIST 012 Reading Childhood
HIST 015 The Great Depression: A Storied History
HIST 025/THEA 026 Fashionable London: Clothing and Fetishism from Victorian Street to Westwood Catwalk
LEAD 018 Wilderness Leadership
LGST 021 Creating a Non–Profit Organization
JAPN 025 Exploring Japanese Culture and Language
LING 012 Preliminary Introduction to American Sign Language
MATH 012 Mural
MATH 016/SPEC 016 Knitting: The Social History and Craft Form
MATH 023 Gaudino Winter Study Fellows Program
MUS 013 Math and Music
MUS 025 Musical Performance: Cultural Exchange in Argentina
PHIL 011 Aikido and the Creation of Ethical Policy
PHIL 013 Boxing
PHYS 15 Livres des Artists–The Artist Book
PSCI 021 Fieldwork in Public and Private Non–Profits/Volunteer Income Tax Assistance
PSCI 025 Williams in NOLA
PSYC 016 Rhythm Based Communication
PSYC 019 Psychology in Action
REL 025 Jerusalem: One City, Three Faiths, Many Narratives
RLSP 016/MUS 016 Music Circus: John Cage and His World
RUSS/SPEC 025 Williams in Georgia
STAT 013 Roulette
SPEC 010 Quest for College: Early Awareness in Berkshire County Schools
SPEC 015 Ski Patrol Rescue Techniques: Outdoor Emergency Care CPR
SPEC 019 Medical Apprenticeship
SPEC 021 The Psychology of the Workplace; a Field Study with Williams Alumni/Parents
SPEC 024 Eye Care and Culture In the Rural Atlantic Coast of Nicaragua
SPEC 026/MATH 026 Resettling Refugees in Maine
SPEC 028 Teaching Practica in New York City Schools
SPEC 035 Making Pottery on the Potter's Wheel

EXPLORING DIVERSITY INITIATIVE

THE EXPLORING DIVERSITY INITIATIVE REQUIREMENT—Williams College is committed to creating and maintaining a curriculum, faculty, and student body that reflects and explores a diverse, globalized world and the multi–cultural character of the United States. Courses designated "(D)" in the College Bulletin are a part of the College's Exploring Diversity Initiative (EDI); they represent our dedication to study groups, cultures, and societies as they interact with, and challenge, each other. Through such courses, students and faculty also consider the multiple approaches that engage these issues. Rather than simply focus on the study of specific peoples, cultures, or regions of the world, in the past or present, however, courses fulfilling the requirement actively promote a self–conscious and critical engagement with diversity. They urge students to consider the operations of difference in the world and provide them with the tools to do so. The ultimate aim of the requirement is to lay the groundwork for a life–long engagement with the diverse cultures, societies, and histories of the United States and the rest of the world.

Courses that comprise the Exploring Diversity Initiative may fall under a variety of categories, including (but not limited to) the following:

1. Comparative Study of Cultures and Societies. These courses focus on the differences and similarities between cultures and societies, and/or on the ways in which cultures, peoples, and societies have interacted and responded to one another in the past.
2. Empathetic Understanding. These courses explore diverse human feelings, thoughts, and actions by recreating the social, political, cultural, and historical context of a group in order to imagine why within that context, those beliefs, experiences, and actions of the group emerged.
3. Power and Privilege: These courses link issues of diversity to economic and political power relations, investigating how cultural interaction is influenced by various structures, institutions, or practices that enable, maintain, or mitigate inequality among different groups.
4. Critical Theorization: These courses focus on ways scholars theorize the possibilities of cross–cultural understanding and interaction; they investigate the ways that disciplines and paradigms of knowledge both constitute "difference" and are reconfigured by the study of diversity–related questions.
5. Cultural Immersion: In various ways these courses immerse students in another culture and give them the tools with which to understand that culture from the inside. They include those foreign language courses that explicitly engage in the self–conscious awareness of cultural and societal differences, traditions, and customs as an integral aspect of language study.

All students are required to complete ONE course that is part of the Exploring Diversity Initiative. Although this course, which may be counted toward the divisional distribution requirement, may be completed any semester before graduation, students are urged to complete the course by the end of the sophomore year.

By immersing students in foreign cultures, and often by furthering language acquisition, study abroad programs can offer a robust way to study cultural diversity. Students wishing to fulfill the EDI requirement via the completion of a study abroad program must submit a petition before departure proposing EDI credit for a particular course on their program, for particular experiences (such as independent research or a homestay), or for a specific language training program they will undertake while abroad. The petition will require students to describe how they believe their proposed study abroad experience will meet one or more of the goals of the Exploring Diversity Initiative; it will be considered by the Director of the Exploring Diversity Initiative working in concert with the Committee on Academic Standing.

QUANTITATIVE/FORMAL REASONING COURSES

Williams students should be adept at reasoning mathematically and abstractly. The ability to apply a formal method to reach conclusions, to use numbers comfortably, and to employ the research tools necessary to analyze data lessen barriers to carrying out professional and economic roles. Prior to their senior year, all students must satisfactorily

complete a Quantitative/Formal Reasoning (QFR) course—those marked with a "(Q). Students requiring extra assistance (as assessed during First Days) are normally placed into Mathematics 100/101/102, which is to be taken before fulfilling the QFR requirement.

The hallmarks of a QFR course are the representation of facts in a language of mathematical symbols and the use of formal rules to obtain a determinate answer. Primary evaluation in these courses is based on multistep mathematical, statistical, or logical inference (as opposed to descriptive answers).

Courses that may be used to meet the requirement in 2014–2015:

ARTS 107(S) Creating Games (Same as CSCI 107) (Q)
ASTR 111(F) Introduction to Astrophysics (Q)
ASTR 221(S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes (Same as ASTR 421) (Q)
ASTR 420(S) Observational Cosmology: Observing and Modeling the Universe (Q)
ASTR 421(S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes (Same as ASTR 221) (Q)
BIMO 321(F) Biochemistry I–Structure and Function of Biological Molecules (Same as BIOL 321 and CHEM 321) (Q)
BIMO 322(S) Biochemistry II–Metabolism (Same as BIOL 322 and CHEM 322) (Q)*
BIOL 202(F) Genetics (Q)
BIOL 203(F) Ecology (Same as ENVI 203) (Q)
BIOL 305(S) Evolution (Q)
BIOL 319(F) Integrative Bioinformatics, Genomics, and Proteomics Lab (Same as CHEM 319, CSCI 319, MATH 319 and PHYS 319) (Q)
BIOL 321(F) Biochemistry I–Structure and Function of Biological Molecules (Same as BIMO 321 and CHEM 321) (Q)
BIOL 322(S) Biochemistry II–Metabolism (Same as BIMO 322 and CHEM 322) (Q)*
CHEM 116(S) Chemistry and Physics of Cooking (Q)
CHEM 151(F) Introductory Concepts of Chemistry (Q)
CHEM 153(F) Introductory Concepts of Chemistry: Advanced Section (Q)
CHEM 155(F) Principles of Modern Chemistry (Q)
CHEM 156(S) Organic Chemistry: Introductory Level (Q)
CHEM 319(F) Integrative Bioinformatics, Genomics, and Proteomics Lab (Same as BIOL 319, CSCI 319, MATH 319 and PHYS 319) (Q)
CHEM 321(F) Biochemistry I–Structure and Function of Biological Molecules (Same as BIMO 321 and BIOL 321) (Q)
CHEM 322(S) Biochemistry II–Metabolism (Same as BIMO 322 and BIOL 322) (Q)*
CSCI 107(S) Creating Games (Same as ARTS 107) (Q)
CSCI 109(F) The Art and Science of Computer Graphics (Q)
CSCI 134(F,S) Introduction to Computer Science (Q)

THE WILLIAMS TUTORIAL PROGRAM

The Tutorial Program offers Williams students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No student is required to take a tutorial course, but any student with the appropriate qualifications and interests is invited to do so.

Tutorials at the 100/200 level are designed primarily for first–year students and sophomores; they are usually given enrollment preference for such courses, though interested juniors and seniors are often welcome. Tutorials at the 300/400 level are designed primarily for juniors and seniors (and, often, for majors in the discipline); first–year students and sophomores are welcome to apply, but are urged to consult the instructor before registering.

Tutorials place much greater weight than do regular courses—or even small seminars—on student participation. They aim to teach students how to develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

The ways in which particular tutorials are conducted vary across the disciplines, but here is a description of how most tutorials at Williams are organized. Tutorials are usually limited to ten students. At the start of term, the instructor divides the students into pairs. Each pair meets weekly with the instructor for roughly one hour. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all tutorial members to provide background information designed to facilitate the students' independent work. But the heart of every tutorial course is the weekly meeting of the two students with the instructor.

At these weekly meetings, one student delivers a prepared essay or presentation (e.g., an analysis of a text or work of art, a discussion of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually in the range of 4–7 pages) during the term, and offer five or six critiques of their partners' work.

Since the program's inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They have appreciated the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral abilities as they engage in debate; and the close intellectual bonds tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

Registration information: Students pre–register for tutorials as they would for any other course (but should first check the description for prerequisites and to see if permission of the instructor is required). Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students may not drop a tutorial after 4:00 PM on the day before the first scheduled day of organizational meetings each semester. It is therefore important that students determine, before the start of the term, their interest in and commitment to the course. If they are uncertain whether they wish to take the tutorial, they should consult with the instructor. Tutorials may not be taken on a pass/fail basis.

TUTORIALS OFFERED 2014–2015

AFR 246T(F) Black Asia: From King Kong to Kung Fu and Beyond (Same as AMST 246T, COMP 245T and ENGL 246T) (D) (W)
AFR 318T(F) Declining Significance of Race and Racism in U.S. Politics? (Same as PSCI 318T and SOC 318T) (W)
AFR 338T(F) Garveyism (Same as LEAD 338T and PSCI 338T) (W)
AFR 343T(S) Representations of Racial–Sexual Violence from Enslavement to Emancipation (Same as AMST 343T, INTR 343T and WGSS 343T) (D) (W)
AFR 482T(F) Fictions of African–American History (Same as HIST 482T) (W)
AMST 228T(S) North American Apocalyptic Thought (Same as REL 228T) (W)
AMST 246T(F) Black Asia: From King Kong to Kung Fu and Beyond (Same as AFR 246T, COMP 245T and ENGL 246T) (D) (W)
AMST 343T(S) Representations of Racial–Sexual Violence from Enslavement to Emancipation (Same as AFR 343T, INTR 343T and WGSS 343T) (D) (W)

WRITING–INTENSIVE COURSES

Courses designated as "writing intensive"—those marked with a "(W)"—stress the process of learning to write effectively. Such courses include a substantial amount of writing (a minimum of 20 pages), usually divided into several discrete assignments. Instructors pay close attention to matters of style and argumentation. Enrollments are limited to 19.

All Williams College students are required to take two writing–intensive courses: one by the end of the sophomore year and one by the end of the junior year. Students will benefit most from writing–intensive courses by taking them early in their college careers and are therefore strongly encouraged to complete the requirement by the end of the sophomore year.

Courses that may be used to meet the requirement in 2014–2015:

AFR 104(S) Travel Narratives and African History (Same as HIST 104) (W)
AFR 129(S) Twentieth–Century Black Poets (Same as ENGL 129) (W)
AFR 167(S) Let Freedom Ring: African Americans and Emancipation (Same as AMST 167 and HIST 167) (W)
AFR 240(S) Introduction to the Music of Duke Ellington (Same as MUS 251) (W)*
AFR 246T(F) Black Asia: From King Kong to Kung Fu and Beyond (Same as AMST 246T, COMP 245T and ENGL 246T) (D) (W)
AFR 318T(F) Declining Significance of Race and Racism in U.S. Politics? (Same as PSCI 318T and SOC 318T) (W)
AFR 322(S) Race, Culture and Incarceration (Same as AMST 322, INTR 322 and PSCI 313) (D) (W)
AFR 338T(F) Garveyism (Same as LEAD 338T and PSCI 338T) (W)
AFR 343T(S) Representations of Racial–Sexual Violence from Enslavement to Emancipation (Same as AMST 343T, INTR 343T and WGSS 343T) (D) (W)
AFR 419(F) Going to Ground: Considering Earth in the Arts of Africa (Same as ARTH 419) (D) (W)
AFR 482T(F) Fictions of African–American History (Same as HIST 482T) (W)
AMST 124(S) The Poetics of Place (Same as ENGL 124) (W)
AMST 167(S) Let Freedom Ring: African Americans and Emancipation (Same as AFR167 and HIST 167) (W)

WINTER STUDY PROGRAM

REMINDERS ABOUT WSP REGISTRATION

All students who will be on campus during the 2014-2015 academic year must register for WSP. Registration will take place in the early part of fall semester. If you are registered for a senior thesis in the fall which must be continued through Winter Study by departmental rules, you will be registered for your Winter Study Project automatically. *In every other case, you must complete registration.* First-year students are required to participate in a Winter Study that will take place on campus; they are not allowed to do 99's.

Even if you plan to take a 99, or the instructor of your first choice accepts you during the registration period, there are many things that can happen between registration and the beginning of Winter Study to upset your first choice, so you must list five choices. You should try to make one of your choices a project with a larger enrollment, not that it will guarantee you a project, but it will increase your chances.

If you think your time may be restricted in any way (ski meets, interviews, etc.), clear these restrictions with the instructor *before* signing up for his/her project.

Remember, for cross-listed projects, you should sign up for the subject you want to appear on your record.

For many beginning language courses, you are required to take the WSP Sustaining Program *in addition* to your regular project. You will be automatically enrolled in this Sustaining Program, *so no one should list this as a choice.*

The grade of honors is reserved for outstanding or exceptional work. Individual instructors may specify minimum standards for the grade, but normally, fewer than one out of ten students will qualify. A grade of pass means the student has performed satisfactorily. A grade of perfunctory pass signifies that a student's work has been significantly lacking but is just adequate to deserve a pass.

If you have any questions about a project, see the instructor *before* you register.

Finally, all work for WSP must be completed and submitted to the instructor no later than January 29, 2015. *Only the Dean can grant an extension beyond this date.*

WINTER STUDY 99'S

Sophomores, juniors and seniors are eligible to propose "99's," independent projects arranged with faculty sponsors, conducted in lieu of regular Winter Study courses. Perhaps you have encountered an interesting idea in one of your courses which you would like to study in more depth, or you may have an interest not covered in the regular curriculum. In recent years students have undertaken in-depth studies of particular literary works, interned in government offices, assisted in foreign and domestic medical clinics, conducted field work in economics in developing countries, and given performances illustrating the history of American dance. Although some 99's involve travel away from campus, there are many opportunities to pursue intellectual or artistic goals here in Williamstown.

99 forms are available online: http://www.williams.edu/Registrar/winterstudy/99direct.html

The deadline for submitting the proposals to faculty sponsors is September 25, 2014.

AFRICANA STUDIES

AFR 10 Black Radical Film CROSSLISTING: HIST 12
COURSE DESCRIPTION: We will watch, discuss and analyze several films from two of the foremost voices of Black radicalism in film today, Raoul Peck and Euzhan Palcy, both from the French/Haitian West Indies. Their films range from depicting radical movements for decolonization (Lumumba, Aime Cesaire), to the struggle against apartheid (Dry White Season), to the Civil Rights movement (Ruby Bridges) and the Attica prison riot in the U.S. (The Killing Yard), to the travesties of Western 'aid' in post-earthquake Haiti (Fatal Assistance).
METHOD OF EVALUATION: 2 short papers (5 pages) or class presentation
PREREQUISITES: None
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: Africana concentrators; History majors, order of preference
COST: None
MEETING TIME: afternoons
INSTRUCTOR: Shanti Singham

AFR 11 Heroes/Anti-Heroes in Contemporary TV and Cinema CROSSLISTING: PSCI 11
COURSE DESCRIPTION: Who are heroes and anti-heroes? What do these two terms mean? This course explores competing representations of the philosophies and politics surrounding heroes and anti-heroes through exploration of contemporary television and cinema. In order to accomplish our analytical objectives, we will screen and examine three series from among the following possibilities: *Game of Thrones, Luther, Breaking Bad, Scandal, House of Cards, Homeland, Heroes, 30 for 30*, and the *Dark Knight* trilogy.
METHOD OF EVALUATION: class participation, a weekly screening e-response post, and 10-page final paper.
PREREQUISITES: none.
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Preference: Africana Studies concentrators and Political Science majors.
COST: $50
MEETING TIME: mornings
INSTRUCTOR: Neil Roberts

AFR 25 Touring Black Religion in the "New" South CROSSLISTING: ENVI 26/REL 26
COURSE DESCRIPTION: In February of 1927 anthropologist Franz Boas asked folklorist Zora Neale Hurston to identify an ideal location in which to study and collect data about "Negro culture in the South" Hurston's reply, without hesitation, was the central and gulf coast of Florida because she believed there, "it was possible for [her] to get a cross section of the Negro South in one state" Hurston traveled directly to Eatonville, the town she eventually claimed as her birth home, and for over a decade, utilized the information she collected as the backdrop to her fiction as well as her nonfiction explorations of Black religion.
Taking Hurston's lead, this course (the first team-taught travel winter study offered solely by Africana Studies faculty) will utilize Florida's gulf coast as the backdrop to exploring the diverse manifestations of modern black religious expression. Because of its diverse geographical, political structures, populations, and economy, Florida has historically been characterized as a "new South" with distinctive cultural expressions. With this history in mind, this course will address four critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion; (3) How do Black communities see themselves in relation to broader social concerns? and (4) How, if at all, is religious expression in Florida unique?
To answer these questions, we will travel to Florida's west coast and visit three different church communities to understand Black Protestant religion as currently expressed in the "New South" This includes Bryant Chapel Christian Methodist Episcopal Church (CME), a small mainstream denominational church in Talleveast Florida; Old Landmark Cathedral Church of God in Christ (COGIC), a Pentecostal-Holiness church in St. Petersburg, Florida; and Revealing Truth Ministries, a mega-church in Tampa, Florida. As participant-observers we will take part in worship services, and when possible, interview local residents about the role each church plays in its respective community. In addition to learning about Black religion along the western coast of Florida through participant observation, students will visit and tour local historical sites significant to Black religious experiences, and will meet with local academics, archivists, and leaders. These will include: touring the Zora Neale Hurston National Museum of the Fine Arts in Eatonville; visiting the Public Archaeology Lab at New College of Florida with Professor Uzi Baram; holding conversations about doing ethnograhic work with author and scholar Robert Hayden; and touring the Family Heritage Museum at the State College of Florida with Freddie Brown and Kathie F. Marsh. Surveying Black history archives was especially important in the previous iteration of the course because they enlivened the historical and ethnographic literatures the students read.
In addition to their roles as participant observers, students will have access to an electronic reading packet that will ground them briefly, though comprehensively, on Florida's history, ethnographic methods, and Black religious expressions. We will also use sources that contextualize church responses to current social concerns such as environmental racism, homelessness, and health care. A completed draft of the course reading packet is provided in the itinerary below.
PREREQUISITES: No previous experience or religious affiliation is necessary, and we especially invite students who are interested in experiential learning.
METHOD OF EVALUATION: Evaluation will be based on an electronic field journal, participation in weekly colloquies, and an oral presentation.
ENROLLMENT LIMIT: 8
METHOD OF SELECTION: We will review application essays and hold interviews with the top 10 applicants. Preference will be given to majors and concentrators in Africana Studies, Religion, and Environmental Studies. Priority will also be given to students with a background in ethnographic methods.
COST: $3,000.
INSTRUCTORS: James Manigault-Bryant and Rhon Manigault-Bryant

AFR 30 Senior Project
To be taken by students registered for Africana Studies 491 who are candidates for honors.

AMERICAN STUDIES

To be taken by students registered for American Studies 491 or 492.

ANTHROPOLOGY AND SOCIOLOGY

ANSO 11 Berkshire Farm Residential Program for Adolescent Males Externship
COURSE DESCRIPTION: The Winter study class at Berkshire Farm Center provides on site opportunities for students to directly observe interventions working with traumatized adolescent

males. Students can chose observing and providing support in a classroom setting, participating in adventure based counseling experiences teaching though activities, or providing support in the workforce development sites teaching youth workforce readiness skills. Berkshire's mission is to help strengthen youth and families to live safely, productively and independently within their home communities. The residential program provides evidence based practices to assists families heal from past traumas, be reunified and get on a path for success. Williams students will be placed in the various sites 12-15 hours a week and participate in seminar learning for 2 hours a week. Berkshire is 30 minutes from Williams so transportation arrangements are required. Reading, journaling and a final give back project are additional components for learning.
METHOD OF EVALUATION: Journaling, reading, final project
PREREQUISITES: none
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: class standing and major
COST: $20
MEETING TIME: TBA
ADJUNCT INSTRUCTOR: Donelle Hauser

ADJUNCT BIO: Donelle Hauser, LMSW has been in the child welfare field for over 20 years. She is currently the Vice President of the Residential program overseeing the Substance Abuse program, clinical services, medical services, cottage living, therapeutic recreation and food services.

ANSO 12 Children and the Courts
COURSE DESCRIPTION: This is an interdisciplinary course that offers students an opportunity to observe the Juvenile Court in Western Massachusetts. Students will accompany Judge Locke and or Attorney Chenail to court, meet with lawyers, probation officers, social workers and other professionals working in juvenile justice. There is a weekly dinner at the instructor's home to discuss the observations. Requirements: a weekly journal, a final project and participation in a mock trial.
METHOD OF EVALUATION: journal entries, final project and participation in mock trial
PREREQUISITES: none
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Seniors will receive consideration if overenrolled, compelling reason from other students
COST: $0
MEETING TIME: other; see description
ADJUNCT INSTRUCTOR: Judith Locke

ADJUNCT BIO: Judge Judith Locke has been a Juvenile Judge for 15 years, prior she worked for DCF, the District Attorney's office and was in private practice. Much of the previous employment was centered on families and children.

ANSO 19 Conducting Social Science Research at the American Institute for Economic Research CROSSLISTING: ECON 19
COURSE DESCRIPTION: Students in this course will have the opportunity to conduct original social science research at the American Institute for Economic Research, a nationally-renowned think tank based in Great Barrington, Massachusetts. With me, students will develop a content area of interest to explore during the four weeks. Then students will be matched with a supervisor at AIER. The projects at AIER range from the Affordable Care Act and financialization to immigration, labor, and retirement policy. Students will also have myriad opportunities to learn different research methodologies, such as time series analysis, survey project design and qualitative analysis, census data collection, and Stata analysis. Students will have regular meetings with me to ensure they grow in their own areas of interest as well as regular progress report meetings with their one-on-one supervisors at AIER.
METHOD OF EVALUATION: Supervisor evaluations and students' original research contributions
PREREQUISITES: None
ENROLLMENT LIMIT: 8
METHOD OF SELECTION: Telephone Interview
COST: $0
MEETING TIME: 8:30 a.m.-4:30 p.m., two-three days a week; students will be responsible for arranging transportation to and from AIER.
ADJUNCT INSTRUCTOR: Anna N. Kreisberg

ADJUNCT BIO: Nicole Kreisberg is a Senior Research Analyst at AIER. She has her MA from the University of Chicago, and her research areas are demography, survey research, immigration, labor, and poverty.

ANTHROPOLOGY

ANTH 14 The Role of Epidemiology in Public Health and Evidence-Based Medicine CROSSLISTING: CHEM 12
COURSE DESCRIPTION: Clinical decisions are increasingly being made on evidence from the medical literature rather than "solely" from the clinical experience of the physician. What kinds of questions (hypotheses) are being asked and how are they answered, and answered reliably? How does a conscientious physician keep up with this evidence and evaluate it both critically and efficiently?
After an introduction to the methods of epidemiology, as developed in real time epidemic investigations, and as employed in answering some of the important questions involving the etiology of disease, treatment, management, and prognosis (natural history), the course will turn to the medical literature, and discuss individual papers, or groups of papers bearing on important public health and clinical issues. We will operate as a journal club, with groups of students responsible for presenting and critiquing the design, conduct and analysis of the paper(s) of the day.
It is expected that some students will suggest issues perceived to be important to them, perhaps from their own private reading, their personal or family health experience, or from actively shadowing a physician in the WS Course offered annually by Ms. Jane Cary. While both courses cannot be taken at the same time, students shadowing a physician may wish to review the literature to delve more deeply into a problem they have seen. They will be welcome to suggest a topic and join this course on an ad hoc basis to discuss it more thoroughly than may be possible in the hospital or outpatient setting. Since these student are occupied during the day, we may add evening sessions on reasonable notice to accommodate their more complicated schedules.
It is hoped that this model will continue into the Spring Term as an informal Williams Journal Club activity for those interested in both public health and clinical decision making.
This WS Course is designed to be a serious academic experience. Students will be expected to read and present, and also participate actively in the discussion that follows.
We will meet at least three times a week for a total of 6 class hours. Preparation for class, which will be organized in groups of 3 or 4 is expected to take at least 12 hours per week. Applicants will be interviewed by the instructor.
METHOD OF EVALUATION: Preparation and quality of presentation. Honors requires a special paper arranged with instructor
PREREQUISITES: A course in basic statistics is helpful but not required
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: By interview
COST: $200 for materials
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Nicholas Wright

ADJUNCT BIO: Nicholas Wright '57, MD, MPH, is a retired medical epidemiologist living in Williamstown. Most recently, he was on the faculty of Robert Wood Johnson Medical School in NJ, but also spent over 30 years in international public health work, 7 of them living in Sri Lanka and Thailand.

ANTH 19 "The Feather'd Hook": An Introduction to Streamside Entomology and Fly-Tying CROSSLISTING: ENVI 19
COURSE DESCRIPTION: For over a thousand years anglers have imitated the insects upon which fish feed - most notably trout and salmon - by tying bits of feather, fur, and other materials to their hooks. Over time the practice has developed into a minor art, with its own tools, techniques, aesthetics, and competing theories of animal behavior. In this course students will learn the gentle art of fly-tying, concentrating on imitations of the various distinctive stages in the life cycles of the four main insect orders on which trout feed: Ephemeroptera, Trichoptera, Diptera, and Plecoptera (mayflies, caddis flies, midges, and stoneflies). We will in particular focus on the imitation of species most likely to be encountered in New England trout streams.
Course Requirements: Attendance at all classes is mandatory. As their principal project for the course students will prepare the presentation of a fly pattern (or series of patterns) to be given before the class in the last week of classes. A presentation should consist of
· a description of the historical context of the fly
· of the insect and stage of development imitated by the fly (as appropriate)
· of the materials and techniques used to make the fly
· of the preferred presentation of the fly
· of the theory of attraction according to which the fly was designed
· and a demonstration of how the fly is tied
A number of books will be placed on reserve in Sawyer Library and students will be assigned readings (on-line or handouts) from various non-fiction literary works on flies, fly-tying, and river ecology. They will also have available the Chapin Library's collection of classic piscatoriana for research purposes.
The course will meet on Tuesdays, Wednesdays, and Thursdays, from 10:00-12:30. We will have one mandatory field trip to the American Museum of Fly Fishing in Manchester, VT.
METHOD OF EVALUATION: Final project and presentation
PREREQUISITES: none
ENROLLMENT LIMIT: 24
METHOD OF SELECTION: Interview
COST: $80 for a basic fly-tying kit. Incidental field trip costs.
MEETING TIME: mornings; 10-12:30
INSTRUCTORS: Nicolas Howe and Peter Just

ANTH 31 Senior Thesis
To be taken by students registered for Anthropology 493-494.

SOCIOLOGY

SOC 10 Intentional Communities and the American College
COURSE DESCRIPTION: The exponential growth of opportunities for higher education in a low cost on line environment has presented an existential question to residential colleges and universities. What additional value does a traditional collegiate experience provide given the enormous cost of such an education? President Falk partially answered that question when he spoke about the unique pedagogic value of human to human interaction in didactic learning. What Falk did not address, but is of equal importance, is the role of a college as an intentional community that teaches its members how to live in community. While this has always been important, the need for such an education is greater now than it ever has been. As Robert Putnam has written, many of the mediating institutions of society have disappeared from the contemporary culture. More students than ever before never have experienced a neighborhood, their families are not members of civic organizations and if they attend a house of worship, frequently even that institution no longer acts as much of a locus for community life. The last, and often the only opportunity for young

people to live in community is when they live in a residential institution of higher learning.
In this course, we will look briefly at the history of higher education from its monastic beginnings through the development of the research university model to the present. We will examine the need for teaching how to live in community and different models of intentional communities that may have saliency in their adaptation to the collegiate environment. Finally, we will look at what changes within the institutions would be required to implement such an educational goal.
Last year's syllabus included readings from Robert Putnam, Eva Brann, Richard De Millo, Victor Farrell, Charles Vest, Frank Donohue, Henry Rosovsky, Clark Kerr, Andrew Del Blanco, Alan Duesterhaus, Benjamin Ginsberg, Robert Birnbaum, Francis Wayland, Ernst Boyer, Richard Brodhead, A. Bartlett Giamatti and me. Last year our guests speakers included, the Provost, Dean of Faculty and Director of Athletics at Williams College as well as Matthew Derr, the President of Sterling College.
METHOD OF EVALUATION: In addition to class participation, students will write a reaction paper on the readings for each class that will be posted on line and will be encouraged to comment upon classmates postings. Students will be responsible for leading class discussions on particular readings each class.
PREREQUISITES: none
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: An email to the instructor as to reasons why s/he wishes to enroll.
COST: 150 (whatever the cost of the packet will be from the copy center.)
MEETING TIME: other
EXPLANATION OF MEETING TIME: Mondays and Fridays, 10:30 a.m.-12:30 p.m., break for lunch, and then return for an afternoon session from 1:30-3:30 p.m.
ADJUNCT INSTRUCTOR: James Nuzzo

ADJUNCT BIO: Dr Nuzzo taught this course last Winter Term and is a research psychoanalyst. He is writing a book on this subject: "Modern Monasteries: Intentional Communities and American Higher Education."

SOC 11 Wendell Berry and the Agrarian Tradition
COURSE DESCRIPTION: Wendell Berry-Kentucky farmer, poet, novelist, and cultural critic-has for decades been writing about topics that have in recent years become matters of growing public concern. The importance of local economy, the impact of new technologies on community and agriculture, sustainability, environmental stewardship, citizenship, and the value of place are among the themes in Berry's work that will be considered in the course. Students will read both Berry's fiction as well as a variety of his non-fiction essays, which address related subject matters. Among those deeply influenced by Berry's writings are such popular environmentalists as Michael Pollan and Bill McKibben, some of whose work will also be explored in the course. Students will have the opportunity to visit a local Community Supported Agriculture (CSA) farm and will be required to write two short essays.
METHOD OF EVALUATION: Two short essays
PREREQUISITES: None
ENROLLMENT LIMIT: 18
METHOD OF SELECTION:
COST: $75
MEETING TIME: mornings
INSTRUCTOR: James Nolan

SOC 31 Senior Thesis
To be taken by students registered for Sociology 493-494.

ARABIC STUDIES

ARAB S.P. Sustaining Program for Arabic 101-102
Students registered for Arabic 101-102 are required to attend and pass the Arabic Sustaining Program.
Prerequisite: Arabic 101.
Evaluation will be based on regular attendance and active participation.
Meeting time: mornings, 9:00-9:50.

ARAB 25 Transnational Itineraries CROSSLISTING: COMP 25/RLSP 25
COURSE DESCRIPTION: For this course, we will travel to Spain and Morocco in order to study transnational migration from an interdisciplinary perspective. We will analyze this often sensitive aspect of a long, complex relationship that is often framed in problematic contrasts such as East/West, North/South, Europe/Africa and Christianity/Islam. We will visit different NGO's, government organizations and academic institutions to "consider how human mobility is shaped by religion, security, youth culture, desertification, poverty, and other pressing issues and how mobility engenders transnational art and multilayered identities" (CCCL, Rabat). In addition, we will examine the legal and political response to the human drama of migration, as well as social attitudes towards migrants. This program includes weekend home stays with families in both Morocco and Spain and community service.
METHOD OF EVALUATION: There will be preliminary readings and screenings of documentaries and films (posted online) on the historical relationship between Spain and Morocco, as well as the topic of migration between them. Students are expected to keep an experiential journal with daily entries and a final 10-page self-assessment that will integrate their formal studies and personal experiences.
PREREQUISITES: None. This course is aimed towards students wishing to better understand international migration and who have transnational and multi-cultural interests.
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Interested students will be asked to write a 500-word essay describing their interest in this course, relevant experiences and general disposition in multicultural environments. If necessary, finalists will have a personal interview.
COST: $4,000.00
MEETING TIME: international travel
INSTRUCTOR: Armando Vargas and Jane Canova

ARAB 31 Senior Thesis
To be taken by students registered for ARAB 493-494.

ART

ART HISTORY

ARTH 14 The other Greek Mythology: The "Great God Pan" and other Small-Fry
COURSE DESCRIPTION: Waiting in the wings of Greek mythology, outside the limelight occupied by Herakles, Venus, and other celebrities, is a misfit cast of minor characters. This scruffy chorus is made up of nature's "extras." Horse-men, goat-men, bull-men, cat-women, tree-women, fish-girls, snake-people, and so forth. The recipe is simple: take one human, take one animal, blend thoroughly. Individual specimens occasionally interact with gods or heroes, and end up in the pages of a book. But animal-human hybrids are usually envisioned en masse and exist primarily in pictorial or sculptural art, where they thrive, to this day. The conceptual or cognitive value of these half-breeds has changed over time, keeping up with developments in ethical anxieties and hierarchies of genre and taste. The small-fry of Greek mythology have been subordinated to the status of decoration, if not banished altogether. But they are hardly ornamental. Embodied in satyrs, nymphs, Pan, and the others is a collective vision of an alternate evolutionary trajectory and cultural history. In this parallel world, humans and animals not only talk to each other, they live similar lives, intermarry, and create new species. The distinction between nature and culture is not meaningful. Male and female are more or less equal. The industrial revolution never happens.
In this course, we will explore the alternate world of mythological hybrids by examining works of ancient art, including sculpture and painted vases, and reading ancient texts, such as Hesiod's Theogony and Ovid's Metamorphoses. We will contextualize the representations within ancient intellectual history via texts that range from Old Comedy and political theory to religious history, philosophy, and ethics (e. g., Aristophanes, Demokritos, Polybios, and Lucretius). We will also investigate the survival of the ancient myth of evolutionary alterity. This will include consideration of the imagery of fifteenth- and sixteenth-century Italian painters such as Piero di Cosimo, Nietzsches' first book, The Birth of Tragedy, and several twentieth-century artists, such as Picasso and Matthew Barney.
The goals of the course will be to chart the obscure history of the mythological underclass from its origins in antiquity until today, and to explore the relationships between the mythology and philosophies of the environment.
The requirements of the course will include: attendance; preparing and answering questions for discussion; at least one illustrated presentation to the class; one short paper or equivalent offering based on the presentation; one day-long field trip to New York to the Metropolitan Museum of Art and perhaps the Museum of Modern Art. Student participation will be key: while I know the ancient material very well, much modern material will be as new to me as it may be to you.
METHOD OF EVALUATION: Presentation plus 10-page paper or equivalent project
PREREQUISITES: none
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: priority will be given to students with prior coursework in art history, classics, or environmental studies
COST: $25
MEETING TIME: mornings
INSTRUCTOR: Guy Hedreen

ARTH 18 Hidden Treasures and the Amber Room: Impressionist Art Held Hostage CROSSLISTING: ASTR 19/HIST 19
See under ASTR for full description

ARTH 31 Senior Thesis
To be taken by students registered for ArtH 494. For requirements of entry into the course, please see "The Degree with Honors in Art, Art History" in the catalogue or on the Art Department's webpage.
Enrollment limited to 8.
Students need permission of the department to register for this course.
FILIPCZAK

ARTH 33 Honors Independent Study
To be taken by candidates for honors by the independent study route.

ART STUDIO

ARTS 10 Observational Drawing CROSSLISTING: BIOL 10
See under BIOL for full description

ARTS 14 Contemporary Treehouse Design
COURSE DESCRIPTION: This course will provide an introduction to the creative and technical aspects of contemporary treehouse design. Students will identify a site and design a treehouse based on measurements taken in the field. An array of design strategies and construction techniques will be studied through lectures, videos, and assignments. Regular desk critiques will help guide the investigation, and each project will culminate in a final presentation and exhibition of work. Evaluation will be based on completion of assignments, design development, and the quality of the final project. Attendance and participation will also be taken into account. We will meet twice a week for three hour sessions, with most of the design work completed outside of class.
METHOD OF EVALUATION: Final project and presentation.
PREREQUISITES: None
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Seniority and familiarity with architectural drafting.
COST: $50
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Christopher Yorke
SPONSOR: Ben Benedict

ADJUNCT BIO: Christopher Yorke (Williams '06) holds an MArch from Princeton and currently runs an architectural design studio in Palau. He has also designed and built treehouses for the past seven years, including two years with Pete Nelson, the star of Treehouse Masters.

ARTS 15 Large-Format Photography
COURSE DESCRIPTION: An introduction to studio/view cameras, processing sheet film and making contact prints from large negatives. Studio exercises will deal with the use of camera movements to alter shape and increase depth of field, and with basic lighting techniques; darkroom exercises will include the tray development of sheet film, determination of effective film speed and control of contrast through development time.
The subject matter of the photographs produced in the course will not be prescribed; it is limited only by the participants' imagination and the weather in January. Working with subjects of their own choosing, students will have the opportunity to learn the principles of traditional photographic image making by producing large-format negatives and translating them into effective black-and-white prints, principally in 4x5 formats but perhaps as well in 5x7 and 8x10.
Each student will be expected to make a few exhibition-quality prints, which may be enlargements or contact prints from 4x5 negatives, or contract prints from larger ones. The prints will be exhibited in a group show at the end of Winter Study.
Class will meet as a group for a minimum of ten hours a week for demonstrations in the studio and dark room, and later for discussion and criticism of work. In addition to this time, students will be expected to spend at least 20 hours a week in the studio and darkroom working individually, under the supervision of the course instructor and the photography technician.
METHOD OF EVALUATION: based on commitment to the course, measured by participation in discussion sessions, work in the studio and darkroom and the quality of the prints.
PREREQUISITES: none, although some dark room experience would be an advantage
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: majors first, then in descending class order
COST: lab fee of $225 lab fee will be charged to cover the cost of film, paper and chemicals
MEETING TIME: M-F (everyday), 10 a.m.-12:30 p.m.
ADJUNCT INSTRUCTOR: Ralph Lieberman
SPONSOR: Aida Laleian
ADJUNCT BIO: Ralph Lieberman is an art historian and photographer who lives in Williamstown. He holds a PhD from the Institute of Fine Arts. His photo-graphs have appeared in many publications and are to be found in major American and European art-historical study collections. A large exhibition of his work was on show at the Williams College Museum for several months in 2009.

ARTS 16 Glass and Glassblowing CROSSLISTING: CHEM 16
See under CHEM for full description

ARTS 17 Printmaking: Experiments and Chance Processes
COURSE DESCRIPTION: Typically, printmaking processes are intended to produce multiple impressions of the same image. This requires the artist to exert precision and control at every step, from drawing the image, prepping the plate, to printing. However, because of its many technical and chemical variables, printmaking is also a medium that can yield unintended and surprising outcomes. This course will take printmaking's fortuitous disposition as its starting point and will introduce students to the diverse and radical roles chance can play in an artistic practice. Students will investigate chance processes and experimental printmaking methods with a focus on the creation of monoprints and collagraphs, two mediums that are flexible in form and technique. Alongside making prints, students will explore and consider the various roles chance has played in the work of Modernist avant-gardes and artists including, Jean Arp, Marcel Duchamp, Francis Alÿs, Lygia Clark, John Cage, Andy Warhol, Yoko Ono, and John Baldessari. In addition to studio projects, in class time will include brief slide lectures, group discussions, and critiques. We will visit WCMA and take one class trip to New York City. Outside-of-class work will include some short readings and additional studio time to complete projects.
METHOD OF EVALUATION: Evaluation will be based on class participation, assignments and a final project/exhibition.
PREREQUISITES: none
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: Preference will be given to students who have taken ARTS 100.
COST: $75
MEETING TIME: MTR, 10am-12:50pm
ADJUNCT INSTRUCTOR: Beverly Acha
SPONSOR: Barbara Takenaga

ADJUNCT BIO: Beverly Acha ('09) has an MFA in Painting and Printmaking from Yale University and a BA in Studio Art and American Studies from Williams College. She currently lives and works in New York City and teaches at Dia: Beacon and El Museo del Barrio.

CHINESE

CHIN S.P. Sustaining Program for Chinese
Students registered for Chinese 101-102 are required to attend and pass the Chinese Sustaining Program.
Evaluation will be based on regular attendance and active participation.
Prerequisite: Chinese 101.
Meeting time: MTR 9:00-9:50.
Cost to student: one Xerox packet.
LANGUAGE FELLOWS

CHIN 31 Senior Thesis
To be taken by all students who are candidates for honors in Chinese.

JAPANESE

JAPN S.P. Sustaining Program for Japanese
Students registered for Japanese 101-102 are required to attend and pass the Japanese Sustaining Program.
Evaluation will be based on regular attendance and active participation.
Prerequisite: Japanese 101.
Meeting time: MTR 9:00-9:50.
Cost to student: one Xerox packet.
JINHWA CHANG

JAPN 11 The Samurai in Japanese Film
Some of the finest films ever crafted and celebrated in cinematic history have projected the lives and legends of the samurai. Like the gunfighter and cowboy of the American West, the samurai is an extraordinarily iconic figure, if not, an enduring expression of a distinct Japanese ethos. This course will examine the samurai genre, the formulation of the samurai character, the code of Bushido he lived by, and the multiple roles he has assumed in Japanese filmmaking. Whether as a warrior or loyal retainer to his lord, a symbol of purity of purpose or tragic sacrifice, the samurai has usually been apotheosized as a noble, revered hero. Why? Notwithstanding this image, the films in this course will trace the rise and fall of the samurai class, the tangled legacies of its demise, and ultimate disappearance at the end of the Shogunate era, when Samurai cut their top knots before the turn of the twentieth century, and put up their swords for good.
The focus of this class will be on the films of Kurosawa, Gosha, Kobayashi, Okamoto and Inagaki.
METHOD OF EVALUATION: Class attendance and participation. Short papers after completion of films. Final 5-6 page paper.
PREREQUISITES: None
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: Upper classmen will be given priority.

COST PER STUDENT: $25
MEETING TIME: MWF, 1-3 p.m. with additional film screenings to be announced.
ADJUNCT INSTRUCTOR: Frank Stewart
SPONSOR: K. Yamamoto

ADJUNCT BIO: From 1990-2004 Frank Stewart was an Associate Professor in the Faculty of Law at Hiroshima Shudo University in Hiroshima, Japan. He lived a short distance from Heiwa Koen, the Peace Park, the epi-center of where the A-bomb was detonated.

JAPN 31 Senior Thesis
To be taken by all students who are candidates for honors in Japanese.

ASTRONOMY/ASTROPHYSICS

ASTR 19 Hidden Treasures and the Amber Room: Impressionist Art Held Hostage CROSSLISTING: ARTH 18/HIST 19
COURSE DESCRIPTION: The course looks at Impressionist art as a route into cultural history, beginning with an in-depth discussion of the Impressionists in Paris at the time of the Franco-Prussian War and after; the initial failure of the movement in France; foreign avant-garde collectors who bought the art, and the art's dislocation during World Wars I and II; and finally, a description of the pillaging of art treasures by the warring nations and the efforts of Allied art professionals such as the Monuments Men to restore the art to their original owners, despite controversy about restitution and the right of return.
Lecture format with weekly reading and class participation expected. Independent research for final paper/presentation. Guided visit to the Clark Art Institute to study Impressionist and Academic art in the collection.
METHOD OF EVALUATION: Ten-page paper and class presentation
PREREQUISITES: None, though exposure to art history or modern European history would be useful
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: brief essay on reasons for wanting to take the course
COST: under $10 for course packet
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Margo Bowden

ADJUNCT BIO: Margo Bowden is a former independent school history and politics teacher in New York as well as a NYC Teaching Fellow and an adjunct professor at Queens College. She served as a docent at the Guggenheim Museum before becoming a docent at the Clark Art Institute.

ASTR 31 Senior Research
To be taken by students registered for Astronomy 493, 494.

ASPH 31 Senior Research
To be taken by students registered for ASPH 493, 494.

BIOLOGY

BIOL 10 Observational Drawing CROSSLISTING: ARTS 10
COURSE DESCRIPTION: This is a drawing and watercolor course for students interested in developing their skills in observing and drawing from nature. Much of the class work will deal with drawing directly from plant forms and specimens from the animal world and to this end we will be using an interesting collection of stuffed mounts and skeletons that belong to the Williams Biology department. We will also spend time in the Morley greenhouse. There will also be an emphasis on the use of watercolor. Beyond the subject matter at hand, assignments will also address and analyze the more formal aspects of drawing and two-dimensional design with outside assignments including mandatory and scheduled visits to the Clark, the WCMA study collection and the Chapin Library of Rare Books.
Evaluation will be based on both the completion of in-class work and outside assignments, with a focus on the depiction of content, level of effort, and development of the work. Evidence of technical and skill development as well as attendance and participation will also be taken into consideration. There will be a considerable amount of scheduled time outside of regular class meetings for additional assignments so be prepared to commit to the necessary amount of time. Exhibition and review of work at the final class meeting is required.
Requirements: ongoing review of work and final exhibition.
No prerequisites.
Enrollment limit: 15.
Method of selection: seniority and concentration.
Cost: $110.
Meeting time: Tuesday, Wednesday and Thursday afternoons--some mornings.
METHOD OF EVALUATION: Review of work, attendance and final exhibition
PREREQUISITES: None
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Seniority and concentration
COST: $110
MEETING TIME: afternoons
EXPLANATION OF MEETING TIME: Tuesday, Wednesday, and Thursday afternoons, some mornings
ADJUNCT INSTRUCTOR: John Recco

ADJUNCT BIO: John Recco lives and works in Hoosick, NY and holds an MFA from Columbia University. He has taught at a variety of institutions including Bennington College and Williams. He is the recipient of numerous awards including a Fulbright, fellowships at Yaddo, The Millay Colony, The European Cultural Centre of Delphi, Greece and a NYSCA Individual Artist Grant. His work is included in two recent publications; 100 Boston Painters published by Schiffer Publishing and Galvanized Truth: A Tribute to George Nick, By: Kimberlee C. Alemian.

BIOL 11 Project BioEYES: Teaching 4th Grade about Zebrafish
COURSE DESCRIPTION: BioEYES brings tropical fish to 4th grade classrooms in Williamstown and Greylock Elementary schools, in a science teaching workshop. Elementary school students will breed fish in the classroom, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 4th grade students in the classroom, and assess elementary student learning. A final eight-page paper describing the goals and outcomes for each grade level is required. No zebrafish experience is necessary; during the first week students will learn to set up fish matings, and learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 4th grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent two weeks we will work at the schools, and in the final week, students will write up the assessment data.
METHOD OF EVALUATION: 8 page paper
PREREQUISITES: none
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: preference to seniors
COST: $0
MEETING TIME: other; varies depending on needs of schools and laboratory requirements; occasional morning meetings to collect zebrafish
ADJUNCT INSTRUCTOR: Jennifer Swoap

ADJUNCT BIO: Jennifer Swoap, an elementary school teacher, currently coordinates Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools.

BIOL 12 New Orleans-Style Jazz and Street Performance
This course has a focus on making music based on the principles of improvisation and street performance embodied by New Orleans-Style jazz. Typically composed of brass instruments, this course welcomes musicians and performers of all types, from the classically trained to those with no experience who are willing to play washboards, kazoos, and experiment with other forms of sound-making. For when you travel the world after Williams, this course will prepare you to "busk," or make money playing music on the street, where some of the most dynamic forms of jazz and improvisation have been created. The course will include various street performances and culminate in a "gig" at a local music venue.
PREREQUISITES: none
METHOD OF EVALUATION: Evaluation will be based on class attendance and participation in the final project which will be in the form of a performance.
ENROLLMENT LIMIT: 20.
MEETING TIME: We will meet twice a week for three-hour sessions, with extra band practices to be scheduled in accordance to our needs.
ADJUNCT INSTRUCTOR: ANDY KELLY (akelly21@berkshire.rr.com)
SPONSOR: SWOAP

Andy Kelly, a local Jazz musician and former busker, Williams College Class of '80, now travels the world bridging cultures with music, using American jazz to make peace in the world.

BIOL 13 Introduction to Animal Tracking
COURSE DESCRIPTION: This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student's choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slide show. Students are required to create journals and site maps of Hopkins and their personal study areas, including all major features of the landscape, flora and fauna activity. There will be required reading assignments in the field guides for this class as well as a thousand word final research paper on one of the mammals present in their study area.
METHOD OF EVALUATION: Evaluation will be based on attendance, participation a final presentation of their maps and journals, with attention to detail and content and the research paper.
ENROLLMENT LIMIT: 15
COST: $75; students are expected to have appropriate outdoor gear for winter conditions.
MEETING TIME: 10 a.m.-2 p.m., twice a week for four hour sessions, primarily in the field. Students are also required to do extensive independent field study, demonstrating observations through journals and site maps.
ADJUNCT INSTRUCTOR: DAN YACOBELLIS (miye_yelo@yahoo.com)
Sponsor: SWOAP

Dan Yacobellis is a local naturalist and wildlife tracker who has explored forest and field for the last 20 years. He teaches courses on wilderness skills and tracking at nature education centers in Massachusetts and New York.

BIOL 14 Biology and Psychology of Food Intake and Taste CROSSLISTING: PSYC 16
COURSE DESCRIPTION: This course will examine the biological and psychological factors that influence how we consume and experience food. Topics covered will include: sensory experience of various tastes, the role of olfaction, hunger and cravings, and developmental or environmental influences. We will combine class lectures & discussions with kitchen- or lab-based activities that allow students to experience or experiment with tastants and ingredients.
Class will meet for 6 hours a week, split into at least one lab / kitchen session and lectures / discussions. Students will be expected to complete outside readings as well as research and cook or bake for a final project.
METHOD OF EVALUATION: Evaluation will be based on in-class participation, completion of labs, and a final project.
PREREQUISITES: none
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: seniority, priority given to biology / psychology / neuroscience majors or concentrators
COST: 20
MEETING TIME: afternoons
INSTRUCTOR: Matt Carter and Mariko Moher

BIOL 26 Opportunities and Challenges: Living and Working with Immigrants and Refugees in Portland, ME CROSSLISTING: SPEC 26
See under SPEC for full description

BIOL 31 Senior Thesis
To be taken by students registered for Biology 493, 494.

CHEMISTRY

CHEM 11 Science for Kids CROSSLISTING: SPEC 11
COURSE DESCRIPTION: Are you interested in teaching? Do you enjoy working with kids? Do you like to experiment with new things? Here is a chance for you to do all three! The aim of this Winter Study Project is to design a series of hands-on science workshops for elementary school children and their parents. Working in teams of 2-4, students spend the first two and a half weeks of Winter Study planning the workshops. This involves deciding on a focus for each workshop (based on the interests of the students involved) followed by choosing and designing experiments and presentations that will be suitable for fourth-grade children. On the third weekend of Winter Study (January 24, 25) we bring elementary school kids with their parents to Williams to participate in the workshops.
You get a chance to see what goes into planning classroom demonstrations as well as a sense of what it's like to actually give a presentation. You find that kids at this age are great fun to work with because they are interested in just about everything and their enthusiasm is infectious. You also give the kids and their parents a chance to actually do some fun hands-on science experiments that they may not have seen before, and you are able to explain simple scientific concepts to them in a manner that won't be intimidating. It is a rewarding experience for all involved.
METHOD OF EVALUATION: Evaluation is based on participation in planning and running the workshops. Each group is expected to prepare a handout with descriptions of the experiments for the kids, parents, and teachers.
PREREQUISITES: No prerequisites; you need not be a science major; all that is needed is enthusiasm.
ENROLLMENT LIMIT: 25
METHOD OF SELECTION: seniors, juniors, sophomores
COST: None
MEETING TIME: other; classes meet three times a week for approximately three hours each session. The workshop is run on the third weekend of Winter Study (January 24, 25) and attendance from 9:00 a.m. to 3:00 p.m. is mandatory that weekend. There are also one or two brief meetings held in the fall term for preliminary planning.
INSTRUCTOR: Jimmy Blair

CHEM 12 The Role of Epidemiology in Public Health and Evidence-Based Medicine CROSSLISTING: ANTH 14
See under ANTH for full description

CHEM 13 Ultimate Wellness: Concepts For a Happy Healthy Life
COURSE DESCRIPTION: This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today! We will approach nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness.
TOPICS INCLUDE:
Ayurveda
Cleansing
Preventative medicine
Yoga and meditation
Food intolerance awareness
Healthy eating and meal planning
Deconstructing cravings and overcoming sugar addiction
Finding your happiness
Evaluation will be based on completion of assignments, class participation, reflective 10-page paper or equivalent creative project, and final presentation that demonstrates a level of personal growth. After signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it. In the event of over-subscription, these statements will be used in the selection process.
We will meet twice a week for three-hour sessions as a group.
There will be several books and a DVD required for this class
*Course will include three individual sessions. An initial health assessment and two additional sessions designed to personalize the course and assist the student in applying the learned techniques.
METHOD OF EVALUATION: Final project and presentation
PREREQUISITES: No
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: After signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it. In the event of over-subscription, these statements will be used in the selection process.
COST: $100 or less
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Nicole Anagnos

ADJUNCT BIO: Nicole Anagnos is a health & nutrition coach and founder and director of Zen Tree Wellness in Williamstown. She also holds a masters degree in education.

The WSP Committee has asked that you provide a reading list and also more details in the course description. They also ask that you require students to do some written work in addition to the final project.

CHEM 14 Beyond Hooking Up: Creating Meaningful Relationships CROSSLISTING: PSYC 14/SPEC 14
COURSE DESCRIPTION: Looking back on past loves and crushes, have you ever wondered "What on earth was I thinking?!" or "Why do I keep picking the wrong guys/girls for me?" While intense sexual attraction or urges may first call the shots, people who take the time to carefully choose and build caring, mutual relationships tend to be happier, healthier and more successful in their lives than those who don't. So how do we get there from here and make sense of all this? Well, no matter where you are on the dating spectrum, this self-exploration and relationship-skill-building course is for you if you are ready to learn how to follow your heart AND your mind to co-create a fulfilling relationship within the vortex of the "hook up" culture. The Myers-Briggs Type Indicator, "How to Avoid Falling In Love with A Jerk," and "Keeping the Love You Find" curricula will guide this introspective, interactive relationship mastery course through meaningful discussions and exercises that explore the common issues, dirty fighting tactics, subconscious directives and emotional allergies that often sabotage relationships. Experiential exercises, personal experiences and journaling will also give you the opportunity to practice effective communication and conflict resolution skills that honor the constructive use of differences and promote intimacy.
Evaluation is based on 8 hours of attendance per week, class participation, MBTI inventory completion, 20-hours per week of assigned readings, journaling, assignments, 1:1 consultations, and final 10-page reflective paper/event proposal and project. Email your statement of interest to ssmith@williams.edu if you are curious about relationships, ready and willing to BE the change, delve into personal growth and take your relationships to the next level.
METHOD OF EVALUATION: Requirements: attendance, class participation, reading, journaling, 1:1 meetings with instructor, assignments and 10-page final paper/project.
PREREQUISITES: statement of interest. Enrollment limit: 20. Preference will be based on meaningful statement of interest.
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: meaningful statement of interest
COST: $100
MEETING TIME: TBA
ADJUNCT INSTRUCTOR: Rachelle Smith

ADJUNCT BIO: Rachelle Smith, MSW, is a holistic, strengths-based clinical social worker, consultant, educator, and mentor bridging relationships, wellness and energy psychology.

CHEM 16 Glass and Glassblowing CROSSLISTING: ARTS 16
COURSE DESCRIPTION: This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students.
METHOD OF EVALUATION: Evaluation is based on class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class.
PREREQUISITES: No prerequisites
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by e-mail to Professor Thoman.
COST: $75 for supplies
MEETING TIME: other

EXPLANATION OF MEETING TIME: 9:00 a.m. to noon, M-F.
INSTRUCTOR: Jay Thoman

CHEM 18 Introduction to Research in Biochemistry
COURSE DESCRIPTION: An independent experimental project in biochemistry is carried out in collaboration with a member of the Department with expertise in biochemistry. Biochemistry is a branch of chemistry that deals with the molecular details of living systems including the interaction of biologically important molecules. In the Chemistry Department, studies are underway to investigate the structure/function relationship of proteins, the interaction between proteins and RNA and DNA, and the molecular basis of bacterial gene regulation.
METHOD OF EVALUATION: A 10-page written report is required.
PREREQUISITES: variable, depending on the project (at least CHEM 151) and permission of the Department. Since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors listed below and with the Department Chair before electing this course.
ENROLLMENT LIMIT: Enrollment limited to space in faculty research lab.
METHOD OF SELECTION:
COST: None
MEETING TIME: mornings
INSTRUCTOR: Amy Gehring, Becky Taurog

CHEM 20 Introduction to Research in Inorganic Chemistry
COURSE DESCRIPTION: An independent experimental project in inorganic chemistry is carried out in collaboration with a member of the Department with expertise in inorganic chemistry. Opportunities for research in inorganic chemistry at Williams include (I) the design and development of biorenewable material-based sensors and adsorbents for environmental imaging of pollutants and (2) luminescent lanthanide ion (Ln(III)) complexes incorporating gemini surfactants for highly penetrating and efficient cellular imaging. Students will be guided through the fundamentals of project planning, record keeping, scientific writing, and presentation. The interdisciplinary nature of the research will expose students to a variety of areas including synthetic inorganic and organic chemistry for preparing Ln(III) complexes, analytical chemistry and spectroscopy in the characterization of all new materials, physical chemistry in the rationalization of the photophysical properties of the Ln(III) complexes, and applied chemistry through the development of a biorenewable platform for the prepared molecular sensors.
METHOD OF EVALUATION: A 10-page written report is required.
PREREQUISITES: variable, depending on the project (at least CHEM 151) and permission of the Department. Since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors listed below and with the Department Chair before electing this course. Non-science majors are invited to participate.
ENROLLMENT LIMIT: Enrollment limited to space in faculty research lab.
METHOD OF SELECTION:
COST: None
MEETING TIME: mornings
INSTRUCTOR: Patrick Barber

CHEM 24 Introduction to Research in Physical Chemistry
COURSE DESCRIPTION: An independent experimental project in physical chemistry is carried out in collaboration with a member of the Department with expertise in physical chemistry. Current research projects in the Department include computer modeling of non-linear, chaotic chemical and biochemical systems, molecular modeling of water clusters, laser spectroscopy of chlorofluorocarbon substitutes, and observing the dynamics in glasses using single molecule spectroscopy and molecular dynamics simulations.
METHOD OF EVALUATION: A 10-page written report is required.
PREREQUISITES: variable, depending on the project (at least CHEM 151) and permission of the Department. Since projects involve work in faculty research labs, interested students must consult with one or more of the faculty instructors listed below and with the Department Chair before electing this course. Non-science majors are invited to participate.
ENROLLMENT LIMIT: Enrollment limited to space in faculty research lab.
METHOD OF SELECTION:
COST: None
MEETING TIME: mornings
INSTRUCTOR: Enrique Peacock-Lopez and Jay Thoman

CHEM 31 Senior Research and Thesis
To be taken by students registered for Chemistry 493, 494.

CLASSICS

CLAS 11 Alexander the Great CROSSLISTING: HIST 11
COURSE DESCRIPTION: In this course we will be exploring the many different Alexanders that have existed in literature, myth, art for over two millennia, and in film and popular culture more recently. In different places and ages Alexander the Great has been the ideal warrior-king; the pious leader whose exploits serve God; the brilliant but vulnerable boy-king corrupted by sudden wealth and power; the philosopher-king who debated the sages of India or lived a life of Stoic virtues; the isolated, out-of-touch mad leader; the liberator of the oppressed; the lonely romantic seeker; the tyrannical despot. Ancient accounts of his life evolved into mythologies for the new world he had created with his conquests. These tales circulated throughout Greece, North Africa, the Near East and India, and later by way of Rome throughout the western world, growing into separate and distinct traditions as each culture made Alexander its own.
METHOD OF EVALUATION: Two 2-page analyses of selected course materials, an oral presentation, and a final 5-7-page paper, in addition to preparation for and participation in class.
PREREQUISITES: No prerequisites other than an interest in Alexander and his multiform legacy.
ENROLLMENT LIMIT:
METHOD OF SELECTION: If the course is oversubscribed, preference will be given to majors in Classics, History, Comparative Literature, and Art History.
COST: $75
MEETING TIME: afternoons
INSTRUCTOR: Kerry Christensen

CLAS 14 Plato's Symposium and Its Afterlife CROSSLISTING: COMP 14/PHIL 14/WGSS 14
COURSE DESCRIPTION: Plato's Symposium ostensibly commemorates a gathering held at the home of the tragic poet Agathon of Athens, in 416 BCE, whose participants dedicate their evening to delivering speeches in praise of love (eros). This dialogue is among Plato's most widely read, and its influence has ranged far beyond philosophy. We will read the Symposium in translation, with close attention to is dramatic setting, its remarkable narrative structure, and the content of each character's speech, as well as the conversations that come between. Our examination of Plato's text will be interwoven with consideration of selected receptions of and reactions to the Symposium. These may include texts from later antiquity to the Renaissance to modernity (e.g., Philo, Plotinus, Ficino, Shelley, Woolf, Mann, Forster, Eliot, Mishima) as well as visual and cinematic takes on aspects of Plato's work, ranging from Rubens to Hedwig and the Angry Inch. We will also consider a recent evocation of the Symposium in the American courts (Romer v. Evans, 882 P. 2d 1335 Colorado Supreme Court, 1994).
METHOD OF EVALUATION: Evaluation will be based on contributions to class discussion including oral reports, several very short essays, and a final paper or project.
PREREQUISITES: No prerequisites.
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Preference given to majors and intended majors in Classics, Comparative Literature, Philosophy, and Women, Gender and Sexuality Studies.
COST: $30.00 (books + coursepack)
MEETING TIME: mornings
INSTRUCTOR: Amanda Wilcox

CLAS 31 Senior Thesis
May be taken by students registered for Classics 493, 494.

COGNITIVE SCIENCE

COMPARATIVE LITERATURE

COMP 11 Historical Book Binding
COURSE DESCRIPTION: As part of the Book Unbound Initiative, this course will explore the craft, practice, and history of bookbinding through the making of three historic models. In addition to outside readings and in-class discussion, we will visit Chapin Library to examine relevant objects in their collection.
We will start with one of the earliest examples of the codex structure from the Nag Hammadi Library, which was uncovered in Egypt and dates to 350 AD. Then we'll move to a wooden board Ethiopian-style binding, an ancient account book structure still in use in Ethiopia today. And finally, we'll make a limp long stitch binding, which was commonly used as a type of temporary structure for manuscripts as they moved from printer to binder. While the course will focus on the mastery of techniques and refinement of hand-skills, we will discuss how these historic practices can be applied today in conjunction with experimental materials and content. Through making, we will gain insight into the materiality of the book and its place in history and society.
Students should be willing to work in the studio a minimum of twenty hours a week.
METHOD OF EVALUATION: Students will be evaluated by the care and quality of their craftsmanship and their effort in the studio.
PREREQUISITES: none
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: Relevance to other studies and work
COST: $115
MEETING TIME: TBA; probably evenings
ADJUNCT INSTRUCTOR: Kate Barber
SPONSOR: Christopher Nugent

ADJUNCT BIO: Kate Barber has an MFA in Book Arts from the University of Alabama. Her work spans from making historical full leather bindings to creating unique artist's books.

COMP 12 Film Propaganda CROSSLISTING: RUSS 12
See under RUSS for full description

COMP 14 Plato's Symposium and Its Afterlife CROSSLISTING: CLAS 14/PHIL 14/WGSS 14
See under CLAS for full description

COMP 23 Adorno's Aesthetic Theory CROSSLISTING: ENGL 23
See under ENGL for full description

COMP 25 Transnational Itineraries CROSSLISTING: ARAB 25/RLSP 25
See under ARAB for full description

COMP 31 Senior Thesis
To be taken by students registered for Comparative Literature 493, 494.

COMPUTER SCIENCE

CSCI 12 Stained Glass Tiling
COURSE DESCRIPTION: This course combines medieval craftsmanship with contemporary geometry. Each student will build a piece of stained glass using colored glass tiles that fit together to form two or three-dimensional tiling patterns. Students will learn how to cut glass; to paint and print on glass with kiln-fired enamels; and to assemble and solder a stained glass window. Assignments require both artistic decision-making and practical problem-solving in figuring out ways to support, connect and assemble the tiles into a unique work of art. Instructional sessions on the use of tools and safe handling of materials are included where necessary.
Time commitment: Instruction and supervised workshop sessions from 10am - 1pm Monday to Friday. Students will be required to work approximately fifteen additional hours per week on their own time.
The course includes a field trip to see hand-painted stained glass in North Adams and southern Vermont (mandatory). Exhibition of projects on the last day of Winter Study is mandatory.
METHOD OF EVALUATION: Evaluation will be based on final project plus a 10 page written paper on some aspect of stained glass or tiling patterns. Overall attendance, effort, creativity and teamwork whilst mounting final exhibition will also be taken into account.
PREREQUISITES: No prerequisites. Previous experience in art or geometry is not necessary, however, ideal applicants will have an interest in art or mathematics, patience and good hand skills.
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Preference to seniors and those who express an early or specific interest.
COST: $250 for materials, kiln firings, tools and art supplies.
MEETING TIME: Monday to Friday, 10 a.m. to 1 p.m.
ADJUNCT INSTRUCTOR: Debora Coombs

ADJUNCT BIO: Debora Coombs' stained glass windows are exhibited and commissioned internationally. She is a Fellow of the British Society of Master Glass Painters with a Masters degree from London's Royal College of Art and 35 years of experience in the design, fabrication and teaching of stained glass. Contact: (802) 423-5640 debora@coombscriddle.com. Photos: http://www.coombscriddle.com and http://coombscriddle.wordpress.com

CSCI 13 Designing for People CROSSLISTING: PSYC 13
COURSE DESCRIPTION: Many technologically-innovative and aesthetically-beautiful products fail because they are not sensitive to the attitudes and behaviors of the humans who interact with them. The field of Human Factors combines aspects of psychology and sociology with information technology, education, architecture, and physiology, to design objects and information that are easy for people to learn and easy for people to use. The course will provide students with a theoretical framework for analyzing ease-of-learning and ease-of-use, as well as practical knowledge of a variety of human factors testing methodologies. The course will examine usability of a wide variety of designed objects, including buildings, publications, websites, software applications, and consumer electronics gadgets. Students will demonstrate their understanding of human factors theory through a short paper and participation in class discussion. Students identify a usability problem and design a solution which they will evaluate by heuristic analysis and a usability test with 8-10 human test subjects. Findings will be presented to the class. Books to be purchased: *The Design of Everyday Things* by Donald Norman and *The Inmates are Running the Asylum* by Alan Cooper. Students will also be assigned additional readings.
METHOD OF EVALUATION: Five-page paper on usability theory, and presentation of usability design and testing project.
PREREQUISITES: none
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Instructor seeks a diverse group of students with interests in design, psychology, and human-computer interaction
COST: $36
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Rich Cohen '82

ADJUNCT BIO: Rich Cohen '82 has designed communications, social networking and education applications used by over 100 million people and has conducted usability research on four continents.

CSCI 23 Introduction to Research and Development in Computing
COURSE DESCRIPTION: An independent project is completed in collaboration with a member of the Computer Science Department. The projects undertaken will either involve the exploration of a research topic related to the faculty member's work or the implementation of a software system that will extend the students design and implementation skills. It is expected that the student will spend 20 hours per week working on the project. At the completion of the project, each student will submit a 10-page written report or the software developed together with appropriate documentation of its behavior and design. In addition, students will be expected to give a short presentation or demonstration of their work. Students must consult with the instructor before the beginning of the Winter Study registration period to determine details of projects that might be undertaken.
METHOD OF EVALUATION: Final paper and presentation/demonstration
PREREQUISITES: Permission of instructor
ENROLLMENT LIMIT: none
METHOD OF SELECTION: Preference given to sophomores and juniors
COST: $0
MEETING TIME: TBA
EXPLANATION OF MEETING TIME: TBD
INSTRUCTOR: Williams Lenhart

CSCI 31 Senior Honor Thesis
To be taken by students registered for Computer Science 493-494.

CONTRACT MAJOR

DANCE

DANC 12 Intermediate/Advanced Ballet Technique and Rehearsal
COURSE DESCRIPTION: Intermediate/Advanced level ballet students will have a ballet technique class that will include pointe work for women and extra work on jumps and turns for men. A rehearsal will follow in which an original short ballet will be created on eligible, participating students. The class will meet in the studio three times per week, for three hours each meeting. Students will be expected to review and rehearse material on their own in preparation for the next meeting. The resulting work will be shown in the Dance Department's informal Winter Study showing during the last week of Winter Study.
Students who wish to take course for PE credit only must take the technique portion of the class (one-and-a-half hours) a minimum of two times per week.
METHOD OF EVALUATION: Evaluation is based on quality of participation and progress, and final performance.
PREREQUISITES: At least three years of prior ballet training. *Students must contact instructor prior to signing up for permission to join*.
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Students currently enrolled in dance department ensembles or classes will be given priority.
MEETING TIME: afternoons
INSTRUCTOR: Janine Parker

ECONOMICS

ECON 10 Introduction to Financial Reporting and Statement Analysis
COURSE DESCRIPTION: This course covers the concepts and methods underlying financial statements and the tools to analyze financial statements effectively as part of the process of evaluating a company's strategic and operating decisions in the context of its industry. This process is neither superficial nor one-dimensional, as it requires a thorough understanding of accounting principles and frameworks and the ability to identify the effects of management decisions on financial statements and ratios. Using topical exercises and problems based on current corporate annual reports, we will walk through the fundamentals of financial accounting and financial statements first and then examine the methods and disclosure requirements for specific transactions that most companies undertake. For example, what are the consequences of Facebook's acquisition of WhatsApp? Or of Verizon's decision to issue up to $50 billion in bonds? In pairs, students will complete a project analyzing the current financial statements and ratios of a public company and assess its profitability and risk, focusing on the connections between the company's strategic choices and its financial results.
We will meet as a group for 6 hours a week for the first three weeks, and I will meet with project pairs separately. The last week will be devoted to completion of the projects.
METHOD OF EVALUATION: Evaluation will be based on the two-person project culminating in a presentation and short paper, as well as participation in class discussions.
PREREQUISITES: None
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: Lottery
COST: $150 (estimated) for textbook
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Virginia Soybel '79

ADJUNCT BIO: Ginny Soybel teaches financial accounting and financial statement analysis in the graduate, undergraduate and executive education programs at Babson College. She earned her BA at Williams in 2011 where she majored in History and American Civilization, and an MBA and PhD at Columbia University. Before joining the Babson College faculty, she taught at the Amos Tuck School of Business at Dartmouth College.

ECON 11 Public Speaking
COURSE DESCRIPTION: This course will help students become effective and organized public speakers, whether public speaking means giving a class presentation, participating in a debate, or giving a formal speech before a large audience. We will primarily use extemporaneous and prepared class presentations as a means of learning this skill, but we will also study the great American speeches and presidential debates of the twentieth century for further insights into persuasive public speaking techniques. The class will provide a supportive environment to help each student create his or her own public speaking style that is comfortable, confident, and conversational. We will also focus on organizational techniques, handling visual aids effectively, eye contact and body language. Finally, receiving feedback and providing constructive criticism to other students in the class will be an important part of the course.

METHOD OF EVALUATION: Evaluation will be based on in-class presentations, class participation, and a 10-page written critique of the student's own videotaped presentations.
PREREQUISITES: None
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Priority will be based on written statement of interest.
COST: $25
MEETING TIME: mornings
INSTRUCTOR: David Love

ECON 12 Introduction to For Profit and Nonprofit Organizations
COURSE DESCRIPTION: This course uses case study method to expose students to concepts and techniques of business management. Topics include marketing, strategy, finance, operations, organizational structure, and human relations. Most of the cases taught are published by Harvard Business School and include:
Marketing:
Organic Growth at Walmart
Fisher Price Toys
Strategic Planning:
Marvel Enterprises
Nantucket Nectars
Strategy and Public Relations:
Drug Testing in Nigeria -- Pfizer
LiveStrong
Operations:
Oakland A's
Logistics and HR:
Dabbawalla
Language and Globalization: Rakuten
Finance:
Manning Electronics
A 2-3 page summary of each case is required no later than one week after discussion of the case.
We will meet 3 times a week for 2 hours each session.
Enrollment is limited to 15.
Meeting times: afternoons
METHOD OF EVALUATION: Evaluation will be based on case summary grades (50%) and class participation (50%).
PREREQUISITES: n/a
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: lottery
COST: $15. All case materials will be provided.
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Elizabeth Gilbert-Bono

ADJUNCT BIO: Elizabeth Gilbert-Bono, a Lecturer at Brown University and Marketing Consultant for Too Faced, Inc, has a BA from Brown University and MBA from Harvard Business School. She has held VP -- Marketing positions at Houghton Mifflin Co. and LEGO Inc. She lives in Wellesley, MA and has three children (the second, Bryson, is a sophomore at Williams).

ECON 13 Tools for Evaluating New Business Ideas
COURSE DESCRIPTION: Tools for Evaluating a New Business Idea is based on the fact that start-up businesses are temporary organizations in search of a scalable, profitable business model. Start-ups have to continually pivot as they discover what customers really want. This course teaches the Business Model Canvas which is a structured approach to defining and continually testing the assumptions behind the business idea. Class participants will work in groups around a business idea and work with real customers and others to test their hypotheses. Business owners will present their own experiences starting their businesses and adapting to the market as they discovered their own assumptions about their customers and the market were wrong. The aim is to understand the market and the customer and determine whether a market opportunity exists and, if it does, what the company needs to do and be to meet the needs of customers.
METHOD OF EVALUATION: Evaluation is based on class participation, written assignments, and the final group presentation
PREREQUISITES: none
ENROLLMENT LIMIT: 16
METHOD OF SELECTION: The first ones to choose will have preference, in later rounds, more senior students have preference
COST: $40
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Steven Fogel

ADJUNCT BIO: I have worked with start-up businesses for over 30 years and have helped over 1,000 people start businesses. I work with students competing in the business plan competition.

ECON 14 Hospitality Real Estate Development/ Business Methodology for Entrepreneurs
COURSE DESCRIPTION: The purpose of this course is to provide students with an understanding of the methodology required to successfully develop a new business in the hospitality /commercial real estate sector. By utilizing a real world scenario the students will be encouraged to act as entrepreneurs who will take advantage of the opportunity to create a new hotel. The class will be divided into two teams whose task will be to develop a business plan for either a new hotel project, or the redevelopment of an existing hotel. The simulation will use Williamstown as the locale for the new businesses. The objective of the two teams (or 4 teams depending on class size) will be to create a concept and business plan for their assigned hotel project. The plans will be presented in a final wrap session and discussion. As a final result the class will decide on which plan they would consider as the best project to pursue.
Course instruction will include discussion and application of important business principles including, due diligence practices, pro forma development, market share evaluations, project financing, branding decisions, business positioning, competition analysis, franchising structures, profit and loss analysis, marketing techniques(public relations, advertising, direct sales, social media etc.) and management skills.
It is expected that the class will meet in 3 sessions per week that will be 2 hours in length. The students will be required to work as teams outside the classroom to work on the development of their plan and presentation. They will also need to conduct research into market conditions and analysis of competition factors.
METHOD OF EVALUATION: Presentation of a business plan that will be created by each of the student development teams
PREREQUISITES: none
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: Econ majors will be given priority
COST: Minimal if any
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Bernie English

ADJUNCT BIO: My background experience is based about 35 years of experience in hotel management and hospitality real estate development projects. Working with partners we created new hotel projects of all varieties in cities including Washington DC, Philadelphia, Chicago, Denver, Atlanta and several other smaller locales. The Rittenhouse Hotel, Hotel George, Hotel Derek and the Sheraton Atlanta represent a few of the most notable projects developed by my partners and me. My wife and I are Berkshire County natives and we currently reside in Williamstown having returned home after living in a variety of different major metropolitan areas of the country.

ECON 15 Introduction to Indian Cinema
COURSE DESCRIPTION: Though the Indian film industry is the world's most prolific, American audiences have little exposure to it. This course provides an introduction, focusing on Hindi cinema, and showing how its themes have evolved in response to changes in Indian society. In particular, we will examine ways in which Hindi films reflect the threats perceived by the nation, and the resolutions attempted. We will also compare Hindi cinema's norms and conventions to those used by Hollywood.
We will meet twice a week to watch the films (a total of seven) and once a week for discussion. Students will write a 2 page response to each film. Reading will consist of articles from film journals like Screen and Jump Cut.
METHOD OF EVALUATION: Students will write a two-page response paper to each film.
PREREQUISITES: None
ENROLLMENT LIMIT: 10
COST: $25 for readings
MEETING TIME: afternoons
INSTRUCTOR: Anand Swamy

ECON 16 Mechanisms of Arbitrage
COURSE DESCRIPTION: Arbitrage is a central concept of economics. This course is an introduction to mechanisms in markets which cause arbitrage to occur, as well as a discussion of factors which limit arbitrage, particularly when mechanisms counteract others. The emphasis will be on markets in public instruments and the firms which issue them, as well as on markets e.g. commodities, which overlap with those in public securities. Emphasis will be on distortions caused by agency issues, regulations, venues and intellectual "bucketing". The processes by which these issues are at least partially resolved in current markets will be emphasized, although there will be historical readings and backgrounds in market mechanisms.
METHOD OF EVALUATION: There will be an average of 100 pages of reading per class provided by the instructor and there will be an expectation of 10-12 pages of papers, typically as 1- to 2-page papers for class.
PREREQUISITES: None
ENROLLMENT LIMIT: 25
METHOD OF SELECTION: Priority in inverse order of years remaining to graduation
COST: $0
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Paul Isaac

ADJUNCT BIO: Paul Isaac '72 is manager of Arbiter Partners Capital Management LLC, a money management firm based in New York City. He was formerly Chief Investment Officer at Cadogan Management LLCC, a hedge fund of funds firm, and a partner at Mabon Securities and its predecessor firm Mabon Nugent & Co. He has 40 years of investment management experience. He currently serves on the Visiting Committee of the Center for Development Economics. An extended interview for background purposes can be found at: http://www4.gsb.columbia.edu/filemgr?&file_id=7222906 .

ECON 17 Viewing U.S. Economic History through the Visual Arts
COURSE DESCRIPTION: This course will explore topics and events in U.S. economic history through their portrayals in various visual artistic media such as photography, painting, and film. Each session will be dedicated to a particular media and a specific topic in American economic history. Topics may include early industrial development, slavery, organized labor, prohibition, the Great Depression, the post-war golden era, the Reagan era, and the tech boom of the 1990s. Assigned readings for each class session will motivate our discussion of visual artwork related to that day's topic. For example, one session will confront readings on living conditions under slavery and then watch the film 12 Years A Slave to compare and contrast the academic studies with the visual depiction of the institution. In another session, we will read about the New Deal as a response to the Great Depression, and then, in class, we will study the WPA photography held by WCMA. The class will meet three times per week for approximately 2 hours each. In small groups, the students will be required to initiate each class's discussion of a particular visual media and economic historical topic. The final paper assignment will ask students to study how a specific piece of visual artwork sheds light on our understanding of American economic history.
METHOD OF EVALUATION: 6-8 page paper; in-class presentation; participation in class discussions.
PREREQUISITES: none
ENROLLMENT LIMIT: 25
METHOD OF SELECTION: If overenrolled, preference will be given to actual or potential economics, history, or political economy majors.
COST: 40 (reading packet)
MEETING TIME: mornings
INSTRUCTOR: Steven Nafziger

ECON 18 The Practice and Empirics of Monetary Policy in Emerging and Developing Economies
COURSE DESCRIPTION: This course is an introduction to the empirical analysis of practical macroeconomic policy issues, particularly those having to do with monetary policy. One objective is to provide an exposure to a few of the relevant econometric techniques. A second is to supply the background necessary for the critical evaluation of applied macroeconomic research. Third, with a final paper as the main requirement, the course will furnish an opportunity to practice writing about economic issues.
METHOD OF EVALUATION: 12-page paper
PREREQUISITES: Econ 505
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Recommendation of Econ 505 instructor
COST: $0
MEETING TIME: mornings
INSTRUCTOR: Kenneth Kuttner

ECON 19 Conducting Social Science Research at the American Institute for Economic Research CROSSLISTING: ANSO 19
See under ANSO for full description

ECON 20 Quantitative Equity Analysis
COURSE DESCRIPTION: This class will introduce students to applied quantitative equity research. We will briefly review the history and approach of academic research in equity pricing via a reading of selected papers. Students will then learn the best software tools (R and R Studio) for conducting such research. Students will work as teams to replicate the results of a published academic paper and then extend those results in a non–trivial manner. This course is designed for two types of students: first, those interested in applied economic research, and second, those curious about how that research is used and evaluated by finance professionals.
METHOD OF EVALUATION: final project
PREREQUISITES: None
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: by instructor
COST PER STUDENT: 0
MEETING TIME: afternoons
INSTRUCTOR: David Kane '88

David Kane '88 has a Ph.D. in Political Economy and Government and is a Fellow at IQSS at Harvard University. He is a former member of the Harvard faculty and currently works as a portfolio manager.

ECON 22 Volunteer Income Tax Assistance (VITA) CROSSLISTING: POEC 22/WGSS 22
COURSE DESCRIPTION: This course examines tax policy towards low-income families in the United States, and has the following three objectives: 1) For students to understand the shift of redistributive policy in the United States from income support through the transfer system (Aid to Families with Dependent Children/Temporary Assistance for Needy Families) towards support of working individuals through the tax system (primarily the Earned Income Tax Credit (EITC); 2) For students to understand the challenges that low income individuals have "making ends meet" and to understand the role that the EITC has played in increasing the standard of living of the working poor; and 3) To enable students to understand the tax code well enough to prepare simple income tax returns, including those for filers claiming the EITC. Students will be trained by the IRS to prepare income tax returns for low-income individuals and families. At the end of the term, students will use their newly acquired expertise to help individuals and families in Berkshire County prepare and file their returns. Class meetings will involve a mixture of discussion of assigned readings, and exercises that help develop tax preparation skills and understanding of poverty. Assignments outside of class include: a variety of short readings on tax policy, the challenges of living in poverty in the U.S., and public policies that address these challenges; completion of an online course in IRS VITA training; and staffing approximately six hours of tax preparation assistance during the final week of winter term. The volunteer tax preparation sessions take place in North Adams and are usually Wednesday and Thursday evenings during the final week of Winter Study, and then Thursday evenings and Saturday mornings after that.
METHOD OF EVALUATION: Evaluation is based on the results of the IRS certification test, students' work as tax preparers, and a ten-page analytical and reflective essay.
PREREQUISITES: None
ENROLLMENT LIMIT: 14
METHOD OF SELECTION: If overenrolled, students will be selected based on a written statement of interest.
COST: Cost: $100 for texts and coursepack.
MEETING TIME: mornings, with possible occasional afternoon sessions to accommodate visiting speakers, plus the volunteer tax preparation sessions discussed in the course description.
INSTRUCTOR: Lucie Schmidt

ECON 23 Introduction to the Economics, Geography and Appreciation of Wine
COURSE DESCRIPTION: This course provides an introduction to the economics, geography and appreciation of wine. We will be studying the economics and geography of wine production, and will also learn to identify, understand and appreciate the major wine types of the world. The course will involve lectures, outside readings, and in-class wine tastings. We will focus primarily on the Old World wine styles and regions of France, Italy, Germany, Austria, Spain and Portugal. The course has been expanded to also cover some New World wine regions, including California, Oregon, Chile, Argentina, South Africa, New Zealand and Australia.
METHOD OF EVALUATION: Evaluations will be based on short quizzes, including blind tastings, and either an oral presentation or 10-page paper at the conclusion of the course.
PREREQUISITES: Students must be 21 years old on or before January 5, 2015.
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: If overenrolled, selection will be on the basis of a mix of academic record and diversity of backgrounds and interests.
COST: approximately $275.00 in the form of a course fee, to be used for the cost of wine purchases for the course
MEETING TIME: evenings, two nights a week
INSTRUCTOR: Peter Pedroni

ECON 25 Socio-economic Impact of 20 Years of Democracy in South Africa CROSSLISTING: POEC 25/PSCI 25
COURSE DESCRIPTION: South Africa remains a country of contrasts: international polls rank Cape Town as one of the world's three most pleasant cities, yet minutes from the central business district vast informal settlements house some of Africa's poorest people. This travel course will examine the impact of twenty years of democracy on the social and economic lives of South Africans. The newly elected government in 1994 inherited a challenging legacy of historical deprivation and inequity. Twenty years later, remarkable progress in many socio-economic areas contrasts with persistent challenges--particularly youth unemployment. This course will explore the impact of government policies and programs tackling poverty and unemployment and investigate how such a skewed distribution of resources has persisted, and what government policies have succeeded in redressing. Meetings -with policy-makers and community activists, with teachers and labor leaders, with economic researchers and social workers, with public health advocates and bankers-will provide insight into the historical and structural causes of the extreme inequality that still characterizes South Africa's society, and the government interventions that have succeeded in redressing past imbalances and inequities while promoting pro-poor economic growth and inclusive development. The itinerary will focus on Cape Town and rural areas within the Western Cape province. First-hand experience combined with educational presentations and discussions will illuminate the challenges and opportunities policy-makers have faced and document the progress achieved during South Africa's first twenty years tackling the persistent legacy of apartheid. Students will receive a reading package to provide background and analysis of South Africa's socio-economic context and will write a ten-page paper analyzing the impact of one of South Africa's social or economic policies. Students will present the results of their work back at Williams in the final week of the WSP.
PREREQUISITES: none
METHOD OF EVALUATION: 10 page paper and final presentation
ENROLLMENT LIMIT: 12 (or other as recommended)
METHOD OF SELECTION: by essay based on expressed student interest
COST: $3485
ITINERARY: Introductory sessions: January 5-7 Depart USA: January 8 Arrive Cape Town, in-country orientation: January 9
Meetings: January 10-11
Departure to rural Western Cape: January 12 Meetings in Mossel Bay and Knysna: January 13 Rural Western Cape visits: January 14-15 Return to Cape Town: January 16 Meetings in Cape Town: January 17-19 Depart for USA: January 20 Arrival USA: January 21 Student presentations: January 26-28

ECON 27 Sustainable Business Strategies CROSSLISTING: ENVI 18
See under ENVI for full description

ECON 51 Practical Tools for Development Economists
COURSE DESCRIPTION: This class is designed to fill the gaps between real world constraints and the research frontier. Often government economists need answers to policy questions in a matter of hours or days instead of the months or years necessary to build a cutting edge research model. This class will stay away from complex econometrics. All of the techniques will be implemented in Excel. This class is aimed at improving your job performance immediately. The curriculum is based on suggestions from CDE alumni. The class has three main parts: advanced Excel/data techniques, IMF FPP Analysis, and a writing component. Undergraduates taking this class do not need to complete the first half of the writing component.
METHOD OF EVALUATION: Two 10-page papers, 12 homework assignments
PREREQUISITES: ECON 110 and ECON 120
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: The professor will select if overenrolled: Priority given to CDE students, then ECON majors, and then others.

COST PER STUDENT: 0
MEETING TIME: afternoons
INSTRUCTOR: Michael Rolleigh

ECON 52 Micro-Simulation Modeling for Ex Ante Policy Analysis
COURSE DESCRIPTION: Micro-simulation modeling provides one of the most powerful tools for ex ante evidence-based analysis of economic and social policy interventions. Rooted in representative household surveys of a country's population, the models provide a picture of poverty, employment, consumption and income levels throughout the country. A micro-simulation model enables researchers to investigate the impact of existing economic and social policy interventions (such as tax and public benefit interventions) on income levels, poverty, inequality and other outcomes. In addition, researchers are able to simulate the impact and estimate the cost of new policy interventions.
During this course, students will learn to apply these methods to analyze public policies and interpret the findings. The course examines measurement issues, analytical tools and their application to household survey data for a range of developing countries. The course also links the outcomes of the analysis with the challenges of policy implementation, exploring how the political environment and/or institutional setting may result in the implementation of second-best options. This is a hands-on modeling course, and students will build a micro-simulation model for a country of their choice and use this model in completing the course requirements. The course will employ Excel, Stata and advanced micro-simulation packages. The final requirement for the course is a policy paper that provides students with an opportunity to write accessible prose that communicates the methodology adopted and the key lessons of the analysis.
METHOD OF EVALUATION: exercises, presentation, policy papers
PREREQUISITES:
ENROLLMENT LIMIT: 15
METHOD OF SELECTION:
COST: $0
MEETING TIME: mornings
INSTRUCTOR: Michael Samson

ECON 30 Honors Project
The "Specialization Route" to the degree with Honors in Economics requires that each candidate take an Honors Winter Study Project in January of their senior year. Students who wish to begin their honors work in January should submit a detailed proposal. Decisions on admission to the Honors WSP will be made in the fall. Information on the procedures will be mailed to senior majors in economics early in the fall semester.
Seniors who wish to apply for admission to the Honors WSP and thereby to the Honors Program should register for this WSP as their first choice.
Some seniors will have begun honors work in the fall and wish to complete it in the WSP. They will be admitted to the WSP if they have made satisfactory progress. *They should register for this WSP as their first choice.*

ECON 31 Honors Thesis
To be taken by students participating in year-long thesis research (ECON 493-W31-494).

ENGLISH

ENGL 10 Proust: *The Guermantes Way* and *Sodom and Gomorrah*
COURSE DESCRIPTION: In this course we will read the two central novels from Marcel Proust's sequence *In Search of Lost Time*: *The Guermantes Way* (1920-21) and *Sodom and Gomorrah* (1921-22). Proust's fiction is usually encountered through *Swann's Way*, the meditative portrait of the artist's childhood and early adolescence, which scrutinizes the nature of memory, art, and desire. But in these two novels, the young adult narrator enters the more dazzling world of the artistic and aristocratic salons of turn-of-the-century Paris, which he anatomizes with avid and satirical eye. We will discuss social maneuvering; monetary and cultural wealth; the anti-Semitic schisms in high society and the French military precipitated by the Dreyfus crisis; disruptions of class and social mores at the advent of a modern technological age; and the losses, scandals, and disorienting fulfillments that attend obsessional love and multiple forms of sexual desire. Three class meetings, reading assignments, and writing will amount to about 20 hours per week.
METHOD OF EVALUATION: Three 3- to 4-page class reports.
PREREQUISITES: None.
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Preference to students with a literary-studies major (e.g., English, COMP, French).
COST: $35
MEETING TIME: afternoons
INSTRUCTOR: Stephen Tifft

ENGL 11 How to Write for Magazines (and Why Anybody Would Want To)
COURSE DESCRIPTION: A course about the nature of magazine feature writing. The course will begin with readings that survey the history of feature writing in the 20th century, starting with the work of investigative journalists for McClure's in the early 1900's, continuing through the glory days of The New Yorker and Esquire in mid-century, and ending with contemporary writers at a variety of print and online venues. The main focus of the course, however, will be a practical guide to reporting and writing for print magazines, and a discussion of how and why print magazine journalism still matters in an increasingly virtual media world. Students will learn about the process of making contacts with editors, pitching stories, reporting them, and editing them for publication, in four main genres: personal essays, profiles, reported features, and investigative stories. (Weekly readings in all four genres will be assigned.) As final projects, each student will complete a full story, and those who wish to pitch a story to an actual magazine will receive guidance through that process.
Requirements: class participation, at least two one-on-one meetings outside of class, and one story of a minimum of 15 pages. Attendance at a handful of film screenings may also be required.
METHOD OF EVALUATION: 15-page paper
PREREQUISITES: none
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: letter describing reasons for wanting to take the course, and one writing sample
COST: $150
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Michael Joseph Gross

ADJUNCT BIO: Michael Joseph Gross (Williams '93) is a contributing editor at Vanity Fair, where he writes about topics including politics, crime, technology, and national security. After attending Princeton Theological Seminary and working as a political speech writer, he began writing freelance for The New York Times Magazine, The Atlantic, The Nation, Elle, GQ, Out, and many other magazines and newspapers. Starstruck: When a Fan Gets Close to Fame, his book about relationships between celebrities and their admirers, was published by Bloomsbury USA.

ENGL 12 Listening to Strangers
This is a workshop in making audio documentaries. Students will learn basic interview, audio recording, and editing techniques. Our focus will be in learning how to capture one or two of the manifold stories circulating invisibly around us, through the process of interviewing strangers about their lives.
Course requirements include five hours of class meetings, three technical workshops, and four hours of outside listening and reading per week. Investigating stories, interviewing subjects, and editing stories will also require ten to twelve hours weekly. Students will be required to participate in a final listening session in which we will share finished projects.
METHOD OF EVALUATION: Class performance, submission of a 5-10 minute final audio documentary, participation in final listening session
PREREQUISITES: none
ENROLLMENT LIMIT: ten
METHOD OF SELECTION: on the basis of short written expressions of interest and experience in related fields (creative writing, video production, journalism
COST: $75
MEETING TIME: afternoons
INSTRUCTOR: Shawn Rosenheim

ENGL 13 The Great Asian American Novel CROSSLISTING: AMST 13
COURSE DESCRIPTION: For those in the know, Asian American literature has no shortage of excellent novels, yet these have mostly always seemed to be more appropriately classified in ethnic terms-as Chinese American novels, Filipino American novels, and so on. The genre best suited to narrating the peculiar specificity of that pan-ethnic political identification has always been the anthology. Then, in 2010, Karen Tei Yamashita published I Hotel, a playful, brainy, rollicking, carefully researched, and formally virtuosic account of the Asian American Movement, quite possibly the first and the only example of a truly Asian American novel. Not surprisingly, it's a doorstopper-essentially a single-authored anthology of ten novellas-and doing it justice may require the coordinated effort of a team of readers with some time on their hands and an interest in digging up lost histories of Asian American radicalism. We'll see what we can do.
METHOD OF EVALUATION: Active participation and numerous, informal but research-based writing assignments
PREREQUISITES: None
ENROLLMENT LIMIT: 20
COST: $50
MEETING TIME: mornings
INSTRUCTOR: Vince Schleitwiler

ENGL 14 Hurston, Black Folk, and the Literati
Zora Neale Hurston was one of the most brilliant, charismatic, and provocative figures of the Harlem Renaissance. She grew up in an all-black town in Florida and studied at Columbia with the great anthropologist, Franz Boas. She became a preeminent collector of African American and Afro-Caribbean folklore and a one of the most accomplished fiction writers of her era. A dazzling and controversial writer and personality, Zora remains an indispensable and challenging presence in our cultural history.
This course will examine her works of folklore, fiction, autobiography, and cultural and political commentary. We will also read at least one biography and various other materials, ranging from book reviews to personal letters by her contemporaries, in order to assess her accomplishments as a folklorist and writer and the reactions she has continued to provoke from her enthusiasts and detractors.
The final writing assignment for the course will be a paper of twelve to fifteen pages.
METHOD OF EVALUATION: a final 12-15 page paper
PREREQUISITES: none
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: preference to English majors & Africana Studies concentrators
COST: $100
MEETING TIME: mornings
INSTRUCTOR: David L Smith

ENGL 15 Media Battlegrounds: A Workshop in Media Criticism CROSSLISTING: PSCI 15
See under PSCI for full description

ENGL 16 Henry James' The Golden Bowl
COURSE DESCRIPTION: In this course we will read Henry James' late novel, The Golden Bowl, which dramatizes many of James' crucial preoccupations. Centered on a wealthy American collector living in England at the turn of the twentieth century, the novel examines the personal and cultural costs of an American obsession with amassing relics of a collapsing European empire, as well as the potentially ruinous effects of wealth and refined sensibility on tangled love relations. The novel's ethical and perceptual intricacies are conveyed in an ingeniously demanding style that presses syntax to its limits. We will read critical essays on the novel, and draw on Walter Benjamin's work on collecting and on the Arcades of 19th century Paris.  
METHOD OF EVALUATION: 10-page paper
PREREQUISITES: 100 or 200-level English course
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Preference based on major and seniority
COST: $20.
MEETING TIME: afternoons
INSTRUCTOR: Anita Sokolsky

ENGL 17 The Winter Naturalist's Journal CROSSLISTING: ENVI 17
See under ENVI for full description

ENGL 18 Stories and Pictures CROSSLISTING: ARTS 18
COURSE DESCRIPTION: What would you do if Vladimir Nabokov suddenly appeared and said: "Read this thing I wrote, and then make a twenty second stop-motion animation that captures what it feels like to long for a country that doesn't exist anymore. You have a week."? What if Etgar Keret demanded you made a drawing which offered a realistic solution to a magical problem? You don't even want to know what Kurt Vonnegut would want from you.
Stories and Pictures can help you prepare for these kinds of situations. In this class, we will read short stories and produce visual responses to them. We will design movie posters for movies that don't exist and create the work of imaginary artists. We will talk about the different ways in which the written word can provide fuel for image-making, and figure out how to make good art fast. In our meetings we will look at how other visual artists have used narrative to inform their work and try out various art-making techniques such as drawing, collage, digital photography and video. We will meet 3 times weekly for 2-hour sessions and go on at least one field-trip.
Students of all intellectual and creative persuasions are welcome.
METHOD OF EVALUATION: Students are required to complete four artworks and vigorously participate in all class discussions.
PREREQUISITES: none
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: If over-enrolled, preference will be given to students who write the instructor a short email explaining their interest in the class.
COST: $50
MEETING TIME: mornings
INSTRUCTOR: Gabriela Vainsencher

ADJUNCT BIO: Gabriela Vainsencher is a visual artist living and working in Brooklyn, NY. She was Williams College's Levitt fellow in 2009 when she taught this class for the first time. Since then she has taught it as a winter study class in January 2012, 2013, and 2014. Her recent exhibitions include a two-person show at the Musée d'art Moderne André Malraux in Le Havre, France and a solo show at Recession Art gallery in New York.

ENGL 20 Humor Writing CROSSLISTING: MATH 20
See under MATH for full description

ENGL 22 Twenty-First Century Jewish American Fiction CROSSLISTING: JWST 22/REL 22
See under REL for full description

ENGL 23 Adorno's Aesthetic Theory CROSSLISTING: COMP 23
COURSE DESCRIPTION: Theodor Adorno was one of the twentieth century's most challenging thinkers -- a German Jewish refugee who loathed the United States but ended up in Los Angeles, who had no hope for Germany but returned there after the war. His intellectual contributions are too extensive to list: He produced groundbreaking work in philosophy, musicology, literary criticism, sociology, and political theory. The last book he ever wrote was called Aesthetic Theory and summed up a lifetime of thinking about what had happened to art in the twentieth century. Its questions will be our questions: What is the responsibility of art in the face of suffering? What kind of art is possible in a world reduced to rubble? Is it possible to produce a form of art that does not dominate others, that cannot be put in the service of their domination? The book is almost impossible to read cold, so we'll meet every weekday for a couple of hours to read it together.
METHOD OF EVALUATION: 10-page paper
PREREQUISITES: Coursework in continental philosophy or critical theory is strongly recommended, but not strictly necessary.
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: priority given to seniors and juniors
COST: $30
MEETING TIME: afternoons
INSTRUCTOR: Christian Thorne

ENGL 25 Journalism Today
COURSE DESCRIPTION: This course will give students an in-depth, personal view of the inner workings of various facets of journalism. It will feature the perspectives of several distinguished Williams alumni who work in a broad spectrum of today's media universe, including print, broadcast, and new media. In previous years, visitors have represented such outlets as the Wall Street Journal, the New York Times, the New Yorker, ABC News and Bloomberg News. Each guest lecturer will discuss specific skills and experiences in his or her background (students should be aware that our precise meeting schedule week by week may vary, to accommodate the schedules and availability of our guests). In addition to readings of work by guests, there will be one required text about reporting and writing. Students will be expected to complete several reporting and writing exercises, and complete one feature-length news story on a topic to be assigned at the beginning of the course. There will be a week-long trip to New York for field work and to visit various newsrooms. In previous years, organizations visited have included CNN, the New York Times, the Columbia School of Journalism, Good Morning America and Morning Joe, Pro Publica, the Wall Street Journal and more.
PREREQUISITES: none; not open to first-year students.
METHOD OF EVALUATION: Participation in class discussions and reporting and writing exercises, and the completion of one fully-reported, original, feature-length news story about a topic to be assigned at the beginning of the course.
ENROLLMENT LIMIT: 16
METHOD OF SELECTION: Preference will be given to students with a demonstrated interest in journalism or media (as explained in a statement of interest), with a priority given to upperclassmen/
resources: We will need access to one seminar meeting room on a daily basis to account for the scheduling flexibility we'll need for our guests.
ADJUNCT INSTRUCTOR: Christopher Marcisz

ENGL 27 Shakespeare on Film CROSSLISTING: THEA 12
See under THEA for full description

ENGL 30 Honors Project: Specialization Route
Required during Winter Study of all seniors admitted to candidacy for honors via the specialization route.

ENGL 31 Honors Project: Thesis
Required during Winter Study of all seniors admitted to candidacy for honors via the thesis route.

ENVIRONMENTAL STUDIES

ENVI 10 - Accepting the Challenge: Pursuing Living Building Challenge Certification for the New Environmental Center
The new Environmental Center at Williams - opening in the early winter of 2014/2015 - has been designed and constructed to achieve Living Building Challenge certification. Living Building Challenge is a sustainable building certification system that aims to raise the bar for the way in which we define sustainability. It defines the most advanced measure of sustainability in the built environment possible today and acts to diminish the gap between current limits and ideal solutions. Living Building Challenge requires that a building not just be designed and built to be sustainable *in principle*, but to be sustainable *in practice* and to do so under a very demanding interpretation of sustainability- to be net zero energy, net zero water, and to have agriculturally productive land as part of the building site. These goals can only be met with enthusiastic participation from the campus community.
Students taking this course will learn the basics of the Living Building Challenge certification system. They will become familiar with the innovative systems that are integral to Williams' new environmental center: rain water capture, composting toilets, constructed wetlands and rain gardens, solar photovoltaic arrays and air-to-air heat exchangers. Students will then design and implement projects that elucidate and interpret the goals, technologies, and progress of the building, Projects could include posters, tours, art projects, digital displays, apps, workshops, presentations and more. Workshops and readings will introduce students to several different models for behavior change and cultural shift, giving them additional tools for the projects.
METHOD OF EVALUATION: Evaluation will be based on participation and a final project. In-class meeting time is expected to be approximately six hours per week, with the possibility of one full day workshop and one full day field trip.
PREREQUISITES: none
ENROLLMENT LIMIT:15.
METHOD OF SELECTION: Preference will be given to Sophomores and Juniors.
COST: approximately $50 for textbooks and reading packets
ADJUNCT INSTRUCTOR: Amy Johns, Zilkha Center

ENVI 11 The Winter Woods
COURSE DESCRIPTION: This course will focus on the winter season and its effect in molding the natural landscapes of New England. We will take a hands-on approach toward investigating how plants and animals are adapted to enduring the winter conditions of our region. We will make frequent field trips to Hopkins Forest and other regional sites to explore topics ranging from micro-climate and snow pack to physiological, morphological, behavioral adaptation, winter plant identification, wildlife tracking and observation and personal acclimation to the cold. We will also consider the effects of climate change and human impacts upon the winter landscape. In addition students will be expected to spend time out of class making and recording their individual observations. Field activities will be supplemented by readings and class discussions. Students should be prepared to spend many hours out in the elements and be able to hike several miles in

winter conditions. Some field trips will necessitate that students be away from campus beyond normal class hours.
METHOD OF EVALUATION: 10-page paper or equivalent
PREREQUISITES: none
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: seniority
COST: 150
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Drew Jones

PREFIX: ADJUNCT BIO: Drew Jones has been the Manager of Hopkins Memorial Forest for fifteen years. He has a Masters Degree in Forestry and has worked as a Wildlife Biologist and Naturalist from the Southern Appalachians to the North Woods.

See under JLST for full description

ENVI 14 Animal Consciousness CROSSLISTING: RLSP 14
See under RLSP for full description

ENVI 17 The Winter Naturalist's Journal CROSSLISTING: ENGL 17
COURSE DESCRIPTION: This course will engage with the natural world though writing, drawing, and personal observation, supported by reading and discussion. Students will spend time out of doors exploring the ecosystem of the Williamstown area, and indoors practicing reflective writing (both
poetry and prose), and observational drawing. Everyone will be required to keep a nature journal, to be shared and displayed as part of the final project. The writing component of the course will be equivalent of a 10-page paper. This course is designed for students who are interested in environmental
studies, creative writing and drawing.
METHOD OF EVALUATION: Writing component is the equivalent of a 10 page paper.
PREREQUISITES: none
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: If overenrolled, students will be chosen based on seniority and the need to create a group that is diverse in majors and interests.
COST: $60 for books and art supplies.
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Christian McEwen

ADJUNCT BIO: Christian McEwen (instructor) Christian McEwen is the author of "World Enough & Time: On Creativity and Slowing Down," and the editor of "Jo's Girls: Tomboy Tales of High Adventure" (1997) and "The Alphabet of the Trees: A Guide to Nature Writing" (2000). She lives in Northampton, MA.

ENVI 18 Sustainable Business Strategies CROSSLISTING: ECON 27
COURSE DESCRIPTION: This course explores case studies of "sustainable business strategies," as that concept continues to evolve. We will develop our own definition of "sustainability" that encompasses both financially success as well as long run impact on climate and the environment. Topics include:
· What are the criteria for sustainability? Does (only) renewable energy qualify?
· How does the concept of externalities relate to sustainability? Must all external costs and benefits be "internalized" in order for a business to be truly sustainable?
· Can sustainable business models coexist with traditional shareholder value maximization models? Evaluate the role of "B" companies allowing directors to take into account the interest of all stakeholders including workers, consumers, the society at large, and the environment.
· How does sustainability reconcile with the priority of economic growth, particularly in the developing world?
· What is the relationship to fair labor standards and environmental regulation?
· What is the proper role and purpose of governmental subsidies? When should subsidies sunset and leave industries to succeed (or fail) on their own?
Students will read two books: Encounters with the Archdruid and Breakthrough, plus a collection of 4-5 substantial articles.
We are likely to make two mandatory off-campus trips: a day with at least one sustainable company (Ecovative Design in Troy) and travel to NYC for an intensive day long seminar with professional investors in this sector.
Teams of 2-3 students will target a company of their choice and present a critical evaluation of that company's progress, challenges, and prospects for success both financially and in terms of their sustainability goals.
METHOD OF EVALUATION: Team presentations on target companies; active class participation.
PREREQUISITES: None, though some background in economics is very helpful
ENROLLMENT LIMIT: 24
METHOD OF SELECTION: By letter describing their interest.
COST: $90 (books and some travel meals)
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Don Carlson
EMAIL: don.carlson@me.com

ADJUNCT BIO: Don Carlson is a serial entrepreneur, board member and investor in dozens of growth stage companies. Don has been a Williams faculty member (CES and chair of political economy, 1990-92); an executive at Goldman Sachs; a business leader at Axiom, CEB, and BIA; a trial lawyer at Williams & Connolly, and legislative director for Congressman Kennedy. He graduated from Williams as a poli ec major in 1983 and Harvard Law School in 1986. Don lives in Greenwich, CT, with his wife and three teenage children.

See under PSCI for full description

ENVI 25 A New Paradigm for Eleutheran Agriculture: Building a Sustainable Indigenous Food System
COURSE DESCRIPTION: The course is a hands-on group research and community development project in collaboration with two island organizations: One Eleuthera Foundation and the Cape Eleuthera Institute. The Cape Eleuthera Institute is a scientific research institution focused on marine biology and place based academic research. One Eleuthera is a non-governmental organization working to improve public health on the island. They raised funds to build, equip and staff emergency response centers, built the only women's health clinic on the island, and raise awareness about nutrition and fitness on an island where obesity and heart disease rates are significantly higher than they are in the US. One Eleuthera has recently turned their attention to creating a stronger island food system. Their goal is to improve food security and increase the supply of local healthy food by promoting organic farming, preserving the traditional farms for future food production, and focusing public attention on the benefits of fresh fruits and vegetables.
One Eleuthera's multi-pronged food system initiative also includes expanding the garden programs at the local high schools to train future farmers, purchasing land to create an incubator farm, building a canning plant, buying a mobile processing unit, establishing a seed bank, working with the existing farmers on transitioning to a less chemical intensive agriculture and connecting growers to buyers. This class will work as a team to conduct fieldwork to further these projects, focusing on connecting growers to buyers. Class work will include interviewing the established traditional farmers about their operations and discuss the possibility of converting their farm to sustainable agriculture, assessing demand for local produce by interviewing purchasers at stores, restaurants and hotels, as well as interviewing high school about their interest in farming and government officials and other stakeholders in the food system. Research on sustainable tropical farming methods, agricultural economics, and Bahamian politics and government will also be involved. The work will culminate in a presentation to the local organizations as well as a written report of findings and recommendations.
PREREQUISITES: Some environmental studies coursework recommended; not open to first-year students.
METHOD OF EVALUATION: Evaluation will be based on students' participation in the group research project, degree of commitment to project and to being part of a research team, effort and quality of work, professionalism in working with community partners, final report (each student will write a section), and final presentation (each student will present a section).
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Priority to environmental studies concentrators and majors and public health concentrators; priority to students with coursework in environmental studies/agriculture/food systems/public health or work experience in these fields; consideration of students who have had little or no opportunity to travel.
COST: student fees will be covered by the Class of 1963 Sustainability Fund.
INSTRUCTOR: Sarah Gardner

See under AFR for full description

ENVI 31 Senior Research and Thesis
To be taken by students registered for Environmental Studies 493-494.

GEOSCIENCES

GEOS 10 Coastal Destruction: Were People Meant to Live Along the Coast?
COURSE DESCRIPTION: Can people live safely and permanently along the coast? The answer depends on who you ask, and where along the coast you are standing. Yet, regardless of the actual answer, people continue to flock to the coast even as the shoreline recedes and destructive storms and tsunamis occur with alarming regularity. The fact is there are underlying social, political and economic factors that draw people toward the coast, and thus amplify the destruction caused by natural processes and events. For example, the magnitude of destruction caused by a hurricane that blows across a deserted island is very different from that of a hurricane that hits New York City. Rising sea levels associated with climate change and rapidly growing coastal cities will only exacerbate the situation. During this class, students will first gain a basic understanding of the physical processes (e.g., coastal erosion) and events (e.g., storms, tsunamis) that dominate changes in and destruction to the coastal environment. Students will then delve into how the effects of these physical processes and events can be amplified (or mitigated) by social, political and economic realities, especially those that promote continued coastal development. By the end of this class students will have a greater appreciation for the complex processes that dominate the coastal-human environment, as well as how science can inform policy decisions.

Students can expect to meet in class for approximately 8 hours per week. Outside of class, students should expect to read a variety of different materials (e.g., book chapters, journal papers, newspaper articles) and research specific topics related to the class.
METHOD OF EVALUATION: Class participation, individual research outside of class, weekly memos, and either a final oral presentation or written paper
PREREQUISITES: None
ENROLLMENT LIMIT: 16
METHOD OF SELECTION: in case of over-enrollment, preference will be given based on a short statement of interest emailed to the professor and to ensure a wide range of academic backgrounds are represented
COST: $0
MEETING TIME: mornings
INSTRUCTOR: Alex Apotsos

GEOS 12 Landscape Photography CROSSLISTING: ENVI 12
COURSE DESCRIPTION: This class will broaden students' appreciation for the appearance and history of the landscape and teach the skills of making a successful photograph. Williamstown, situated in a valley between the Green and Taconic Mountains and bisected by the Green and Hoosic Rivers, is a place of great natural beauty. The local landscape is a subject that inspires both professional and amateur photographers alike. While Williamstown will be the subject of most of our work, we will use it to learn principles of universal application. Students will discover the importance of light in making a photograph. They will also learn camera skills and the mechanics of digital photography, which will be reviewed at biweekly class meetings. In addition to photographing and critiquing images, the class will visit collections at the Clark Art Institute and WCMA to see original work and examine and discuss books on reserve at Sawyer Library. An overview of the history of landscape photography will be provided with an emphasis on American workers such as Carlton Watkins, Eadweard Muybridge, Alfred Stieglitz, Eliot Porter and Ansel Adams. We will also demonstrate examples of different cameras such as a large format. Students will produce a body of successful photographs that will be projected at the Winter Study presentation day and on display at http://drm.williams.edu/projects/, http://nicholaswhitmanphoto.com/winterstudy2014/.
Students will submit short written explanations with each of their photographic assignments.
METHOD OF EVALUATION: Evaluation will be based on attendance, the student's photography, and their presentation.
PREREQUISITES: Prerequisites: students will need a digital single lens reflex camera (DSLR) or a new generation electronic viewfinder (DSL) camera such as those by Sony or Olympus. See http://digital-photography-school.com/blog/how-to-buy-a-dslr-camera/. Also a laptop pc, with Adobe Lightroom 5 and a 1T external hard drive.
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Preference given to first-year students and sophomores.
COST: $100-
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Nicholas Whitman
EMAIL: nwhitman@roadrunner.com

ADJUNCT BIO: : Nicholas Whitman is a professional photographer and the former Curator of Photography at the New Bedford Whaling Museum. A 1977 graduate of the Rochester Institute of Technology, he has honed his craft to make landscape photographs of power and depth. See more at www.nwphoto.com.

GEOS 31 Senior Thesis
To be taken by students registered for Geology 493-494.

GERMAN

GERM S.P. Sustaining Program for German 101-102
Something new and different for students enrolled in German 101-102. Practice in the use of German for everyday purposes; creation and performance of short dramatic sketches through group collaboration; games; songs; storytelling; reading. No homework.
Requirements: active participation and regular attendance earn a "Pass" grade.
Prerequisites: German 101 or equivalent. Limited to German 101-102 students.
Cost: approximately $5 for photocopied materials.
Meeting time: mornings, three times a week 9-9:50 a.m.

GERM 14 The Life and Death of a Vanished Nation: East Germany, 1949-1990 CROSSLISTING: HIST 14
See under HIST for full description

GERM 30 Honors Project
To be taken by honors candidates following other than the normal thesis route.

GERM 31 Senior Thesis
To be taken by students registered for German 493-494.

HIST 12 Black Radical Film CROSSLISTING: AFR 10
See under AFR for full description

HIST 14 The Life and Death of a Vanished Nation: East Germany, 1949-1990 CROSSLISTING: GERM 14
COURSE DESCRIPTION: In 1989, in the wake of the rapid crumbling of their power in the face of massive popular resistance, the authorities in the German Democratic Republic (Deutsche Demokratische Republik, or DDR) opened the Berlin Wall. Within a year the wall had been torn down and the East German state voted itself out of existence, absorbed wholly into the belly of its larger and more powerful neighbor to the West. Suddenly, the nation born of the promise to create a genuine people's democracy and claiming the moral high ground as an anti-Fascist state had vanished, its political culture and social institutions suddenly erased. What were the promises of the regime and what happened to those promises? What were the contradictions in East German society and why and where did resistance slowly build to the point where the entire edifice came crashing down? This course will briefly chart the short history of the DDR, from the founding of the Socialist Unity Party in the Soviet occupation zone of a defeated Germany at the end of the Second World War to the total collapse of the regime in 1989/90. The course will explore key moments in the political history of the DDR, including the uprisings of 1953 and the building of the Berlin Wall in 1961. It will also focus on the social and cultural practices of East German society, exploring the nature of everyday life under the Communist regime. The course will meet three times per week for the four weeks of Winter Study and part of the evidence for our discussions will come from the viewing and analysis of seven films, the majority of which were made in the DDR during its short existence. A textual history of the DDR will also be accompanied by a packet of additional reading materials that will be discussed in class.
METHOD OF EVALUATION: Final ten-page paper
PREREQUISITES: none
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Preference given to History and German majors
COST: $75
MEETING TIME: mornings
INSTRUCTOR: Chris Waters

HIST 15 Spice Routes: The History and Practice of Indian Food CROSSLISTING: ASST 15
COURSE DESCRIPTION: This course aims to introduce students to the history of Indian food alongside its practice: preparing and cooking select dishes that emerged through the historical encounters they will read about. The course will focus on three key historical frameworks: the Mughal Empire, India and the Indian Ocean world, and India's colonial links with Britain. We will think about notions of power, culture and identity, and the way in which such forces shaped the most basic of activities, preparing and consuming food. Readings will include books, articles, cookbooks and historical primary sources. The dishes students will learn to cook will give them a different window onto the global spice trade, multiple forms of empire, religion and caste, gender, and other issues raised by the readings and crucial to the understanding of Indian history as a whole.
METHOD OF EVALUATION: 3-4 page weekly papers and short final presentation
PREREQUISITES: None
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Students will be selected on the basis of a short paragraph on their favorite Indian dish and why it is their favorite. Email the paragraph as a word document or pdf to Professor Kapadia (ak16@williams.edu)
COST: approximately $75. This includes groceries required for the cooking during the course, books and course packet. Any purchases made at the Indian grocery store, other than what is required for the course, including snacks/meals eaten at the restaurant (which is in the Indian grocery store), will have to be paid for by the students themselves.
MEETING TIME: mornings; two 3-hour morning classes, divided between discussions of readings and practical cooking sessions ending with lunch (that we cooked in class) and cleaning up. We will also make one trip to the Indian grocery store in Albany at the beginning of the course (most likely on January 8).
INSTRUCTOR: Aparna Kapadia and Aruna D'Souza

NOTE: We will be cooking both vegetarian and non---vegetarian dishes. However, it will not be possible to accommodate strict dietary restrictions. Contact instructors before signing up if you have concerns about this.

ADJUNCT BIO: Aruna D'Souza is a writer who focuses primarily on issues of food, colonialism, and diasporic experience. She writes a blog, Kitchen Flânerie, and is completing a book manuscript of the same name. She has also published widely on the subject of modern and contemporary art, feminism, and globalization.

HIST 16 American Wars: Directed Independent Reading and Research
COURSE DESCRIPTION: An independent reading and research course on American wars from colonial times to the present. All participants will share a few common readings, but there will be no formal classes. Instead, each participant will meet individually with the instructor to develop a unique reading list on a topic of their choice. Once their topic is decided, they will spend the rest of the Winter Study researching and writing a substantial paper (at least 25 pages) on their topic.78
METHOD OF EVALUATION: Requirements: a research paper of at least 25 pages in length.
PREREQUISITES: No prerequisites except interest in American military history.

ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Preference will be given to History majors and those students who have demonstrated an interest in the history of warfare.
COST: $40
MEETING TIME: other
EXPLANATION OF MEETING TIME: Individual meetings; no formal classes
INSTRUCTOR: James Wood

HIST 17 Russia, Ukraine, Crimea CROSSLISTING: LEAD 17
COURSE DESCRIPTION: Responding to the "Maidan Revolution" in Ukraine, in March 2014 the Russian Federation annexed the Crimean peninsula, an action condemned as illegal by the new Ukrainian government and most of the international community but hailed by most of the Russian population. Ukrainian and Western critics denounced Russian President Vladimir Putin for acting aggressively and irrationally and claimed that he sought to resurrect the former Soviet Union or Russian Empire, while Putin's Russian supporters praised him for righting what they considered "an historic wrong" and for returning Crimea to its Russian homeland and Russia to its rightful place in the world. While Putin was vilified by much of the international press, his popularity in Russia soared. In eastern Ukraine, encouraged by the Crimean example shadowy groups of Russian nationalist Ukrainians and "volunteers" from Russia seized control of several cities and, by means of force and questionable referenda, asserted regional independence, hoping to provoke Russian annexation but instead inciting violent civil unrest. Though sparked and shaped mainly by events in Ukraine between the winter of 2013 and the early summer of 2014, this still on-going international tension and turmoil in Ukraine also have roots in the past, reflecting both the complicated history of Ukrainian national identity and statehood and Russia's imperial heritage. This course will explore how the past and historical memory shape the present and how knowledge of the past can help us understand the present by examining the current conflict within Ukraine and between Ukraine and Russia, particularly with regard to Crimea. Hence the first two weeks of the course will be devoted to a consideration of such historical questions as the development of Ukrainian culture, national identity, and statehood, the experiences of Ukrainians and Crimean Tatars within the Russian Empire and its Soviet successor, and the nature of Russian and Soviet imperialism and colonialism and their impact on Russian national identity and "territorialism." The final week will focus on recent events and how they might be understood from an historical perspective.
METHOD OF EVALUATION: Final 10-page paper
PREREQUISITES: None
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Preference to students with some background in European/Russian history/Studies, International Studies, and/or Political Science
COST: $75
MEETING TIME: afternoons
INSTRUCTOR: William Wagner

HIST 18 Chasin' the Blues: A Journey through American Music CROSSLISTING: AMST 18
COURSE DESCRIPTION: Before Eric Clapton and Janis Joplin, there was Rev. Gary Davis and Memphis Minnie. This course will examine the lives and times of the early American blues musicians who recorded in the late Twenties and Thirties, and then "rediscovered" in the Sixties. We will explore this genre of American music through its connections to African music, its development in the American rural south, and its later transformation into the urban blues of the 1940s-1960s. We will trace this journey through readings, audio recordings, and video footage. In addition to regular class attendance, students will be required to write a 10-page research paper and offer their findings in an oral presentation to the class.
METHOD OF EVALUATION: 10-page research paper and an oral presentation
PREREQUISITES: none
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: demonstrated interest in the subject by contacting the professor
COST: $25.00
MEETING TIME: mornings
INSTRUCTOR: Scott Wong

HIST 19 Hidden Treasures and the Amber Room: Impressionist Art Held Hostage CROSSLISTING: ARTH 18/ASTR 19
See under ASTR for full description

HIST 30: Workshop in Independent Research
COURSE DESCRIPTION: This course is intended for both junior History majors and sophomores intending on majoring in history who think they might like to do a senior thesis, but who would like to gain more experience in independent research. Students who are interested in exploring a possible topic for a senior thesis are especially encouraged to sign up. This workshop will help familiarize students with methods for doing historical research, including how historians define good research questions; become familiar with the historiography; strategize doing primary research; and identify their sources. Students will also be introduced to doing archival work. Students will pursue their own research on any topic of their own choosing for a 10-page final paper, and we'll use a workshop format to discuss the research and writing of that paper.
METHOD OF EVALUATION: Class participation and final paper
PREREQUISITES: None
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Interest in course subject
COST: $200 (gas + lunch money for one field trip to an archive nearby)
MEETING TIME: Tuesdays and Thurdays
INSTRUCTOR: Karen Merrill

HIST 31 Senior Thesis

To be taken by students registered for JWST 493 or 494.

JUSTICE AND LAW

JLST 13 United States Environmental Law: Its Historic Past, Its Uncertain Future CROSSLISTING: ENVI 13
Taught from the perspective of an experienced trial attorney, this course will examine the role environmental law plays in the United States today in light of how that role has developed during the nearly fifty years since the modern era of environmental law began. We will also consider the reasons why the law's early application in the first half of the 20th century almost exclusively to the conservation and preservation of natural resources took on in the second half a markedly different approach, one emphasizing pollution control and all but ignoring resource conservation.
The course will begin by tracing the development of an American consciousness towards the environment through an examination of our law and our literature, using over fifty slides of paintings and sculptures to help tell the story. We will examine the historical and legal choices we as Americans have made which have put our environment on trial. Our journey begins with the Puritans of New England and the planters of Virginia and their predecessors in the New World and then moves swiftly to the beginning of the modern era in environmental law and to its now uncertain future.
METHOD OF EVALUATION: ?
PREREQUISITES: None
ENROLLMENT LIMIT: ?
METHOD OF SELECTION: ?
COST: $0
ADJUNCT INSTRUCTOR: Philip McKnight

Philip R. McKnight '65 is a trial and appellate attorney. At Williams he completed the honors program for both American History and Literature and European History. He earned his law degree from The University of Chicago Law School and then practiced in the state and federal courts of New York and Connecticut, as well as in Europe.

JLST 14 Mock Trial
COURSE DESCRIPTION: This course was offered in 2012 and 2013 and provides students an opportunity to learn how a trial lawyer goes about preparing and trying a case. The instructors have secured course materials from the American Mock Trial Association, and this year's case likely will be a defamation case brought by a political candidate against a reporter. Two teams will be formed and the individual teams will work together to present two trials, one as plaintiff and one as defendant. The students will play the roles as both witnesses and attorneys to present the case. The initial lecture is called "Anatomy of a Trial," and introduces the students to the basic elements of a civil trial, including selection of witnesses, creation of an overall theme, use of evidence, direct and cross examination and trial tactics. Subsequent classes will involve the teams working with the lecturers to select effective trial witnesses from a pool of potential witnesses and to prepare opening statements, direct and cross examinations, and closing arguments. The final two days will be devoted to the trial of the case, with the teams switching sides on the second day. In the past, we have been able to secure local attorneys to play the role of judge and local residents to serve as jurors.
METHOD OF EVALUATION: Two trials are presented in the last two days, one as plaintiff and one as defendant so students have to learn both sides of the case. Students will be evaluated on their work preparing and presenting the case.
PREREQUISITES: None
ENROLLMENT LIMIT: Hope for 12 minimum and 24 maximum, 8 minimum
METHOD OF SELECTION: has never happened
COST: costs for duplication of materials is minimal
MEETING TIME: Mondays and Tuesdays -- 12:00 to 4:00 on Mondays and 10:00 to 2:00 on Tuesdays
ADJUNCT INSTRUCTOR: David Olson '71 and Gene Bauer '71

ADJUNCT BIO: Dave Olson and Gene Bauer, both Williams '71, are attorneys with many years experience as civil trial attorneys working for law firms and corporations to conduct trials and supervise major pieces of civil litigation. They have taught this same course, using different cases, on two prior occasions, 2012 and 2013.

LATINA/O STUDIES

LATS 31 Latina/o Honors Thesis Seminar
Students must register for this course to complete an honors project begun in the fall or begin one to be finished in the spring.
Prerequisite: approval of program chair.
Enrollment limited to senior honors candidates.

LEADERSHIP STUDIES

LEAD 10 Institutional Leadership and Social Responsibility
COURSE DESCRIPTION: This course will examine a wide variety of issues related to leadership and responsibility in both public- and private- sector settings. We will explore these issues through the experiences of men and women who have held leadership roles in these contexts. The majority of class sessions will be led by guest speakers, most, though not all, of whom are distinguished alumni of the college. Students will be expected to take an active role in introducing and helping to lead discussions involving the guest speakers.
METHOD OF EVALUATION: attendance, preparation, participation in class discussion, a final 10-page paper
PREREQUISITES: None
ENROLLMENT LIMIT: 18
METHOD OF SELECTION:
COST: $0
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Earl Dudley and Peter Berek

ADJUNCT BIO: Earl Dudley-Professor of Law, University of Virginia School of Law, 1989-2008; Private law practice, Washington, DC 1968-1975, 1977-1989; General Counsel, Judiciary Committee, U.S. House of Representatives 1975-1977. Peter Berek-Professor of English, Williams College, 1967-1990; Dean of the College, Williams, 1975-78; Special Assistant to the President, Williams 1987-90; Dean of Faculty and Provost, Mt. Holyoke College, 1990-1998 (interim president, fall 1995); Professor of English, Mt. Holyoke, 1990-2011; Visiting Professor of English, Amherst College, 2009-present.

See under HIST for full description

LEAD 18 Wilderness Trip Leadership & Leadership in Wilderness Emergency Care
This Winter Study project is for students who would like to participate in an off-campus experiential education opportunity. Students will be required to research an appropriate accredited program i.e., National Outdoor Leadership School, Outward Bound etc., that will provide a suitable learning environment and be at least 14 days in length. The Director of the Williams Outing Club will assist students in their search if necessary. Upon choosing a program and being accepted, students will meet with the Director in a pre-program meeting in December to create a framework for observing group dynamics and studying a variety of leadership styles. A required 10-page paper based on their journals will be required immediately after their return to campus for the start of third quarter. There will also be a follow up class to debrief the experience in the first week of February. All programs must meet with the approval of the Outing Club Director. In addition to off-campus opportunities, there will be a Wilderness First Responder Emergency Care course that will take place on campus which is open to all class years. Contact Scott Lewis for details.
Requirements: course approval by WOC Director, daily journal writing with focus on leadership and group dynamics, 10-page paper and 2 class meetings pre and post trip. Student assessment will be based on ten page paper and class discussions.
No prerequisites. Off-campus opportunities are not open to first-year students. Interested students must consult with WOC Director before registration.
Enrollment limit: 20.
Cost to student will vary depending on the program selected-range is generally from $1,500-3,000.
ADJUNCT INSTRUCTOR: SCOTT LEWIS, Director of the Outing Club
Sponsor: MELLOW

MARITIME STUDIES

MATHEMATICS AND STATISTICS

MATHEMATICS

MATH 10 Pilates: Physiology and Wellness
COURSE DESCRIPTION: General Description: During the first half of the twentieth century, Joseph Pilates developed a series of exercises he called Contrology designed to strengthen core muscles and improve overall health. Now known as Pilates, these exercises are meant to increase flexibility, strength, endurance, and spinal health. In this course, we will study the physiology and origins of the Pilates exercises as well as how Pilates can be incorporated into an overall wellness plan. Class time will include both Pilates routines, discussion, and guest lecture. There will be weekly quizzes, readings, and a final project. We will meet 3 mornings per week.
METHOD OF EVALUATION: class participation, quizzes, and final project
PREREQUISITES: None.
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Selection will be based on student responses to a course survey.
COST: 125 for books and equipment
MEETING TIME: mornings
INSTRUCTOR: Allison Pacelli

MATH 11 History of Deaf Culture in America
COURSE DESCRIPTION: 1817 was a critical point in American deaf history: the American School for the Deaf (ASD) opened. Prior to this event, deaf individuals developed ways of communicating through various forms of sign language but a common nationwide language was absent. However, this changed after Thomas Hopkins Gallaudet spent time in France learning the manual method of teaching deaf students (i.e. through sign language). Upon returning to the United States Gallaudet helped open the ASD, which implemented manualism. These methods were introduced into other schools and ultimately led to the development of what is now known as American Sign Language (ASL). In this course, we will learn about the history of deaf culture beginning with the work of Gallaudet and continuing through today. We will discuss controversies surrounding the introduction of manualism and the push by some individuals to use oralism instead (i.e. teaching through spoken language). Further, we will learn about modern deaf culture. For example, we will examine life as a deaf person in a hearing family and vice versa, cochlear implants, and the evolution of society's perception of the deaf community.
METHOD OF EVALUATION: Evaluation will be based on attendance and class participation. There will also be a final 10-page paper or final project and in-class presentation.
PREREQUISITES: none
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: Preference will be given to students with expressed interest in deaf culture based on a short description of why they are taking the course.
COST: approximately $60
MEETING TIME: mornings
INSTRUCTOR: Julie Blackwood

MATH 12 The Mathematics of LEGO Bricks
COURSE DESCRIPTION: Since their introduction in 1949, LEGO bricks have challenged and entertained millions. In this course we'll explore some of the connections between LEGO bricks, mathematics and popular culture. Topics include the following:

Given a collection of LEGO bricks, how many different structures may be built using only the standard snapping? The analysis requires us to develop some of the theory of combinatorics, and deal with the issue of two configurations that look different but are the same after standard moves (such as rotation, flipping about a line, and so on). We will use this problem as a springboard to study related issues in mathematics, especially in game theory.

Given a collection of LEGO bricks, how can you build desired objects? This ranges from building miniature replicas to functional items (which can now be done through 'special' pieces).

The business model of the LEGO Group has changed greatly since the '40s and '50s. While they still hold their products to the highest standard, the generic themes (such as city and space) are now greatly supplemented by various alliances (Superheros, Star Wars, Harry Potter, Lord of The Rings, ...). We will examine some business cases involving LEGO in order to get a sense of how companies determine priorities, including a discussion of the recent LEGO Friends line and gender issues.

One of the greatest computational advances is the ability to parallelize certain computations. Some programs must be run in order, where Step N cannot be done until Step N-1 is completed. Other problems, however, are such that multiple steps can be done simultaneously; examples include GIMPS (the Great Internet Mersenne Prime Search), SETI, mapping the human genome, factorizing numbers, and checking the Riemann Hypothesis. We will discuss the general theory of such computations and its effect on attacking important problems. We will implement our skills by parallelizing the building of the LEGO Star Wars Superstar Destroyer; as it is 3152 pieces, we see the need of having a good, efficient strategy if we are to complete it during the course! We tried to do it in under 10 minutes last year and just failed at 10:21; save me from doing this course three years in a row!

Last year's homepage here: http://web.williams.edu/Mathematics/sjmiller/public_html/legos/
METHOD FOR EVALUATION: Evaluation will be based on class participation, the completion of problem sets involving the mathematical concepts, a final report on one of the topics, and adherence to 'Leg Godt'.
PREREQUISITES: None.
ENROLLMENT LIMIT: 100
METHOD OF SELECTION: Preference will be determined if needed by an application essay, interview and/or meeting.

COST: $25.00
MEETING TIME:
EXPLANATION OF MEETING TIME: TBD
INSTRUCTOR: Steven Miller

MATH 13 Calculus Preparation
COURSE DESCRIPTION: Taking Calculus in the Spring? Want to beef up you math skills? This course will help students prepare for a Spring Semester Calculus course by reviewing algebra, pre-calculus, and introductory calculus material, and covering topics that may be missing from a student's background.
Students will meet with the instructor to discuss their background and plan a course of study. Coursework will be done independently and working in small groups with the instructor.
METHOD OF EVALUATION: Evaluation will be based on participation and homework.
PREREQUISITES: None. Have to be enrolled in calculus in the spring
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Preference will be given to QS students and those going into Math 130 or Math 140
COST: $25.00
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Lori Pedersen

ADJUNCT BIO: Lori Pedersen has taught many regular semester courses at Williams including precalculus, calculus and discrete mathematics.

MATH 14 Introductory Photography: People and Places CROSSLISTING: SPEC 10
COURSE DESCRIPTION: This is an introductory course in photography, both on color and black & white photography and using the digital camera. The main themes will be portraiture and the landscape. No previous knowledge is assumed, but students are expected to have access to a 35 mm (or equivalent) digital camera, with manual override or aperture priority. The topics covered will include composition, exposure, camera use, direction and properties of light, and digital imaging. Students will develop their eye through the study of the work of well-known photographers and the critical analysis of their own work. We will discuss the work of contemporary photographers such as Mary Ellen Mark, Joel Meyerowitz, Constantine Manos, and Eugene Richards. Students will be expected to spend a considerable amount of time practicing their own photography outside of class. There will be one required local half-day field trip. Students will also be introduced to Photoshop and Lightroom, and will work on their own images with these programs.
METHOD OF EVALUATION: Evaluation will be based on class participation, an in-class quiz and a final project.
PREREQUISITES: None
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: Email questionnaire
COST: $60.00
MEETING TIME: mornings
INSTRUCTOR: Cesar Silva

MATH 16 The National Parks: America's Best Idea
COURSE DESCRIPTION: Inspired by Ken Burns' documentary which gave the title of this course, we will talk about the history, development, geography, ecology, environmental issues, as well as other challenges faced by the US National Parks. We will go in order and talk about each of the 59 National Parks and select a few to discuss in detail. Each student will choose one National Park and will become the "local expert" in that park. The students will be asked to prepare a Final Project on a National Park of their choice and give an in-class presentation.
METHOD OF EVALUATION: Evaluation will be based on attendance and class participation. There will also be a 10-page Final Project and an in-class presentation.
PREREQUISITES: None
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Preference will be given to students with expressed interest in the course based on a short description of why they want to be in the class.
COST: 25
MEETING TIME: mornings
INSTRUCTOR: Mihai Stoiciu

MATH 17 The History, Geography and Economics of the Wines of France
COURSE DESCRIPTION: The history of wine making in France is long, dating back to the Greeks and later the Romans. Of course, geography and climate play an essential and important role in grape growing The first areas to be planted were the areas around present day Marseille, (Massalia in Ancient Greece) in Provence, and the areas just north farther up the Rhône river valley. We will briefly survey the history of wine in France from the Romans through the middle ages, the influence of monasteries on wine production, the impact of the French revolution and the evolution of the modern classification system in the 19th century, which is still in place today. We will look at temperature data and study the relationship between temperature change and quality. We will discuss the impact of wine \"scorers\" such as Robert Parker as his influence on the economics of the French wine market. Finally, we will discuss the role of wine in French cuisine and the importance of wine to French culture.
We will read about the history of wine production, study the geography of France and perform various statistical analyses relating to quality, temperature and production. In particular we will study the relationship between price and quality. We will sample wines during much of the course, so students will need to be of legal age to take part in the course.

[6] Wine and War: The French, the Nazis, and the Battle for France\'s Greatest Treasure, D. Kladstrup and P. Kaldstrup , Broadway Books, 2002.
METHOD OF EVALUATION: There will be several short papers on various topics that we discuss as well as an individual research topic paper of 10-15 pages that will be due and presented at the end of the course.
PREREQUISITES: None, but students must be 21 years of age at the time of the course.
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: By short essay
COST PER STUDENT: $150.00 for wines
MEETING TIME: afternoons, Monday and Wednesday, 2 - 5 pm
INSTRUCTOR:: Richard De Veaux

MATH 19 Design School CROSSLISTING: ARTS 19
Stanford has a world-renowned school of design, a synthesis between classical academics, silicon valley technology, and a startup culture. Our class brings this approach to the purple mountains, using design thinking in order to tackle big-scale projects at Williams, such as dorm-room and class-room space reallocation, online database interfaces, the future of collegiate athletics, the role of physical versus online learning, or any other ventures the class find exciting. After a week of learning to quickly prototype models and fostering teamwork between diverse disciplines, the majority of the course will focus on collaborative attempts in sketching, creating, and presenting visual thinking solutions to these big problems. And in this spirit, the course is jointly taught by mathematics and WCMA, bringing together art, design, space, and theory.
METHOD OF EVALUATION: Primarily on attendance and participation, including a final project that consists of written materials about the process, a design video, and a physical prototype.
PREREQUISITES: None
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Priority for those with experience in or intense curiosity for visual design, or those who are involved in large-scale projects at Williams.
COST: about $40 for books
MEETING TIME: mornings
INSTRUCTOR: Satyan Devadoss (Mathematics) and ADJUNCT INSTRUCTOR: Tina Olsen (Director of WCMA)

MATH 20 Humor Writing CROSSLISTING: ENGL 20
COURSE DESCRIPTION: What is humor? The dichotomy inherent in the pursuit of comedic intent while confronting the transient nature of adversity can ratchet up the devolving psyche's penchant for explication to a catastrophic threshold, thwarting the existential impulse and pushing the natural proclivity for causative norms beyond the possibility of pre-situational adaptation. Do you know what that means? If so, this is not the course for you. No, we will write funny stuff, day in and day out. Or at the very least, we will think it's funny. Stories, essays, plays, fiction, nonfiction, we'll try a little of each. And we'll read some humor, too.
Is laughter the body's attempt to eject excess phlegm? Why did Plato write dialogues instead of monologues? Who backed into my car in the Bronfman parking lot on the afternoon of March 2, 2014? These are just a few of the questions we will not explore in this course. No, we won't have time because we will be busy writing. (But if you know the answer to the third question, there's a $10 reward.)
Plan to meet 6 hours a week, and to spend at least 20 hours a week on the course. No slackers need apply. Produce or become produce. Everyone will submit at least one piece for publication.
METHOD OF EVALUATION: Completion of writing assignments, which will include at least 20 pages of writing.
PREREQUISITES: Sense of humor(broadly interpreted.)
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: They will submit writing to the instructor for evaluation.
COST: $40
MEETING TIME: mornings
INSTRUCTOR: Colin Adams

MATH 30 Senior Project
To be taken by candidates for honors in Mathematics other than by thesis route.

MATH 31 Senior Thesis
To be taken by students registered for Mathematics 493-494.

STATISTICS

STAT 10 Data Visualization
COURSE DESCRIPTION: Through modern technology, our world is becoming increasingly quantifiable, and it is now easier than ever to collect accurate and timely data from sources of myriad variety. Data visualization provides one means to detect patterns and structure in "big data" which can translate into accessible information to further scientific knowledge and improve decision

making.
In this course, we will study techniques for creating effective visualizations based on principles from graphic design, visual art, perceptual psychology, and neuroscience. The class will meet about 8 hours a week for lecture and discussion. In addition to participating in class discussions, students will be expected to keep a daily journal, complete short programming and data analysis exercises as well as a final data visualization project. Students will be expected to write up their process and present their final visualization to the class.
There are no prerequisites for the class; however, basic knowledge of statistics and an eagerness to learn some computer programming will be useful.
METHOD OF EVALUATION: Active participation, programming exercises, journals, and a final project and presentation.
PREREQUISITES: None
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Preference will be given to students writing to the instructor with a short paragraph about why they want to be in this class.
COST: 60
MEETING TIME: afternoons
INSTRUCTOR: Brianna Heggeseth

STAT 30 Senior Project
To be taken by candidates for honors in Statistics other than by thesis route.

STAT 31 Senior Thesis
To be taken by students registered for Statistics 493-494.

MUSIC

MUS 10 Chamber Orchestra of Williams (COW)
COURSE DESCRIPTION: The Chamber Orchestra of Williams will be a dual purpose ensemble. COW will offer an opportunity for students interested in conducting to work in front of a live orchestra. The students will learn to address the many issues involved in the craft of conducting; ensemble, intonation, balance, rhythm, tempo, beat patterns, etc. A primary focus will be the development of leadership skills associated with directing an orchestra. In addition to working with student conductors the orchestra will perform as a chamber group without a conductor. Under my guidance every student in the orchestra will have an opportunity during rehearsals to comment on, and make suggestions about rehearsal issues. Discussions about how to fix problems involves careful diplomacy, as the fixes often involve small groups or individuals. I will work with the conductors and oversee the process of the conductorless orchestra. COW will rehearse 6 hours per week with me. I'll meet with the conductors separately 3 to 6 hours each week. Additional rehearsals can be scheduled by the members of the orchestra. Students will be required to practice their parts before scheduled rehearsals. A final performance will be take place at the end of Winter Study.
METHOD OF EVALUATION: The students will be expected to practice their parts in order to be prepared for every rehearsal.
PREREQUISITES: Clearly a student must be able to read music and play an orchestral instrument. Pianists and singers would be eligible to conduct.
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: by audition, or if there is a need for a specific instrument to fill out the orchestra
COST: $0
MEETING TIME: afternoons
INSTRUCTOR: Ronald Feldman

MUS 11 Hildegard of Bingen: Medieval Mysticism and Music CROSSLISTING: REL 11
COURSE DESCRIPTION: The 12th-century German abbess Hildegard of Bingen was one of the most remarkable people of her age. She was a mystical theologian and reformer, poet, composer, dramatist, artist, and author of treatises on natural science and medicine; she corresponded with royalty and popes as well as monastics and laity. Yet she lived most her long life in a remote cloister on the banks of the river Rhine, and was virtually lost to history until her recent rediscovery 900 years after her birth. This discussion course draws on recent recordings, films, and scholarship to explore the life and times of this extraordinary woman, using her music as the window into her spirituality, her thought, and her world. If possible, we will take a field trip to visit the Abbey of Regina Laudis in Bethlehem, CT.
METHOD OF EVALUATION: Evaluation will be based on class participation, two short class presentations, and a final project with presentation. Students who wish to incorporate musical performance or other artistic aspects into their presentations and final project are encouraged to do so. Attendance is mandatory.
PREREQUISITES: No prerequisites. An ability to read music is not required.
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Preference given to freshmen and sophomores, and to students with a demonstrated interest in music, religion, medieval history, or medieval art.
COST: no more than $100
MEETING TIME: mornings
INSTRUCTOR: M. Jennifer Bloxam

MUS 12 Performing the Ramayana
COURSE DESCRIPTION: The Hindu epic, the Ramayana, has captivated the interest and imagination of both religious and secular audiences; the story has served as the inspiration for artists in every imaginable discipline. This course has two major parts: in the first we will survey a range of genres and works that tell or interpret the Ramayana in some way. We will explore interpretations of the story and its characters through imagery and iconography, written material, movies and performance art. In the process, students will be introduced to a number of art forms, and religious and cultural practices, from throughout the Hindu world. Sources range from classical concert pieces to comic books, tourist shows to heavy metal concerts. In the second part of the course, students will create their own performed interpretation of a selected segment of the Ramayana, to be completed by individuals and/or small groups. The course will culminate in a retelling of selections of the Ramayana through the students' original works.
METHOD OF EVALUATION: In addition to regular attendance and completing a final performance piece, students will be expected to keep a journal and contribute discussion points to class meetings.
PREREQUISITES: None
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Preference to Seniors
COST: $50
MEETING TIME: mornings
INSTRUCTOR: Corinna Campbell

MUS 13 Introduction to Klezmer Music
COURSE DESCRIPTION: This course provides an introduction to Klezmer music. Students will focus on different types of Klezmer tunes, including Bulgars, Hurras, Doinas, Shers and Chosidls. Sephardic tunes and Yiddish Theater tunes from the United States will also be studied. The various melodic and harmonic modes of Klezmer music will be studied, including Major, Minor, Ahava Raba, Misheberakh and Adonai Molokh. Emphasis will be placed on learning to phrase in the Klezmer style, the functions of the different instruments in a Klezmer group, harmonic phrase structure, melodic and rhythmic interpretation, and the role of embellishment and improvisation in Klezmer music. Coachings and performance critiques will provide feedback on student work.
In addition, the course material will include discussion of the history and development of Klezmer music, both in Europa and the United States. Reading assignments will be given from books such as The Essential Klezmer by Seth Rogovoy, Discovering Jewish Music by Marsha Bryan Edelman, The Compleat Klezmer by Henry Sapoznik and Stempenyu by Sholom Aleichem. The film "A Tickle in the Heart," about the Epstein brothers and their role in Klezmer music in the United States will be shown and discussed during one of the classes. If feasible, a field trip to the National Yiddish Book Center at Hampshire College will be planned.
The class will meet twice a week for three hour sessions. Outside of class, it is expected that the students will practice and rehearse the music individually and with the group, and complete the assigned reading.
METHOD OF EVALUATION: Evaluation based on participation in the musical coachings and class discussions about the the assigned materials. On the last day of class there will be a performance by the student klezmer group and individual oral presentations on a klezmer music topic relating to the readings and/or the music studied. The performance and oral presentations will be evaluated. Attendance and class participation will also be taken into account.
PREREQUISITES: facility on a musical instrument
ENROLLMENT LIMIT: 8
METHOD OF SELECTION: Audition on the instrument of the student's choice
COST: $0. Students must supply their own musical instruments, except for piano and drum set.
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Paul Green
SPONSOR: W. Anthony Sheppard

ADJUNCT BIO: Paul Green, a professional clarinetist in the Berkshires, has a B.A in Theory and Composition of Music from Yale College, an M.S. in Performance from the Juilliard School and an M.M. in Jazz Performance from Florida International University. He has taught music at a variety of Institutions, including the Lynn University Conservatory of Music, Florida International University, Florida Atlantic University, the Hotchkiss School and the Berkshire Music School.

MUS 31 Senior Thesis
To be taken by students registered for Music 493, 494.

NEUROSCIENCE

NSCI 31 Senior Thesis
To be taken by students registered for Neuroscience 493-494.

PHILOSOPHY

PHIL 10 What Should We Do With Our Brain?/Reading Catherine Malabou
COURSE DESCRIPTION: Is the mind a mirror? A computer? A projector? How might a Hegelian talk about neuroscience? Are there interesting and meaningful parallels between the ways in which we talk about brain structures and social and economic structures? Why, if at all, should we be interested in the metaphors we use to talk about the brain? How might the concept of "plasticity" help us rethink "destruction," "loss," and "death"? In this Winter Study tutorial we read short works by the French philosopher Catherine Malabou to begin to answer these questions.

Readings may include: What Should We Do With Our Brains? (2008), Ontology of the Accident (2009) and The New Wounded: From Neurosis to Brain Damage (2012).
METHOD OF EVALUATION: 2 5-page tutorial papers
PREREQUISITES: One upper level course in Philosophy, Political Theory, or Critical Theory
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Student petitions containing background information and reasons for choosing the course.
COST: $60
MEETING TIME: other
EXPLANATION OF MEETING TIME: Tutorial meetings and one or two seminar meetings.
INSTRUCTOR: Jana Sawicki

PHIL 12 Ethics in Public Health
COURSE DESCRIPTION: It is the beginning of Winter Study on the Williams campus. Students are just arriving after their semester break, and along with them, a novel and highly transmissible strain of avian flu. It is a fictional scenario, but not unimaginable. Over the course of the winter study period we will watch it unfold, and use it as a launch pad for investigating ethics in public health. In particular, the various stages of the epidemic will give us the opportunity to explore the ethics of disease surveillance, research, resource allocation, and compulsion within the public health context (e.g., mandated reporting of disease, isolation and quarantine, compulsory vaccination and treatment), among other topics. Students will be expected to complete background readings in public health ethics taken from the philosophical, bioethics, and professional public health literature, and to participate actively in class discussions. In addition, students are responsible to give in-class presentations in which they propose public health measures at various stages of the fictional epidemic, and defend the ethical dimensions of the measures they propose. (These may be team presentations, depending on class enrollment.) Each student will submit a brief (e.g., 2-3 page) written response to at least three other presentations.
METHOD OF EVALUATION: One in-class presentation, three short (2-3 page) response papers, and participation
PREREQUISITES: none
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: public health concentrators and philosophy majors will receive enrollment priority
COST: $20 for reading packet
MEETING TIME: afternoons
INSTRUCTOR: Julia Pedroni

PHIL 13 Boxing
COURSE DESCRIPTION: Boxing is one of the world's oldest sports, and there are 3000 year old artistic representations of boxing from ancient Egypt. The history of boxing in the United States during the nineteenth and twentieth centuries reflects the history of the nation. Issues of class, ethnicity, race, and gender have played a central role in the sport. Stories about boxing also play a central role in the popular culture. In this course we will look at some treatments of boxing by social historians, examine some depictions of boxing in documentary and dramatic films, and watch some classic fights.
We will also learn some of the fundamental skills involved in boxing. Training as a boxer will give men and women a better appreciation of the physical demands involved. Four days a week we will engage in an intensive training regimen working on basic punching technique, footwork, defense and conditioning. The workouts will involve minimal contact, but will be physically demanding. Students will need to purchase boxing gloves, handwraps, and a jump rope.
Evaluation will be based on attendance, participation, and a 10-page final paper.
No prerequisites. *Enrollment limit: 20.*
Cost to student: $150.
Meeting time: mornings workouts; movies, discussions and seminars in the afternoon and evening
INSTRUCTOR: Keith McPartland

PHIL 14 Plato's Symposium and Its Afterlife CROSSLISTING: CLAS 14/COMP 14/WGSS 14
See under CLAS for full description

PHIL 15 Deleuze: Philosophy, Literature and the Arts
COURSE DESCRIPTION: The French philosopher Gilles Deleuze (1925-1995) is considered one of the most important thinkers of the 20th century by many people interested in continental philosophy, post-structuralism and post-modernism. He has had a huge influence not only within philosophy itself, but also in as varied disciplines as literature, art theory, cinema, architectural theory and contemporary dance, to name a few. His multi-faceted work spans from remarkable re-readings of classical philosophers (Spinoza, Nietzsche, Hume, Bergson, Kant and Leibniz) to the development of his own philosophy centered on becoming and affirmation via works on literature, art, cinema, political and psychoanalytical theory.
This course will offer an introduction to different aspects of Deleuzian thought, starting out with his re-definition of philosophy, art and science as creating activities. We will subsequently address some of Deleuze's core themes: the nature of philosophy and the image of thought, the body and its affectivity, the nature of time through concepts like becoming, event and lines of flight, the relationship between philosophy and literature (in particular, American), and what it means to have an idea in cinema. Through a reading of a selection of texts and chapters from his different books, we will aim to develop an overarching understanding of one of the key figures in contemporary philosophy, as well as to see how philosophy as such is intimately connected to literature, art and cinema - to see how it is possible to think philosophically not only within philosophy, but with, and from out of, other creative disciplines.
Format: seminar (introduction to the texts given by the professor, followed by discussion).
METHOD OF EVALUATION: Attendance, participation in discussions, 10 pgs final paper
PREREQUISITES: None. Basic knowledge of the history of philosophy is recommended but not required.
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: In case of overenrollment, preference will be given to students interested in philosophy, literature, film and political theory.
COST: Books and course package: 30 $
MEETING TIME: afternoons; 3x2 hour meetings per week + film viewing.
ADJUNCT INSTRUCTOR: Fredrika Spindler

ADJUNCT BIO: Fredrika Spindler, PhD, Associate professor of philosophy at Södertörn University, Stockholm, Sweden; STINT Fellow and Richmond Visiting Professor at Williams College 2013-2014; Visiting Professor at PUC University, Rio de Janeiro, Brazil regularly since 2006. Areas of specialization: Continental philosophy, Spinoza, Nietzsche, Deleuze.

PHIL 25 Eye Care and Culture in Nicaragua
COURSE DESCRIPTION: Students will be divided into two groups. One group will read extensive excerpts from Steven Kinzer's Blood of Brothers, which will introduce them to Nicaragua's complex history. A second group will read excerpts from Gioconda Belli's The Country Under My Skin, a memoir focusing on its author's involvement in the Sandinista revolution, and several documents specifically concerning the Atlantic Coast Autonomous Regions of Nicaragua. The groups will make presentations to each other (this a practice first used in 2014, when it was a great success).
The eye-care work the students will do in Nicaragua is described in this proposal's account of the intellectual substance of the course.
PREREQUISITES: None, although it is helpful to include at least three students who are fluent in Spanish.
method of evaluation: Presentations and journals as described above, along with on-site observation of the students' participation in the eye clinics.
ENROLLMENT LIMIT: 12
METHOD FOR SELECTION: Students will submit applications indicating why they want to take the course. In 2014, we were able to include (1) all seniors who applied, and (2) all students who had applied for inclusion in the course in earlier years but been excluded. Others were selected on the basis of their applications. Those who were excluded were informed that if they reapplied in later years, we would attempt to accommodate them. We hope to be able to continue to do so. As indicated above, it is important to have some students who are fluent in Spanish, so that may be a factor in some cases.
resources: Classroom space for three mornings prior to the trip to Nicaragua, and one following our return to Williamstown; classroom space for somewhat longer on the day on which students are trained in giving eye exams. Perhaps photocopies of reading materials (although these may instead be posted on Glow). Health Services provides students with information, innoculations, and some medications.
budget: Spreadsheet sent to Barbara Casey
COST: 3100
INSTRUCTOR: Alan White, Robert Peck and Elise Harb

PHIL 31 Senior Thesis
To be taken by students registered for Philosophy 493-494.

PHYSICS

PHYS 10 Holography
COURSE DESCRIPTION: This course will examine the art and science of holography. It will introduce modern optics at a level appropriate for a non-science major, giving the necessary theoretical background in lectures and discussion. Demonstrations will be presented and students will make several kinds of holograms in the lab. Thanks to a grant from the National Science Foundation, we have 7 well-equipped holography darkrooms available for student use. At the beginning of WSP, the class will meet for lecture and discussion three mornings a week and for lab 2 afternoons a week. The later part of the month will be mainly open laboratory time during which students, working in small groups, will conduct an independent project in holography approved by the instructor. Attendance at lectures and laboratory is required. Requirements: students will be expected to attend and participate in all class sessions as well as mandatory study sessions in museums once a week. They will also be required to keep a sketchbook recording their progress and complete a final project. Evaluations will be based on participation, effort, and development. All class sessions are mandatory as well as one session per week at the Clark and Williams College Museums.
METHOD OF EVALUATION: Evaluation will be based on regular attendance, completion of 4 laboratory exercises, and a holography laboratory project with either a poster presentation to the class at the end of WSP or a 10-page paper approved by the instructor.
PREREQUISITES: none
ENROLLMENT LIMIT: 30
METHOD OF SELECTION: if overenrolled, selection will be based on seniority.
COST: $50
MEETING TIME: mornings
INSTRUCTOR: Ward Lopes

PHYS 11 The Making of the Atomic Bomb
COURSE DESCRIPTION: We will delve into the science and technological impact of the atomic bomb. Richard Rhodes' Pulitzer Prize winning account of the Manhattan Project, Michael Frayn's Tony Award winning play Copenhagen, and some movies will form the basis for explosive discussions. There will be 1000+ pages to read thoughtfully and one hands-on laboratory.
METHOD OF EVALUATION: 20 chapter summaries, discussion participation and leadership, participation in the lab
PREREQUISITES: high school physics
ENROLLMENT LIMIT: 20

METHOD OF SELECTION: passion, or alphabetical
COST: $30
MEETING TIME: afternoons
INSTRUCTOR: Daniel Aalberts

PHYS 12 Drawing as a Learnable Skill
COURSE DESCRIPTION: Representational drawing is not merely a gift, but a learnable skill. If you wanted to draw, but have never had the time to learn; or you enjoy drawing and wish to deepen your understanding and abilities, then this course is for you. This intensive course utilizes traditional drawing exercises to teach representational drawing. By using simple techniques and extensive exercises you will learn to see more accurately and realistically represent the physical world. You will learn to draw a convincing portrait, interior, and still life. This course is designed to develop your powers of observation and enhance your innate creative problem solving abilities, which are applicable in any field. Students need no previous artistic experience, just the willingness and desire to learn a new skill. Students will be expected to attend and participate in all class sessions as well as mandatory study sessions in museums once a week. They will also be required to keep a sketchbook recording their progress and complete a final project. All class sessions are mandatory as well as one session per week at the Clark and Williams College Museums.
METHOD OF EVALUATION: Evaluations will be based on participation, effort, and development.
PREREQUISITES: none
ENROLLMENT LIMIT: 18
METHOD OF SELECTION: Selection will be based on seniority if over enrolled
COST: textbook and $5 for materials
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Stella Ehrich

ADJUNCT BIO: Stella Ehrich lived in Italy for sixteen years, where she spent seven years studying figurative realism in the Studio Simi in Florence. She holds an MFA in painting from Bennington College. Stella is a professional painter whose work includes portraits, landscapes and still life subjects.

PHYS 13 Loop d' Loop d' Loop d' Loop d' Loop d' Loop...
COURSE DESCRIPTION: This class is about music, but you don't have to be a musician to take it. It is about recursion, but you don't have to be a computer scientist to get it. We will play with the subjective and social meanings of sound-art, but you don't have to be an artist to play along.
Imagine that you record yourself speaking in a room; You record the sound of that recording as it plays back in that same room; You record the recording of the recording; You sit back and let this loop repeat and repeat. Eventually your words are smoothed out by the resonances of the room into a rich melody.
In this class we will explore the world of sound-art. We will transmute audio samples by harnessing the resonances of architectural spaces in Williamstown, from dorm room to theater. Emphasizing hands-on projects, students will create, listen, read, and field trip their way to a new understanding of sound and recursion.
METHOD OF EVALUATION: A final project that could range from creating a new piece of sound-art, to an acoustical experiment, to an essay. Students are welcome to work in groups.
PREREQUISITES: NONE
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: If overenrolled, selection will be based on seniority.
COST: $0
MEETING TIME: 10AM-12PM MTR
ADJUNCT INSTRUCTOR: Daniel Fox

ADJUNCT BIO: Daniel Fox is a composer and a mathematician interested in the sense of space that one can create using music and sound.

PHYS 14 Electronics
COURSE DESCRIPTION: Electronic circuits and instruments are indispensable parts of modern laboratory work throughout the sciences. This course will cover the basics of analog electronic circuits, including transistors and operational amplifiers, and will briefly introduce digital circuits. Class will include a mixture of lab, lecture, and discussion, providing ample opportunity for hands-on experience. Students will build and test a variety of circuits chosen to illustrate the kinds of electronic devices and design problems a scientist is apt to encounter. In the last week, students will design and build a final project, or will write a 10-page paper.
METHOD OF EVALUATION: Participation, completion of both laboratory work and occasional homework, and quality of final project or paper
PREREQUISITES: Mathematics 140 or equivalent calculus
ENROLLMENT LIMIT: 16
METHOD OF SELECTION: Priority given to seniors first, first-years last
COST: $50
MEETING TIME: afternoons
INSTRUCTOR: Jefferson Strait

PHYS 16 3D Design and Fabrication for Rapid Prototyping and Advanced Manufacturing
COURSE DESCRIPTION: Advances in 3D design and fabrication technology are fundamentally changing the landscape of product development and manufacturing. Sophisticated tools for design and analysis are widely available and lower in cost. Concept to prototype design cycles have shrunk from months to days or even hours. Advanced manufacturing technology is creating more complex and intricate components with higher throughput, producing better products but creating fewer jobs. In this course, we will engage in hands-on exploration of the technology that is driving the change in products that affect our lives, but also in our economy and society.
Utilizing state-of the-art 3D CAD (computer-aided design) tools, we will model a variety of objects using both parametric and non-parametric methods. We will create dynamic simulations of mechanisms and perform stress analysis. We will use a 3-D printer to create rapid-prototypes. After verifying the design through prototypes, we will use CAM (computer-aided manufacturing) to create a program for a state-of-the-art 5-axis CNC milling machine. This CNC system will produce metal objects of virtually any shape or complexity at high-speed.
To gain further understanding of the impact of advanced manufacturing on jobs and the economy, we will visit several manufacturing companies in New England that use both traditional and highly advanced manufacturing technologies to create parts for industries such as aerospace and medical devices. In the last week, students will create a final project fabricated from their own design. At the conclusion of the class students will display and discuss the projects in a public poster display and reception.
METHOD OF EVALUATION: Final project and poster form public display and reception
PREREQUISITES: none
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Preference based on one-paragraph explanation of student's interest in the course.
COST: 75
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Michael Taylor

ADJUNCT BIO: Michael Taylor is an engineer and inventor with 30 years of experience in product development and manufacturing. Broad-based hands-on mechanical and electrical fabrication skills. Experienced in 3D CAD and rapid proto-typing. Owns and operates a product development and consumer products company. Full-time college employee in the Bronfman Science Shop. B.S./M.S in Engineering Sciences (Univ. of Florida)

PHYS 22 Research Participation
Several members of the department will have student projects available dealing with their own research or that of current senior thesis students. Approximately 35 hours per week of study and actual research participation will be expected from each student.
Students will be required to keep a notebook and write a 5-page paper summarizing their work. Those interested should consult with members of the department as early as possible in the registration period or before to determine details of projects then expected to be available.
Prerequisites: permission of instructor.
Enrollment limit: 1 or 2 per project.
Cost: $0.
Meeting time: to be arranged with instructor.
TUCKER-SMITH and members of the department

PHYS 31 Senior Thesis
To be taken by students registered for Physics 493, 494.

POLITICAL ECONOMY

POEC 17 Social Entrepreneurship: Impact in the Social Sector
COURSE DESCRIPTION: Operating as consultants, students will work in small teams to develop solutions to challenges faced by leading social enterprises ("clients") working in areas such as economic development, education, and health care. Projects will focus on current, actual challenges, e.g. how best to evaluate a program's impact, how best to engage a target constituency, or how to achieve financial sustainability. Student teams will develop project plans, collect and analyze relevant information, and seek input from a variety of experts. They will present their final recommendations to client organizations' leadership teams. The course will feature several guest speakers who will address developments and trends in the field of social entrepreneurship. The class will travel to New York City to meet with leading social enterprises and impact investors.
METHOD OF EVALUATION: class participation, project contributions, quality of final written and oral presentations, and the value of the input that students provide to clients.
PREREQUISITES: none
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: If oversubscribed, selection will be based on a statement of student interest in the course.
COST: $250
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Jeffrey D. Thomas

ADJUNCT BIO: Jeffrey Thomas is the Executive Director of Lever, a center for entrepreneurship and social innovation based in North Adams, Massachusetts.

POEC 21 Fieldwork in Public Affairs and Private Non-Profits (Same as PSCI 21)
See under PSCI for full description

POEC 22 Volunteer Income Tax Assistance (VITA) CROSSLISTING: ECON 22/WGSS 22
See under ECON for full description

POEC 23 Institutional Investment
The Williams College Investment Office, based in Boston, is seeking three sophomores or
juniors to join the Investment Office for four weeks in January 2015. The Investment Office manages the investments of the College's $2.0 billion endowment. The endowment plays a major role in supporting the operations of the College and the role of the Investment Office is to develop critical understanding of markets and investment managers to provide the best financial support possible to the College.
What is it?
This unique opportunity is a structured program designed to give students an overview of
endowment and investment management. Through formal training and project work, Winter Study Analysts will gain a better understanding of how an institutional investment portfolio is managed and how investment managers are selected and monitored. Students will learn about global equities, hedge funds, venture capital, buyouts, commodities, real estate and fixed income. Exposure will cut across U.S. and non-U.S. markets, both developed and emerging. Winter Study Analysts will sharpen their professional skills and have the opportunity to meet investment professionals from across the investment industry.
Students are expected to work at the office for a minimum of 32 hours a week (four days/week), complete a set of relevant readings, keep a journal, and present a final project. No prerequisites are required.
When is it?
The Winter Study Analyst program will be based in Boston and will run for four weeks
during Winter Study (January 5 - January 29).
Where is it?
The Winter Study Analyst program will be based in the Investment Office in Boston, MA
and housing will be provided for the Analysts.
How do I apply?
To apply for enrollment, please select this course (WS POEC 23) as your first choice when
registering for Winter Study. Additionally, please send an email with your resume and a cover letter discussing why you are interested in this course and what you hope to gain from it to: investmentoffice@williams.edu by 11:59 PM ET on Sunday, October 12, 2014. Enrollment limit: 3. If oversubscribed, students will be selected via interviews.
What does it cost?
Low/no-cost housing and class related materials (i.e. books and articles) will be provided by
the Investment Office. Students are responsible for the cost of food, incidentals and transportation to and from Boston at the beginning and end of the month.

Instructors?
This Winter Study Class is taught by the investment team that staffs the Williams College
Investment Office. The three lead instructors for the program for January 2015 are Collette Chilton (Chief Investment Officer), Abigail Wattley (Director), and Caitlyn Clark (Investment Analyst). The entire Investment Office staff is integrally involved and supportive of the program and students will interact regularly with all team members.

Collette Chilton, Chief Investment Officer - Collette joined Williams College in October 2006. Prior to joining Williams, Collette was President and Chief Investment Officer at Lucent Asset Management Corporation from 1998 to 2006. While at Lucent, Collette was responsible for the investment and oversight of approximately $40 billion in pension and retirement savings assets for the company. Collette received a Bachelor of Science degree in Political Economy of Natural Resources from the University of California, Berkeley in 1981 and a Masters of Business Administration from the Amos Tuck Graduate School of Business at Dartmouth College in 1986.

Abigail Wattley, Director - Abigail rejoined Williams College in September 2010 as an Investment Associate. From 2007 to 2008 Abigail worked in the Williams Investment Office in the role of Investment Analyst. Prior to working for Williams, Abigail worked as a Senior Consulting Associate at Cambridge Associates. Abigail received a B.A. in Economics from Williams College in 2005 and a Masters of Business Administration from the Harvard Business School in 2010.

Caitlyn Clark, Investment Analyst - Caitlyn joined Williams College in July 2013.
Caitlyn received a B.A. in Chemistry from Williams College in 2013. During her time at Williams, Caitlyn was captain of the women's varsity soccer team.

What if I have questions?
If you would like to learn more about the endowment you can find our investment report at:
http://investment.williams.edu
If you have questions you can email us at Investmentoffice@williams.edu

POEC 25 Socio-economic Impact of 20 Years of Democracy in South Africa CROSSLISTING: ECON 25/ PSCI 25

See under AFR for full description

PSCI 12 The Art of War
COURSE DESCRIPTION: This course will examine the meaning and uses of the classical Chinese text, The Art of War, by Sun Tzu. Students will consider Sun Tzu's insights both in the context of ancient Chinese philosophy and in terms of their contemporary relevance. The first half of the course will concentrate on placing Sun Tzu in historical and philosophical context; the second half will examine how The Art of War has been used in a variety of modern fields.
Evaluation will include mandatory class attendance and participation, and a 10-page paper.
METHOD OF EVALUATION: Evaluation will include mandatory class attendance and participation, and a 10-page paper.
PREREQUISITES: none
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Seniors and juniors will have priority
COST: 75
MEETING TIME: mornings
INSTRUCTOR: Sam Crane

PSCI 13 Race, Politics, and Scandal
COURSE DESCRIPTION: "Scandal," a popular television series and political thriller, has caught the attention of many Americans. While the show's plot is largely focused on Olivia Pope's efforts to manage the images of America's political elite, its audience is largely fascinated by the show's sub-plots. Here, we are presented questions of morality, depictions of familial relationships, illustrations of power and gender dynamics, and challenges concerning the meaning and processes of democracy. What's more, while the lead character is a Black woman and the cast is racially and ethnically diverse, the extent to which race is factor in the lives the characters is up for debate. "Race, Politics, and Scandal" is a course aimed to delve into the conversations in which creator Shonda Rhimes encourages her audience to engage. We will use the show to explore issues around race, gender, democracy and political scandal. Students should have some familiarity with the show; we will view select scenes during class but discussion will mainly focus on how the readings around the course's central themes are portrayed in this popular television series.
METHOD OF EVALUATION: class participation, short reflection papers, presentation
PREREQUISITES: None.
ENROLLMENT LIMIT: 18
METHOD OF SELECTION: First and second year students will get preference
COST: $0
MEETING TIME: afternoons
INSTRUCTOR: Candis Smith

PSCI 14 The CIA and the Politics of Intelligence
COURSE DESCRIPTION: This course will trace the evolution of CIA from an organization largely focused, in its early days, on coups and regime change under the Dulles brothers, to its present role in the war on terror and beyond. Students will consider how intelligence is and ought to be gathered, and the political issues that emerge from those activities. Some of the Agency's signal successes and failures will be examined, and some of its directors will be evaluated. The fluctuating relationship between CIA and the FBI will also be discussed. Stress will be placed on the personal experiences of those who have served in the Agency.
METHOD OF EVALUATION: Evaluation will include class attendance and participation, and a 10-page paper.
PREREQUISITES: none
ENROLLMENT LIMIT: 18
METHOD OF SELECTION: Preference to Political Science majors and Leadership Studies concentrators.
COST: 50$
MEETING TIME: afternoons
ADJUNCT BIO: Donald Gregg served in CIA from 1951-82, worked in the White House from 1979-89, and was US Ambassador to South Korea from 1989-93. He is now chairman emeritus of The Korea Society. 1980-89, taught a second-year graduate level course at the Master of Science in Foreign Service Program of Georgetown University. He is now chairman of the Pacific Century Institute in Los Angeles.
ADJUNCT INSTRUCTOR: Donald Gregg

PSCI 15 Media Battlegrounds: A Workshop in Media Criticism CROSSLISTING: ENGL 15
COURSE DESCRIPTION: More than ever, people are unhappy with journalism and reporting in the US. And there is a lot to complain about. But what do these complaints tell us about the larger battle to control and shape news media, and politics, in the US?
This course is a hands-on critical inquiry and discussion experience. We will compare the methods, arguments, and conclusions of groups contesting - and influencing - news and media production. Readings will introduce students to different styles of criticizing journalism and mass media by intellectuals, politicians, think tanks, activists, media professionals, and others. Students will also discover and discuss examples of media criticism from the worlds of political satire, everyday life, or elsewhere. In class discussions, we will collaborate to pin down the standards are arguments used by various media critics to challenge and legitimize media practices and connect media criticism with broader intellectual movements and relations of power.
Students will be challenged to define their own standards for "good" media and develop their own method of criticism, employing it to analyze media texts of their choosing -- everything from

articles, videos, radio stories, films, and more. The course will culminate in presentations of each student's findings.
METHOD OF EVALUATION: Participation in class, regular short analytical writing, and final project/presentation
PREREQUISITES: none
ENROLLMENT LIMIT: 16
METHOD OF SELECTION: Preference to juniors, seniors, and students with demonstrated interest in the field
COST: 30
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: James Owens

ADJUNCT BIO: James Owens is an independent media researcher and activist whose studies of journalism and politics appear in scholarly and movement-based publications alike. He is a co-founder of Chicago Media Action and holds an MA in Communication from the University of Illinois at Chicago.

PSCI 16 Political Aikido: How to Form the More Perfect Union
COURSE DESCRIPTION: Preamble: For over 50 years, Williams has helped shape the world by training students at the Center for Developmental Economics to become finance ministers and policy advisors to their respective governments and central banks. This Winter Study course, which might also be summarized as "Aikido and Adolescent Democracies", is dedicated to the proposition that a sister program, perhaps known as the Center for Developmental Politics, could in a similar way help shape the world by training students to conduct themselves as politicians and policy advocates in a way that seeks harmony rather than division, that relies on hope rather than fear, and that insists on justice for all. Students in this course will take on the pioneering task of demonstrating exactly what such a sister program might accomplish.
Premise: Hyper-Partisanship necessarily steers the ship of state back and forth from one ideological direction to the other as the political power of opposing parties rises and falls. Much of the political energy is spent destructively, and therefore is not available to implement positive change. More progress would be made if the ship of state sailed in one more consistent direction without so much of the side to side, and if political capital could be spent on progress rather than persecution.
The Course: Strategies for finding a common direction forward in the midst of opposing political energies will emerge from the student's embodied study of martial arts, specifically Aikido, which is sometimes called "The Art of Peace". Aikido is a Japanese martial tradition that combines the samurai arts of sword and grappling with the philosophical desire to manifest harmony in the face of conflict. As such, Aikido addresses situations of conflict that manifest themselves physically, but also offers insight into how to prevent or redirect the energies - social, political, or psychological - that might otherwise become conflict in one or another aspect of our lives. The physical training (2 hours each weekday morning in Currier Ballroom) will improve each student's strength, balance, posture, and flexibility. Everyone will also learn how to throw their friends across the room. About 25% of training time will be devoted to sword, staff, and dagger techniques. Students will focus their academic work on researching the political landscape within one particular country, developing Aikido-inspired recommendations to improve the imperfect democratic systems and circumstances they find there, and articulating why those recommendations are implementable and would have the desired effects. Students will perform this work in groups of approximately five. Potentially interesting choices for academic focus include such imperfect democracies as the US, China, the Dominican Republic, the European Union, and the hypothetical Palestinian State.
METHOD OF EVALUATION: Students will be evaluated on the quality of their participation in both physical and intellectual course components (class discussions, final project) Students are encouraged to correspond with the instructor (rkent-at-williams.edu) before registration begins if they have questions.
PREREQUISITES: Same physician's approval on file as the school requires to participate on sports teams. Students do not have to be especially athletic, and in Aikido women train as equals with men.
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: should the course oversubscribe, selection will be via a short survey.
COST: $150 (for which you get an aikido uniform and training weapons)
MEETING TIME: mornings (daily aikido training), and over lunch (academic discussions in smaller groups 1-2 times/ week)
ADJUNCT INSTRUCTOR: Robert Kent

ADJUNCT BIO: Robert Kent '84 spent 3 years in Kyoto, Japan earning his Sho Dan (first degree black belt), directly after majoring in both Philosophy and Religion at Williams. He currently holds a Yon Dan rank (Fourth degree black belt) and serves as President of Aiki Extensions, Inc., a nonprofit that supports programs that bring the strategic insights and practical wisdom of Aikido into non-traditional settings. He is also founder of The PeaceCamp Initiative (a scholarship program that seeks to use Aikido principles to heal the Israeli/Palestinian conflict a few kids at a time) for which he won Ben & Jerry's 2008 Peace Pioneer Prize. He earned a Masters degree in Philosophy at Claremont Graduate School in 1993, writing his thesis on the Ethics of Authenticity. This will be the 9th time he has offered an Aikido-based Winter Study course.

PSCI 17 The Third World City
COURSE DESCRIPTION: In 2007, the world became majority urban. But most of these urbanites live not in places like New York or Tokyo but rather in places like Lagos or Mumbai, dwelling in shantytowns and working in petty commerce. Their cities' path of urbanization diverges from the "normal" one accompanying industrialization in the West and in East Asia. About this phenomenon, arguably the most important social fact in today's world, observers have adopted wildly divergent normative and theoretical stances, from the romantically optimistic to the apocalyptic. We read a few of these, including Mike Davis, Rem Koolhaas, Hernando De Soto, and Robert Neuwirth, and watch some films and videos on the subject.
METHOD OF EVALUATION: 10-page paper
PREREQUISITES: none
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Preference to Political Science majors
COST: small course packet and books (about $70)
MEETING TIME: mornings
INSTRUCTOR: James Mahon

PSCI 18 Girl meets World: Films from 5 Continents CROSSLISTING: WGSS 18
COURSE DESCRIPTION: This course brings together a selection of films that challenge the narrative of girl-meets-boy as the privileged formula for representing the growth and development of young women around the world. Sometimes girl does meet boy, but the challenge that these films put to us is to re-imagine the path to womanhood as mediated by other factors as well: girls' own curiosity and ambition, their resourcefulness in the face of poverty and exploitation, resistance against being gendered in conventional ways, their friendships and romantic ties with one another, and their many creative ways of defining how one becomes a woman. To support our analysis of the films, we will also consider how some transnational feminist movements have responded to the challenges and creative energies of girlhood. Special attention will be given to the difficulty of securing girls' rights through international conventions that implicitly treat all children (ages 0-18) as male, and all women as adults. Films and film-makers will likely be selected from the following countries: Korea, India, Great Britain, Belgium, Senegal, France, Australia, Colombia, Argentina, and the United States.
METHOD OF EVALUATION: Active class participation and either 3 policy memos (3 pages each) or one 10-page final paper
PREREQUISITES:
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Preference to Political Science and WGSS majors
COST: $50 for reading materials
MEETING TIME: afternoons
INSTRUCTOR: Nimu Njoya

PSCI 19 Law as a Tool for Social Justice
COURSE DESCRIPTION: The law is a powerful tool to attain goals of social justice. It may be deployed in two ways: through the enactment of legislation, and by use of the judicial system. Racial justice and justice for the impoverished are the two goals dealt with by this course; however, the class will focus more on the legal process and courses of action to achieve them. While the materials impart knowledge of the legal system and courtroom practice, the course always will view the law and its evolution in the context of the larger political, social and economic settings of the time. While at times the law will have a heroic cast, the course also will examine the limitations of its use as a tool for social justice due to overriding political, social and economic obstacles. The class will focus on four engaging and highly praised books:
Gilbert King, Devil in the Grove; the story of a 1949 Florida interracial rape case involving horrific injustice that was taken to the Supreme Court by Thurgood Marshall. Winner, 2013 Pulitzer Prize nonfiction.
Anthony Lewis, Gideon's Trumpet; the setting, by the Supreme Court, of a new legal precedent providing impoverished persons with legal counsel in State felony cases. Winner, 1965 Edgar Prize nonfiction.
Adam Hochschild, Bury the Chains; the story of an ultimately successful grass-roots movement to enact anti-slavery legislation in Great Britain in the first half of the 19th century. Finalist, 2005 National Book Award nonfiction.
J. Anthony Lukas, Common Ground; the author follows 3 families (Black, Irish-Catholic, and Boston Brahmin) as a sharply divided Boston reacts to a Federal court busing order to achieve integration. Winner, 1985 Pulitzer Prize nonfiction.
METHOD OF EVALUATION: Evaluation will include class attendance and participation, and a 10-page paper.
PREREQUISITES: none
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: seniority
COST: $70
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Richard Pollet

ADJUNCT BIO: Richard Pollet graduated from Williams in 1969, cum laude, with Honors in Political Science, and thereafter obtained a J.D. from Columbia Law. He spent 40 years practicing law, the last 26 as General Counsel of J.Walter Thompson (JWT), retiring from the company last June. He now does some legal consulting, which primarily consists of teaching/mentoring newly hired lawyers of WPP, the parent company of JWT.

PSCI 20 Politics after the Apocalypse CROSSLISTING: ENVI 20
COURSE DESCRIPTION: The zombies are coming! Climate change will destroy us all! Bird-flu pandemic! Contemporary film, journalism, pop culture, and science continually remind us that we live on the edge of cataclysm - reminders that are sometimes alarmist, sometimes fanciful, and sometimes all too realistic. What will happen if (when?) we slip over that edge? What shape will human life and society take after the apocalypse? Which aspects of political order (and disorder) will survive the fire, pestilence, war, or other ground-clearing disaster to give shape to the lives of survivors? What new political forms will emerge upon that cleared ground? Will humanity go backwards or forwards after the purge? Will we even be "human" at that point?
This class will ponder an eclectic array of sources from television, film, literature, social science, and critical theory that envision politics after the apocalypse. We will approach these sources as thought experiments akin to other theoretical devices in the cannon of political theory: most obviously, efforts to imagine politics after the apocalypse seem analogous to and in tension with classical accounts of the "state of nature" and its overcoming in social contract theory. What does it say about a particular dimension of politics to imagine either its erasure or its persistence after the end times? What kinds of aspirations for our contemporary, pre-apocalyptic moment are engendered by fantasies - be they dark, comic, or both - of bands of survivors scraping together an existence in fictive post-apocalyptic moments?
Course materials will include the films 28 Days Later and How to Survive a Plague, the climate-disaster novel Far North, the television drama The Walking Dead, selections from Locke and Hobbes' social contract theories, and contemporary academic works such as Daniel W. Drezner's Theories of International Politics and Zombies and Jacques Derrida's "Of an Apocalyptic Tone

Recently Adopted in Philosophy." In addition to regular, brief analytic writings, students will develop and present a final project: either a traditional academic paper or a creative work of post-apocalyptic fiction (i.e. a short story or a video short).
METHOD OF EVALUATION: class participation, regular response pieces, final project and its presentation.
PREREQUISITES: none
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: preference to first years, sophomores and Poli Sci majors
COST: 30
MEETING TIME: afternoons
INSTRUCTOR: Laura Ephraim

PSCI 21 Fieldwork in Public Affairs and Private Non-Profits (Same as POEC 21)
This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed by the instructor, and write a final paper summarizing and reflecting upon the experience. A group meeting of all students will occur after winter study to discuss the experience.
Requirements: 90 hours of fieldwork; satisfactory evaluation from the institutional sponsor; 10-page final paper or equivalent; participation in final meeting. At the time of preregistration, interested students should send a resume and letter of interest to Paula Consolini.
Prerequisites: none.
Enrollment limit: 30.
Selection will be based on a resume and letter of interest.
Cost: approximately $15 for readings, student covers transportation costs to and from internship site.
Meeting time: some meetings will take place prior to Winter Study and at the end, as students are off-site in internships during the term.
Instructor: PAULA CONSOLINI (Paula.M.Consolini@williams.edu)

Paula Consolini is the Director of the Center for Learning in Action.

PSCI 22 Learning Intervention for Troubled Teens (LIFFT)
The objective of this program and winter study course is to provide an alternative sentence for adolescents involved in the Juvenile Court system in Berkshire County. Many of these children cut school, are disruptive in the classroom, and do not find learning stimulating. The goal of this program is to teach these children, through experience, that learning can be fun, providing them with the motivation to succeed in school. These students, under the guidance of Williams College undergraduates, will select a topic of interest and learn how to research and present this topic to their peers in the program, with access to Williams College facilities. Williams undergraduate students will gain experience in teaching and motivating troubled teenagers and will also present a topic of their choosing to the students in the program, modeling a classroom setting. Furthermore, Williams students will be exposed to the Juvenile Court system, gaining insight into the causes of and solutions to the incidence of juvenile crime. Williams students will be expected to read relevant training materials, meet with their teenagers three times a week in the afternoon, give a final presentation, and keep a weekly journal detailing the meetings.
Evaluation will be based on the quality of the journal and the Williams students' own topic presentations.
No prerequisites.
Enrollment limit: 8.
Preference to sophomores, juniors, and seniors. Students will be asked to write a paragraph describing why they want to take the course.
Cost: $0.
Meeting time: students will meet on Mondays for a Group Discussion from 2-4 PM, Tuesdays-Thursdays with their teens from 3-5 PM, and on Fridays for field trips from 8 AM-12 PM. The estimated total required time per week is 12 hours.
Instructor: MICHAEL WYNN (mwynn@pittsfieldpd.org)
Sponsor: SHANKS

Mike Wynn is the Chief of the Pittsfield Police Department and graduated from Williams in 1993. s

PSCI 25 Socio-economic Impact of 20 Years of Democracy in South Africa CROSSLISTING: ECON 25/POEC 25
See under ECON for full description

PSCI 32 Individual Project
To be taken by students registered for Political Science 495 or 496.

PSYCHOLOGY

PSYC 12 Alcohol 101: Examining and Navigating the College Drinking Scene
COURSE DESCRIPTION: Seventy-two percent of college students report that they used alcohol at least once within the past 30 days. Where is the line between fun and danger? This course will examine the realities of the role of alcohol in the social lives of college students. Students will engage in active discussions of outside readings, in-class videos, and myths vs. facts, as well as personal observations and opinions. Class structure will involve 3-hour classes that meet twice weekly. Participants will learn scientific facts about alcohol, including how it gets metabolized in the body differently in men and women, and how to recognize and respond to the signs of alcohol poisoning. Films will include evocative footage and interviews, such as "College Binge Drinking and Sober Reflections." We will hear from emergency personnel about alcohol-related medical emergencies and problem-solve strategies to stay safe when choosing to use alcohol. Statistical data from colleges here in the Northeast will be reviewed, including survey results from the Core Institute and the Harvard School of Public Health Alcohol study.
Requirements: outside readings, in-class participation and the final presentation of a project aimed at educating peers.
METHOD OF EVALUATION: In-class participation and the final presentation of a project aimed at educating peers.
PREREQUISITES: none
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: permission of instructor (if overenrolled)
COST: $25
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Kathryn Niemeyer

ADJUNCT BIO: Kathy Niemeyer holds an M.A. in Counseling Psychology from Boston College and is a Licensed Mental Health Counselor with current private practices in Williamstown and Pittsfield. She has worked in the Fitchburg State and Stonehill College Counseling Centers and was also the AOD Prevention Program Coordinator at Stonehill. She taught the semester-long Alcohol and Other Drugs course at Boston College and has been a regular guest lecturer at Williams.

PSYC 14 Beyond Hooking Up: Creating Meaningful Relationships CROSSLISTING: CHEM 14/SPEC 14
See under CHEM for full description

PSYC 15 Ephquilts: An Introduction to Traditional Quilting
COURSE DESCRIPTION: This studio course will lead the student through various piecing, appliqué and quilting styles and techniques, with some non-traditional methods included. Samples will be made of techniques learned, culminating in the completion of a sizeable project of the student's choosing (wall quilt or lap-size quilt). There will be an exhibit of all work (ephquilts), at the end of winter study. "Woven" into the classes will be discussions of the history of quilting, the controversy of "art" quilts vs. "traditional" quilts, machine vs. hand-quilting and the growing quilting market. Reading list: Pieces of the Past by Nancy J. Martin; Stitching Memories: African-American Story Quilts by Eva Ungar Grudin; Sunshine and Shadow: The Amish and Their Quilts by Phyllis Haders; A People and Their Quilts by John Rice Irwin; Treasury of American Quilts by Cyril Nelson and Carter Houck; The Quilt: New Directions for an American Tradition, Nancy Roe, Editor. Requirements: attendance of all classes (including field trip), a love of fabric, design and color, an enthusiasm for handwork, participation in exhibit. Extensive time will be spent outside of class working on assigned projects.
METHOD OF EVALUATION: 2 projects: a techniques sampler quilt and a quilt of student's choosing (to be approved by instructor) and participation in exhibit
PREREQUISITES: none
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: seniors, juniors, sophomores, first years
COST: $250.00
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Debra Rogers-Gillig

ADJUNCT BIO: Debra Rogers-Gillig, one of the top quilters in New England, has been quilting for 30 years, and teaching classes and coordinating shows and exhibits for 25 years. She has received numerous prizes and awards from quilt shows in New York and New England and been published in quilt magazines.

PSYC 16 Biology and Psychology of Food Intake and Taste CROSSLISTING: BIOL 14
See under BIOL for full description

PSYC 18 Knocking on Heaven's Door: Thanatology 101
COURSE DESCRIPTION: Of the two great themes that peoples of all cultures have reflected upon since the dawn of time, love and death, the latter has only been recently addressed in undergraduate curricula. In this important and ground-breaking class, we will attend to central issues dealing with the experiences of dying people; decision-making at the end of life; challenges for the

care-givers; manifestations of grief as a healing process; and, that which constitutes a "death system." Our sources and materials will be drawn from literature, film, psychology, philosophy, religion, ethics and the law. Some of our sessions will feature first-person narratives of individuals discussing real-world scenarios. Students will be expected to interview someone who has lost a loved one and to learn about his or her grief experience; or, to spend one-on-one time with a dying person, or a funeral director. We will have a field trip to a local funeral home. Your study of a death system will be an opportunity to explore your local area and learn what policies and resources are in place that effect the death and dying experiences in your community.
As we reflect upon the dying process, we will consider our reactions to our own mortality and to that of those close to us.
METHOD OF EVALUATION: Evaluation will be based on class participation, one in-class presentation, and the final five to ten-page essay
PREREQUISITES: None
ENROLLMENT LIMIT: 20
METHOD OF SELECTION: Preference will be given to students who have a special interest in, or experience with, death and dying.
COST: $30 - 40
MEETING TIME: We will meet two or three afternoons a week.
ADJUNCT INSTRUCTORS: Deborah Alecson and David Elpern
Deborah Golden Alecson, M.S. is a thanatologist and author who teaches, lectures, and writes about death, dying and bereavement. Her books include *Lost Lullaby* (University of California Press, 1995) and *We Are So Lightly Here: A Story About Conscious Dying* (Goldenwords, Ink, 2010). Her new book of poetry, *Complicated Grief*, will be available in the Fall 2014.
David J. Elpern, M.D is a Williamstown physician who has written and taught courses about the medical humanities for the past thirty years.

PSYC 19 Psychology Internships
Would you like to explore applications of psychology in the "real world?" This course gives students an opportunity to work full time during winter study in a mental health, business, education, law or other setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the winter study registration period. Please prepare a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.
Evaluation will be based on a 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience, and the supervisor's evaluation.
Prerequisites: approval of Professor Zaki is required.
Enrollment limit: 20.
Cost: travel expenses in some cases.
INSTRUCTOR: Jennifer Crosby

PSYC 22 Introduction to Research in Psychology
This course provides a research opportunity for students who want to understand how psychologists ask compelling questions and find answers about behavior. Several faculty members, whose subfields include behavioral neuroscience, cognitive psychology, social psychology, clinical psychology, developmental psychology, and the psychology of education, will have student projects available. Since projects involve faculty research, interested students must consult with members of the Psychology Department before electing this course.
Required activities: a minimum of 20 hours per week of research participation will be expected of each student.
Evaluation will be based on the quality of research participation, student's lab journal and either an oral presentation or a written 10-page report of the research project.
Prerequisites: permission of instructor.
Enrollment limit: space available in faculty research labs.
Selection will be based on evaluation of departmental application and number of faculty available as mentors.
Meeting time: other.
INSTRUCTOR: Laurie Heatherington

PSYC 31 Senior Thesis
To be taken by students registered for Psychology 493-494.
K. SAVITSKY

PUBLIC HEALTH

PHLH 23 Uncomfortable Learning: Gaudino Fellowship
The Gaudino Fund is offering Gaudino Fellowships for a group of 3 to 4 students during Winter Study 2014, based upon a proposed domestic or foreign collaborative project to be held in the same general location, reflecting values identified in the Gaudino Mission Statement, including separate home stays for each fellow, either joint or separate work/engagement internships, and a structure to facilitate collaborative action and learning. The team selected will be guided and overseen by the Gaudino Scholar who will help assure successful arrangements and will conduct appropriate preparatory discussions and follow-up sessions to optimize and help students articulate lessons learned from the overall experience.
Students should form teams of 3 or 4 and organize their projects around two main components: direct encounter with otherness and self-reflection. The Gaudino Board is particularly interested in projects that encourage students to confront their own personal beliefs, values or views regarding the subject and that also develop the "habits of mind" of applying conceptual thinking and intellectual analysis to a challenging experience. The Gaudino Board is looking for projects that address specific intellectual problems through direct experience, undertaken preferably in a social milieu that is previously unfamiliar or even uncomfortable to the applicant. For example, proposed projects could address issues of socioeconomic class, race, public health, environmental degradation, religion, sexuality, violence or migration.
N.B. Although this course is housed in PHLH, projects are not limited to public health.
Each team is expected to meet with the Gaudino Scholar in late September and submit their group application by October 4th. The Scholar along with a group of Gaudino Trustees will pick one project to award the Gaudino Fellowship. That team will then meet and consult with the Gaudino Board during their meeting on October 19th.
Projects will be evaluated on whether they do subject the students to "uncomfortable learning", i.e. having an experience that challenges and perhaps alters one's view of what it is to live a good life and the group's commitment to incorporate home stays as part of their project and overall experience. In fact, a home/family stay is required at the location. Simply encountering people or cultures that differ from those of the applicant is not sufficient. We are looking for something closer to total immersion, actually living and participating in an unfamiliar culture. The intent is to open the student to an understanding (of both the familiar and unfamiliar) that could not be achieved otherwise.
Each student is expected to write a short (3-4 page) self-reflection before leaving for the WSP, keep a journal of their experience, as well as write a 8-10 page paper by the end of the Winter Study period reflecting on the WSP experiences and what has possibly changed in the student's perceptions and beliefs from the opening essay. They will also meet the other members of the team on a weekly basis during Winter Study and regularly update the Gaudino Scholar by email and/or Skype calls. The team that receives the Gaudino Fellowship will give a brief presentation to the Board about their experience at the Board's spring meeting in April.
The team whose project is approved will receive the Gaudino Fellow designation. In addition, students on Financial Aid will receive Gaudino funding from a minimum of 50% to a maximum of 90% of the budget for the project up to $2,500, as determined by the Financial Aid office. No additional funding for students' projects will be provided by the College. Students selecting this course will register for PHLH 23.

REL 14 Yoga: A Practical and Theoretical Exploration in Three Phases
Yoga has grown considerably in popularity in recent years, often as a form of exercise but increasingly as a way to reduce stress and increase well-being. Familiarity with key traditional ideas behind yoga is also increasing, along with considerable confusion. This course provides a framework to organize the main yogic ideas and practices into three phases which correlate to the historical development of both Hindu and Buddhist yoga in India, as well as with a path of personal development through yoga. Following traditional teachings, these three phases sequentially address 1. individual freedom 2. benefitting others 3. fully conscious embodiment. In addition to class meetings you are offered the tools and invited on a daily basis to practice meditation, yoga asana, and contemplation of philosophical texts. In the process you gain a foothold from which to unfold your yoga practice going forward. Understanding the theoretical underpinnings of yoga from both Buddhist and Hindu traditional sources, you are invited to formulate your view of the path of yoga in a way that supports your ongoing capacity to digest its various and deep offerings.
Required texts: *The Yoga Sutras of Patanjali, Barbara Stoler Miller tr, The Bhagavad Gita, Barbara Stoler Miller tr, The Secret of Self-Recognition, Jaideva Singh tr.*, *The Path to Enlightenment, The Dalai Lama*
Materials: Yoga mat (Yoga block and belt - recommended)

REL 22 Twenty-First Century Jewish American Fiction CROSSLISTING: ENGL 22/JWST 22
COURSE DESCRIPTION: This course offers an opportunity to read recently published novels and short stories that can fruitfully be classified as contributions to Jewish American fiction. How should we interpret the meanings of "Jewishness" and "Judaism" in these works? What do they suggest about the experiences, emotions, ideas, values and aspirations of contemporary Jewish Americans? How does Jewishness, in these works, relate to controversial social categories like race, religion, gender, secularism, ethnicity, class and sexuality? How do the narratives use humor, fantasy, and memory? How do they engage Jewish rituals and symbols, Jewish history and politics? What else is going on in these books? How might they resist classification as "Jewish American fiction"? The course will involve lively discussions prompted by these and any other questions that are provoked by the reading. Possible authors include: Dara Horn, Gary Shteyngart, Allegra Goodman, Michael Chabon, Rebecca Goldstein and Nathan Englander.
METHOD OF EVALUATION: Class participation and a 10-page interpretive essay on any topic in one or more of the readings.
PREREQUISITES: None
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: preference is given to students who have taken REL 259/ENG 259/JWST 259 or REL 209/JWST 209. Otherwise, short letters of interest sent to the instructor will determine selection.
COST: $45 for books.
MEETING TIME: afternoons
INSTRUCTOR: Jeffrey Israel

REL 25 Jerusalem: One City, Two Cultures, Three Religions, Many Narratives
COURSE DESCRIPTION: Students will be required to read JERUSALEM: ONE CITY, THREE FAIHS by Karen Armstrong and INNOCENTS ABROAD by Mark Twain prior to WS, as well as short films and articles that will be available on GLO.
Our class sessions will introduce Judaism, Christianity, and Islam and their relation to this particular place. We will look at religious, political, and cultural history, to prepare us for our experiences on-the-ground.
Prerequisites: open minds, open hearts, curiosity.
Method of evaluation: Following the trip, students will write a ten page reflection to try to capture the meaning of the experiences of the class. In late February, There will be a reunion of travelers from this class in February to reflect on the highlights, wonders, and confusions of the trip.
ENROLLMENT LIMIT: 10
METHOD FOR SELECTION: The instructor will conduct personal interviews and solicit application essays that will facilitate selection of a diverse group, representing (but not limited to) the three major religious faiths who claim a home in Jerusalem.
COST: $3500
ADJUNCT INSTRUCTOR: Robert Scherr

ADJUNCT BIO: Cantor BOB SCHERR, Jewish Chaplain for the College.

REL 26 Touring Black Religion in the "New" South CROSSLISTING: AFR 25/ENVI 26
See under AFR for full description

REL 30 Senior Projects
COURSE DESCRIPTION: An advanced course for Senior Religion majors (who are not writing theses) to further develop their senior seminar paper into a polished 25 page research paper (which will also be the focus of a brown-bag presentation during the Spring semester). The course will help the students with general research methods, workshopping, paper writing, and presentation practice.
METHOD OF EVALUATION: polished 25 page paper
PREREQUISITES: Senior Religion Majors only
ENROLLMENT LIMIT:
METHOD OF SELECTION:
INSTRUCTOR: Jason Josephson

FRENCH

RLFR S.P. Sustaining Program for French 101-102
Students registered for 101-102 are required to attend and pass the sustaining program during the Winter Study period. There are five 50-minute meetings per week.
Meeting time: mornings; 9-9:50 a.m.
TBA (Teaching Associates)

RLFR 12 Audible Imagination: Exploring Sound Across the Arts
COURSE DESCRIPTION: This is a course about sound and its relationship to the visual arts, technology, and the environment. We focus on sound art, an interdisciplinary movement that emerged from the twentieth-century avant-garde. Our purpose will be to study and make sound art: artists and non-artists will be invited to test the boundaries between art and everyday life, between seeing and hearing, and between noise and music. The first two weeks cover the fundamentals of sound production: how to make your own microphones, how to record, and how to use basic production software. In the third week, you'll apply these production techniques in a project of your own design. In the fourth week, you'll share your final project with professional sound artists who will visit and perform in our classroom. Class meets twice a week for three hours. Work for the course includes readings (Cage, Oliveros, Schwitters, Westerkamp), weekly online postings to the course blog, two short projects, and final sound project.
METHOD OF EVALUATION: Five online posts and final audio/visual project
PREREQUISITES: All are welcome
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Preference will be given to students majoring in Romance Languages, Art, Theater and Dance, English or Comp. Lit
COST: $0
MEETING TIME: afternoons
ADJUNCT INSTRUCTOR: Matthew Anderson

ADJUNCT BIO: Matt Anderson is a multimedia artist who has worked in sound, performance, and installation since 1993. He studied at the Studio for Interrelated Media at the Massachusetts College of Art and has exhibited and performed in venues including the Centre for Contemporary Arts, Glasgow, UK; Kunstraum Michael Barthel, Leipzig, Germany; and Los Angeles Contemporary Exhibitions (LACE), Los Angeles, CA.

TEACHING ASSOCIATES

RLSP 14 Animal Consciousness CROSSLISTING: ENVI 14
COURSE DESCRIPTION: If you've ever owned a cat or dog, you've probably found yourself looking into those well-loved eyes and asking, "What are you thinking?" This course explores literature and films that take that question as their point of departure. We will examine works by a very distinguished group of artists - Virginia Woolf, Leo Tolstoy, Horacio Quiroga, Franz Kafka, Robert Bresson, Verlyn Klinkenborg, and others - all of whom endeavor to imagine and represent the subjective experience of a nonhuman animal. Some focus on companion animals, while others explore the interior life of an insect, a reptile, a beast of burden, or a so-called "predator." These works are often humorous, but they are also surprisingly serious: they raise issues ranging from the mixed blessings of domestication to the role of instinct, the hierarchy of species, and the rights of non-human animals. Through them, we will explore questions about the limits of human nature and our ethical relationships with the nonhuman others who inhabit our lives and our planet. Requirements include regular response papers, oral presentations/discussion-leading, and a final paper. Enrollment limit: 12.
METHOD OF EVALUATION: 10 page paper, response papers, presentations, discussion-leading
PREREQUISITES: None
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: Students will be asked to submit a short statement describing their motivation for taking the course.
COST PER STUDENT: $100
MEETING TIME: mornings
INSTRUCTOR: Jennifer French

RLSP 16 The Poetics of Southern Spain
COURSE DESCRIPTION: This course will take an imaginary journey, geographical, temporal, literary and cultural, through Andalucía (the southern provinces of Spain). Starting with its first Phoenician settlements in the second millennium BCE and ending with the region's present day reality we will look at the terrain; its rivers, forests, mountains and fabled coast, through the eyes of writers, poets, musicians and filmmakers including: Abu l-Qasim al-Manishi (12th Century, Sevilla), Avienus (Roman, 4th Century CE), Richard Ford, Alexandre Dumas, Gustave Doré, Rainer Maria Rilke, Byron, Washington Irving, Federico García Lorca, Luis Cernuda, Gerald Brennan, Ernest Hemingway and Camarón de la Isla. Students will be required to read and discuss readings that will be provided for them and to interpret scenes from Lorca's 'Blood Wedding' and 'Doña Rosita the Spinster'. We will listen to flamenco music discussing its traditions and roots. We will view and discuss the films: 'Guadalquivir' (Joaquín Gutiérrez Acha), 'Blood Wedding' (Carlos Saura, 1981), 'El Sur' (Víctor Erice, 1983), 'Federico García Lorca' (Healey, 1998), 'Solas' (Benito Zembrano, 1999) and 'Camarón' (Jaime Chávarri, 2005). The course will be conducted in Spanish (with the exception of readings by authors whose original texts are not in Spanish).
METHOD OF EVALUATION: A 10-page paper will be assigned based on what each student most takes away from the class.
PREREQUISITES: Fluency in Spanish
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Personal interviews
COST: $0
MEETING TIME: mornings; class will meet twice a week for three hour sessions.
ADJUNCT INSTRUCTOR: John Healey

ADJUNCT BIO: The instructor lived in Southern Spain for over twenty years, is a published author, is fluent in Spanish and directed the feature length documentary film 'Federico García Lorca' (1998-RTVE/A.r.t.e.)

RUSSIAN

RUSS S.P. Sustaining Program for Russian 101-102
Required of all students enrolled in Russian 101-102. Three meetings per week, 50 minutes per session. Practice in speaking and comprehension based on material already covered as well as some new vocabulary and constructions. Designed to maintain and enhance what was acquired during fall semester, using new approaches in a relaxed atmosphere. No homework.
Regular attendance and active participation required to earn a "Pass." Open to all.
Meeting time: mornings; 9-9:50 a.m.
TBA

RUSS 12 Film Propaganda CROSSLISTING: COMP 12
COURSE DESCRIPTION: Since its birth over a century ago, cinema has demonstrated a peculiar propensity for propaganda, with some of the twentieth century's greatest directors producing films that explicitly seek to alter spectators' beliefs and behavior. This course explores the curious relationship between film and propaganda by examining ten cinematic masterworks from the twentieth century, including D.W. Griffith's The Birth of Nation (1915), Dziga Vertov's Man With a Movie Camera (1929), Leni Riefenstahl's Triumph of the Will (1935), Stanley Kubrick's Dr. Strangelove (1964), and Francis Ford Coppola's Apocalypse Now (1979), among others. Our viewing will be accompanied by a variety of short critical texts that will help us to understand what propaganda is, why it lends itself so readily to film, and what it has to do with politics, entertainment, and art. In addition to watching ten of the greatest movies ever made, students will maintain a course blog that chronicles our viewing experience and create their own works of video propaganda by the end of winter study. We will meet 3-4 times per week for 90 minutes to discuss what we are watching and reading in the afternoons, as well as 3-4 evenings each week to watch the assigned films together.
METHOD OF EVALUATION: Students' participation in the course blog and their works of video propaganda.
PREREQUISITES: none
ENROLLMENT LIMIT: none
METHOD OF SELECTION: Preference given to students majoring or planning to major in Russian and Comparative Literature, as well as students with a demonstrated interest in film and/or video.
COST: $10.00
MEETING TIME: other
EXPLANATION OF MEETING TIME: 3-4 evening film screenings each week; 3-4 afternoon meetings (90 minutes each) per week
INSTRUCTOR: Julie Cassiday

RUSS 25 Republic of Georgia CROSSLISTING: SPEC 24
COURSE DESCRIPTION: Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in any field. Our students have worked in the Georgian Parliament, helped in humanitarian relief organizations like Save the Children, interned in journalism at The Georgian Times, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Sveti-tskhoveli and the twentieth-century Stalin Museum, take the ancient Georgian Military Highway to ski in the Caucasus Range, see the birth-place of the wine grape in Kakheti and the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course students will write a 10-page paper assessing their internship experience.
Knowledge of Russian or Georgian is not required.
PREREQUISITES: none; not open to first-year students
ENROLLMENT LIMIT: 8.
METHOD OF EVALUATION: 10-page paper
METHOD FOR SELECTION: Through short essays describing why they want to participate, and through personal interviews, if necessary
COST: $2500
INSTRUCTOR: Darra Goldstein

THEATRE

THEA 12 Shakespeare on Film CROSSLISTING: ENGL 27
COURSE DESCRIPTION: The greatest English language playwright composed his dramas for a remarkably spare and simple theatrical setting. Yet that same playwright is undoubtedly the one whose work has spawned more film productions and adaptations than any other in history. (Wikipedia lists over 410 full-length film and TV versions of his works.) How do we reconcile Shakespeare's minimalist Elizabethan theatrical vision with his explosion onto the high-tech screens of the 20th and 21st centuries? What happens when the "unworthy scaffold" of the Globe Theater's "wooden O" morphs into wide angles, cross cuts, live action, and even digital animation. This Winter Study course will investigate these questions through reading and then viewing film versions of a selection of Shakespeare's major plays.
Requirements: Attendance at each session, participation in discussion. Completion/Presentation of final project where students imagine their own adaptations of a favorite Shakespeare play.
METHOD OF EVALUATION: Completion/Presentation of final project where students imagine their own adaptations of a favorite Shakespeare play.
PREREQUISITES: None
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: Theatre majors, English majors
COST:
MEETING TIME: mornings
EXPLANATION OF MEETING TIME: Prefer M/W/Th 10-12:50
INSTRUCTOR: Robert Baker-White

THEA 13 Comic Theory
COURSE DESCRIPTION:
What makes us laugh, and why? In this course, we'll examine why we find things funny and discuss the cornerstones of comedy criticism: the elements and conventions of Greek and Roman comedy (the happy idea, the confusion of realms, critiques of human intervention), Hobbes and Baudelaire on superiority, Bakhtin's theories of the grotesque and carnivalesque, Bergson's idea of the mechanical encrusted upon the living, Freud's economy of psychic expenditure, Frye's theory of archetypes and social transformation, and others. We'll also watch, read, and discuss great comedies, including "Ivona, Princess of Burgundia." You'll always have answers for that eternal question: what's so funny?
METHOD OF EVALUATION: 10-page paper, final project, or presentation
PREREQUISITES:
ENROLLMENT LIMIT: 30
METHOD OF SELECTION:
COST: $0
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Ilya Khodosh

ADJUNCT BIO: Ilya Khodosh '08 has an MFA in Dramaturgy and Dramatic Criticism from the Yale School of Drama.

THEA 14 American Theatre Festivals in New York City and Beyond
COURSE DESCRIPTION: "January is the Coolest Month Onstage" in NYC (NT Times - January 3, 2012). Theatre Festivals around the world showcase the talents and ideas of successive generations of writers, directors, designers and actors. Famously, festivals in Edinburgh, Avignon, Grahamstown in South Africa, and many, many others draw the attention of theatre people throughout the world. In this course we will look at the seasons of some of those festivals and try to gauge the forces that have inspired them. Not least indeed, amongst cities that host theatre festivals, is New York. We will pay particular attention to current festivals, and pay a visit to the city. During January, The Association of Performing Arts Presenters (APAP) has its annual "trade conference", which draws tens of thousands of artists and arts facilitators to buy and sell their wares. The class will pay a 3 to 4 day weekend visit to New York to attend some of the Theatre Festivals that occur during that time. We will go to Under The Radar; Coil; American Realness; CultureMart and others.
METHOD OF EVALUATION: A final ten minute presentation to the class, based on each students findings.
PREREQUISITES: NONE
ENROLLMENT LIMIT: 10
METHOD OF SELECTION: Some theatre or theatre-going experience will be considered.
COST: $200
MEETING TIME: afternoons
INSTRUCTOR: David Eppel

THEA 15 Plays For The Festival And Beyond
COURSE DESCRIPTION: In 2014, Mandy Greenfield will assume the artistic directorship of WTF. With a strong background in developing and producing new plays, Mandy will develop several new works for the Festival in 2015. Actress and teacher Jessica Hecht will lead a developmental workshop of three of the scripts to be included at the Festival in Summer 2015. These

developmental workshops will offer students the chance to act, direct and dramaturge in collaboration with the playwrights and will culminate in a trip to New York where they will have class with Mandy and do a final reading of all three plays. This project was initiated by Jessica at NYU where she teaches in the Experimental Theatre Wing and carried out on commissions for the Manhattan Theatre Club, The Public and the Vineyard with writers including Adam Rapp, Liz Flahive and Jenny Schwartz. Students will be expected to read each of the three WTF plays and at least one other play from all 3 writers in advance of the start date. Outside class, students will be required to rehearse scenes and read newly generated material. Acting in the final reading is not required but students must be open to reading in class. Jessica's work includes many Broadway plays , the new works of Sarah Ruhl, Richard Greenberg and Diana Son, and the tv series Breaking Bad and Friends. Mandy is the current Artistic Producer of The Manhattan Theatre Club and will take over the Festival this Fall. As mentioned, students will meet the writers and have the input of one or two other professional actors and or directors who have been working with Jessica in this developmental process over the past several years.
METHOD OF EVALUATION: Final Presentation. Detailed script notes are required for all, If not performing, additional dramaturgical material is requested.
PREREQUISITES: 2 semesters of theatre - performance preferred but not required
ENROLLMENT LIMIT: 20 is preferred-24 MAX
METHOD OF SELECTION: students screened through a letter of interest and/or resume
COST: $225 to cover cost of 2-day field trip to NYC.
MEETING TIME: other
EXPLANATION OF MEETING TIME: Class will likely be a Monday intensive (8hrs) with approximately 4 hours of rehearsal scheduled during the week and an additional meeting with the playwright/director or Jessica. Total: 14-15 hours
ADJUNCT INSTRUCTOR: Jessica Hecht

ADJUNCT BIO: Jessica Hecht is a Tony award nominated actress known for originating characters in several new plays on Broadway and off. She teaches at NYU Tisch School of the Arts and has done 8 seasons at the Williamstown Theatre Festival

THEA 32 Senior Honors Thesis

WGSS 25: Creating Social Enterprises with Marginalized Ugandan Youth
Teams of Williams students have been working for several years now in Uganda to empower groups of HIV+ youth there in their activism against the AIDS pandemic and the underlying issues of poverty, inequality and social marginalization. Over the last two years we have been focusing on building a network of training and support for the creation of social enterprises to be run by groups of marginalized youth. This year we will take the next step: a smaller group of Williams students will go to Uganda to learn and teach about worker–owned cooperatives and work with our Ugandan partners to open their own worker–owned business.
This approach stems from the realization that grassroots activism is usually done most effectively by those who live inside the community in question and are themselves intimately affected by the issues. When it comes to HIV Uganda now has a generation of youth who have grown up with the virus, including many who were born HIV+ and have reached adulthood thanks to the availability of antiretroviral drugs. Now in their teens and twenties, these youth have become, or are becoming sexually active and often want to have children of their own. They are crucial actors in the future of the pandemic, whether it will become more deeply entrenched in intergenerational cycles of stigma, poverty and inequality or communities will be able to lift themselves out of those spirals. When supported and mobilized positive youth make extraordinary activists. Yet many of them find themselves isolated and stigmatized, unable to disclose their status to friends, colleagues or teachers, or find support from other youth in similar situations. Other groups of youth find themselves marginalized because of their sexual orientation or gender expression: these young people are often thrown out of families, schooling, and employment and left few alternatives to sex work and chaotic, unstable living situations, putting them at high risk for HIV.
When these affected actors become activists they can be very powerful, but given their marginal economic status they are usually extremely dependent on outside funding. Without that they lack the resources even to take public transport to attend meetings or go out into the community to do sensitization or advocacy. Their activist work becomes dependent on funding cycles and the whims and fashions of the donor community. The idea we have been working with, then, is to collaborate with them to create social enterprises that train the activists in income–generating skills, give them the opportunity to generate income as a group, and use some of that income to fund their own continuing activism.
Worker cooperatives are a model that has been used in Europe and the US since the 1800s, and is increasingly being used in Latin America. They are particularly appropriate for marginalized groups as a means of building solidarity and democratic practices, jointly accessing capital, and building income and assets. The UN declared 2012 the 'year of the co–op', and it has been argued that it is a particularly appropriate form for African contexts. Uganda has more experience with farmers' cooperatives than worker co–ops, but there is growing interest and expertise in the region. Week 1 of our trip will include a training program in Kampala, jointly taught by the Williams group and our Ugandan collaborators, including visits to existing co–ops and lectures from local experts on mentoring social enterprises. For week 2 we will divide into small groups to develop proposals and business plans for creating new co–ops. The entire team will then vote on a proposal to move forward with. During week 3 the groundwork for a particular co–op will begin, building the experience that, over the next two years, will help develop a Kampala co–op incubator with the capacity to create and mentor future co–ops as social enterprises for marginalized youth. In our down time we will have a chance to view some of Uganda's natural beauty and wildlife, as well as moving around Kampala, a vibrant East African hub.
METHOD OF EVALUATION: Evaluation will be based on student journals and participation throughout the class.
ENROLLMENT LIMIT: 8
METHOD OF SELECTION: Students will be chosen through an application form and interview.
ESTIMATED COST: $3,650 including flights.
INSTRUCTOR: Kiaran Honderich

SPEC 15 Contemporary American Songwriting CROSSLISTING: AMST 15/MUS 15
COURSE DESCRIPTION: Contemporary American Songwriting
This course will focus on learning how to write and perform songs in a contemporary style. Topics addressed will include song structure, how to create a lyric that communicates, vocal and instrument presentation, performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs. These songs must be conceived during the course period (previously written material is not usable). Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. At least one of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and all officially scheduled events is mandatory. A short writing assignment based on the assigned reading will be passed in on the last day of class.
No pre-requisites. Students with a musical background and the ability to play and instrument may be given preference, but anyone interested is encouraged to register. (Bernice.Lewis@williams.edu). Enrollment limit: 14.
Please be aware that this course meets four days a week.
METHOD OF EVALUATION: Attendance, Final Performance, and writing assignment
PREREQUISITES: None
ENROLLMENT LIMIT: 14
METHOD OF SELECTION: 14 per section, upperclassmen may be given priority, also experience as musicians, and gender balancing,
COST: $35 class fee
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Bernice Lewis

SPEC 17 Addiction Studies and Diagnosis
The goal of this class is to help students develop an effective understanding of the definition, impact, and treatment of addiction. Students will be familiarized with the DSM-5, the text used to diagnose mental illness in the US. Students will read a history of addiction in the US and the central text of Narcotics Anonymous to understand the structure of 12 Step recovery. Speakers will tell their stories in their journey from addiction to recovery. Students will be expected to accurately diagnose the speaker according to the criteria in the DSM-5. Finally, an extensive annotated bibliography and oral presentation will be presented in groups at the end of the course. The course will be capped at 15 students.
Calendar of Classes
Mon January 5 Introduction and Lecture on Chemical Dependency and 12 Step Counseling
Readings: Slaying the Dragon pages 1-78 Narcotics Anonymous - start reading
Wed January 7 "My Name is Bill W." 1st Quiz
Readings: Slaying the Dragon- pages 79-197 Narcotics Anonymous - continue reading
Mon January 12 Guest Speaker - 1st Presentations
Readings: Slaying the Dragon- pages 199-260 Narcotics Anonymous - continue reading
Wed January 14 "Days of Wine and Roses" -2nd Quiz
Readings: Slaying the Dragon- pages 263- 341 -Narcotics Anonymous - continue reading
Mon January 19 Martin Luther King Jr. Day - Guest speaker -Narcotics Anonymous - continue reading Narcotics Anonymous

Wed January 21 Third Quiz -Readings Narcotics Anonymous - continue reading 3rd Quiz
Mon January 26 Guest Speaker -Readings Narcotics Anonymous - finish reading (stories optional)
Wed January 28 Group Presentations, evaluations and wrap up
Grading for the class
Annotated Bibliography and Oral Presentation(s) 30%
Journal entries - 1 page minimum each topic (@ 250 words) - Attend and comment on three 12 Step meetings. Reports on three people who took the CAGE, MAST and Johns Hopkins test - one person must 'pass' one of the tests. Choices nearby are Al-Anon, OA, AA, and NA. Eight entries, 5% each, 40% total
Attendance - 15%
Quizzes- 15%
Texts - "Slaying the Dragon: The History of Addiction Treatment and Recovery" by William White and "Narcotics Anonymous, 6th Edition"
MEETING TIME: MW 12:30-3:30
ADJUNCT INSTRUCTOR: Rick Berger

SPEC 18 Live! from Studio 275
COURSE DESCRIPTION: This course is designed to explore roles, technology and workflows associated with writing, producing and directing a "live" studio-based video production.
Class time will consist of lecture mixed with hands-on instruction/participation learning the various tech systems (lighting, cameras, audio and tri-caster) installed in Video Studio 275 at the Center for Educational Technology. In tandem, we will explore the roles and responsibilities of a studio production crew through lecture, student research and class presentations.
Midway through the course, we will form groups to conceive of, write, produce and direct multiple 30-minute shows. Each student will take on the role of writer, producer or director for their show, assigning others from the class to production crew roles.
We will meet for 3, two-hour sessions each week (lecture and workshop) with an additional required research/sofware learning/production time (minimum of 6 hours/week, additional during the final production week)
Enrollment limited to 12
METHOD OF EVALUATION: Topic based research and class presentation, class participation, completion of shows (final project).
PREREQUISITES: interest in studio-based video production
ENROLLMENT LIMIT: 12
METHOD OF SELECTION: Short essay submission.
COST:
MEETING TIME: mornings
ADJUNCT INSTRUCTORS: Tamra Hjermstad and Bruce Wheat

SPEC 19 Medical Apprenticeship
Firsthand experience is a critical component of the decision to enter the health professions. Through this apprenticeship, students can clarify their understanding of the rewards and challenges that accompany the practice of all types of medicine. Apprenticeships are arranged in two distinct ways: some students live on campus and are matched with a local practitioner, while others make independent arrangements to shadow a distant professional. The expectation is that each student will observe some aspect of medicine for the better part of the day, five days per week. In recent years, students have shadowed physicians, veterinarians, dentists, nurses, and public health experts.
A 5-page reflective paper is required, as is attendance (for those shadowing near campus) at three Tuesday evening programs. Students will meet from 6:30-8:30 p.m. over dinner to hear from invited speakers from the medical community as a stimulus to discussion about their apprenticeship experiences.
Prerequisites: interested students must attend an information meeting in early October. Local enrollment is limited by the number of available practitioners. Preference for placements will be given on the basis of seniority and demonstrated interest in the health professions.
Cost: local apprenticeships: required vaccinations, local transportation and possibly lunches. Distant apprenticeships: costs will vary based upon location.
Instructors: Steven Anisman, M.D.; David Armet. ADJUNCT INSTRUCTOR: JANE CARY, Health Professions Advisor

SPEC 20 Student Leadership Development CROSSLIST: LEAD 20
COURSE DESCRIPTION: As students move through their time in college, many will opt to take on roles of leadership in the Williams community. This desire to be engaged and involved leads to the development of life skills and abilities that become highly marketable traits post-graduation. Student Leadership Development is focused on facilitating student awareness of their unique interests and abilities, their connection to their involvement at Williams College and within their communities, and how their extracurricular involvement interfaces with their career trajectory.
This course will utilize student development theories as conceptual frameworks to analyze student leadership and involvement, and offer coursework involving career and personality assessments, case study analyses, class discussion, short-term experiential learning projects, and exposure to guest speakers who expose students to the breadth of opportunities on campus.
Through the duration of the course, students will engage in ongoing dialogue and will have the opportunity to create and share a small group presentation connected to one of the topics of focus as related to a selected case study. Students will leave the course with an enhanced awareness of their own leadership potential, the relationship between their leadership skills and career options, and insight into the factors and experiences that shape them as today's student leaders, and tomorrow's engaged citizens and community builders.
METHOD OF EVALUATION:
Students will be evaluated based on class participation, a weekly journal that must be kept, and 2 papers (mid-winter study, and final).
PREREQUISITS:
None
ENROLLMENT LIMIT:
20
HOW STUDENTS WILL BE SELECTED:
Preference will be given to first year and second year students
ESTIMATED COST TO STUDENT:
$50 - This will include the purchase of self-assessment tests, and a required text
MEETING TIMES:
Students will meet in a lecture/discussion format for 6 hours per week (M/W/F for two hours each) and will spend between 4-6 hours each Thursday doing experiential learning in the given weeks' focus area
ADJUNCT INSTRUCTORS: Benjamin Lamb and Mike O'Connor

INSTRUCTOR BIOS:
Benjamin Lamb -Assistant Director for Student Involvement - Student Organizations: Ben joined Williams in January 2010 as an intern in the Office of Student Life, in May 2010 he joined on as a full-time staff. In his role he works with student groups, leadership and identity development. With a background in the sciences, Ben has worked has worked as a wildland firefighter, salmon population researcher, chemist, ecotourism manager, career counselor, admissions councilor, high school guidance counselor, and also currently serves as a City Councilor in the City of North Adams.
Patricia Leahey-Hays - Assistant Director for Student Involvement - Residential Programs: Patricia has a degree in public policy and a MBA but has spent most of her professional career working in higher education administration in student development. She is currently working with a very talented group of Williams College students in her role focusing on residential life and leadership development.
Mike O'Connor - Director of the Career Discovery Program: Mike O'Connor joined Williams in September 2013 after spending three years as Director of Career Planning at the Sage Colleges in Albany and Troy, NY, where he oversaw two campus Career Service offices for a population of 3000 liberal arts, business, health science, and education students at the Bachelors, Masters, and Doctoral levels. Mike has been assisting students with all areas of Career Planning for over eight years, having also worked at Hiram College, Union College, and as a private tutor in Granada, Spain. Mike has a M.A. in Student Affairs & Diversity from Binghamton University and a B.A. in Psychology from the University of Connecticut.

SPEC 21 - Experience the Workplace; an Internship with Williams Alumni/Parents
II. Course description: Field experience is a critical element in the decision to enter a profession. Through this internship, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. Internship placements are arranged through the Career Center, with selected alumni and parent acting as on-site teaching associates. The expectation is that each student will observe some aspect of the profession for the better part of the day, five days per week. It is also expected that the teaching associate will assign a specific project to be completed within the three-to-four week duration of the course depending upon appropriateness.
Intellectual Merit: Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience.
a. Method of evaluation: It is expected that students will complete assigned readings, keep a daily journal, and write a 5-10 page expository review and evaluation that will become public record as a resource for other students.
b. Required activities and meeting times: The expectation is that each student will be in the field to observe some aspect of the profession for the better part of the day, five days per week. In addition to observation there may be an opportunity to work on distinct projects generated by the instructor depending upon appropriateness.
c. Prerequisites: interested students must attend an information meeting in early October, and meet individually with Career Center staff to go over the details of their placements.
d. Enrollment: Enrollment is limited by the number of available teaching associates (instructors).
e. Student selection criteria: Placements will be determined by the individual alum or parent sponsor based on application and possible telephone interview.
f. Meeting Times: each student will be in the field to observe some aspect of the profession five days per week, at least 6 hours per day.
g. Cost to students: Local apprenticeships - local transportation. Distant apprenticeships - costs will vary based upon location, BUT ARE THE RESPONSIBILITY OF THE STUDENT. The college has no extraordinary funding to support the internship.
h. Teaching Associates (*instructors*): Williams College alumni and parents of current Williams students will be recruited to become instructors for this course. A broad range of professions will be represented as the course develops. Alumni and parents will receive individual orientations with the course director in person or via telephone conference.
i. Sponsor's Name: John Noble, Director of the Career Center and Dawn Dellea, Manager of Alumni and Parent Engagement Programs
III. Budget: we would like to use the $500 maximum budget allocation to recognize the contribution of the instructors, in the form of an appropriate plaque or certificate.
IV. Bibliography: a bibliography of readings would be selected from such works as:
Ready or Not, Here Life Comes by Mel Levine, 2005.
What Should I do with My Life? by Po Bronson, 2003.
Working by Studs Terkel, 1974.

Zen and the Art of Making a Living by Laurence Boldt, 1993.
V. Addendum: it is the intention of the course to offer a wide variety of traditional and non-traditional field placements for students that are not offered by other Winter Study courses. I'm happy to report that 100% of the students surveyed said they would recommend this course.

SPEC 24 Republic of Georgia CROSSLISTING: RUSS 25
See under RUSS for full description

SPEC 25 Digging Deep into Winter Food: Farm-to-Plate Living in Vermont
COURSE DESCRIPTION: Vermont is a leader in food sustainability. The state is rich in farms using sustainable agriculture techniques. Communities in Vermont often embrace locally grown food as a marker of identity. This one-week residency at Green Mountain Girls Farm in Northfield, Vermont offers students hands-on learning in the context of the farm as well as exposure to current food policy work in Vermont. Students will learn about ecological agricultural approaches such as permaculture, work with dairy goats and laying hens, and cook and process food from the farm. Visits to farms and organizations in the immediate area will frame the theme of sustainable food in the context of community. This includes hearing from government officials and non-profit leaders in nearby Montpelier.
This course will meet twice prior to leaving campus and twice following return to campus. The residency at Green Mountain Girls Farm lasts one week, from Tuesday, January 13 to Tuesday, January 20. Students will write one two-page paper detailing their understanding of course themes and expectations for the course prior to departure. Readings for this course focus on food systems design and the impact of regional food systems on local Vermont economies, such as the 2011 Farm to Plate Strategic Plan from the Vermont Sustainable Jobs Fund. While at the farm, students will research and present creative individual projects. Students will submit a second two-page paper reflecting on their experience upon returning to Williams.
Requirements: Vermont is cold in January, and many activities will take place outside. Students must bring layered cold-weather clothing, including sturdy insulated boots suitable for snowshoeing, insulated gloves, neck warmers or scarves, winter hats, and sunglasses. Students are welcome to bring cross-country skis for recreation. Snowshoes will be provided for forest outings.
Enrollment limit: 9. Students expressing convincing interest in the themes of the course will be preferred.
COST: $1000.00
ADJUNCT INSTRUCTORS: Brent Wasser and Mari Omland '89
SPONSOR: Zilkha Center

SPEC 26 Opportunities and Challenges: Living and Working with Immigrants and Refugees in Portland, ME CROSSLISTING: BIOL 26
COURSE DESCRIPTION: This Winter Study project will allow students to experientially explore questions of identity and privilege, as well as the current challenges and opportunities surrounding resettlement of diverse groups of immigrants and refugees. Students experience these questions through three weeks of living and working with host families in Portland, a city of 65,000 people which is home to approximately 13,000 resettled refugees. Each student will live as part of a culture within another dominant culture. In the spirit of past Gaudino programs in experiential education, this program encourages students to take an active role in the learning process. Students will learn from their experience through rigorous and critical dialogue, reflection, and activity. They will encounter first-hand the issues they have previously read or heard about and they will actively use those experiences both during the WSP, as well as back on campus through follow-up activities and discussions in and out of the classroom
Sponsored by the Gaudino Scholar and Gaudino Fund since 2008, this Winter Study course will allow a small group of students to have a cultural immersion experience in the U.S. Portland, Maine, a refugee resettlement city for over 30 years, has over 60 languages spoken by students in its schools, and residents from over 80 countries all over the world. Inspired by the transformative Williams-at-Home program, each student will live with a refugee or immigrant host family, and work either as a teacher or medical apprentice. Most students will work in one of the Portland school or adult education classrooms with students whose families are new to the United States. The Williams student will gain practical experience as a teacher, tutor, and mentor in multiple classrooms with many diverse students. Students will also have a chance to talk with senior teachers and administrators about the challenges facing 21st century schools in the United States in an increasingly diverse society and global economy. There will also be an opportunity for a student or two seeking medical or public health experience to shadow medical or mental health practitioners in several community clinics serving the refugee and immigrant populations. Students will be challenged to reflect upon their own identity, assumptions, privileges, and values.
In December students will receive articles and orientation materials to prepare for their experience, and must write a 5-page reflective essay due on arrival in Maine on their experience of their identity: ethnicity, national identity, race, and/or class, and its impact on their lives. Each student must also keep a journal during the program and at the end turn in a 5-page reflective essay addressing how her or his impressions, assumptions, or values were challenged or changed concerning those topics addressed in the opening essay. The student group will have a day-long orientation upon arrival in Maine, will meet weekly to share insights and challenges, and will have the opportunity for one on one reflection time
prerequisites: Open to sophomores, juniors, seniors
method of evaluation: 5-7 page final paper
enrollment limit: 6
method for selection: If the course is over-enrolled, the Instructor will give preference to those students who demonstrate, in a short conversation with and/or essay submitted to the instructor, their interest in experiential learning generally and the problems confronting recent immigrants to the U.S. specifically.
COST: Cost: $750 ($30/day) for room and board to host families, plus travel to and from Portland. Students on Financial Aid will receive Gaudino funding as determined by the Financial Aid office.
itinerary: January 5 - Students arrive in Maine, begin orientation January 6 - Student orientation January 7 - Students tour work placement sites, meet host families January 8 - Work placements begin January 13 - Group check-in January 17 - Group discussion/Activity January 21 - Individual check-ins January 24 - Host family potluck January 28 - Wrap-up, evaluation, closing January 29 - Last day of Winter Study
ADJUNCT INSTRUCTOR: Heather Foran '04

SPEC 28 Class of 1959 Teach NYC Urban Education Program
Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants will be expected to pursue a full day's program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at $400 for the term. Further assistance is available for financial aid students.
Evaluation will be based on a journal and a 5-page paper.
Prerequisites: sophomore, junior or senior standing; not open to first-year students.
Enrollment limit: 12.
Cost: $400.
Meeting time: off-campus fieldwork: daily 8:30 a.m.-3 p.m. and weekly seminar dinners.
ADJUNCT INSTRUCTOR: TRACY FINNEGAN
Sponsor: WINTER STUDY COMMITTEE

Tracy Finnegan is a master's level teacher with training and teaching experience in a variety of approaches and settings.

SPEC 35 Making Pottery on the Potter's Wheel
Each class will begin with a lecture-demonstration, followed by practice on the potter's wheel. Each student will have the use of a potter's wheel for every class. Pottery making classes will be held in the mornings, 9 AM to 12:15 PM, at Oak Bluffs Cottage Pottery in Pownal, Vermont. We will work on mugs, bowls, pitchers, plates, jars, lids, vases, and bottles, and will finish these shapes as required by trimming and adding handles, lugs, lids, spouts, and knobs. We will also work on several different handbuilding projects. Early in the Winter Study Session there will be a 1.5-hour slide presentation held one afternoon at a location on Campus. After the tenth pottery making class meeting, all completed work will be biscuit-fired. The eleventh meeting will be devoted to glazing the biscuited pieces. Glazing techniques will include pouring, dipping, layering, brushing, and stamping, and using wax resist and other masking techniques to develop pattern and design. The completed work will then be glaze-fired. The last meeting, held at Oak Bluffs Cottage Pottery early in the new semester, will be devoted to a "final project" (positive-orientation) critique in the studio of your finished work. Woven into lecture-demonstrations will be presentations on various topics relating to the science and history of pottery making.
Requirements: attendance at all class sessions and enthusiasm for learning the craft of pottery making.
No prerequisites or potterymaking experience necessary. *Enrollment limit: 9.*
Cost: $335 lab fee, plus makeup class fees ($50.00 per class) if applicable. No makeup class fee charged for excused absence.
Meeting time: mornings, plus one afternoon slide presentation, and one final 1-hour critique session early in the spring semester at a time to be arranged.
ADJUNCT INSTRUCTOR: RAY BUB

Ray Bub is a ceramic artist and teacher at Oak Bluffs Cottage Pottery in Pownal, Vermont, 10 minutes north of the Williams College campus. All class meetings except the slide show take place at Oak Bluffs Cottage Pottery. Learn more about Ray Bub at www.raybub.com

SPEC 39 "Composing A Life:" Finding Success and Balance in Life After Williams
COURSE DESCRIPTION: To be at Williams you have learned to be a successful student, but how do you learn to be successful in life? How will you define success in both your career and in your personal life? How will you achieve balance between the two? In short, what will constitute the "good life" for you? We borrow the concept of "composing a life" from Mary Catherine Bateson, as an apt metaphor for the ongoing process of defining success and balance in life. This course is designed: (1) To offer college students an opportunity to examine and define their beliefs, values, and assumptions about their future personal and professional lives before entering the "real" world; (2) To encourage students to gain a better understanding of how culture, ideology, and opportunity affect their life choices; (3) To provide an opportunity for students to consider different models of success and balance through "living cases" (in the form of guests from various professions and lifestyles); and (4) To aid students in contemplating their own life/career options through individual advising and introducing various career and life planning resources. Using selected readings, cases, and guest speakers, we will explore both the public context of the workplace as well as the private context of individuals and their personal relationships in determining life choices.
Requirements: regular attendance, class participation, field interview, and a 10-page final paper, weekly assignments include cases and readings from a variety of related fields, and some self-reflection exercises.
No prerequisites. Questions about the course: please contact Michele Moeller Chandler at (413) 458-8106 or michele.chandler2@gmail.com
METHOD OF EVALUATION: 10-page paper
PREREQUISITES: none
ENROLLMENT LIMIT: 15
METHOD OF SELECTION: preference to juniors and seniors
COST: approximately $35-40 for reading materials and cases
MEETING TIME: mornings
ADJUNCT INSTRUCTOR: Michele Moeller Chandler and Chip Chandler

ADJUNCT BIO: Michele Moeller Chandler ('73) and Chip Chandler ('72) have taught this Winter Study course for the past eighteen years. Michele, a former college administrator, has an M.A. from Columbia, and a Ph.D. from Northwestern. Chip, a retired McKinsey senior partner, has an M.B.A. from Harvard, and currently teaches in the Leadership Studies Program.

PRESIDENTS OF WILLIAMS

Ebenezer Fitch, D.D., 1793–1815
Zephaniah Swift Moore, D.D., 1815–1821

COMMITTEES 2014-2015

Numbers in parentheses indicate respectively the number of faculty members, ex-officio members (often officers of administration) and student members. The faculty, staff members and students for 2014-2015 as well as ex-officio members appear in brackets.

Academic Standing (CAS) (6-4-0): Responsible for maintaining academic standards. Reviews records of students with inadequate academic performance; rules on requests for the waiving of academic regulations or other unusual academic activities; and decides on some requests for readmission. [Ngoni Munemo, *Chair*, Dick DeVeaux, Dave Edwards, Luana Maroja, Lucie Schmidt, Candis Smith, Dave Johnson*, Richard Nesbitt*, Sarah Bolton*, Barbara Casey*.]

Appointments and Promotions (CAP) (3-3-0): advises the President and trustees about faculty appointments and advancement. Although students do not sit with the committee, the CAP receives student opinion about faculty from the departments. Departments gather student opinion through student advisory committees, direct interviews with students, and the Student Course Evaluation Survey. In addition, students may volunteer evaluations to department chairs or the the Dean of the Faculty directly. [Andrea Danyluk, Leyla Rouhi, Dave Zimmerman, Adam Falk*, Will Dudley*, Denise Buell*.]

Calendar and Schedule (3-2-3): Deals with proposing the academic calendar to the faculty and with approving the class hour schedules submitted by the departments. [Leslie Brown, *Chair*, Marjorie Hirsch, Fred Strauch, Bud Fisher*, Stephen Sneed*, Barbara Casey*, students to be announced.]

Discipline (8-1-8): Hears and rules upon cases of alleged violations of College regulations. All the student members also serve as the Student Honor Subcommittee, which hears cases of alleged violations of the Honor Code and recommends appropriate action to the Dean. Four faculty members of the Discipline Committee serve in an advisory capacity to the Honor Committee. [Gretchen Long, *Chair*, Quamrul Ashraf, Jimmy Blair, Kris Herman (fall), Jeff Israel, Steve Kuster (spring), Liz McGowan, Rob Savage, Cheryl Shanks, Sarah Bolton*, students to be announced.]

Diversity and Community: The Committee on Diversity and Community focuses on issues of diversity and community on campus and makes recommendations on both curricular and extracurricular matters with the intention of promoting better understanding between and among groups on campus. [Cecilia Chang, *Chair,* Jen Chuks, Dan Greenberg, Roger Kittleson, Jim Mahon, Ashok Rai, Karen Swann, Christian Thorne, Wendy Wang, students to be announced.]

Educational Policy (7-4-6): Recommends educational policy and maintains a College-wide overview of the curriculum. [Peter Low, *Chair*, Julie Cassiday, Phoebe Cohen, Sara Dubow, Jessica Fisher, Greg Mitchell, Mihai Stoiciu, Sarah Bolton*, Denise Buell*, Barbara Casey*, Adam Falk*, students to be announced.]

Faculty Steering Committee (6-0-0): discusses topics of particular interest to faculty and meets with student groups from time to time to discuss issues in common. [Cathy Johnson, *Chair,* Lois Banta, Mea Cook, Edan Dekel, Nick Howe, Ben Rubin.]

Honorary Degrees (3-2-3): Makes recommendations to the President and Trustees on honorary degree recipients and speakers at Commencement and Convocation. [Laylah Ali, David Dethier, Laura Ephraim, Jay Thoman*, Keli Gail*, students to be annouced.]

Information Technology (4-5-3): Recommends policies for use of computers and word processors in courses and for research; advises on the acquisition of hardware and software needed to support academic computing. [Bill Lenhart, *Chair,* Jason Josephson, Nate Kornell, Aida Laleian, Will Dudley*, David Pilachowski*, Dinny Taylor*, two administrators appointed by the Provost*, students to be announced.]

Lecture (4-0-4): Schedules and makes arrangements for visiting lecturers. [Mike Glier, *Chair*, Rose Kelanic, two faculty to be announced, students to be announced.]

Library (3-3-3): Makes recommendations on matters of library policy, including the allocation of the purchasing budget among the academic departments. [Amanda Wilcox, *Chair*, Brent Heeringa, Eric Knibbs, Denise Buell*, David Pilachowski*, Robert Volz*, students to be announced.

Priorities and Resources (4-7-3): Reviews trends in the annual College budget and consults with the Provost, Vice Provost and Treasurer on them as well as on matters relating to priorities in fundraising and resources for capital expenditures, principally for middle-to-long-range spans of time. [Rob Baker-White, *Chair*, Sara LaLumia, Claire Ting, Bill Wagner, Will Dudley*, Steve Klass*, John Malcolm*, Fred Puddester*, Matthew P. Sheehy*, Chris Winters*, students to be announced.]

Undergraduate Life (5-3-6): Recommends policy on all non-academic aspects of student life including faculty-student relations, student governance, student housing, and athletic activities. [Bojana Mladenovic, *Chair*, Matt Carter, Scott Lewis, Carolyn Miles, Steve Tifft, students to be announced.]

Winter Study (5-4-4): Recommends policy on the Winter Study Program and administers it, including review of all faculty and student projects for approval and allocation of funding. [Jerry Caprio, *Chair*, Julie Blackwood, David Morris, Alison Swain, Li Yu, students to be announced.]

* Ex-officio

SPECIAL ADVISORS 2014-2015

Architecture: Ann K. McCallum
Business Schools and Business Opportunities: Robin Meyer
Divinity Schools: Richard E. Spalding
Engineering: Jefferson Strait
Faculty Fellowships: John Gerry
Federally Funded Faculty Fellowships (NSF, Fulbright, HHMI, etc.): Chris Winters
Graduate Fellowships and Scholarships: Katerina King

Churchill Scholarship
Fulbright Predoctoral Grants
Luce Scholars Program
NSF Scholarships
Rhodes, Marshall, Mitchell Scholarships
Harry S. Truman Scholarship
Udall Scholarship
Watson Fellowship

Graduate Schools of Arts and Sciences: Department Heads
Health Professions Advisor: Jane D. Cary
International Student Advisor: Laura B. McKeon
Law Schools: Michelle Shaw
National Science Foundation: Department Chairs
Peace Corps: John Noble
Public and International Affairs Schools and Foreign Service: James McAllister, John Noble
Special Academic Programs: Molly L. Magavern
Student Writing Tutorial Program: Stephanie E. Dunson
Study Abroad Programs: Laura B. McKeon
Teaching, M.A.T. Programs: Susan L. Engel, John Noble
Williams College Fellowships: Katerina King
Winter Study Practice Teaching: Susan L. Engel

SEXUAL HARASSMENT/DISCRIMINATION ADVISORS

Advisors are available to all members of the College community for consultation concerning incidents that could be a form of discrimination. The advisor's role is described in the *Discrimination Grievance Policy and Procedures*, printed in the handbooks. Persons serving as advisors are health staff and counselors, assistant and associate deans, Human Resources officers, the Chaplain, and the Affirmative Action Officer. All advisors have received training in sexual harrassment and other discrimination advising.

Staff TBA

STANDING PANELS FOR DISCRIMINATION GRIEVANCE PROCEDURES

The grievance committee that hears cases of alleged discrimination (see handbooks) is appointed from a standing panel consisting of thirty-two persons, drawn from several College panels and from the College Council. Its membership also includes a minority faculty and staff representative. Two panel members—one a member of the faculty, the other of the staff—stand ready to chair the grievance committee appointed to hear a particular case.

Faculty Review Panel: Colin Adams, Christopher Bolton, Rashida Braggs, Phoebe Cohen, Pia Kohler, Tim Lebestky, Nicole Mellow, David Morris, Olga Shevchenko, Janneke van de Stadt, 2 TBA in fall.

Vice President for Finance and Administration: Barbara Casey, Heather Clemow, Marc Field, Michael Frawley, Gary Guerin, Kelly Kervan, Robin Kibler, Jeanette Kopczynski, Richard Nesbitt, Elizabeth Reynolds, Terry Waryjasz, 1 TBA in fall.

College Council Panel: Sharona Bollinger '14, Alida Davis '14, Harry Gilbert '14, Jeremy Gold '14, 2 students TBA.

Faculty Chair: Appointed by President.

Staff Chair: Appointed by President.

DEGREES CONFERRED JUNE, 2014

Conferring of the Degree of Master of Arts

Thadeus Jay Dare Dowad
Melissa Horn
Matthew Alan Kluk
Megan Elizabeth Kosinski
Emily Leifer
Benjamin Orion Murphy
Nina Colette Pelaez
Hillary Reder
David Jeffrey Sledge
Anna–Claire Powell Stinebring
Robert A. Wainstein
Leqi Yu

Conferring of the Degree of Master of Arts or Certificate in Policy Economics

Tsotne Amashukeli
Syedah Mohsina Atiq
Margot Ayala Lino
Marlyatou Bah
Mphatso Chisuwo Banda
Mamoudou Nagnalen Barry
Bigendako Edouard Normand
Chisomo Faith Chakachadza
Japhet Chiwaula
Abebual Zerihun Demilew
Nino Devdariani
Ali Othman Moqbel Ghaleb
Rebeca María Hernández Asturias
Shereen Hazirah Hishamudin
Ratanak Hoeun
Aziz Kholboboev
Le Phu Loc
Moogdho Mim Mahzab
Kristina Manysheva
Silver Namunane

PRIZES AND AWARDS—2013-2014

OLMSTED PRIZES—Awarded for excellence in teaching to four secondary school teachers nominated by the Williams Class of 2014. These prizes were established in 1984 through the estate of George Olmsted, Jr., 1924. The recipients are Sara Barber-Just, an English teacher at Amherst Regional High School in Amherst, Massachusetts; Seth Hersch, a history teacher at Gwinnet School of Mathematics, Science, and Technology in Lawrenceville, Georgia; Brian McDonald, a history teacher at Charles E. Jordan High School in Durham, North Carolina; and Robert H. Shurtz, a physics and mathematics teacher at the Hawken School in Gates Mills, Ohio.

Prizes Awarded in 2013-2014

Fellowships

Allison Davis Research Fellowship: Sikandar Ahmadi ’14, Linda Tzu–Kwan Chu ’14, Theo C. Pippins ’14, Malik Nashad Sharpe ’14
Russell H. Bostert Fellowship: Isabel E. Abraham–Raveson ’15, Alyssa K. Amos ’15, Angelina A. Lin ’16, Joshua S. C. Morrison ’16
Carnegie Endowment for International Peace Junior Fellowship: William M. Hayes ’14
Class of 1945 Florence Chandler Fellowship: Pedro A. Roque ’14, Cassandra D. McLellan ’14
Horace F. Clark, 1833, Prize Fellowship: Rebecca H. Fallon ’14
Francis Sessions Hutchins, Class of 1900, Memorial Fellowship Prize: Keelia W. Riegg ’14, Robert A. Castro ’14
Hubbard Hutchinson, Class of 1917, Memorial Fellowship (Art): Vera A. Gould ’14
Hubbard Hutchinson, Class of 1917, Memorial Fellowship (Music): Sato Matsui ’14
Hubbard Hutchinson, Class of 1917, Memorial Fellowship: Nickolas J. Maziarka ’14
Hubbard Hutchinson, Class of 1917, Memorial Fellowship (Dance): Randy E. Reyes ’14
Hubbard Hutchinson, Class of 1917, Memorial Fellowship (Theatre): Elizabeth B. Stern ’14
2006 and 2009 International Service Fellowship (English): Niharika Pendurthi ’15
2006 and 2009 International Service Fellowship: Kyung Jun Chae ’16, Evelyn Rojas ’16
Jeffrey Owen Jones 1966 Fellowship in Journalism: Julia K. Davis ’14
Charles Bridgen Lansing, 1829, Fellowship in Latin and Greek: Lauren E. Miller ’15, Khanh P. Nguyen ’14, Alyssa L. Tomkowicz ’15, Rebecca G. Williams ’17
Mary and Nathaniel M. Lawrence Travel Fellowship: Remy M. Gates ’16, Rachel L. Krcmar ’16
Levien Family Journalism Summer Fellowship: Lani Willmar ’15
Allen Martin Fellowship: Amy M. Levine ’14
Williams C. Millard, Class of 1929, Fund Fellowship: Mei Kazama ’16
Mellon Mays Undergraduate Fellowship: Nataly A. Garzon ’14, Jallicia A. Jolly ’14, Fernando Lora ’14, Eilin R. Perez ’14, Nitza M. Solis ’14
Robert Ikemori Quay ’04 Outing Club Memorial Fellowship: Scott T. Wieman ’14
Ruth Scott Sanford Memorial Fellowship in Theatre: Russell C. Maclin ’17, Harold E. Theurer ’17
Dr. Herchel Smith Fellowship: Abigail M. Adams ’14, Nathan R. Bricault ’14, Jacob D. Addelson ’14, Sikandar Ahmadi ’14, Steven N. Hailey ’14, Jared D. Hallett ’14, Henry K. Schmidt ’14
Frederick Eugene Stratton 1872 Fellowship in Biology: Molly H. F. McEntee ’14
Thomas J. Watson Fellowship: Eloise C. Andry ’14, Ali M. Mctar ’14
Williams in Africa Post Graduate Fellowship: Kaleigh R. Kenny ’14, Meredith F. Yang ’14
Williams Teaching Fellowship, United College, Chinese University of Hong Kong: Linda Tzu–Kwan Chu ’14, Robin M. Gimm ’14
Robert G. Wilmers, Jr., 1990, Memorial Student Travel Abroad Fellowship: Sumaya M. Awad ’16, Caroline W. Bruno ’15, Ezequiel Davila ’16, Lydia C. Heinrichs ’15, Fiona W. Dang ’15, Maksym G. Kolenov ’16, Katherine T. Hrach ’16, Benjamin C. Hoyle ’15. En Tzu Liu ’15. Shadman Rahman ’16. Kairav Sinha ’15. Herbert P. Smith ’15. Anna I. Spiers ’15. Penny Sun ’16. Sarah M. Vukelich ’16
Carroll A. Wilson Fellowship: Amy M. Levine ’14
Class of 1945 Student World Fellowship: Arantza Eseverri ’15, Laurel E. Jarombek ’15, Chaewon Kim ’16, Doris M. Mbabu ’15, Adrian A. Mitchell ’15, Benjamin J. Nathan ’15, Miho Sakuma ’15, Chelsea X. Zhu ’15

Prizes

John Sabin Adriance, Class of 1882, Prize in Chemistry: Chau D. Vo ’14
Charles R. Alberti, Class of 1919, Award: Gia M. Recco ’14
Robert G. Barrow Memorial Prize for Music Composition: Cassandra D. McLellan ’14
Olga R. Beaver Memorial Prize in Mathematics: David F. Stevens ’14
Beinecke Memorial Scholarship: Sam D. O’Donnell ’15
The Michael Davitt Bell Prize: Katherine L. Buoymaster ’15
The Erastus C. Benedict, Class of 1821, Prize in Biology: (First Prize) Megan H. Trager ’14
The Erastus C. Benedict, Class of 1821, Prize in Biology: (Second Prize) Manasi Iyer ’14
The Erastus C. Benedict, Class of 1821, Prize in Classics: (Latin—Second Prize) Khanh P. Nguyen ’14
The Erastus C. Benedict, Class of 1821, Prize in Classics: (Latin—First Prize) Maxwell R. Dietrich ’16
The Erastus C. Benedict, Class of 1821, Prize in Classics: (Greek—First Prize) Maxwell R. Dietrich ’16
The Erastus C. Benedict, Class of 1821, Prize in Classics: (Greek, Second Prize) Molly E. Siebecker ’17
The Erastus C. Benedict, Class of 1821, Prize in French: (First Prize) Nina R. Oberman ’14
The Erastus C. Benedict, Class of 1821, Prize in French: (Second Prize) Jens J. Zentil ’14
The Erastus C. Benedict, Class of 1821, Prize in German: (First Prize) Stephanie A. Cardenas ’14
The Erastus C. Benedict, Class of 1821, Prize in German: (Second Prize) Gabor Gurbacs ’14
The Erastus C. Benedict, Class of 1821, Prize in History: (Second Prize) Julia K. Davis ’14
The Erastus C. Benedict, Class of 1821, Prize in History: (First Prize) Brian W. McGrail ’14
The Erastus C. Benedict, Class of 1821, Prize in Mathematics: (Second Prize) Eva R. Fourakis ’16
The Erastus C. Benedict, Class of 1821, Prize in Mathematics: (First Prize) Peter M. McDonald ’16
The Erastus C. Benedict, Class of 1821, Prize in Mathematics: (Second Prize) Elizabeth S. Frank ’16
Gaius C. Bolin, 1889, Prize in Africana Studies: Jallicia A. Jolly ’14
Russell H. Bostert Thesis Prize in History: Nathaniel C. Sutton ’14
Kenneth L. Brown, Class of 1947, Prize in American Studies: Helen M. Song ’14
Sterling A. Brown, Class of 1922, Citizenship Prize: Tre’Dez A. Colbert ’14
The Bullock Poetry Prize of the American Academy of Poets: Lysander P. L. Jaffe ’14
W. Marriott Canby, Class of 1891, Athletic Scholarship Prize: Caroline O. Miller ’14
Chinese Government Scholarship: Charles E. Hermann ’14, Samuel Jeong ’14
Winston Churchill Foundation Scholarship: Jared D. Hallett ’14
David Taggart Clark Prize in Latin: Denis A. Rondeau ’17
Class of 1925 Scholar–Athlete Award: Brianne C. Mirecki ’14
Williams College Community Builder of the Year: Zoe E. Grueskin ’14, Gulnara Radjapova ’14
The James Bronson Conant and Nathan Russell Harrington, Class of 1893, Prize in Biology: Melinda B. Wang ’14
Henry Rutgers Conger Memorial Literary Prize: Megan J. Bantle ’14
Robert Dalzell Thesis Prize in History: Alexandra R. Oviedo ’14
Davis Center Student Activist of the Year: Dayana De La Torre ’14
Doris deKeyserlingk Prize in Russian: Lysander P. L. Jaffe ’14
Garrett Wright DeVries, Class of 1932, Memorial Prize in Romance Languages: Julia K. Davis ’14
Dewey Prize: Julia K. Davis ’14
Jean Donati Student Employee Award in Music: Lysander P. L. Jaffe ’14
Dunbar Student Life Prizes: Rylee R. Bethea ’15, Julia K. Davis ’14, Samuel Jeong ’14, Rachel C. Riddiough ’14, Tabitha W. Tongoi ’15
Henry A. Dwight, Class of 1829, Botanical Prize: Kathleen W. Higgins ’14
U.S. English Language Teaching Assistantship: Khanh P. Nguyen ’14
Environmental Studies Committee Award: Katherine A. Newcomer ’14

Ernest Brown Africana Arts Prize: Demarius D. Edwards ’14, Kenny E. Jean ’14
S. Lane Faison, Jr. 1929 Prize: Henry K. Schmidt ’14
Freeman Foote Prize in Geosciences: Kalle L. Jahn ’14
Robert W. Friedrichs Award in Sociology: Meghan E. Rowe ’14
Fulbright Grant: Amy J. Berg ’14, Bianca S. Brown ’14, Julia K. Davis ’14, Catherine H. Gerkis ’14, Kerrin G. Hensley ’14, Jallicia A. Jolly ’14, Sara Kang ’14, Daniel T. Lee ’14, Claire Liu ’14, Fernando Lora ’14, Anyela M. Perez ’14, Amanda J. Su ’14
Fulkerson Award for Leadership in the Arts: Marisa C. Repka ’14
Gilbert W. Gabriel, Class of 1912, Memorial Prize in Theatre: Lily K. Riopelle ’14
Sam Goldberg Colloquium Prize in Computer Science: Joshua E. Geller ’14
Sam Goldberg Colloquium Prize in Mathematics: Joseph R. Iafrate ’14, Nina B. Horowitz ’14
Patricia Goldman–Rakic Prize in Neuroscience: Jenna C. Adams ’14, Megan H. Trager ’14
Barry M. Goldwater Scholarship: Benjamin L. Augenbraun ’15, Jesse B. Freeman ’15, Samantha N. Petti ’15
William C. Grant Jr. Prize in Biology: Zachary M. McKenzie ’14
The Arthur B. Graves, Class of 1858, Essay Prize in Art: Louisa M. Lee ’14
The Arthur B. Graves, Class of 1858, Essay Prize in Economics: Ivan N. Badinski ’14
The Arthur B. Graves, Class of 1858, Essay Prize in History: Sara Kang ’14
The Arthur B. Graves, Class of 1858, Essay Prize in Philosophy: Amy M. Levine ’14
The Arthur B. Graves, Class of 1858, Essay Prize in Political Science: Benjamin A. Shuham ’14
The Arthur B. Graves, Class of 1858, Essay Prize in Religion: Joshua S. Miller–Lewis ’14
Grosvenor Memorial Cup: Louisa M. Lee ’14

Fall Semester	36	25	25	12	24	12
Spring Semester	36	25	25	12	24	12

The Winter Study Period covers 25 calendar days.

NOTE: Because no Williams student should ever have to choose between important religious, academic and athletic commitments, College policy provides for students who wish to participate in religious observances that conflict with other obligations to make arrangements with their instructors to do so.

The policy, approved in 1984 by the faculty and trustees in compliance with the laws of the Commonwealth of Massachusetts, states that "Any student who is unable, because of his or her religious beliefs, to attend classes or to participate in any examination, study, or work requirement on a particular day shall be excused from any such requirement, and shall be provided an opportunity to make up such requirement which s/he may have missed because of such absence now—provided, however, that such makeup examination or work shall not create an unreasonable burden upon the College. No adverse or prejudicial effects shall result to any student" who makes use of this provision of college policy.

The faculty (including coaches) receive annual reminders of this policy, and are encouraged to work carefully with students in anticipating and resolving conflicts to their mutual satisfaction.
